FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the Federal Register shall be judicially noticed.

The Federal Register will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 55 FR 12345.

Title 3—

The President

Proclamation 6288 of October 11, 1990

White Cane Safety Day, 1990

By the President of the United States of America

A Proclamation

The white cane is a simple yet effective tool that enables many of America's citizens with visual impairments to enjoy greater independence and freedom of movement. This familiar device helps visually impaired individuals to navigate through their environment safely, avoiding physical barriers and hazards.

For millions of Americans, both those with visual disabilities and those without, the white cane is also a symbol of dignity and determination. It is a tangible reminder that those Americans who have impaired eyesight possess not only the desire but also the ability to lead full, independent, and productive lives.

Each year, during the observance of White Cane Safety Day, we renew our commitment to eliminating physical and attitudinal barriers that continue to hinder the full participation of blind persons in our society. On this White Cane Safety Day we also celebrate the Americans with Disabilities Act of 1990, which I signed into law on July 26, 1990. A declaration of equality for persons with disabilities, this historic legislation guarantees these citizens protection against discrimination as well as greater opportunities to participate in the mainstream of American life.

In recognition of the white cane and all that it symbolizes, the Congress, by Joint Resolution approved October 6, 1964, has authorized the President to designate October 15 of each year as "White Cane Safety Day."

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim October 15, 1990, as White Cane Safety Day. I urge all Americans to show respect for those who carry the white cane and to honor, through appropriate ceremonies and activities, their many achievements.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

Federal Register
Vol. 55, No. 199
Monday, October 15, 1990

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Docket No. FV-90-127FR]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Rename Pink Grapefruit as Red Grapefruit

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule changes the name for certain grapefruit covered under the marketing order for oranges, grapefruit, tangerines, and tangelos grown in Florida. All grapefruit currently classified as pink are reclassified red as the result of this action. The Citrus Administrative Committee (CAC) unanimously recommended this change to make the marketing order name conform with the name used by the Florida Citrus Commission (FCC) and to maintain standardized terminology within the Florida citrus industry.

EFFECTIVE DATE: October 15, 1990.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456; telephone: (202) 475–3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order No. 905, both as amended (7 CFR part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

The rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 100 Florida citrus handlers subject to regulation under the marketing order covering oranges, grapefruit, tangerines, and tangelos grown in Florida. In addition, there are about 13,000 producers of these citrus fruits in Florida. There are also about 25 importers of grapefruit. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. A minority of these handlers and a majority of the producers and a majority of importers may be classified as small entities.

A proposed rule concerning this action was published in the Federal Register (55 FR 30922, July 30, 1990), with a 30-day comment period ending on August 29, 1990. No comments were received.

This action adds a new § 905.105 to the rules and regulations under the order to change the name of certain grapefruit from pink to red. Section 905.5 (7 CFR 905.5) of the marketing order defines fruit regulated under the marketing order and authorizes the addition of other fruit specified in § 905.4 (7 CFR 905.4), as recommended by the CAC and approved by the Secretary. This action merely changes the name of certain grapefruit.

This action also amends § 905.306 (7 CFR 905.306) of the rules and regulations, which specifies for both domestic and export markets minimum grade and size requirements for grapefruit grown in Florida. The entries for grapefruit in paragraph (a), Table I, and in paragraph (b), Table II, of § 905.306, are revised to change the term "pink" to "red" to bring these provisions of this section into conformity with the new name.

While the proposed rule indicated that certain grapefruit varieties were being redefined, the intent of the proposal was merely to change the name of certain classifications of grapefruit from pink to red, not redefine the varieties. Therefore, appropriate terminology changes have been made in this final rule to recognize this fact.

The CAC recommended this action following the Florida Citrus Commission's (FCC) action which changed the name of pink grapefruit to red grapefruit in that organization's citrus shipping manifests. The FCC made this change in light of production shifts to redder grapefruit varieties in Florida. This action is intended to make the marketing order grapefruit name the same as the FCC's name, thereby standardizing terminology and helping prevent industry and market confusion when grapefruit is referred to in marketing, cultural, and statistical materials. The marketing order has traditionally used the same terminology as that developed by the FCC to define the various classifications and groupings of Florida citrus, and this action maintains that practice.

Section 8e of the Act (7 U.S.C. 608e–1) provides that whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of these commodities into the United States are prohibited unless they meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodities. Section 8e also provides that whenever two or more marketing orders regulate the same commodity produced in different areas of the United States, the Secretary shall determine which area the imported commodity is in most direct competition with and apply the regulations for that area to the imported commodity.

Grapefruit import requirements are specified in § 944.106 (7 CFR part 944), and are effective under section 8e of the Act. That section requires that grapefruit imported into the United States must meet the same minimum grade and size requirements as those specified for each grapefruit variety listed in Table I of paragraph (a) in § 905.306. Since this action renames pink grapefruit as red grapefruit under the marketing order, the name changes also apply to the grapefruit import regulation. However, no change to the provisions of the import regulation is needed to implement this name change.

This action reflects the CAC's and the Department's appraisal of the need to make the name change for grapefruit, as hereinafter set forth. The Department's view is that this action will have a beneficial impact on producers and handlers since it maintains standardized terminology for grapefruit within the Florida citrus industry and should lessen the chances of market and industry confusion.

Based on the above, the Administrator of the AMS has determined that this change will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the CAC, and other available information, it is found that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because: (1) Shipment of the 1990–91 season Florida grapefruit crop has begun and Florida grapefruit handlers should start using the new names as soon as possible; (2) Florida grapefruit handlers are aware of these terminology changes which were recommended by the CAC at a public meeting and they will need no additional time to make the changes; (3) this action should be implemented as soon as possible, so that standardized terms are used within the Florida grapefruit industry; (4) the proposed rule provided a 30-day comment period, and no comments were received; and (5) no useful purpose will be served by delaying the effective date until 30 days after publication.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements, Tangelos, Tangerines.

For the reasons set forth in the preamble, 7 CFR part 905 is amended to read as follows:

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

1. The authority citation for 7 CFR part 905 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. New § 905.105 is added to subpart—Rules and Regulations to read as follows:

Note: This section will appear in the annual Code of Federal Regulations.

§ 905.105 Grapefruit classifications.

Pursuant to § 905.5(m), the following classifications of grapefruit are renamed as follows:

(a) Marsh and other seedless grapefruit, excluding pink grapefruit, are renamed as Marsh and other seedless grapefruit, excluding red grapefruit;

(b) Duncan and other seeded grapefruit, excluding pink grapefruit, are renamed as Duncan and other seeded grapefruit, excluding red grapefruit;

(c) Pink seedless grapefruit, is renamed as Red seedless grapefruit;

(d) Pink seeded grapefruit, is renamed as Red seeded grapefruit.

3. Section 905.306 is amended by revising the entries for grapefruit in paragraph (a), Table I, and in paragraph (b), Table II, to read as follows:

Note: This section will appear in the annual Code of Federal Regulations.

§ 905.306 Orange, Grapefruit, Tangerine, and Tangelo Regulation 6.

BILLING CODE 3410-02-M

7 CFR Part 910

[Lemon Regulation 739]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to domestic markets during the period from October 14 through October 20, 1990. Consistent with program objectives, such action is needed to balance the supplies of fresh lemons with the demand for such lemons during the period specified. This action was recommended by the Lemon Administrative Committee (Committee), which is responsible for local administration of the lemon marketing order.

EFFECTIVE DATES: Regulation 739 (7 CFR part 910) is effective for the period from October 14 through October 20, 1990.

FOR FURTHER INFORMATION CONTACT: Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture (Department), room 2524–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 475–3861.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 910 (7 CFR part 910), as amended, regulating the handling of lemons grown in California and Arizona. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 70 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and aproximately 2,000 lemon producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

The California-Arizona lemon industry is characterized by a large number of growers located over a wide area. The Committee's estimate of the 1990–91 production is 42,140 cars (one car equals 1,000 cartons at 38 pounds net weight each), compared to 37,861 cars during the 1989–90 season. The production area is divided into three districts which span California and Arizona. The Committee estimates District 1, central California, 1990–91 production at 6,600 cars compared to the 4,158 cars produced in 1989–90. In District 2, southern California, the crop is expected to be 24,700 cars compared to the 24,292 cars produced last year. In District 3, the California desert and Arizona, the Committee estimates a production of 10,840 cars compared to the 9,436 cars produced last year. On October 11, 1990, the National Agricultural Statistics Service will publish an estimate of the 1990–91 lemon crop.

The three basic outlets for California-Arizona lemons are the domestic fresh, export, and processing markets. The domestic (regulated) fresh market is a preferred market for California-Arizona lemons. Based on its crop estimate of 42,140 cars, the Committee estimates as of October 2 that about 42.5 percent of the 1990–91 crop will be utilized in fresh domestic channels (17,900 cars), compared with the 1989–90 total of 16,600 cars, about 44 percent of the total production of 37,861 cars in 1989–90. Fresh exports are projected at 20.1 percent of the total 1990–91 crop utilization compared with 22 percent in 1989–90. Processed and other uses would account for the residual 37.4 percent compared with 34 percent of the 1989–90 crop.

Volume regulations issued under the authority of the Act and Marketing Order No. 910 are intended to provide benefits to growers and consumers. Reduced fluctuations in supplies and prices result from regulating shipping levels and contribute to a more stable market. The intent of regulation is to achieve a more even distribution of lemons in the market throughout the marketing season and to avoid unreasonable fluctuations in supplies and prices.

Based on the Committee's marketing policy, the crop and market information provided by the Committee, and other information available to the Department, the costs of implementing the regulations are expected to be more than offset by the potential benefits of regulation.

Reporting and recordkeeping requirements under the lemon marketing order are required by the Committee from handlers of lemons. However, handlers in turn may require individual growers to utilize certain reporting and recordkeeping practices to enable handlers to carry out their functions. Costs incurred by handlers in connection with recordkeeping and reporting requirements may be passed on to growers.

The Committee submitted its marketing policy for the 1990-91 season to the Department on June 19. The marketing policy discussed, among other things, the potential use of volume and size regulations for the ensuing season. The Committee considered the use of volume regulation for the season. This marketing policy is available from the Committee or Ms. Rodriguez. The Department reviewed that policy with respect to administrative requirements and regulatory alternatives in order to determine if the use of volume regulations would be appropriate.

The Committee met publicly on October 9, 1990, in Redlands, California, to consider the current and prospective conditions of supply and demand and unanimously recommended that 325,000 cartons is the quantity of lemons deemed advisable to be shipped to fresh domestic markets during the specified week. The marketing information and data provided to the Committee and used in its deliberations were compiled by the Committee's staff or presented by Committee members at the meeting. This information included, but was not limited to, price data for the previous week from Department market news reports and other sources, the preceding week's shipments and shipments to date, crop conditions, weather and transportation conditions, and a reevaluation of the prior week's recommendation in view of the above.

The Department reviewed the Committee's recommendation in light of the Committee's projections as set forth in its 1990-91 marketing policy. This recommended amount is the same as the estimated projections in the Committee's current shipping schedule.

During the week ending on October 6, 1990, shipments of lemons to fresh domestic markets, including Canada, totaled 308,000 cartons compared with 282,000 cartons shipped during the week ending on October 7, 1989. Export shipments totaled 168,000 cartons compared with 184,000 cartons shipped during the week ending on October 7, 1989. Processing and other uses accounted for 227,000 cartons compared with 211,000 cartons shipped during the week ending on October 7, 1989.

Fresh domestic shipments to date for the 1990-91 season total 2,048,000 cartons compared with 2,215,000 cartons shipped by this time during the 1989-90 season. Export shipments total 1,201,000 cartons compared with 1,441,000 cartons shipped by this time during 1989-90. Processing and other use shipments total 2,215,000 cartons compared with 1,330,000 cartons shipped by this time during 1989-90.

For the week ending on October 6, 1990, regulated shipments of lemons to the fresh domestic market were 308,000 cartons on an adjusted allotment of 358,000 cartons which resulted in net undershipments of 50,000 cartons. Regulated shipments for the current week (October 7 through October 13, 1990) are estimated at 310,000 cartons on an adjusted allotment of 344,000 cartons. Thus, undershipments of 34,000 cartons could be carried over into the week ending on October 20, 1990.

The average f.o.b. shipping point price for the week ending on October 8, 1990, was $14.03 per carton based on a reported sales volume of 310,000 cartons compared with last week's average of $14.20 per carton on a reported sales volume of 207,000 cartons. The 1990-91 season average f.o.b. shipping point price to date is $13.13 per carton. The average f.o.b. shipping point price for the week ending on October 7, 1989, was $15.12 per carton; the season average f.o.b. shipping point price at this time during 1989-90 was $14.71 per carton.

The Department's Market News Service reported that, as of October 9, the demand for choice quality fruit is moderate and demand for first grade quality fruit is "fairly light". The market for 75's and first grade fruit ranging in size from 95's to 165's is lower while for 200's to 235's and 115's choice quality fruit, the market is higher. At the meeting, a Committee member commented that demand for lemons continues to be good. There is some inventory build-up on choice grade fruit and some softer build-up on fancy grade lemons in District 3. The Committee member indicated that volume regulation is still greatly desired to help ensure an orderly market. Another Committee member stated that demand is strong, especially on small-sized (140's and smaller) fancy grade fruit. The member also indicated that volume regulation is needed to prevent a disorderly market with District 2 winding down, production in District 3 peaking the District 1 soon beginning harvesting. The Committee unanimously recommended volume regulation for the period from October 14 through October 20, 1990.

Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the California-Arizona 1989-91 season average fresh on-tree price is estimated at $6.88 per carton, 107 percent of the projected season average fresh on-tree parity equivalent price of $6.24 per carton. The California-Arizona 1989-90 season average fresh on-tree price is estimated at $9.02, 121 percent of the projected season average fresh on-tree parity equivalent price.

Limiting the quantity of lemons that may be shipped during the period from October 14 through October 20, 1990, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of lemons to market.

Based on considerations of supply and market conditions, it is found that this action will tend to effectuate the declared policy of the Act.

Based on the above information, the Administrator of the AMS has determined that issuance of this rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found and determined that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register. This is because there is insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act.

In addition, market information needed for the formulation of the basis for this action was not available until October 9, 1990, and this action needs to be effective for the regulatory week which begins on October 14, 1990. Further, interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and handlers were apprised of its provisions and effective time. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified.

List of Subjects in 7 CFR Part 910

Lemons, Marketing agreements, and Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.1039 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 910.1039 Lemon Regulation 739.

The quantity of lemons grown in California and Arizona which may be handled during the period from October 14 through October 20, 1990, is established at 325,000 cartons.

Dated: October 10, 1990.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

7 CFR Part 958

[Docket No. FV-90-122]

Onions Grown in Designated Counties in Idaho and Malheur County, Oregon; Final Rule to Revise Inspection Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule the provisions of an interim final rule that allowed onions that have been inspected and certified as meeting marketing order requirements and that are subsequently peeled, chopped, sliced or otherwise further prepared for fresh market to be shipped without being reinspected. The intent of this action is to allow handlers of Idaho-Eastern Oregon onions to expand their markets and provide the trade with a product it desires.

EFFECTIVE DATES: November 14, 1990.

FOR FURTHER INFORMATION CONTACT: Caroline C. Thorpe, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456, telephone (202) 447-2020.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 130 and Marketing Order No. 958 (7 CFR part 958), both as amended, regulating the handling of onions grown in certain designated counties in Idaho and Malheur County, Oregon. The marketing agreement and order are authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed by the Department in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 30 handlers and 450 producers of Idaho-Eastern Oregon onions under this marketing order. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers may be classified as small entities.

The vast majority of onions grown in the Idaho-Eastern Oregon production area are utilized in fresh market outlets. About 10 percent of the crop is processed. Onions destined for fresh markets are subject to the grade, size, maturity, pack and container requirements specified in § 958.328. Currently, fresh shipments are required to be at least U.S. No. 2 grade, with a minimum diameter of 1 inch for white varieties and 1⅛ inches for all other varieties.

Under the terms of the marketing order, onions that are shipped to processors for dehydration, canning, freezing, extraction or pickling are exempt from the handling regulation, subject to certain safeguard procedures. Exemptions are also provided for minimum quantities, certain types of onions (e.g. braided red onions) and onions for other specified purposes, including planting.

Onions subject to the handling regulation are required to be inspected by the Federal-State Inspection Service (FSIS) and be covered by a valid inspection certificate at the time of shipment. Pursuant to § 958.60(b) of the order, regarding, resorting or repacking any lot of onions invalidates any inspection certificate issued prior to rehandling. Handlers who ship onions that are regraded, resorted, repacked or in any other way further prepared for market are therefore required to have such onions reinspected.

The interim final rule was issued on July 25, 1990, and published in the Federal Register July 31, 1990. The interim final rule revised these inspection requirements by providing that onions that have been inspected and certified as meeting marketing order requirements and that are subsequently peeled, chopped, sliced or otherwise further prepared for fresh market, are exempt from the reinspection requirement. This action is authorized by §§ 958.53 and 958.60 of the marketing order.

Recently, there has been increased interest by handlers in the production area in mechanically peeling onions and marketing them as fresh onions. These onions are being prepared for use primarily by foodservice establishments. Such onions are for immediate use in the fresh form in salad bars and condiment stands. Onions that have been peeled, chopped or sliced are desired by the trade because of the convenience of handling the product. Foodservice operators are able to provide a quality product with minimal effort and reduced labor costs.

However, peeled onions are generally unable to meet the established minimum grade requirement because of the damage incurred during the peeling process. In addition to having the outer layers of skin removed, mechanically peeled onions often have their tops (stem ends) and bottoms (root ends) removed. During this process the inner, fleshy onion layers may also be cut. If the inner layers are cut, such onions are scored as having serious grade defects, and are unable to meet the minimum grade requirement. This would be true even though, prior to alteration, the onions had met marketing order requirements. The interim final rule provided that if onions meet the fresh market quality requirements prior to being peeled, sliced or chopped, handlers may ship these onions to fresh markets without reinspection. Therefore, such onions are not subject to reinspection subsequent to peeling, chopping or slicing. This action helps to expand markets for the Idaho-Eastern Oregon onion industry, and thereby improves returns to producers and handlers.

This action was unanimously recommended by the Idaho-Eastern Oregon Onion Committee (committee), the agency responsible for local administration of the marketing order. In its deliberations, the committee considered several alternative means of facilitating the movement of peeled,

chopped or sliced onions. Included was an exemption for such onions from all handling requirements, including that of an initial inspection. The committee rejected this option, however, because it believes that peeled onions compete directly in the marketplace with other fresh packed onions. As such, it is necessary that these onions be subject to the same minimum quality standards so as not to thwart the industry's objective of providing acceptable quality onions to all fresh market outlets. To allow uninspected cull onions to be used for this purpose would be contrary to this goal, which the industry believes is necessary to maintain and increase its share of the fresh onion market.

Safeguard procedures are established to ensure that only onions of acceptable quality are peeled, sliced or chopped for the fresh market. Handlers shipping onions for this purpose are required to submit to the committee a copy of the inspection certificate issued by the FSIS. This certificate will serve to verify that the onions had been inspected and the minimum marketing order requirements had been met. Such handlers are also required to document on forms provided by the committee, in quadruplicate, the intended use and destination of the onions, referencing the inspection certificate number. Two copies of such forms must be sent on shipment to the handler intending to peel, chop or slice the onions for fresh market, and one copy must be mailed to the committee. The handler responsible for peeling, chopping or slicing the onions is then required to document the weight of the finished product and promptly return one signed copy of the form to the committee.

Handlers in the production area that peel, slice or chop onions grown outside the production area are required to provide the committee with documentation to verify that the onions so handled were not subject to the initial inspection requirement.

These reporting requirements are necessary to enable the committee to determine whether peeled, sliced or chopped onions had been previously inspected and whether they were in compliance with the applicable minimum quality requirements.

The interim final rule also made minor revisions in the introductory paragraph and paragraphs (c) and (f) of § 958.328 that appear in this final rule. These revisions were needed to make conforming changes to those paragraphs.

In compliance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the information collection requirements contained in this final rule have been approved by the Office of Management and Budget (OMB), and have been assigned OMB No. 0581–0067.

The interim final rule published in the July 31, 1990, Federal Register (55 FR 31034) afforded interested person until August 30, 1990, to submit written comments. No comments were received.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, including the information and recommendations submitted by the committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

[T.D. 8313]

RIN 1545-AP09

Exception From the Prohibition of Federal Guarantees—Permitted Investments of Tax-Exempt Bond Proceeds

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the prohibition of federal guarantees with respect to bonds the interest on which is excludable from gross income. The Tax Reform Act of 1984 changed the applicable law and, with certain exceptions, provides that interest on a bond issued by a state or local governmental unit is not excludable from gross income if payment of the bond's principal or interest is directly or indirectly guaranteed by the United States (or any agency or instrumentality thereof). These temporary regulations provide that investments in obligations issued by the Resolution Funding Corporation pursuant to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 are excepted from the prohibition of federal guarantees. The text of the temporary regulations set forth in this document also serves as the text of the notice of proposed regulations cross-referenced in the proposed rules section of this issue of the Federal Register.

EFFECTIVE DATE: These temporary regulations are effective for investments made on or after October 2, 1989.

FOR FURTHER INFORMATION CONTACT: William P. Cejudo, 202–566–3289 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document adds temporary regulations to the Income Tax Regulations (26 CFR part 1) under section 149(b) of the Internal Revenue Code. The provisions currently found in section 149(b) were added to the Code by section 622 of the Tax Reform Act of 1984, Public Law No. 98–369, 98 Stat. 694, 910–21.

Explanation of Provisions

Under section 149(b) of the Code, if a state or local bond is federally guaranteed, interest on the bond is not excludable from gross income under section 103(a). A bond is federally guaranteed if: (a) The payment in whole or in part of the bond's interest or principal is guaranteed by the United States (or any agency or instrumentality thereof), (b) a significant portion of the bond's proceeds are used to make federally guaranteed loans, (c) a significant portion of the bond's proceeds are invested in federally insured deposits in financial institutions, or (d) the payment of the bond's principal or interest is otherwise indirectly guaranteed in whole or in part by the United States (or any agency or instrumentality thereof). Without this

provision, a federally guaranteed state or local bond would be more attractive than either taxable federal securities or other state and local bonds lacking federal guarantees, because the bond would have the backing and safety of a federal obligation plus the federal tax exemption of a state or local obligation.

Section 149(b)(3)(B) of the Code lists four specific exceptions to the prohibition of a federal guarantee. It also allows as exceptions other investments permitted in regulations. These temporary regulations exempt investments in obligations issued by the Resolution Funding Corporation from the prohibition of federal guarantees. The regulations are effective for investments made on or after October 2, 1990.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is William P. Cejudo, Office of the Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, other personnel from the Service and Treasury Department participated in their development.

List of Subjects in 26 CFR 1.61—1.281–4

Deductions, Exemptions, Income taxes, Reporting and recordkeeping requirements, Taxable income.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805 * * *

§ 1.149(b)(3)–1T also issued under 26 U.S.C. 149(b)(3)(B)(v).

Par. 2. The following new § 1.149(b)(3)–1T is added in the appropriate place:

§ 1.149(b)(3)–1T Permitted investments (temporary).

(a) *Exception under authority of section 149(b)(3)(B)(v).* Section 149(b)(1) does not apply to investments in obligations issued pursuant to section 21B(d)(3) of the Federal Home Loan Bank Act, as amended by section 511(a) of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, or any successor provision to section 21B(d)(3) of the Federal Home Loan Bank Act as so amended.

(b) *Effective date.* This section applies to investments made on or after October 2, 1990.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Approved: October 5, 1990.

Fred T. Goldberg, Jr.,
Commissioner of Internal Revenue.

Kenneth W. Gideon,
Assistant Secretary of the Treasury.

RIN 1545–AJ26

Look-Back Method for Long-term Contracts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final Income Tax Regulations relating to the look-back method of section 460(b) of the Internal Revenue Code for long-term contract income reported under the percentage of completion method of accounting. The look-back method was enacted by the Tax Reform Act of 1986 (the "1986 Act"), Public Law 99–514, and amended by the Technical and Miscellaneous Revenue Act of 1988 (the "1988 Act"), Public Law 100–647, and the Revenue Reconciliation Act of 1989 (the "1989 Act"), Public Law 101–239. The purpose of the look-back method is to compensate for deferral or acceleration of contract income that results from the use of estimated, rather than actual, total contract price and contract costs in applying the percentage of completion method. Taxpayers are required to pay interest if long-term contract income is deferred, and are entitled to receive interest if long-term contract income is accelerated, under the percentage of completion method. These regulations provide the public with guidance as to how interest is computed under the look-back method, and also include simplified methods to reduce the complexity of computing interest under the look-back method.

EFFECTIVE DATE: These regulations are effective with respect to contracts entered into after February 28, 1986; however, § 1.460–6(d) (regarding the application of the simplified marginal impact method to domestic contracts of widely held pass-through entities) does not apply to any contract completed in a tax year for which the due date (determined with regard to extensions) of the return is before November 10, 1988.

FOR FURTHER INFORMATION CONTACT: Cheryl Oseekey of the Office of the Assistant Chief Counsel (Income Tax and Accounting), (202) 566–3024 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504 (h)) under control number 1545–1031. The estimated average annual burden per respondent is 13 hours and 55 minutes. This time estimate is included in the burden of Form 8697.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224, and to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

On June 12, 1990, the Federal Register published proposed amendments to the Income Tax Regulations (26 CFR part 1) relating to the look-back method for long-term contracts under section 460(b) of the Internal Revenue Code. See 55 FR 23755. Written comments were submitted by seven organizations or individuals and a public hearing was held on August 24, 1990. The preamble to the proposed regulations stated that a Treasury Decision adopting the proposed regulations with respect to the simplified marginal impact method in § 1.460-6(d), and the delayed reapplication method in § 1.460-6(e), was expected to be issued no later than September 17, 1990.

This document adds new § 1.460-6 to part 1 of title 26 of the Code of Federal Regulations. These regulations conform the Income Tax Regulations to the requirements of section 460(b) of the Code, as enacted by section 804(a) of the 1988 Act and as amended by sections 1006(c)(2) and 5041(d) of the 1988 Act, and sections 7621(b) and 7811(e) of the 1989 Act.

Explanation of Provisions

In General

Section 460(b) of the Code provides that, upon the completion of any long-term contract, the look-back method is applied to amounts reported under the contract using the percentage of completion method. The percentage of completion method requires the use of estimates of total contract price and total contract costs for reporting income in years prior to the year of contract completion. The look-back method is intended to offset the time-value effects of using estimates during the life of a contract that differ from the actual amounts determined upon the completion of the contract.

Under the look-back method, taxpayers are required to pay interest if tax liability is deferred as a result of underestimating the total contract price or overestimating total contract costs. Conversely, taxpayers are entitled to receive interest if tax liability is accelerated as a result of overestimating the total contract price or underestimating total contract costs. The amount of interest a taxpayer is required to pay or is entitled to receive under the look-back method is computed by applying the overpayment rate established by section 6621(a)(1), compounded daily, to the difference between the tax liability reported and the tax liability that would have been reported if the taxpayer had reported income on the basis of the actual contract price and the actual contract costs instead of the estimated contract price and costs (the "hypothetical underpayment" or "hypothetical overpayment"). Congress provided the look-back method to prevent harsh results that would otherwise be produced by the percentage of completion method if, for example, an overall loss is experienced on a contract. H.R. Rep. No. 426, 99th Cong., 1st Sess. 628 (1985), 1986-3 (Vol. 2) C.B. 628.

The look-back method involves only the computation of interest with respect to hypothetical underpayments or overpayments of tax liability attributable to the use of estimated, rather than actual, contract price and contract costs and, accordingly, has no effect on the amount of tax liability reported for a previous tax year. For example, if the tax rates in effect during the second year of a 2-year contract are lower than tax rates in effect during the first year, and if contract income was accelerated to the first year of the contract because estimated contract costs were lower than actual contract costs, interest is credited to the taxpayer on the hypothetical overpayment of tax for the first year based on the tax rate actually in effect for that year. The taxpayer would not be entitled, however, to a refund representing the amount of tax that would have been saved by applying the lower tax rate in effect for the second tax year to the amount of income accelerated to the first year of the contract. The look-back method, therefore, by design only corrects for timing differences, not permanent differences in tax liability that result from over- or underestimation of contract price and costs. Accordingly, the look-back method does not replace the requirement to properly estimate total contract price and contract costs in reporting income under the percentage of completion method for each year of a contract. For this reason, taxpayers' estimates remain subject to verification upon audit. See Notice 89-15, 1989-1 C.B. 634, Q & A 24 through Q & A 27, for rules for estimating the total contract price and total contract costs.

Operation of the Look-Back Method

The amount of interest charged or credited to a taxpayer under the look-back method is generally computed in three steps. The first step is to reapply the percentage of completion method to completed contracts using the actual, rather than estimated, contract price and contract costs. Income from the contract is thus reallocated among prior tax years. The second step is to compare what the tax liability for each affected year would have been if income had been reported as reallocated under the look-back method with the tax liability that was previously determined. If, for any year, there is a difference between these two amounts, the difference is treated as a hypothetical underpayment or overpayment of tax. The third step is to apply the rate of interest on overpayments established by section 6621 of the Code, compounded daily, to the hypothetical underpayment or overpayment of tax, from the year of the underpayment or overpayment until the year the contract was completed. The result is the amount of interest to be paid by or credited to the taxpayer. The regulations illustrate the three steps involved in applying the look-back method.

Simplified Method

The regulations provide a "simplified marginal impact method," which generally simplifies the application of Step Two of the look-back method by eliminating the requirement to determine what a taxpayer's tax liability would have been if income were reported on the basis of actual contract price and actual contract costs. Under the simplified marginal impact method, a taxpayer reapplies the percentage of completion method, using the actual, rather than estimated, total contract price and total contract costs, to all contracts that are completed or adjusted in a particular year. The taxpayer then computes the aggregate marginal increase or decrease in income, from those contracts only, for each tax year affected by those contracts. This increase or decrease in income for each affected tax year is generally deemed to give rise to a hypothetical overpayment or underpayment of tax determined at the highest statutory tax rate in effect for that year under section 1, in the case of an individual, and section 11, in the case of a corporation (currently 28 percent and 34 percent, respectively).

In accordance with section 460(b)(4) of the Code, as added by section 5041 (d) of the 1988 Act, the simplified marginal impact method must be used with respect to income from domestic long-term contracts of a widely held partnership, S corporation, or trust. With respect to this required application, the simplified marginal impact method is applied at the entity rather than at the owner level. In addition, hypothetical overpayments or underpayments of tax liability are deemed to arise at the highest statutory tax rate in effect for the majority of the entity's owners without regard to the actual tax rates or tax attributes of each of the owners.

The regulations also make the simplified marginal impact method available in the case of contracts that are not subject to the statutory simplified method. This extension results from a concern about the administrative burdens that would be imposed on taxpayers in the absence of this simplified method. Considerable complexity arises because a taxpayer otherwise must fully recompute tax liability for several years at a time and, in addition, recompute tax liability multiple times for the same year when the look-back method is applied to a year for which the tax liability has previously been recomputed under the look-back method. Additional complexity results because the time period for determining the amount of interest charged or credited to a taxpayer must be adjusted when the look-back method affects tax attributes such as net operating loss or credit carryovers and carrybacks that change the time period that a hypothetical underpayment or overpayment of tax was actually available to the taxpayer or the government.

The simplified marginal impact method simplifies the computation of hypothetical overpayments and underpayments and, in some cases, the time period for charging or crediting interest. Therefore, the regulations also permit C corporations, owners of widely held pass-through entities with respect to foreign contracts, owners of closely held passthrough entities, and sole proprietors to elect the simplified marginal impact method. The simplified marginal impact method is made available to these taxpayers under the authority of section 460(h), which provides that the Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of section 460.

A taxpayer that either is required to or elects to use the simplified marginal impact method must apply the method to all of the taxpayer's completed long-term contracts. If, however, the amount of income originally reported with respect to a long-term contract for any redetermination year exceeds the amount of income reallocated under the look-back method with respect to that contract for that year (*i.e.*, using actual contract price and contract costs) by the lesser of $1,000,000 or 20 percent of the amount of income reallocated under the look-back method with respect to that contract for that year, the regulations provide that the Commissioner may require a taxpayer that uses the simplified marginal impact method to apply the look-back method to that contract as if the simplified method did not apply. In determining whether to exercise this authority, the district director may take into account whether the taxpayer overreported income for a purpose of receiving interest on a hypothetical overpayment determined at the highest statutory tax rate. The district director also may take into account whether the taxpayer underreported income for the year in question with respect to other contracts. Moreover, if the Form 8697 is examined for any completion year and a year in which income was overreported is open under the statute of limitations, an adjustment to tax, rather than to look-back interest, will be made if the taxpayer did not properly estimate contract price and contract costs and the taxpayer would otherwise be permitted to obtain a permanent tax benefit.

To prevent the running of interest in a taxpayer's favor on amounts in excess of the taxpayer's actual tax liability for any year, a hypothetical overpayment in the case of a taxpayer electing the simplified marginal impact method is limited to the taxpayer's actual tax liability for the year, taking into account net operating losses carried to that year. Representatives of the construction industry commented that this tax liability ceiling could make the simplified marginal impact method impractical for contractors who experience wide fluctuations in their taxable income from year to year. The final regulations, however, retain the tax liability ceiling as a necessary limitation on hypothetical overpayments to prevent those taxpayers who were excluded from the statutory simplified method from receiving an unintended windfall by use of the method. Moreover, to the extent that the ceiling is based on a taxpayer's overall tax liability, the profitability of some activities will either partially or fully offset the negative impact on the ceiling from less profitable activities.

The tax liability ceiling does not apply in the case of the required use of the simplified marginal impact method. In this context, application of the ceiling would be impractical and would defeat the purpose of the simplified marginal impact method because hypothetical overpayments are determined solely at the pass-through entity level. Several commentators requested that closely held pass-through entities electing to use the simplified marginal impact method also be permitted to apply the method at the entity level to further reduce complexity arising from the owner level application. To the extent that a pass-through entity is closely held, each owner's share of income from a contract, and thus the potential for distortion from an entity-level application of the simplified marginal impact method, is likely to increase and yet could not be practicably made subject to the tax liability ceiling. Consequently, the regulations do not permit application of the elective use of the simplified marginal impact method at the entity level.

Form 8697

The amount of interest due or to be refunded as a result of applying the look-back method is computed and reported on Form 8697 (Interest Computation Under the Look-back Method for Completed Long-term Contracts) for any tax year in which one or more long-term contracts are completed, or in which the contract price or contract costs are adjusted for one or more long-term contracts that were previously completed. Form 8697 is due no later than the due date (including extensions) of the tax return for the year of completion or adjustment. Form 8697 is filed with the same Internal Revenue Service Center with which a taxpayer's income tax return is filed.

In general each taxpayer that reports income from a long-term contract, or adjusts amounts attributable to a completed long-term contract, is required to file Form 8697 to apply the look-back method. In the case of a pass-through entity, such as a partnership or an S corporation, however, the regulations clarify that the owners or shareholders generally are required to file Form 8697 and are liable for, or entitled to receive, interest with respect to their distributive shares of income from a contract. However, widely held pass-through entities are required to apply the look-back method at the entity level with respect to income from domestic contracts.

Mid-Contract Change in Taxpayer

The proposed regulations provided rules for applying the look-back method when there is a mid-contract change in the taxpayer reporting income from a contract. As proposed, these rules require the completing taxpayer to apply the look-back method with respect to all years of the contract, including tax years of a predecessor taxpayer. Several commentators have indicated that taxable sales should be excluded from this rule and treated as a constructive completion of the contract, consistent with the prior law treatment of taxable sales of a long-term contract. In part, the proposed regulations reflected the

concern that a constructive completion would require the look-back method to be applied before actual completion of the contract and on the basis of estimates or, in the case of a sale of an entire business, on the basis of an allocation of the purchase price of the business, thereby producing results that may conflict with the purpose of the look-back method. In response, these commentators have stated that this concern is adequately alleviated by the tension in the taxable sale context between the seller's motivation to underallocate the purchase price to the contract (to minimize look-back interest) and the purchaser's motivation to overallocate the purchase price to the contract (to minimize the allocation to goodwill). In these final regulations, the treatment of mid-contract changes in the taxpayer is reserved for further consideration.

Scope of Look-Back Method

The regulations describe the scope of the look-back method, which generally includes all long-term contracts entered into after February 28, 1986, that are reported under the percentage of completion method or the percentage of completion-capitalized cost method. In the case of any long-term contract reported under the percentage of completion-capitalized cost method, interest is charged or credited to the taxpayer with respect to the percentage (40, 70, or 90, whichever applies) of the contract reported under the percentage of completion method.

Section 56(a)(3) provides that, in determining the amount of the alternative minimum taxable income for any tax year, the percentage of completion method of accounting (as modified by section 460(b)) is used in lieu of the method of accounting that is used for purposes of computing the regular tax. The regulations clarify that the look-back method accordingly applies to alternative minimum taxable income computed using the percentage of completion method as well as to regular taxable income.

De Minimis Exception

The 1988 Act amended section 460(b) to exempt from the look-back method certain long-term contracts that are not otherwise exempt from the required use of the percentage of completion method (or the percentage of completion-capitalized cost method). Under section 460(b)(3)(B), the look-back method does not apply to any contract completed within 2 years if the gross contract price does not exceed the lesser of $1,000,000 or 1 percent of the taxpayer's average annual gross receipts. The regulations clarify that this de minimis exception is mandatory, even if income from the contract was accelerated as a result of the use of inaccurate estimates of contract price and contract costs, so that the taxpayer would otherwise be entitled to receive interest on the resulting hypothetical overpayment of tax.

If the de minimis exception applies to a contract for regular taxable income, then the exception also applies for alternative minimum taxable income. Because of the adjustments required for computing alternative minimum taxable income, a taxpayer's gross receipts for alternative minimum tax purposes may differ from gross receipts for regular income tax purposes. Thus, if the criteria for meeting the de minimis exception were applied separately for alternative minimum tax purposes using alternative minimum tax gross receipts, a difference between alternative minimum tax gross receipts and regular tax gross receipts could cause a contract to qualify for the de minimis exception for regular tax purposes, but not for alternative minimum tax purposes, or vice versa. To prevent this result, the regulations provide that gross receipts are determined for purposes of section 460(b)(3)(B) by reference only to regular taxable income.

The de minimis exception was enacted in 1988, effective for qualifying contracts entered into after February 28, 1986, and, therefore, may apply to contracts for which a taxpayer has already applied the look-back method. Since the de minimis exception was enacted retroactively, taxpayers are permitted to file an amended Form 8697 to reverse the application of the look-back method to qualifying contracts.

Treatment of Look-Back Interest

In accordance with section 460(b)(1), interest required to be paid by a taxpayer is treated as an increase in tax for purposes of subtitle F of the Code (other than the estimated tax penalty); however, interest received by a taxpayer is not treated as a reduction in tax liability. Under the regulations, the determination of whether interest computed under the look-back method is treated as tax for this purpose is determined on a "net" basis for each filing year. Thus, if a taxpayer computes for the current filing year both hypothetical overpayments and hypothetical underpayments for prior years, the taxpayer has an increase in tax only if the interest computed on the underpayments for all those prior years exceeds the interest computed on the overpayments for all those prior years.

For purposes of determining taxable income under subtitle A of the Code, however, any amount of interest required to be paid by the taxpayer under the look-back method is treated as interest expense. Consistent with the proposed regulations, the final regulations provide that this interest expense is treated as interest expense arising from an underpayment of income tax. Thus, any look-back interest required to be paid in the case of an individual (including an individual owner of any pass-through entity) is treated as personal interest in accordance with § 1.163–9T(b)(2), even if that interest is attributable to long-term contract income of a trade or business.

Several commentators were of the view that the disallowance of a deduction for look-back interest is unfair to individual contractors that are not taxed as corporations. According to these commentators, look-back interest expense should not be subject to § 1.163–9T(b)(2) because it results from hypothetical, not actual tax liabilities. However, by its terms, § 1.163–9T(b)(2) generally applies to all interest relating to tax liabilities, including certain deferred tax liabilities that do not result from an error in the computation of tax. Further, in the legislative history underlying section 453A, which requires interest to be paid on deferred taxes arising from installment sales, Congress clarified that personal interest included interest relating to deferred taxes as well as actual tax deficiences. See H.R. Conf. Rep. No. 495, 100th Cong., 1st Sess. 930 (1987), 1987–3 C.B. 930. Interest expense required to be paid under the look-back method relates to the deferral of tax liability and, therefore, is within the scope of § 1.163–9T(b)(2).

With respect to interest that is refunded under the look-back method, the regulations similarly provide that, for purposes of subtitle A, this amount is taxable interest income. The regulations also clarify that interest computed under the look-back method at the entity level under the simplified marginal impact method is allocated among the owners (or beneficiaries) in the same manner that interest income and interest expense are allocated to owners (or beneficiaries) and subject to the requirements of section 704 and any other applicable rules.

Treatment of Change Orders

The regulations clarify that the look-back method is applied to all amounts attributable to a single long-term contract. Section 460(f), which defines the term "long-term contract,"

authorizes the Secretary to prescribe regulations that require (1) two or more contracts that are interdependent (by reason of pricing or otherwise) to be treated as a single contract, and (2) a single contract that is properly severed to be treated as multiple contracts. Notice 89–15, Q & A 37 and 38, provides that the rules for severing and aggregating contracts in § 1.451–3(e) determine what constitutes a single long-term contract for purposes of reporting income and allocating costs to long-term contracts under section 460. These rules apply for determining whether a change order or other similar agreement is treated as a separate contract or as part of the original contract. *Cf.* Notice 89–15, Q & A 11. Because the look-back method involves a hypothetical reapplication of the percentage of completion method (as modified by section 460), the same rules apply in determining what constitutes a single long-term contract for purposes of the look-back method. Accordingly, under the regulations, if a contract change order does not constitute a separate contract under the rules for severing and aggregating contracts, the revenue and expenses attributable to the change order are allocable under the look-back method to all tax years of the underlying contract.

Time at Which Look-Back Method is Applied

Section 460(b)(1)(B) of the Code requires the look-back method to be applied upon completion of a long-term contract, and then to be reapplied in any tax year in which there are post-completion adjustments to the contract price or contract costs.

Completion

The regulations define the term "completion" for this purpose to mean final completion and acceptance within the meaning of § 1.451–3(b)(2). With respect to any long-term contract, therefore, the look-back method generally is applied no later than the year in which the subject matter of the contract has been delivered and is available for use by the customer, even if the taxpayer expects to incur additional contract costs in a year subsequent to the completion year.

Although § 1.451–3(b)(2) determines the "time" for completion, the provisions in § 1.451–3(b)(2), and § 1.451–3(d) (which separate contract revenues and contract costs from a long-term contract in certain circumstances, such as in the case of a dispute or contract term relating to contingent compensation) do not apply for purposes of the look-back method. These provisions, which are designed to prevent inappropriate deferral of income and expenses by taxpayers using the completed contract method, are not relevant under the percentage of completion method. Moreover, these provisions are inconsistent with the requirement of section 460(b)(1)(b) to reapply the look-back method to amounts taken into account after completion, since their application would otherwise permit income from a long-term contract to be accounted for under a method of accounting that is not subject to the look-back method.

In addition, section 460(b)(1) requires any portion of the contract price not previously included in income to be included in income for the year immediately following the completion year, even if the taxpayer expects to incur additional contract costs in a year subsequent to the year immediately following the completion year. This rule does not apply for purposes of the look-back method, however. Thus, to the extent that a taxpayer incurs additional costs after the year immediately following the year of completion, the taxpayer will be entitled to receive interest under the look-back method to compensate for any acceleration of income that resulted from this requirement.

Post-Completion Reapplications

The regulations clarify that, after completion of a contract, section 460(b) generally requires the look-back method to be reapplied in any subsequent tax year in which additional contract revenues or contract costs are taken into account, or in which amounts previously taken into account as income or deductions are adjusted for any reason. In reapplying the look-back method when any amount is taken into account after completion, including when any amount of revenue that is taken into account in the year immediately following the year of completion by reason of section 460(b)(1), the regulations provide that only costs actually incurred as of the reapplication year are included in the denominator of the percentage of completion ratio. Section 460(b)(2) provides that these amounts may be taken into account, for purposes of reapplying the look-back method, at a value that is discounted from the time the amount is taken into account to the time of completion. The regulations clarify that amounts of contract revenue that are properly taken into account under the percentage of completion method at the time of, or prior to, contract completion are not discounted under this rule, even if received after contract completion.

Although section 460(b)(2) permits taxpayers to discount adjustments on a contract-by-contract basis, if a taxpayer discounts any adjustments relating to a particular contract, the taxpayer must discount all contract price or contract cost adjustments arising from the contract. See H.R. Rep. No. 247, 101st Cong., 1st Sess. 1411 (1989), which provides that adjustments to costs are to be treated in the same manner as adjustments to price.

The regulations provide a "delayed reapplication method" which, if elected, may reduce the number of times the look-back method is required to be reapplied for post-completion adjustments to a taxpayer's long-term contracts. Under the delayed reapplication method, taxpayers will be permitted to wait until the cumulative amount of adjustments to either the contract price or contract costs reaches a threshold of 10 percent of these amounts prior to adjustment or, if lesser, $1,000,000. To insure that all adjustments to the contract price are ultimately taken into account under the look-back method, a reapplication of the look-back method must be made (without regard to the thresholds) 5 years after the most recent application of the look-back method, or, if earlier, the year in which the taxpayer reasonably believes the contract is finally settled and closed.

Several commentators suggested that the look-back method should not have to be reapplied at any time after completion if the cumulative adjustments to net profit are de minimis. Because section 460(b) does not permit amounts attributable to a contract to be permanently forgiven from the application of the look-back method, the final regulations do not adopt this suggestion.

The regulations also do not reflect the comment that taxpayers be permitted to apply the look-back method prior to completion of a contract. Such a rule would unduly increase the complexity of the look-back method and, to the extent the regulations cannot require an early application, would be invoked selectively by taxpayers.

Special Analyses

It has been determined that these regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations and, therefore, a final

BEST COPY AVAILABLE

Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for these regulations was submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Carol Conjura of the Office of Associate Chief Counsel (Technical), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in their development.

§ 1.460–6 Look-back method.

(a) *In general*—(1) *Introduction.* With respect to income from any long-term contract reported under the percentage of completion method, a taxpayer is required to pay or is entitled to receive interest under section 460(b) on the amount of tax liability that is deferred or accelerated as a result of overestimating or underestimating total contract price or contract costs. Under this look-back method, taxpayers are required to pay interest for any deferral of tax liability resulting from the underestimation of the total contract price or the overestimation of total contract costs. Conversely, if the total contract price is overestimated or the total contract costs are underestimated, taxpayers are entitled to receive interest for any resulting acceleration of tax liability. The computation of the amount of deferred or accelerated tax liability under the look-back method is hypothetical; application of the look-back method does not result in an adjustment to the taxpayer's tax liability as originally reported, as reported on an amended return, or as adjusted on examination. Thus, the look-back method does not correct for differences in tax liability that result from over- or under-estimation of contract price and costs and that are permanent because, for example, tax rates change during the term of the contract.

(2) *Overview.* Paragraph (b) explains which situations require application of the look-back method to income from a long-term contract. Paragraph (c) explains the operation of the three computational steps for applying the look-back method. Paragraph (d) provides guidance concerning the simplified marginal impact method. Paragraph (e) provides an elective method to minimize the number of times the look-back method must be reapplied to a single long-term contract. Paragraph (f) describes the reporting requirements for the look-back method and the tax treatment of look-back interest. Paragraph (g) provides rules for applying the look-back method when there is a transaction that changes the taxpayer that reports income from a long-term contract prior to the completion of a contract. Paragraph (h) provides examples illustrating the three computational steps for applying the look-back method.

(b) *Scope of look-back method*—(1) *In general.* The look-back method applies to any income from a long-term contract within the meaning of section 460(f) that is required to be reported under the percentage of completion method (as modified by section 460) for regular income tax purposes or for alternative minimum tax purposes. If a taxpayer uses the percentage of completion-capitalized cost method for long-term contracts, the look-back method applies for regular tax purposes only to the portion (40, 70, or 90 percent, whichever applies) of the income from the contract that is reported under the percentage of completion method. The requirements of section 460 also apply to income and expenses attributable to activities that benefit any long-term contract entered into by a party related to the taxpayer within the meaning of section 707(b) or 267(b), determined without regard to section 267(f)(1)(A) and by substituting "80 percent" for "50 percent" with regard to the ownership of the stock of a C corporation. Therefore, to the extent that the percentage of completion method is required to be used with respect to income and expenses that are attributable to activities that benefit a related party's long-term contract, the look-back method also applies to these amounts, even if those activities are not performed under a contract entered into directly by the taxpayer.

(2) *Exceptions from section 460.* The look-back method generally does not apply to the regular taxable income from any long-term construction contract within the meaning of section 460(e)(4) that:

(i) Is a home construction contract within the meaning of section 460(e)(1)(A), or

(ii) Is not a home construction contract but is estimated to be completed within a 2-year period by a taxpayer whose average annual gross receipts for the 3 tax years preceding the tax year the contract is entered into do not exceed $10,000,000 (as provided in section 460(e)(1)(B)). These contracts are not subject to the look-back method for regular tax purposes, even if the taxpayer uses a version of the percentage of completion method permitted under § 1.451–3, unless the taxpayer has properly changed its method of accounting for these contracts to the percentage of completion method as modified by section 460(b). The look-back method, however, applies to the alternative minimum taxable income from a contract of this type, unless it is exempt from the required use of the percentage of completion method under section 56(a)(3).

(3) *De minimis exception.* Notwithstanding that the percentage of completion method is otherwise required to be used, the look-back method does not apply to any long-term contract that:

(i) Is completed within 2 years of the contract commencement date, and

(ii) Has a gross contract price (as of the completion of the contract) that does not exceed the lesser of $1,000,000 or 1 percent of the average annual gross receipts of the taxpayer for the 3 tax years preceding the tax year in which the contract is completed.

This de minimis exception is mandatory and, therefore, precludes application of the look-back method to any contract that meets the requirements of the exception. The de minimis exception applies for purposes of computing both regular taxable income and alternative minimum taxable income. Solely for this purpose, the determination of whether a long-term contract meets the gross receipts test for both alternative minimum tax and regular tax purposes is made based only on the taxpayer's regular taxable income.

(4) *Alternative minimum tax.* For purposes of computing alternative minimum taxable income, section 56(a)(3) generally requires long-term contracts within the meaning of section 460(f) (generally without regard to the exceptions in section 460(e)) to be accounted for using only the percentage of completion method as defined in section 460(b), including the look-back method of section 460(b), with respect to tax years beginning after December 31, 1986. However, section 56(a)(3) (and thus the look-back method) does not apply to any long-term contract entered into after June 20, 1988, and before the beginning of the first tax year that begins after September 30, 1990, that meets the conditions of both section 460(e)(1)(A) and clauses (i) and (ii) of section 460(e)(1)(B), and does not apply to any long-term contract entered into in a tax year that begins after September 30, 1990, that meets the conditions of section 460(e)(1)(A). A taxpayer that applies the percentage of completion method (and thus the look-back method) to income from a long-term contract only for purposes of determining alternative minimum taxable income, and not regular taxable income, must apply the look-back method to the alternative minimum taxable income in the year of contract completion and other filing years whether or not the taxpayer was liable for the alternative minimum tax for the filing year or for any prior year. Interest is computed under the look-back method to the extent that the taxpayer's total tax liability (including the alternative minimum tax liability) would have differed if the percentage of completion method had been applied using actual, rather than estimated, contract price and contract costs.

(5) *Effective date.* The look-back method, including the de minimis exception, applies to long-term contracts entered into after February 28, 1986. With respect to activities that are subject to section 460 solely because they benefit a long-term contract of a related party, the look-back method generally applies only if the related party's long-term contract was entered into after June 20, 1988, unless a principal purpose of the related-party arrangement is to avoid the requirements of section 460.

(c) *Operation of the look-back method*—(1) *Overview*—(i) *In general.* The amount of interest charged or credited to a taxpayer under the look-back method is computed in three steps. This paragraph (c) describes the three steps for applying the look-back method. These steps are illustrated by the examples in paragraph (h). The first step is to hypothetically reapply the percentage of completion method to all long-term contracts that are completed or adjusted in the current year (the "filing year"), using the actual, rather than estimated, total contract price and contract costs. Based on this reapplication, the taxpayer determines the amount of taxable income (and alternative minimum taxable income) that would have been reported for each year prior to the filing year that is affected by contracts completed or

adjusted in the filing year if the actual, rather than estimated, total contract price and costs had been used in applying the percentage of completion method to these contracts, and to any other contracts completed or adjusted in a year preceding the filing year. If the percentage of completion method only applies to alternative minimum taxable income for contracts completed or adjusted in the filing year, only alternative minimum taxable income is recomputed in the first step. The second step is to compare what the tax liability would have been under the percentage of completion method (as reapplied in the first step) for each tax year for which the tax liability is affected by income from contracts completed or adjusted in the filing year (a "redetermination year") with the most recent determination of tax liability for that year to produce a hypothetical underpayments or overpayment of tax. The third step is to apply the rate of interest on overpayments designated under section 6621 of the Code, compounded daily, to the hypothetical underpayment or overpayment of tax for each redetermination year to compute interest that runs, generally, from the due date (determined without regard to extensions) of the return for the redetermination year to the due date (determined without regard to extensions) of the return for the filing year. The net amount of interest computed under the third step is paid by or credited to the taxpayer for the filing year. Paragraph (d) provides a simplified marginal impact method that simplifies the second step—the computation of hypothetical underpayments or overpayments of tax liability for redetermination years—and, in some cases, the third step—the determination of the time period for computing interest.

(ii) *Post-completion revenue and expenses*—(A) *In general.* The look-back method is applied upon the completion of any long-term contract and (unless the taxpayer elects the delayed reapplication method of this section) is applied in any subsequent tax year for which there are taken into account any increases or decreases in either total contract price or total contract costs allocable to the contract under section 460(c) ("allocable contract costs") to the extent those increases or decreases were not previously taken into account under the percentage of completion method. Any year in which the look-back method must be reapplied is treated as a filing year. See Example (3) of paragraph (b)(4) for an illustration of how the look-back method is applied to post-completion adjustments.

(B) *Completion.* A contract is considered to be completed for purposes of the look-back method no later than the year in which final completion and acceptance within the meaning of § 1.451–3(b)(2) have occurred. Accordingly, determination of the completion year for any long-term contract is based on an analysis of all the relevant facts and circumstances, including the manner in which the parties to the contract deal with each other and with the subject matter of the contract and the nature of any work or costs remaining to be performed or incurred on the contract. Therefore, the first application of the look-back method must occur no later than the tax year in which the subject matter of the contract has been delivered and is available for use by the customer, even if the taxpayer reasonably expects at that time to incur additional allocable contract costs.

(C) *Discounting of contract price and contract cost adjustments subsequent to completion; election not to discount*—(*1*) *General rule.* The amount of any post-completion adjustment to the total contract price or contract costs is discounted, solely for purposes of applying the look-back method, from its value at the time the amount is taken into account in computing taxable income to its value at the completion of the contract. The discount rate for this purpose is the Federal mid-term rate under section 1274(d) in effect at the time the amount is properly taken into account. For purposes of applying the look-back method for the completion year, no amounts are discounted, even if they are received after the completion year.

(*2*) *Election not to discount.* Notwithstanding the general requirement to discount post-completion adjustments, a taxpayer may elect not to discount contract price and contract cost adjustments with respect to any contract. The election not to discount is to be made on a contract-by-contract basis and is binding with respect to all post-completion adjustments that arise with respect to a contract for which an election has been made. An election not to discount with respect to any contract is made by stating that an election is being made on the taxpayer's timely filed Federal income tax return (determined with regard to extensions) for the first tax year after completion in which the taxpayer takes into account (i.e., includes in income or deducts) any adjustment to the contract price or contract costs. See § 5h.6.

(*3*) *Year-end discounting convention.* In the absence of an election not to discount, any revisions to the contract price and contract costs must be discounted to their values as of the completion of the contract in reapplying the look-back method. For this purpose, the period of discounting is the period between the completion date of the contract and the date that any adjustment is taken into account in computing taxable income. Although taxpayers may use the period between the months in which these two events actually occur, in many cases, these dates may not be readily identifiable. Therefore, for administrative convenience, taxpayers are permitted to use the period between the end of the tax years in which these events occur as the period of discounting provided that the convention is used consistently with respect to all post-completion adjustments for all contracts of the taxpayer the adjustments to which are discounted. In that case, the taxpayer must use as the discount rate the Federal mid-term rate under section 1274(d) as of the end of the tax year in which any revision is taken into account in computing taxable income.

(D) *Revenue acceleration rule.* Section 460(b)(1) imposes a special rule that requires a taxpayer to include in gross income, for the tax year immediately following the year of completion, any previously unreported portion of the total contract price (including amounts that the taxpayer expects to receive in the future) determined as of that year, even if the percentage of completion ratio is less than 100 percent because the taxpayer expects to incur additional allocable contract costs in a later year. At the time any remaining portion of the contract price is includible in income under this rule, no offset against this income is permitted for estimated future contract costs. To achieve the requirement to report all remaining contract revenue without regard to additional estimated costs, a taxpayer must include only costs actually incurred through the end of the tax year in the denominator of the percentage of completion ratio in applying the percentage of completion method for any tax years after the year of completion. The look-back method also must be reapplied for the year immediately following the year of completion if any portion of the contract price is includible in income in that year by reason of section 460(b)(1). For purposes of reapplying the look-back method as a result of this inclusion in income, the taxpayer must only include in the denominator of the percentage of completion ratio the actual contract costs incurred as of the end of the year,

even if the taxpayer reasonably expects to incur additional allocable contract costs. To the extent that costs are incurred in a subsequent tax year, the look-back method is reapplied in that year (or a later year if the delayed reapplication method is used), and the taxpayer is entitled to receive interest for the post-completion adjustment to contract costs. Because this reapplication occurs subsequent to the completion year, only the cumulative costs incurred as of the end of the reapplication year are includible in the denominator of the percentage of completion ratio.

(2) *Look-back Step One*—(i) *Hypothetical reallocation of income among prior tax years.* For each filing year, a taxpayer must allocate total contract income among prior tax years, by hypothetically applying the percentage of completion method to all contracts that are completed or adjusted in the filing year using the rules of this paragraph (c)(2). The taxpayer must reallocate income from those contracts among all years preceding the filing year that are affected by those contracts using the total contract price and contract costs, as determined as of the end of the filing year ("actual contract price and costs"), rather than the estimated contract price and contract costs. The taxpayer then must determine the amount of taxable income and the amount of alternative minimum taxable income that would have been reported for each affected tax year preceding the filing year if the percentage of completion method had been applied on the basis of actual contract price and contract costs in reporting income from all contracts completed or adjusted in the filing year and in any preceding year. If the percentage of completion method only applies to alternative minimum taxable income from the contract, only alternative minimum taxable income is recomputed in the first step. For purposes of reallocating income (and costs if the 10-percent year changes for a taxpayer using the 10-percent method of section 460(b)(5)) under the look-back method, the method of computing the percentage of completion ratio is the same method used to report income from the contract on the taxpayer's return. (Thus, an election to use the 10-percent method or the simplified cost-to-cost method is taken into account). See Example (1) of paragraph (h)(2) for an illustration of Step One.

(ii) *Treatment of estimated future costs in year of completion.* If a taxpayer reasonably expects to incur additional allocable contract costs in a tax year subsequent to the year in which the contract is completed, the taxpayer includes the actual costs incurred as of the end of the completion year plus the additional allocable contract costs that are reasonably expected to be incurred (to the extent includible under the taxpayer's percentage of completion method) in the denominator of the percentage of completion ratio. The completion year is the only filing year for which the taxpayer may include additional estimated costs in the denominator of the percentage of completion ratio in applying the look-back method. If the look-back method is reapplied in any year after the completion year, only the cumulative costs incurred as of the end of the year of reapplication are includible in the denominator of the percentage of completion ratio in reapplying the look-back method.

(iii) *Interim reestimates not considered.* The look-back method cannot be applied to a contract before it is completed. Accordingly, for purposes of applying Step One, the actual total contract price and contract costs are substituted for the previous estimates of total contract price and contract costs only with respect to contracts that have been completed in the filing year and in a tax year preceding the filing year. No adjustments are made under Step One for contracts that have not been completed prior to the end of the current filing year, even if, as of the end of this year, the estimated total contract price or contract costs for these uncompleted contracts is different from the estimated amount that was used during any tax year for which taxable income is recomputed with respect to completed contracts under the look-back method for the current filing year.

(iv) *Tax years in which income is affected.* In general, because income under the percentage of completion method is generally reported as costs are incurred, the taxable income and alternative minimum taxable income are recomputed only for each year in which allocable contract costs were incurred. However, there will be exceptions to this general rule. For example, a taxpayer may be required to cumulatively adjust the income from a contract in a year in which no allocable contract costs are incurred if the estimated total contract price or contract costs was revised in that year. However, in applying the look-back method, no contract income is allocated to that year. Thus, there may be a difference between the amount of contract income originally reported for that year and the amount of contract income as reallocated. Similarly, because of the revenue acceleration rule of section 460(b)(1), income may be reported in the year immediately following the completion year even though no costs were incurred during that year and, in applying the look-back method in that year or another year, if additional costs are incurred or the contract price is adjusted in a later year, no income is allocated to the year immediately following the completion year.

(v) *Costs incurred prior to contract execution; 10-percent method*—(A) *General rule.* There are two situations in which allocable contract costs may be incurred without causing contract income to be reported under the percentage of completion method. First, allocable contract costs that are incurred in tax years prior to the tax year the contract is entered into are deductible in the tax year the contract is entered into, and no contract income is required to be reported in any of these prior tax years. The look-back method does not require allocation of contract income to tax years before the contract was entered into. Costs incurred prior to the year a contract is entered into are similarly first taken into account in the numerator of the percentage of completion ratio in the year the contract is entered into. Second, under the elective 10-percent method of section 460(b)(5), a taxpayer takes no contract revenues or contract costs into account until the tax year as of the close of which at least 10 percent of the total estimated contract costs are incurred (the 10-percent year). Instead, contract costs incurred in a tax year preceding the 10-percent year are deferred until the 10-percent year, at which time they are included in the numerator of the percentage of completion ratio and deducted from gross income. A taxpayer using the 10-percent method must also use the 10-percent method in applying the look-back method, using actual total contract costs to determine the 10-percent year. Thus, contract income is never reallocated to a year before the 10-percent year as determined on the basis of actual contract costs. If the 10-percent year is earlier as a result of applying Step One of the look-back method, contract costs incurred up to and including the new 10-percent year (as determined based on actual contract costs), are reallocated from the original 10-percent year to the new 10-percent, and costs incurred in later years but before the old 10-percent year are reallocated to those years. If the 10-percent year is later as a result of applying Step One of the look-back

method, contract costs incurred up to and including the new 10-percent year are reallocated from all prior years to the new 10-percent year. This is the only case in which costs are reallocated under the look-back method.

(B) *Example.* The application of the look-back method by a taxpayer using the 10-percent method is illustrated by the following example:

Example. Z elected to use the 10-percent method of section 460(b)(5) for reporting income under the percentage of completion method. Z entered into a contract in 1990 for a fixed price of $1,000x. During 1990, Z incurred allocable contract costs of $80x and estimated that it would incur a total of $800x for the entire contract. Since $80x is less than 10 percent of total estimated contract costs, Z reported no revenue from the contract in 1990 and deferred the $80x of costs incurred. In 1991, Z incurred an additional $620x of contract costs, and completed the contract. Accordingly, in its 1991 return, Z reported the entire contract price of $1,000x, and deducted the $620x of costs incurred in 1991 and the $80x of costs incurred in 1990.

Under section 460(b)(5), the 10-percent method applies both for reporting contract income and the look-back method. Under the look-back method, since the costs incurred in 1990 ($80x) exceed 10 percent of the actual total contract costs ($700x), Z is required to allocate $114x of contract revenue ($80x/$700x × $1,000x) and the $80x of costs incurred in 1990. Thus, application of the look-back method results in a net increase in taxable income for 1990 of $34x, solely for purposes of the look-back method.

(vi) *Amount treated as contract price*—(A) *General rule.* The amount that is treated as total contract price for purposes of applying the percentage of completion method and reapplying the percentage of completion method under the look-back method under Step One includes all amounts that the taxpayer expects to receive from the customer. Thus, amounts are treated as part of the contract price as soon as it is reasonably estimated that they will be received, even if the all-events test has not yet been met.

(B) *Contingencies.* Any amounts related to contingent rights or obligations, such as incentive fees or amounts in dispute, are not separated from the contract and accounted for under a non-long-term contract method of accounting, notwithstanding any provision in § 1.451–3(b)(2) (ii), (iii), (iv), and § 1.451–3(d) (2), (3), and (4), to the contrary. Instead, those amounts are treated as part of the total contract price in applying the percentage of completion method and the look-back method. For example, if an incentive fee under a contract to manufacture a satellite is payable to the taxpayer after a specified period of successful performance, the incentive fee is includible in the total contract price at the time and to the extent that it can reasonably be predicted that the performance objectives will be met, for purposes of both the percentage of completion method and the look-back method. Similarly, a portion of the contract price that is in dispute is included in the total contract price at the time and to the extent that the taxpayer can reasonably expect the dispute will be resolved in the taxpayer's favor (without regard to when the taxpayer receives payment for the amount in dispute or when the dispute is finally resolved).

(C) *Change orders.* In applying the look-back method, a change order with respect to a contract is not treated as a separate contract unless the change order would be treated as a separate contract under the rules for severing and aggregating contracts provided in § 1.451–3(e). Thus, if a change order is not treated as a separate contract, the contract price and contract costs attributable to the change order must be taken into account in allocating contract income to all tax years affected by the underlying contract.

(3) *Look-back Step Two: Computation of hypothetical overpayment or underpayment of tax*—(i) *In general.* Step Two involves the computation of a hypothetical overpayment or underpayment of tax for each year in which the tax liability is affected by income from contracts that are completed or adjusted in the filing year (a "redetermination year"). The application of Step Two depends on whether the taxpayer uses the simplified marginal impact method contained in paragraph (d) or the actual method described in this paragraph (c)(3). The remainder of this paragraph (c)(3) does not apply if a taxpayer uses the simplified marginal impact method.

(ii) *Redetermination of tax liability.* Under the method described in this paragraph (c)(3) (the "actual method"), a taxpayer, first, must determine what its regular and alternative minimum tax liability would have been for each redetermination year if the amounts of contract income allocated in Step One for all contracts completed or adjusted in the filing year and in any prior year were substituted for the amounts of contract income reported under the percentage of completion method on the taxpayer's original return (or as subsequently adjusted on examination, or by amended return). See Example (2) of paragraph (h)(3) for an illustration of Step Two.

(iii) *Hypothetical underpayment or overpayment.* After redetermining the income tax liability for each tax year affected by the reallocation of contract income, the taxpayer then determines the amount, if any, of the hypothetical underpayment or overpayment of tax for each of these redetermination years. The hypothetical underpayment or overpayment for each affected year is the difference between the tax liability as redetermined under the look-back method for that year and the amount of tax liability determined as of the latest of the following:

(A) The original return date;

(B) The date of a subsequently amended or adjusted return (if, however, the amended return is due to a carryback described in section 6611(f), see paragraph (c)(4)(iii)); or

(C) The last previous application of the look-back method (in which case, the previous hypothetical tax liability is used).

(iv) *Cumulative determination of tax liability.* The redetermination of tax liability resulting from previous applications of the look-back method is cumulative. Thus, for example, in computing the amount of a hypothetical overpayment or underpayment of tax for a redetermination year, the current hypothetical tax liability is compared to the hypothetical tax liability for that year determined as of the last previous application of the look-back method.

(v) *Years affected by look-back only.* A redetermination of income tax liability under Step Two is required for every tax year for which the tax liability would have been affected by a change in the amount of income or loss for any other year for which a redetermination is required. For example, if the allocation of contract income under Step One changed the amount of a net operating loss that was carried back to a year preceding the year the taxpayer entered into the contract, the tax liability for the earlier year must be redetermined.

(vi) *Definition of tax liability.* For purposes of Step Two, the income tax liability must be redetermined by taking into account all applicable additions to tax, credits, and net operating loss carrybacks and carryovers. Thus, the tax, if any, imposed under section 55 (relating to alternative minimum tax) must be taken into account. For example, if the taxpayer did not pay alternative minimum tax, but would have paid alternative minimum tax for that year if actual rather than estimated contract price and costs had been used in determining contract income for the year, the amount of any hypothetical overpayment or underpayment of tax must be determined by comparing the hypothetical total tax liability (including hypothetical alternative minimum tax

liability) with the actual tax liability for that year. The effect of taking these items into account in applying the look-back method is illustrated in Examples (4) through (7) of paragraphs (h)(5) through (h)(8) below.

(4) *Look-back Step Three: Calculation of interest on underpayment or overpayment*—(i) *In general.* After determining a hypothetical underpayment or overpayment of tax for each redetermination year, the taxpayer must determine the interest charged or credited on each of these amounts. Interest on the amount determined under Step Two is determined by applying the overpayment rate designated under section 6621, compounded daily. In general, the time period over which interest is charged on hypothetical underpayments or credited on hypothetical overpayments begins at the due date (not including extensions) of the return for the redetermination year for which the hypothetical underpayment or overpayment determined in Step Two is computed. This time period generally ends on the earlier of:

(A) The due date (not including extensions) of the return for the filing year, and

(B) The date both

(*1*) The income tax return for the filing year is filed, and

(*2*) The tax for that year has been paid in full. If a taxpayer uses the simplified marginal impact method contained in paragraph (d), the remainder of this paragraph (c)(4) does not apply.

(ii) *Changes in the amount of a loss or credit carryback or carryover.* The time period for determining interest may be different in cases involving loss or credit carrybacks or carryovers in order to properly reflect the time period during which the taxpayer (in the case of an underpayment) or the Government (in the case of an overpayment) had the use of the amount determined to be a hypothetical underpayment or overpayment. Thus, if a reallocation of contract income under Step One results in an increase or decrease to a net operating loss carryback (but not a carryforward), the interest due or to be refunded must be computed on the increase or decrease in tax attributable to the change to the carryback only from the due date (not including extensions) of the return for the redetermination year that generated the carryback and not from the due date of the return for the redetermination year in which the carryback was absorbed. In the case of a change in the amount of a carryover as a result of applying the lookback method, interest is computed from the due date of the return for the year in which the carryover was absorbed. See Examples (6) and (9) of paragraph (h)(6) for an illustration of these rules.

(iii) *Changes in the amount of tax liability that generated a subsequent refund.* If the amount of tax liability for a redetermination year (as reported on the taxpayer's original return, as subsequently adjusted on examination, as adjusted by amended return, or as redetermined by the last previous application of the look-back method) is decreased by the application of the look-back method, and any portion of the redetermination year tax liability was absorbed by a loss or credit carryback arising in a year subsequent to the redetermination year, the look-back method applies as follows to properly reflect the time period of the use of the tax overpayment. To the extent the amount of tax absorbed because of the carryback exceeds the total hypothetical tax liability for the year (as redetermined under the look-back method) the taxpayer is entitled to receive interest only until the due date (not including extensions) of the return for the year in which the carryback arose.

Example. Upon the completion of a long-term contract in 1990, the taxpayer redetermines its tax liability for 1988 under the look-back method. This redetermination results in a hypothetical reduction of tax liability from $1,500x (actual liability originally reported) to $1,200x (hypothetical liability). In addition, the taxpayer had already received a refund of some or all of the actual 1988 tax by carrying back a net operating loss (NOL) that arose in 1989. The time period over which interest would be computed on the hypothetical overpayment of $300x for 1988 would depend on the amount of the refund generated by the carryback, as illustrated by the following three alternative situations:

(A) If the amount refunded because of the NOL is $1,500x: interest is credited to the taxpayer on the entire hypothetical overpayment of $300x from the due date of the 1988 return, when the hypothetical overpayment occurred, until the due date of the 1989 return, when the taxpayer received a refund for the entire amount of the 1988 tax, including the hypothetical overpayment.

(B) If the amount refunded because of the NOL is $1,000x: interest is credited on the entire amount of the hypothetical overpayment of $300x from the due date of the 1988 return, when the hypothetical overpayment occurred, until the due date of the 1990 return. In this situation interest is credited until the due date of the return for the completion year of the contract, rather than the due date of the return for the year in which the carryback arose, because the amount refunded was less than the redetermined tax liability. Therefore, no portion of the hypothetical overpayment is treated as having been refunded to the taxpayer before the filing year.

(C) If the amount refunded because of the NOL is $1,200x—: interest is credited to the taxpayer on $100x ($1,200x—$1,100x) from the due date of the 1988 return until the due date of the 1989 return because only this portion of the total hypothetical overpayment is treated as having been refunded to the taxpayer before the filing year. However, the taxpayer did not receive a refund for the remaining $200x of the overpayment at that time and, therefore, is credited with interest on $200x through the due date of the tax return for 1990, the filing year. See Examples (10) and (11) of paragraph (h)(9) for a further illustration of this rule.

(iv) *Additional interest due on interest only after tax liability due.* For each filing year, taxpayers are required to file a Form 8697 (Interest Computation Under the Look-back Method for Completed Long-term Contracts) at the time the return for that filing year is filed to report the interest due or to be refunded under the look-back method. Even if the taxpayer has received an extension to file its income tax return for the filing year, look-back interest is computed with respect to the hypothetical increase (or decrease) in the tax liability determined under the look-back method only until the initial due date of that return (without regard to the extension). Interest is charged, unless the taxpayer otherwise has a refund that fully offsets the amount of interest due, (or credited) with respect to the amount of look-back interest due (or to be refunded) under the look-back method from the initial due date of the return through the date the return is filed. No interest is charged (or credited) after the due date of the return with respect to the amount of the hypothetical increases (or decreases) in tax liability determined under the look-back method.

(d) *Simplified marginal impact method*—(1) *Introduction.* This paragraph (d) provides a simplified method for calculating look-back interest. Any taxpayer may elect this simplified marginal impact method, except that pass-through entities described in paragraph (d)(4) of this section are required to apply the simplified marginal impact method at the entity level with respect to domestic contracts and the owners of those entities do not apply the look-back method to those contracts. Under the simplified marginal impact method, a taxpayer calculates the hypothetical underpayments or overpayments of tax for a prior year based on an assumed marginal tax rate. A taxpayer electing to use the simplified marginal impact method must use the method for each long-term contract for which it reports income (except with respect to domestic

contracts if the taxpayer is an owner in a widely held pass-through entity that is required to use the simplified marginal impact method at the entity level for those contracts).

(2) *Operation*—(i) *In general.* Under the simplified marginal impact method, income from those contracts that are completed or adjusted in the filing year is first reallocated in accordance with the procedures of Step One contained in paragraph (c)(2) of this section. Step Two is modified in the following manner. The hypothetical underpayment or overpayment of tax for each year of the contract (a "redetermination year") is determined by multiplying the applicable regular tax rate (as defined in paragraph (d)(2)(iii)) by the increase or decrease in regular taxable income (or, if it produces a greater amount, by multiplying the applicable alternative minimum tax rate by the increase or decrease in alternative minimum taxable income, whether or not the taxpayer would have been subject to the alternative minimum tax) that results from reallocating income to the tax year under Step One. Generally, the product of the alternative minimum tax rate and the increase or decrease in alternative minimum taxable income will be the greater of the two amounts described in the preceding sentence only with respect to contracts for which a taxpayer uses the full percentage of completion method only for alternative minimum tax purposes and uses the completed contract method, or the percentage of completion-capitalized cost method, for regular tax purposes. Step Three is then applied. Interest is credited to the taxpayer on the net overpayment and is charged to the taxpayer on the net underpayment for each redetermination year from the due date (determined without regard to extensions) of the return for the redetermination year until the earlier of

(A) The due date (determined without regard to extensions) of the return for the filing year, and

(B) The first date by which both the return is filed and the tax is fully paid.

(ii) *Applicable tax rate.* For purposes of determining hypothetical underpayments or overpayments of tax under the simplified marginal impact method, the applicable regular tax rate is the highest rate of tax in effect for the redetermination year under section 1 in the case of an individual and under section 11 in the case of a corporation. The applicable alternative minimum tax rate is the rate of tax in effect for the taxpayer under section 55(b)(1). The highest rate is determined without regard to the taxpayer's actual rate bracket and without regard to any additional surtax imposed for the purpose of phasing out multiple tax brackets or exemptions.

(iii) *Overpayment ceiling.* The net hypothetical overpayment of tax for any redetermination year is limited to the taxpayer's total federal income tax liability for the redetermination year reduced by the cumulative amount of net hypothetical overpayments of tax for that redetermination year resulting from earlier applications of the look-back method. If the reallocation of contract income results in a net overpayment of tax and this amount exceeds the actual tax liability (as of the filing year) for the redetermination year, as adjusted for past applications of the look-back method and taking into account net operating loss, capital loss, or credit carryovers and carrybacks to that year, the actual tax so adjusted is treated as the overpayment for the redetermination year. This overpayment ceiling does not apply when the simplified marginal impact method is applied at the entity level by a widely held pass-through entity in accordance with paragraph (d)(4) of this section.

(iv) *Example.* The application of the simplified marginal impact method is illustrated by the following example:

Example. Corporation X, a calendar-year taxpayer, reports income from long-term contracts and elected the simplified marginal impact method when it filed its income tax return for 1989. X uses only the percentage of completion method for both regular taxable income and alternative minimum taxable income. X completed contracts A, B, and C in 1989 and, therefore, was required to apply the look-back method in 1989. Income was actually reported for these contracts in 1987, 1988, and 1989. X's applicable tax rate, as determined under section 11, for the redetermination years 1987 and 1988 was 40 percent and 34 percent, respectively. The amount of contract income originally reported and reallocated for contracts A, B, and C, and the net overpayments and underpayments for the redetermination years are as follows:

	1987	1988
Contract A:		
Originally reported	$6,000x	$4,000x
Reallocated	3,000x	5,000x
Increase/(Decrease)	(3,000x)	1,000x
Contract B:		
Originally reported	6,000x	2,000x
Reallocated	7,000x	1,000x
Increase/(Decrease)	1,000x	(000x)
Contract C:		
Originally reported	5,000x	5,000x
Reallocated	4,000x	7,000x
Increase/(Decrease)	(4,000x)	2,000x
Net Increase/(Decrease)	(5,000x)	2,000x
Tentative (Underpayment)/Overpayment:		
@ 40	2,000x	
@ 34		(000x)
Ceiling:		
Actual Tax Liability (After Carryovers and Carrybacks)	1,000x	000x

Under the simplified marginal impact method, X determined a tentative hypothetical net overpayment for 1987 and a net underpayment for 1988. X determined these amounts by first aggregating the difference for contracts A, B, and C between the amount of contract price originally reported and the amount of contract price as reallocated and, then, applying the highest regular tax rate to the aggregate decrease in income for 1987 and the aggregate increase in income for 1988.

However, X's overpayment for 1987 is subject to a ceiling based on X's total tax liability. Because the tentative net overpayment of tax for 1987 exceeds the actual tax liability for that year after taking into account carryovers and carrybacks to that year, the final overpayment under the simplified marginal impact method is the amount of tax liability paid instead of the tentative net overpayment. Since application of the look-back method for 1988 results in a tentative underpayment of tax, it is not subject to a ceiling. If the look-back method is applied in 1991, the ceiling amount for 1987 will be zero and the ceiling amount for 1988 will be $1,360.

X is entitled to receive interest on the hypothetical overpayment from March 15, 1988, to March 15, 1990. X is required to pay interest on the underpayment from March 15, 1988, to March 15, 1990.

(3) *Anti-abuse rule.* If the simplified marginal impact method is used with respect to any long-term contract (including a contract of a widely held pass-through entity), the district director may recompute interest for the contract (including domestic contracts of widely held pass-through entities) under the look-back method using the actual method (and without regard to the simplified marginal impact method). The district director may make such a recomputation only if the amount of income originally reported with respect to the contract for any redetermination year exceeds the amount of income reallocated under the look-back method with respect to that contract for that year (using actual contract price and contract costs) by the lesser of $1,000,000 or 20 percent of the amount of income as reallocated (*i.e.*, based on actual contract price and contract costs) under the look-back method with respect to that contract for that year. In determining whether to exercise this authority upon examination of the Form 8697, the district director may take into account whether the taxpayer overreported income for a purpose of receiving interest under the look-back method on a hypothetical overpayment determined at the applicable tax rate.

The district director also may take into account whether the taxpayer underreported income for the year in question with respect to other contracts. Notwithstanding the look-back method, the district director may require an adjustment to the tax liability for any open tax year if the taxpayer did not apply the percentage of completion method properly on its original return.

(4) *Application*—(i) *Required use by certain pass-through entities*—(A) *General rule.* The simplified marginal impact method is required to be used with respect to income reported from domestic contracts by a pass-through entity that is either a partnership, an S corporation, or a trust, and that is not closely held. With respect to contracts described in the preceding sentence, the simplified marginal impact method is applied by the pass-through entity at the entity level. For determining the amount of any hypothetical underpayment or overpayment, the applicable regular and alternative minimum tax rates, respectively, are generally the highest rates of tax in effect for corporations under section 11 and section 55 (b)(1). However, the applicable regular and alternative minimum tax rates are the highest rates of tax imposed on individuals under section 1 and section 55 (b) (1) if, at all times during the redetermination year involved (*i.e.*, the year in which the hypothetical increase or decrease in income arises), more than 50 percent of the interests in the entity were held by individuals directly or through 1 or more pass-through entities.

(B) *Closely held.* A pass-through entity is closely held if, at any time during any redetermination year, 50 percent of more (by value) of the beneficial interests in that entity are held (directly or indirectly) by or for 5 or fewer persons. For this purpose, the term "person" has the same meaning as in section 7701(a)(1), except that a pass-through entity is not treated as a person. In addition, the constructive ownership rules of section 1563(e) apply by substituting the term "beneficial interest" for the term "stock" and by substituting the term "pass-through entity" for the term, "corporation" used in that section, as appropriate, for purposes of determining whether a beneficial interest in a pass-through entity is indirectly owned by any person.

(C) *Examples.* The following examples illustrate the application of the rules of paragraph (d)(4)(i):

Example (1). P, a partnership, began a long-term contract on March 1, 1988, and completed this contract in its tax year ending December 31, 1989. P used the percentage of completion method for all contract income. Substantially all of the income from the contract arose from U.S. sources. At all times during all of the years for which income was required to be reported under the contract, exactly 25 percent of the value of P's interests was owned by Corporation M. The remaining 75 percent of the value of P's interests was owned in equal shares by 15 unrelated individuals, who are also unrelated to Corporation M. M's ownership of P represents less than 50 percent of the value of the beneficial interests in P, and, therefore, viewed alone, is insufficient to make P a closely held partnership. In addition, because no 4 of the individual owners together own 25 percent or more of the remaining value of P's beneficial interests, there is no group of 5 owners that together own, directly or indirectly, 50 percent or more by value of the beneficial interests in P. Therefore, P is not closely held pass-through entity.

Because P is not a closely held pass-through entity, and because P completed the contract after the effective date of section 460(b)(4), P is required to use the simplified marginal impact method. Any interest computed under the look-back method will be paid to, or collected from, P, rather than its partners, and must be reported to each of the partners on Form 1065 as interest income or expense. Further, assume that, for the redetermination years, Corporation M is subject to alternative minimum tax at the rate of 20 percent and 3 of the individuals who own interests in P are subject to the highest marginal tax rate of 33 percent in 1988. Regardless of the actual marginal tax rates of its partners, P is required to determine the underpayment or overpayment of tax for each redetermination year at the entity level by applying a single rate to the increase or decrease in income resulting from the reallocation of contract income under the look-back method. Because more than 50 percent of the interests in P are held by individuals, P must use the highest rate specified in section 1 for each redetermination year. Thus, the rate applied by P is 50 percent for 1988, 38.5 percent for 1987, and 28 percent for 1988.

Example (2). Assume the same facts as in Example (1), except that one of the individuals, Individual I, who directly owns 5 percent of the value of the interests of P, also owns 100 percent of the stock of Corporation M. Section 1563(e) (4) of the Code provides that stock owned directly or indirectly by or for a corporation is considered to be owned by any person who owns 5 percent or more in value of its stock in that proportion which the value of the stock which that person so owns bears to the value of all the stock in that corporation. Because section 460(b)(4)(C)(iii) and this paragraph (d) (4) provide that rules similar to the constructive ownership rules of section 1563(e) apply in determining whether a pass-through entity is closely held, all of M's interest in P is attributed to I because I owns 100 percent of the value of the stock in M. Accordingly, because I's direct 5 percent and constructive 25 percent ownership of P, plus the interests owned by any 4 other individual partners, equals 50 percent or more of the value of the beneficial interests of P, P is a closely held pass-through entity within the meaning of section 460(b)(4)(C)(iii). Therefore, P cannot use the simplified marginal impact method at the entity level. Accordingly, each of the partners of P must separately apply the look-back method to their respective interests in the income and expenses attributable to the contract, but each partner may elect to use the simplified marginal impact method with respect to the partner's share of income from the contract.

(D) *Domestic contracts*—(1) General rule. A domestic contract is any contract substantially all of the income of which is from sources in the United States. For this purpose, "substantially all" of the income from a long-term contract is considered to be from United States sources if 95 percent or more of the gross income from the contract is from sources within the United States as determined under the rules in sections 861 through 865.

(2) *Portion of contract income sourced.* In determining whether substantially all of the gross income from a long-term contract is from United States sources, taxpayers must apply the allocation and apportionment principles of sections 861 through 865 only to the portion of the contract accounted for under the percentage of completion method. Under the percentage of completion method, gross income from a long-term contract includes all payments to be received under the contract (*i.e.*, any amounts treated as contract price). Similarly, all costs taken into account in the computation of taxable income under the percentage of completion method are deducted from gross income rather than added to a cost of goods sold account that reduces gross income. Therefore, allocable contract costs are not considered in determining whether a long-term contract is a domestic contract or a foreign contract, even if, under the taxpayer's facts, the allocation of contract costs to any portion of a contract not accounted for under the percentage of completion method would affect the relative percentages of United States and foreign source gross income from the entire contract if this portion of the contract were taken into account in applying the 95-percent test.

(E) *Application to foreign contracts.* If a widely held pass-through entity has some foreign contracts and some domestic contracts, the owners of the pass-through entity each apply the look-back method (using, if they elect, the simplified marginal impact method) to their respective share of the income and expense from foreign contracts. Moreover, in applying the look-back method to foreign contracts at the owner level, the owners do not take into

account their share of increases or decreases in contract income resulting from the application of the simplified marginal impact method with respect to domestic contracts at the entity level.

(F) *Effective date.* The simplified marginal impact method must be applied to pass-through entities described in paragraph (d)(4)(ii) of this section with respect to domestic contracts completed or adjusted in tax years for which the due date of the return (determined with regard to extensions) of the pass-through entity is after November 9, 1988.

(ii) *Elective use*—(A) *General rule.* As provided in paragraph (d)(4)(i) of this section, the simplified marginal impact method must be used by certain pass-through entities with respect to domestic contracts. C corporations, individuals, and owners of closely held pass-through entities may elect the simplified marginal impact method. Owners of other pass-through entities may also elect the simplified marginal impact method with respect to all contracts other than those for which the simplified marginal impact method is required to be applied at the entity level. This rule applies to foreign contracts of widely held pass-through entities. In the case of an electing owner in a pass-through entity, the simplified marginal impact method is applied at the owner level, instead of at the entity level, with respect to the owner's share of the long-term contract income and expense reported by the pass-through entity.

(B) *Election requirements.* A taxpayer elects the simplified marginal impact method by stating that the election is being made on a timely filed income tax return (determined with regard to extensions) for the first tax year the election is to apply. An election to use the simplified marginal impact method applies to all applications of the look-back method to all eligible long-term contracts for the tax year for which the election is made and for any subsequent tax year. The election may not be revoked without the consent of the Commissioner.

(C) *Consolidated group consistency rule.* In the case of a consolidated group of corporations within the meaning of section 1504(a), an election to use the simplified marginal impact method is made by the common parent of the group. The election is binding on all other affected members of the group (including members that join the group after the election is made with respect to all applications of the look-back method after joining). If a member subsequently leaves the group, the election remains binding as to that member unless the Commissioner consents to a revocation of the election. If a corporation using the simplified marginal impact method joins a group that does not use the method, the election is automatically revoked with respect to all applications of the look-back method after it joins the group.

(e) *Delayed reapplication method*—(1) *In general.* For purposes of reapplying the look-back method after the year of contract completion, a taxpayer may elect the delayed reapplication method to minimize the number of required reapplications of the look-back method. Under this method, the look-back method is reapplied after the year of completion of a contract (or after a subsequent application of the look-back method) only when the first one of the following conditions is met with respect to the contract:

(i) The net undiscounted value of increases or decreases in the contract price occurring since the time of the last application of the look-back method exceeds the lesser of $1,000,000 or 10 percent of the total contract price as of that time,

(ii) The net undiscounted value of increases or decreases in the contract costs occurring since the time of the last application of the look-back method exceeds the lesser of $1,000,000 or 10 percent of the total contract price as of that time,

(iii) The taxpayer goes out of existence,

(iv) The taxpayer reasonably believes the contract is finally settled and closed, or

(v) Neither condition (e)(1) (i), (ii), (iii), nor (iv) above is met by the end of the fifth tax year that begins after the last previous application of the look-back method.

(2) *Time and manner of making election.* An election to use the delayed reapplication method may be made for any filing year for which the due date of the return (determined with regard to extensions) is after June 12, 1990. The election is made by a statement to that effect on the taxpayer's timely filed Federal income tax return (determined with regard to extensions) for the first tax year the election is to be effective. An election to use the delayed reapplication method is binding with respect to all long-term contracts for which the look-back method would be reapplied without regard to the election in the year of election and any subsequent year unless the Commissioner consents to a revocation of the election. In the case of a consolidated group of corporations within the meaning of section 1504(a), an election to use the delayed reapplication method is made by the common parent of the group. The election is binding on all other affected members of the group (including members that join the group after the election is made with respect to contracts adjusted after joining). If a member subsequently leaves the group, the election remains binding as to that member unless the Commissioner consents to a revocation of the election. If a corporation that has made the election joins a consolidated group that has not made the election, the election is treated as revoked with respect to contracts adjusted after joining.

(3) *Examples.* The operation of this delayed reapplication method is illustrated by the following examples:

Example (1). X completes a contract in 1987, and applies the look-back method when its return for 1987 is filed. X properly uses $600,000 as the actual contract price in applying the look-back method. In 1990, as a result of the settlement of a dispute with its customer, X redetermines total contract price to be $640,000, and includes $40,000 in gross income. On its return for 1990, X states it is electing the delayed reapplication method. X is not required to reapply the look-back method at that time, because $40,000 does not exceed the lesser of $1,000,000 or 10 percent of the unadjusted contract price of $600,000, and 5 years have not passed since the last application of the look-back method.

Example (2). Assume the same facts as in Example (1), except that at the end of 1992, the fifth year after completion of the contract, no other adjustments to contract price or contract costs have occurred. X is required to reapply the look-back method in 1992 and, accordingly, redetermine its tax liability for each redetermination year. After redetermining the underpayment of tax for those years, X must compute the amount of interest charged on the underpayments. Although 1992 is the filing year, interest is due on the amount of each underpayment resulting from the adjustment only from the due date of the return for each redetermination year to the due date of the return for 1990 because the tax liability for the adjustment was fully paid in 1990. However, from the due of the 1990 return until the due date of the 1992 return, when the look-back method is reapplied for the adjustment, interest is due on the amount of interest attributable to the underpayments.

(f) *Look-back reporting*—(1) *Procedure.* The amount of any interest due or to be refunded as a result of applying the look-back method is computed and reported on Form 8697 for any filing year. In general, the look-back method is applied by and Form 8697 is filed by the taxpayer that reports income from a long-term contract. See paragraph (g) of this section to determine who is responsible for applying the look-back method when, prior to the completion of a long-term contract, there is a transaction that

changes the taxpayer that reports income from the contract.

(2) *Treatment of interest on return*—(i) *General rule.* The amount of interest required to be paid by a taxpayer is treated as an income tax under subtitle A, but only for purposes of subtitle F of the Code (other than sections 6654 and 6655), which adresses tax procedures and administration.

Thus, a taxpayer that fails to file Form 8697 with respect to interest required to be paid or that fails to pay the amount of interest due is subject to any applicable penalties under subtitle F, including, for example, a penalty for failing to file Form 8697. However, interest required to be paid under the look-back method is treated as interest expense for purposes of computing taxable income under subtitle A, even though it is treated as income tax liability for penalty purposes. Interest received under the look-back method is treated as taxable interest income for all purposes, and is not treated as a reduction in tax liability. The determination of whether or not interest computed under the look-back method is treated as tax is determined on a "net" basis for each filing year. Thus, if a taxpayer computes for the current filing year both hypothetical overpayments and hypothetical underpayments for prior years, the taxpayer has an increase in tax only if the interest computed on the underpayments for all those prior years exceeds the interest computed on the overpayments for all those prior years, for all contracts completed or adjusted for the year.

(ii) *Timing of look-back interest.* For purposes of determining taxable income under subtitle A of the Code, any amount of interest refunded to the taxpayer under the look-back method is includible in gross income as interest income in the tax year it is properly taken into account under the taxpayer's method of accounting for interest income. Any amount of interest required to be paid is taken into account as interest expense arising from an underpayment of income tax in the tax year it is properly taken into account under the taxpayer's method of accounting for interest expense. Thus, look-back interest required to be paid by an individual, or by a pass-through entity on behalf of an individual owner (or beneficiary) under the simplified marginal impact method, is personal # interest and, therefore, is disallowed in accordance with § 1.163-9T(b)(2). Interest determined at the entity level under the simplified marginal impact method is allocated among the owners (or beneficiaries) for reporting purposes in the same manner that interest income and interest expense are allocated to owners (or beneficiaries) and subject to the requirements of section 704 and any other applicable rules.

(g) *Mid-contract change in taxpayer.* [Reserved]

(h) *Examples*—(1) *Overview.* This paragraph provides computational examples of the rules of this section. Except as otherwise noted, the examples involve calendar-year taxpayers and involve long-term contracts subject to section 460 that are accounted for using the percentage of completion method, rather than the percentage of completion-capitalized cost method. If the percentage of completion-capitalized cost method were used by a taxpayer described in the examples, the amounts of contract income and expenses shown in the examples would be reduced, for purposes of determining regular taxable income, to the appropriate fraction (40, 70, or 90 percent) of contract items accounted for under the percentage of completion method. Tens of thousands of dollars ($ 00,000's) are omitted from the figures in the examples. The contracts described in the examples are assumed to be the taxpayers' only contracts that are subject to the look-back method of section 460. Except as otherwise stated, the examples assume that the taxpayer has no adjustments and preferences for purposes of section 55, so that alternative minimum taxable income is the same as taxable income, and no alternative minimum tax is imposed for the years involved. The examples assume that the taxpayer does not elect the 10-percent method, the simplified marginal impact method, or the delayed reapplication method.

(2) *Step One.* The following example illustrates the application of paragraph (c)(2):

Example (1). In 1988, W completes three long-term contracts, A, B, and C, entered into on January 1 of 1986, 1987, and 1988, respectively. For Contract A, W used the completed contract method of accounting. For Contract B, W used the percentage of completion-capitalized cost method of accounting, taking into account 60 percent of contract income under W's normal method of accounting, which was the completed contract method. For Contract C, W used the percentage of completion method of accounting. The total price for each contract was $1,000. In computing alternative minimum taxable income, W is required to use the percentage of completion method for Contracts B and C. W used regular tax costs for purposes of determining the degree of contract completion under the alternative minimum tax.

Contract A is not taken into account for purposes of applying the look-back method, because it is subject to neither section 460 nor section 56(a)(3). Thus, even if W had used the percentage of completion method as permitted under § 1.451-3, instead of the completed contract method, the look-back method would not be applicable because the Contract A was entered into before the effective date of section 460.

The actual costs allocated to Contracts B and C under section 460(c) and incurred in each year of the contract were as follows:

Contract	1987	1988	1989	Total
B	$200	$400	$200	$800
C	100	300	400	800

In applying the look-back method, the first step is to allocate the contract price among tax years preceding and including the completion year. That allocation would produce the following amounts of gross income for purposes of the regular tax. Note that no income from Contract C is allocated to 1987, the year before the contract was entered into, even though contract costs were incurred in 1987:

Contract	1987	1988	1989
B	$100 (40%X$200/$800X$1000)	$200 ((40%X$600/$800X$1000)-$100)	$700
C	0	500 ($400/$800X$1000)	500

Because the percentage of completion-capitalized cost method may not be used for alternative minimum tax purposes, the allocation of contract income would produce the following amounts of gross income for purposes of computing alternative minimum taxable income:

Contract	1987	1988	1989
B	$250 ($250/$500X$1000)	$500 ($500/$500X$1000)-$250	$250
C	0	500	500

(3) *Step Two.* The following example illustrates the application of paragraph (c)(3):

Example (i). (i) X enters into two long-term contracts (D and E) in 1988. X determines its tax liability for 1988 as follows:

e=estimate
a=amount originally reported (actual)
h=hypothetical

	1988		Total
	D	E	
1988 contract costs	$3,000e	$2,000e	
Total contract costs	6,000e	8,000e	
Total contract price	10,000e	10,000e	
1988 completion (%)	37.5e	25e	
1988 gross income	3,750e	2,500e	
Less, 1988 costs	(3,000e)	(2,000e)	
1988 net contract income	750e	500e	$1,250e
Other 1988 net income (loss)			(2,000e)
Taxable income (NOL)			(750e)
Tax			0e
Federal from NOL carryback fully absorbed in 1985, at 46%			345e

(ii) X completes Contract D during 1989. X determines its taxable income for 1989 as follows:

	1989		Total
	D	E	
1989 contract costs	$3,000a	0e	
Total contract costs	6,000a	8,000e	
Total contract price	10,000e	10,000e	
1989 completion (%)	100	22.2e	
1989 gross income/(loss)	4,250	($750e)	
Less, 1989 costs	($3,000a)	0e	
1989 net contract income	3,250e	($750e)	$2,572e
Other 1989 net income (loss)			0e
Taxable income (NOL)			2,572e
Tax at 34%			1,011e

(iii) For purposes of the look-back method, X must reallocate the actual total contract D price between 1988 and 1989 based on the actual total contract D costs. This results in the following hypothetical underpayment of tax for 1988 for purposes of the look-back method. Note that X does not reallocate the contract E price in applying the look-back method in 1989 because contract E has not been completed, even though X's estimate of contract E costs has changed. The following computation is only for purposes of applying the look-back method, and does not result in the assessment of a tax deficiency.

	1988		Total
	D	E	
1989 contract costs	$3,000a	$2,000e	
Total contract costs	6,000a	8,000e	
Total contract price	10,000e	10,000e	
1988 completion (%)	50a	25e	
1988 gross income	5,000h	2,500e	
Less, 1988 costs	(3,000a)	(2,000e)	
1988 net contract income	2,000h	500e	$2,500h
Other 1988 net income (loss)			(2,000a)
Taxable income (NOL)			500h
Tax at 34%			170h
Less, previously computed tax			—0a
Underpayment of 1988 tax			170h
Underpayment of 1985 tax from NOL carryback refund in 1988			345h

	1988		Total
	D	E	
Total [illegible] of tax			$18h

For purposes of any subsequent application of the look-back method for which 1989 is a redetermination year, because the reallocation of contract income and redetermination of tax liability are cumulative, X will use for 1989 the amount of contract D income and the amount of tax liability that would have been reported in 1989 if X had used actual contract costs instead of the amounts that were originally reported using the estimate of $9,000. Assuming no subsequent revisions (due to, for example, adjustments to contract D price and costs determined after the end of 1989), this amount would be determined as follows:

	1989		Total
	D	E	
1989 contract costs	$3,000a	0a	
Total contract costs	9,000a	$8,000a	
Total contract price	10,000a	10,000a	
1989 completion (%)	100a	22.2a	
1989 gross income	5,000h	(278a)	
Less, 1989 costs	(9,000a)	0a	
1989 net contract income	2,000h	(278a)	$1,722h
Other 1989 net income (loss)			0a
Taxable income (NOL)			1,722h
Tax at 34%			585h

(iv) X completes contract E during 1990. X determines its taxable income for 1990 as follows:

	1990		Total
	D	E	
1990 contract costs		$7,000a	
Total contract costs		8,000a	
Total contract price		10,000a	
1990 completion (%)		100a	
1990 gross income		7,778a	
Less, 1990 costs		(7,000a)	
1990 net contract income		778a	$778a
Other 1990 net income (loss)			0a
Taxable income (NOL)			778a
Tax at 34%			265a

(v) For purposes of the look-back method, X must reallocate the actual total contract E price between the 1988, 1989, and 1990, based on the actual total contract E costs.

This results in the following hypothetical overpayment of tax for 1988. Note that X uses the amount of income for contract D determined in the last previous application of the look-back method, and not the amount of income actually reported:

	1988		Total
	D	E	
1988 contract costs	$3,000a	$2,000a	
Total contract costs	96,000a	99,000a	
Total contract price	$10,000a	$10,000a	
1988 completion (%)	50a	22.2a	
1988 gross income	95,000h	$2,222h	
Less, 1988 costs	($3,000a)	($2,000a)	
1988 net contract income	$2,000h	$222h	$2,222h
Other 1988 net income (loss)			($2,000a)
Taxable income (NOL)			$222h
Tax at 34%			$75h
Less, previously computed tax (based on most recent application of the look-back method)			$179h
Overpayment of 1988 tax			$104h

In applying the look-back method in 1995, X again uses the amounts substituted as of the last previous application of the look-back method with respect to contract D. Thus, X computes its hypothetical underpayment for 1988 as follows:

	1988		Total
	D	E	
1988 contract costs	$3,000a	0a	
Total contract costs	$6,000a	$9,000a	
Total contract price	$10,000a	$10,000a	
1988 completion (%)	100a	22.2a	
1988 gross income	$5,000h	$0h	
Less, 1988 costs	($3,000a)	($0a)	
1988 net contract income	$2,000h	0a	$2,000h
Other 1988 net income (loss)			($0a)
Taxable income (NOL)			$2,000h
Tax at 34%			$680h
Less, previously computed tax			$585h
Underpayment of 1988 tax			$95h

For purposes of any subsequent application of the look-back method for which 1990 is a redetermination year, X will use for 1990 the amount of Contract E income, and the amount of tax liability, that was originally reported in 1990 because X's estimate of the total contract costs from $8,000 to $9,000 did not change after 1988. Without regard to any subsequent revisions, these amounts are the same as in the table in paragraph (h)(3)(iv) above.

(4) *Post-completion adjustments.* The following example illustrates the application of paragraph (c)(1)(ii):

Example (3). The facts are the same as in Example (2). In 1991, X settles a lawsuit against its customer in Contract E. The customer pays X an additional $3,000, without interest, in 1991. Applying the Federal mid-term rate then in effect, this $3,000 has a discounted value at the time of contract completion in 1990 of $2,700. X is required to apply the look-back method for 1991 even though no contract was completed in 1991. X must include the full $3,000 adjustment (which was not previously includible in total contract price) in gross income for 1991. X does not elect not to discount adjustments to the contract price or costs. Thus, X adjusts the contract price by the discounted amount of the adjustment and, therefore, uses $12,700 (not $13,000) for total Contract E price, rather than $10,000, which was used when the look-back method was first applied with respect to Contract E.

For purposes of the look-back method, X must allocate the revised total Contract E price of $12,700 between 1988, 1989 and 1990 based on the actual total Contract E costs, and compare the resulting revised tax liability with the tax liability determined for the last previous application of the look-back method involving those years. This results in the following hypothetical underpayments of tax for purposes of the look-back method:

r=revised

	1988		Total
	D	E	
1988 contract costs	$3,000a	$2,000a	
Total contract costs	$6,000a	$9,000a	
Total contract price	$10,000a	$12,700r	
1988 completion (%)	50a	22.2a	
1988 gross income	$5,000h	$2,822rh	
Less, 1988 costs	($3,000a)	($2,000a)	
1988 net contract income	$2,000h	822rh	$2,222rh
Other 1988 net income (loss)			($2,000a)
Taxable income			$822rh
Tax at 34%			$279rh
Less, previously computed tax			$75h
Underpayment of 1988 tax			$204rh

No Contract E costs were incurred in 1989, and there is no hypothetical underpayment for 1989.

	1990		
	D	E	Total
1990 contract costs		$7,000a	
Total contract costs		$9,000a	
Total contract price		$12,700r	
1990 completion (%)		100a	
1990 gross income		$3,878rh	
Less 1990 costs		($7,000a)	
1990 net contract income		$2,878rh	$2,878rh
Other 1990 net income (loss)			0a
Taxable income (NOL)			$2,878rh

	1990		
	D	E	Total
Tax at 34%			
Less, previously computed tax			
Underpayment of 1989 tax			

In 1992, X incurs an additional cost of $1,000 allocable to the contract, which was not previously includible in total contract costs. Applying the Federal mid-term rate then in effect, the $1,000 has a discounted value at the time of contract completion of $900. X deducts this additional $1,000 in expenses in 1992. Based on this increase in contract costs, X reapplies the look-back method, and determines the following hypothetical underpayments for 1988, 1989 and 1990 for purposes of the look-back method:

	1989		Total
	D	E	
1988 contract costs	$3,000a	$2,000a	
Total contract costs	$6,000a	$9,000a	
Total contract price	$10,000a	$12,700a	
1989 completion (%)	60a	20.4a	
1989 gross income	$5,000h	$2,592h	
Less, 1988 costs	($3,000a)	($2,000a)	
1988 net contract income	$2,000h	$592h	$2,592h
Other 1988 net income (loss)			($2,000a)
Taxable income (NOL)			$592h
Tax at 34%			$201h
Less, previously computed tax			$278h
Overpayment of 1989 tax			($77h)

No Contract E costs were incured in 1990, and there is no hypothetical underpayment for 1990.

	1990		Total
	D	E	
1990 contract costs			$7,000a
Total contract costs		$9,000a	
Total contract price		12,700a	
1990 completion (%)		92a	
1990 gross income		$1,071h	
Less, 1990 costs		(7,000a)	
1990 Net contract income		2,071h	$2,071h
Other 1990 net income (loss)			0a
Taxable income (NOL)			2,071h
Tax at 34%			704h
Less, previously computed tax			$978h
Overpayment of 1989 tax			($274h)

(5) *Alternative minimum tax.* The operation of the look-back method in the case of a taxpayer liable for the alternative minimum tax as provided in paragraph (c)(3)(vi) is illustrated by the following examples:

Example (i). Y enters into a long-term contract in 1988 that is completed in 1990. Y used regular tax costs for purposes of determining the degree of contract completion under the alternative minimum tax.

(i) Y determines its tax liability for 1988 as follows:

1988 contract costs	$6,000a
Total contract costs	$6,000a
Total contract price	$20,000a
1988 completion (%)	50a
1988 gross income	$10,000a
Less, 1988 contract costs	($4,000a)
1988 net contract income	$6,000a
Other 1988 net income/(loss)	($3,460a)
Taxable income	$2,600a
Regular tax at 34%	$884a
Adjustments and preferences to produce alternative minimum taxable income	$600a
Alternative minimum taxable income	$3,200a
Tentative minimum tax at 20%	640a
Tax liability	$884a

In 1989, Y determines the following amounts:

1989 contract costs	$3,000a
Total contract costs	$10,000a
Total contract price	$20,000a

(ii) For purposes of applying the look-back method, Y redetermines its tax liability for 1988, which results in a hypothetical overpayment of tax. This hypothetical

overpayment is determined by comparing Y's original regular tax liability for 1986 with the hypothetical total tax liability (including alternative minimum tax liability) for that year because Y would have paid the alternative minimum tax if Y had used its actual contract costs to report income:

1986 contract costs	$4,000a
Total contract costs	$10,000a
Total contract price	$20,000a
1986 completion(%)	40a
1986 gross income	$8,000b
less, 1986 contract costs	($4,000a)
1986 net contract income	$4,000b
Other 1986 net income/(loss)	($3,400a)
Taxable income	$600b
Regular tax at 34%	$204b
Adjustments and preferences to produce alternative minimum taxable income	$600a
Alternative minimum taxable income	$1,200b
Tentative minimum tax at 20%	$240b
Alternative minimum tax	$240b
Total tax liability	$540b
less, previously computed tax	$384a
Underpayment/(overpayment)	($144b)

(6) *Credit carryovers.* The operation of the look-back method in the case of credit carryovers as provided in paragraph (c)(3)(v) is illustrated by the following example:

Example (5). Z enters into a contract in 1986 that is completed in 1987. Z determines its tax liability for 1986 as follows:

1986 contract costs	$400a
Total contract costs	$1,000a
Total contract price	$2,000a
1986 completion (%)	40a
1986 gross income	$800a
Less, 1986 costs	($400a)
1986 net contract income	$400a
Other 1986 net income	$0a
Taxable income	$400a
Tax at 46%	$184a
Unused tax credits carried forward from 1985 allowable in 1986	$350a
Net tax due	$0a

Z determines the following amounts for 1987:

1987 contract costs	$400a
Total contract price	$2,000a
Total contract costs	$800a

If Z had used actual rather than estimated contract costs in determining gross income for 1986, Z would have reported tax liability of $276 (46%x$600) rather than $184. However, Z would have paid no additional tax for 1986 because its unused tax credits carried forward from 1985 would have been sufficient to offset this increased tax liability. Therefore, there is no hypothetical underpayment for 1986 for purposes of the look-back method. However, this hypothetical earlier use of the credit may increase the hypothetical tax liability for 1987 (or another subsequent year) for purposes of subsequent applications of the look-back method.

(7) *Net operating losses.* The operation of the look-back method in the case of net operating loss ("NOL") carryovers as provided in paragraph (c)(3)(v) is illustrated by the following example:

Example (6). A entered into a long-term contract in 1986, which was completed in 1987. A determined its tax liability for 1986 as follows:

1986 contract costs	$400a
Total contract costs	$1,000a
Total contract price	$2,000a
1986 completion (%)	40a
1986 gross income	$800a
Less, 1986 costs	($400a)
1986 net contract income	$400a
Other 1986 net income/(loss)	($1,000a)
Taxable income/(NOL)	($600a)
Tax	$0a

A elected to carry this loss forward to 1987 pursuant to section 172(b)(3)(C).

For 1987, A determined the following amounts:

1987 contract costs	$400a
Total contract costs	$800a
Total contract price	$2,000a

If actual rather than estimated contract costs had been used in determining gross income for 1986, A would have reported $1,000 of gross income from the contract rather than $800, and thus would have reported a loss of $400 rather than $600. However, since A would have paid no tax for 1986 regardless of whether actual or estimated contract costs had been used, A does not have an underpayment for 1986 for purposes of the look-back method. If A had, instead, carried back the 1986 NOL, and this NOL had been absorbed in the tax years 1983 through 1985, it would have resulted in refunds of tax for those years in 1986. When A applies the look-back method, a hypothetical underpayment of tax would have resulted for those years due to a hypothetical reduction in the amount that would have been refunded if income had been reported on the basis of actual contract costs. See Example (2)(iii).

(8) *Alternative minimum tax credit.* The following example illustrates the application of the look-back method if affected by the alternative minimum tax credit as provided in paragraph (c)(3)(vi):

(i) Example (4), above illustrates that the reallocation of contract income under the look-back method can result in a hypothetical underpayment or overpayment determined using the alternative minimum tax rate, even though the taxpayer actually paid only the regular tax for that year. However, application of the look-back method had no effect on the difference between the amount of alternative minimum taxable income and the amount of regular taxable income taken into account in that year because the taxpayer was required to use the percentage of completion method for both regular and alternative minimum tax purposes and used the same version of the percentage of completion method for both regular and alternative minimum tax purposes (*i.e.*, the taxpayer had made an election to use regular tax costs in determining the percentage of completion for purposes of computing alternative minimum taxable income).

(ii) The following example illustrates the application of the look-back method in the case of a taxpayer that does not use the percentage of completion method of accounting for long-term contracts in computing taxable income for regular tax purposes and thus must make an adjustment to taxable income to determine alternative minimum taxable income. The example also shows how interest is computed under the look-back method when the taxpayer is entitled to a credit under section 53 for minimum tax paid because of this adjustment.

Example (7). X is a taxpayer engaged in the construction of real property under contracts that are completed within a 24-month period and whose average annual gross receipts do not exceed $10,000,000. As permitted by section 460(e)(1)(B), X uses the completed contract method ("CCM") for regular tax purposes. However, X is engaged in the construction of commercial real property and, therefore, is required to use the percentage of completion method ("PCM") for alternative minimum tax ("AMT") purposes.

Assume that for 1988, 1989, and 1990, X has only one long-term contract, which is entered into in 1988 and completed in 1990. Assume further that X estimates gross income from the contract to be $2,000, total contract costs to be $1,000, and that the contract is 25 percent complete in 1988 and 75 percent complete in 1989. In 1990, the year of completion, the percentage of completion does not change but, upon completion, gross income from the contract is actually $3,000, instead of $2,000, and costs are actually $1,000.

For 1988, 1989, and 1990, X's income and tax liability using estimated contract price and costs are as follows:

Estimates	1988	1989	1990
Regular tax:			
Long-term:			
Contract-CCM	0	0	$2,000
Other income	0	$5,000	0
Total income	0	$5,000	$2,000
Tax @ 34%	0	$1,700	$680
AMT			
Gross income	$500	$1,000	$1,500
Deductions	$(250)	$(500)	$(250)
Total long-term:			
Contract-PCM	$250	$500	$1,250
Other income	0	$5,000	0
Total income	$250	$5,500	$1,250
Tax @ 20%	$50	$1,100	$250
Tentative Minimum Tax	$50	$1,100	$250
Regular Tax	0	$1,700	$680
Minimum Tax Credit	0	$(50)	0
Net Tax Liability	$50	$1,650	$680

When X files its tax return for 1990, X applies the look-back method to the contract. For 1988, 1989, and 1990, X's income and tax liability using actual contract price and costs are as follows:

Actual	1988	1989	1990
Regular tax:			
Long-term:			
Contract-CCM	0	0	$2,000
Other income	0	$5,000	0
Total income	0	$5,000	$2,000
Tax @ 34%	0	$1,700	$680
AMT			
Gross income	$750	$1,500	$750
Deductions	$(250)	$(500)	$(250)
Total long-term:			
Contract-PCM	$500	$1,000	$500
Other income	0	$5,000	0
Total income	$500	$6,000	$500
Tax @ 20%	$100	$1,200	$100
Tentative Minimum Tax	$100	$1,200	$100
Regular Tax	0	$1,700	$680
Minimum Tax Credit	0	$(100)	0
Net Tax Liability	$100	$1,600	$580
Underpayment	$50		
Overpayment		$50	

As shown above, application of the look-back method results in a hypothetical underpayment of $50 for 1988 because X was subject to the alternative minimum tax for that year. Interest is charged to X on this $50 underpayment from the due date of X's 1988 return until the due date of X's 1990 return.

In 1989, although X was required to compute alternative minimum taxable income using the percentage of completion method, X was not required to pay alternative minimum tax. Nevertheless, the look-back method must be applied to 1989 because use of actual rather than estimated contract price in computing alternative minimum taxable income for 1988 would have changed the amount of the alternative minimum tax credit carried to 1989. Interest is paid to X on the resulting $50 overpayment from the due date of X's 1989 return until the due date of X's 1990 return.

(9) *Period for interest.* The following Examples (8) through (11) illustrate how to determine the period for computing interest as provided in paragraph (c)(4):

Example (8). The facts are the same as in Example (6), except that the contract is completed in 1988, and A determined the following amounts for 1987 and 1988:

For 1987:	
1987 contract costs	0
Total contract costs	$1,000a
Total contract price	$2,000a
1987 completion (%)	40a
1987 gross income	0a
Less, 1987 costs	0a
Other 1987 net income	$800a
Net operating loss carryforward from 1986	$(800a)
Taxable income	0a
Tax	0a
For 1988:	
1988 contract costs	$400a
Total contract costs	$800a
Total contract price	$2,000a

If actual rather than estimated contract costs had been used in determining gross income for 1988, A would have reported $1,000 of gross income from the contract for 1988 rather than $800, and would have reported a net operating loss carryforward to 1987 of $400 rather than $800. Therefore, A would have reported taxable income of $200, and would have paid tax of $80 (*i.e.*, $200 × 40%) for 1987. The due date for filing A's Federal income tax return for its 1988 taxable year is March 15. A obtains an extension and files its 1988 return on September 15, 1989. Under the look-back method, A is required to pay interest on the amount of this hypothetical underpayment ($80) computed from the due date (determined without regard to extensions) for A's return for 1987 (not 1988, even though 1988 was the year in which the net operating loss arose) until March 15 (not September 15), the due date (without regard to extensions) of A's return for 1988. A is required to pay additional interest from March 15 until September 15 on the amount of interest outstanding as of March 15 with respect to the hypothetical underpayment of $80.

Example (9). The facts are the same as in Example (8), except that A carries the net operating loss of $800 back to 1986 rather than forward to 1987, and receives a refund of $276 ($800 reduction in 1986 taxable income × 40% rate in effect in 1986). As in Example (8), if actual contract costs had been used, A would have reported a loss for 1988

of $600 rather than $600. Thus, A would have received a refund of 1988 tax of $184 ($400 × 46%) rather than $276. Under the look-back method A is required to pay interest on the difference in these two amounts ($92) computed from the due date (determined without regard to extensions) of A's return for 1988 (the year in which the carryback arose rather than 1989, the year in which it was used) until the due date of A's return for 1989.

Example (10). B enters into a long-term contract in 1988 that is completed in 1989. B determines its 1988 tax liability as follows:

1988 contract costs	$400a
Total contract costs	$1,000e
Total contract price	$2,000e
1988 completion (%)	40e
1988 gross income	$800a
Less, 1988 costs	($400a)
1988 net contract income	$400a
Other 1988 net income	$2,000a
Taxable income	$2,400a
Tax at 46%	$1,104a

B determines its tax liability for 1987 as follows:

1987 contract costs	$400a
Total contract costs	$1,600e
Total contract price	$2,000e
1987 completion (%)	50e
1987 gross income	$200a
(+(50% × $2,000)—$800 previously reported) less, 1987 costs	($400a)
1987 net contract income	($200a)
Other 1987 net income/(loss)	($2,200a)
Taxable income (NOL)	($2,400a)
Tax	0a

Assume that B had no taxable income in either 1984 or 1985, so that the entire amount of the $2,400 net operating loss is carried back to 1988, and B receives a refund, with interest from the due date of B's 1987 return, of the entire $1,104 in tax that it paid for 1988.

In 1988, B determines the following amounts:

1988 contract costs	$800a
Total contract costs	$1,600a
Total contract price	$2,000a

If B had used actual contract costs rather than estimated costs in determining its gross income for 1988, B would have had gross income from the contract of $800 rather than $800, and thus would have had taxable income of $2,100 rather than $2,400, and would have paid tax of $966 rather than $1,104. B is entitled to receive interest on the difference between these two amounts, the hypothetical overpayment of tax of $138. Interest is computed from the due date (without regard to extensions) of B's return for 1988 until the due date for B's return for 1987. Interest stops running at this date, because B's hypothetical overpayment of tax ended when B filed its original 1987 return and received a refund for the carryback to 1988, and interest on this refund began to run only from the due date of B's 1987 return. See section 6611(f).

Example (11). C enters into a long-term contract in 1988, its first year in business, which is completed in 1989. C determines its tax liability for 1988 as follows:

1988 contract costs	$400a
Total contract costs	$1,000e
Total contract price	$2,000e
1988 completion (%)	40e
1988 gross income	$800a
less, 1988 costs	($400a)
1988 net contract income	$400a
Other 1988 net income	$2,000a
Taxable income (NOL)	$2,400a
Tax at 46%	$1,104a

C determines its tax liability for 1987 as follows:

1987 contract costs	$400a
Total contract costs	$1,066e
Total contract price	$2,000e
1987 completion (%)	75e
1987 gross income	$700a
Less, 1987 costs	($400a)
1987 net contract income	$300a
Other 1987 net income	($2,450a)
Taxable income (NOL)	($2,150a)
Tax	$10a

C carries back the net operating loss to 1988, and files an amended return for 1988, showing taxable income of $250, and receives a refund of $969 (46% x $2,150). Interest on this refund begins to run only as of the due date of C's 1987 return. See section 6611(f).

In 1988, when the contract is completed, C determines the following amounts:

1988 contract costs	$800a
Total contract costs	$1,600a
Total contract price	$2,000a

If C had used actual contract price and contract costs in determining gross income for 1988, it would have reported gross income from the contract of $500 rather than $600, taxable income of $2,100 rather than $2,400, and tax liability of $966 rather than $1,104.

If C had used actual contract price and contract costs in determining gross income for 1987, it would have reported gross income from the contract of $500 rather than $700, and would have reported a net operating loss of $2,350, rather than $2,150, which would have been carried back to 1986.

Under the look-back method, C receives interest with respect to a total 1988 hypothetical overpayment of $138 ($1,104 minus $966). C is credited with interest on $23 of this amount only from the due date of C's 1988 return until the due date of C's 1987 tax return, because this portion of C's total hypothetical overpayment for 1988 was refunded to C with interest computed from the due date of C's 1987 return and, therefore, was no longer held by the government. However, because the remainder of the total hypothetical overpayment of $115 was not refunded to C, C is credited with interest on this amount from the due date of C's 1988 return until the due date of C's 1988 tax return.

Under the look-back method, C receives no interest with respect to 1987, because C had no tax liability for 1987 using either estimated or actual contract price and costs.

BILLING CODE 4830-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2610 and 2622

Late Premium Payments and Employer Liability Underpayments and Overpayments; Interest Rate for Determining Variable Rate Premium; Amendments to Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This document notifies the public of the interest rate applicable to late premium payments and employer liability underpayments and overpayments for the calendar quarter beginning October 1, 1990. This interest rate is established quarterly by the Internal Revenue Service. This document also sets forth the interest rates for valuing unfunded vested benefits for premium purposes for plan years beginning in July through September of 1990. These interest rates are established pursuant to section 4006 of the Employee Retirement Income Security Act of 1974, as amended. The effect of these amendments is to advise plan sponsors and pension practitioners of these new interest rates.

EFFECTIVE DATE: October 1, 1990.

FOR FURTHER INFORMATION CONTACT: Harold Ashner, Senior Counsel, Office of the General Counsel, Code 22500,

Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; telephone (202) 778–8824 ((202) 778–8859 for TTY and TTD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: As part of title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Pension Benefit Guaranty Corporation ("PBGC") collects premiums from ongoing plans to support the single-employer and multiemployer insurance programs. Under the single-employer program, the PBGC also collects employer liability from those persons described in ERISA section 4062(a). Under ERISA section 4007 and 29 CFR 2610.7, the interest rate to be charged on unpaid premiums is the rate established under section 6601 of the Internal Revenue Code ("Code"). Similarly, under 29 CFR 2622.7, the interest rate to be credited or charged with respect to overpayments or underpayments of employer liability is the section 6601 rate. These interest rates are published by the PBGC in Appendix A to the premium regulation and Appendix A to the employer liability regulation.

The Internal Revenue Service has announced that for the quarter beginning October 1, 1990, the interest charged on the underpayment of taxes will be at a rate of 11 percent. Accordingly, the PBGC is amending Appendix A to 29 CFR part 2610 and Appendix A to 29 CFR part 2622 to set forth this rate for the October 1–December 31, 1990 quarter.

Under ERISA section 4006(a)(3)(E)(iii)(II), in determining a single-employer plan's unfunded vested benefits for premium computation purposes, plans must use an interest rate equal to 80% of the annual yield on 30-year Treasury securities for the month preceding the beginning of the plan year for which premiums are being paid. Under § 2610.23(b)(1) of the premium regulation, this value is determined by reference to 30-year Treasury constant maturities as reported in Federal Reserve Statistical Releases G.13 and H.15. The PBGC publishes these rates in Appendix B to the regulation.

The PBGC publishes these monthly interest rates in Appendix B on a quarterly basis to coincide with the publication of the late payment interest rate set forth in Appendix A. (The PBGC publishes the Appendix A rates every quarter, regardless of whether the rate has changed.) Unlike the Appendix A rate, which is determined prospectively, the Appendix B rate is not known until a short time after the first of the month for which it applies. Accordingly, the PBGC is hereby amending Appendix B to part 2610 to add the vested benefits valuation rates for plan years beginning in July through September of 1990.

The appendices to 29 CFR parts 2610 and 2622 do not prescribe the interest rates under these regulations. Under both regulations, the Appendix A rates are the rates determined under section 6601(a) of the Code. The interest rates in Appendix B to part 2610 are prescribed by ERISA section 4006(a)(3)(E)(iii)(II) and § 2610.23(b)(1) of the regulation. These appendices merely collect and republish the interest rates in a convenient place. Thus, the interest rates in the appendices are informational only. Accordingly, the PBGC finds that notice of the public comment on these amendments would be unnecessary and contrary to the public interest. For the above reasons, the PBGC also believes that good cause exists for making these amendments effective immediately.

The PBGC has determined that none of these amendments is a "major rule" within the meaning of Executive Order 12291, because they will not have an annual effect on the economy of $100 million or more; nor create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because no general notice of proposed rulemaking is required for these amendments, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects

29 CFR Part 2610

Employee benefit plans, Penalties, Pension insurance, Pensions, and Reporting and recordkeeping requirements.

29 CFR Part 2622

Business and industry, Employee benefit plans, Pension insurance, Pensions, Reporting and recordkeeping requirements, and Small businesses.

In consideration of the foregoing, appendix A and appendix B to part 2610 and appendix A to part 2622 of chapter XXVI of title 29, Code of Federal Regulations, are hereby amended as follows:

PART 2610—PAYMENT OF PREMIUMS

1. The authority citation for part 2610 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1306, 1307, (1988), as amended by sec. 7861(h), Public Law 101–239, 103 Stat. 2106, 2242.

2. Appendix A to part 2610 is amended by adding a new entry for the quarter beginning October 1, 1990, to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix A—Late Payment Interest Rates

The following table lists the late payment interest rates under § 2610.7(a) for the specified time periods:

From	Through	Interest rate (percent)
October 1, 1990	December 31, 1990	11

3. Appendix B to part 2610 is amended by adding to the table of interest rates therein new entries for premium payment years beginning in July through September of 1990, to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix B—Interest Rates for Valuing Vested Benefits

The following table lists the required interest rates to be used in valuing a plan's vested benefits under § 2610.23(b) and in calculating a plan's adjusted vested benefits under § 2610.23(c)(1):

For premium payment years beginning in—	Required interest rate [1]
• • • • •	
July 1990	8.77
August 1990	8.89
September 1990	7.09

[1] The required interest rate listed above is equal to 85% of the annual yield for 30-year Treasury constant maturities, as reported in Federal Reserve Statistical Release G.13 and H.15 for the calendar month preceding the calendar month in which the premium payment year begins.

PART 2622—EMPLOYER LIABILITY FOR WITHDRAWALS FROM AND TERMINATIONS OF SINGLE-EMPLOYER PLANS

4. The authority citation for part 2622 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1362–1364, 1367–68, as amended by secs. 9312, 9313, Pub. L. 100–203, 101 Stat. 1330.

5. Appendix A to part 2622 is amended by adding a new entry for the quarter beginning October 1, 1990, to read as follows. The introductory text is republished for the convenience of the reader and remains unchanged.

Appendix A—Late Payment and Overpayment Interest Rates

The following table lists the late payment and overpayment interest rates under § 2622.7 for the specified time periods:

From	Through	Interest rate (percent)
• • • • •		
October 1, 1990..	December 31, 1990.	11

Issued in Washington, DC, the 9th day of October 1990.

James B. Lockhart III,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

29 CFR Part 2619

Valuation of Plan Benefits in Single-Employer Plans; Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the regulation of Valuation of Plan Benefits in Single-Employer Plans contains the interest rates and factors for the period beginning November 1, 1990. The use of these interest rates and factors to value benefits is mandatory for some terminating single-employer pension plans and optional for others. The Pension Benefit Guaranty Corporation adjusts the interest rates and factors periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after November 1, 1990 and will remain in effect until the PBGC issues new interest rates and factors.

EFFECTIVE DATE: November 1, 1990.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Senior Counsel, Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202–778–8850 (202–778–8859 for TTY and TDD only). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation's ("PBGC's") regulation on Valuation of Plan Benefits in Single-Employer Plans (29 CFR part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Under ERISA section 4041(c), all plans wishing to terminate in a distress termination must value guaranteed benefits and "benefit liabilities", i.e., all benefits provided under the plan as of the plan termination date, using the formulas set forth in part 2619. Plans terminating in a standard termination may, for purposes of the Standard Termination Notice filed with PBGC, use these formulas to value benefit liabilities, although this is not required. (Such plans may value benefit liabilities that are payable as annuities on the basis of a qualifying bid obtained from an insurer.)

Appendix B in part 2619 sets forth the interest rates and factors that are to be used in the formulas contained in the regulation. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

The rates and factors currently in use have been in effect since October 1, 1990. This amendment adds to appendix B a new set of interest rates and factors for valuing benefits in plans that terminate on or after November 1, 1990, which set reflects an increase of ¼ percent in the immediate interest rate from 7¼ to 7¾ percent.

Generally, the interest rates and factors will be in effect for at least one month. However, any published rates and factors will remain in effect until such time as PBGC publishes another amendment changing them. Any change in the rates normally will be published in the Federal Register by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest rates and factors promptly so that the rates can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation of benefits in plans that will terminate on or after November 1, 1990, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, and Pensions.

In consideration of the foregoing, part 2619 of chapter XXVI, title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2619—[AMENDED]

1. The authority citation for part 2619 is revised to read as follows:

Authority: 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, and 1362 (1988).

2. Rate Set 87 of appendix B is revised and Rate Set 88 of appendix B is added to read as follows. The introductory text is published for the convenience of the reader and remains unchanged.

Appendix B—Interest Rates and Quantities Used To Value Immediate and Deferred Annuities

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "C_y" for deferred annuities and to value both portions of a refund annuity. An interest rate of 5% shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, k_1, k_2, k_3, n_1, and n_2 are defined in § 2619.45.

Rate set	For plans with a valuation date		Immediate annuity rate (percent)	Deferred annuities				
	On or after	Before		i_1	i_2	i_3	n_1	n_2
87	10-1-90	11-1-90	7.50	1.0675	1.0550	1.0400	7	8
88	11-1-90		7.75	1.0700	1.0575	1.0400	7	8

BILLING CODE 7708-01-M

29 CFR Part 2644

Notice and Collection of Withdrawal Liability; Adoption of New Interest Rate

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Notice and Collection of Withdrawal Liability. That regulation incorporates certain interest rates published by another Federal agency. The effect of this amendment is to add to the appendix of that regulation the new interest rate in effect from July 1, 1990 to December 31, 1990.

EFFECTIVE DATE: July 1, 1990.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Senior Counsel, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; telephone 202-778-8850 (202-778-8859 or TTY and TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Under section 4219(c) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Pension Benefit Guaranty Corporation ("the PBGC") promulgated a final regulation on Notice and Collection of Withdrawal Liability. That regulation, codified at 29 CFR part 2644, deals with the rate of interest to be charged by multiemployer pension plans on withdrawal liability payments that are overdue or in default, or to be credited by plans on overpayments of withdrawal liability. The regulation allows plans to set rates, subject to certain restrictions. Where a plan does not set the interest rate, § 2644.3(b) of the regulation provides that the rate to be charged or credited for any calendar quarter is the average quoted prime rate on short-term commercial loans for the fifteenth day (or the next business day if the fifteenth day is not a business day) of the month preceding the beginning of the quarter, as reported by the Board of Governors of the Federal Reserve System in Statistical Release H.15 ("Selected Interest Rates").

Because the regulation incorporates interest rates published in Statistical Release H.15, that release is the authoritative source for the rates that are to be applied under the regulation. As a convenience to persons using the regulation, however, the PBGC collects the applicable rates and republishes them in an appendix to part 2644. This amendment adds to this appendix the interest rates for both the July 1, 1990–September 30, 1990 quarter (for which publication was inadvertently omitted) and the October 1, 1990–December 31, 1990 quarter. The interest rate for both periods is 10 percent, which is the same rate that was in effect for the second quarter of 1990. The rates for the third and fourth calendar quarters are based on the prime rate in effect on June 15, 1990 and September 17, 1990, respectively.

The appendix to 29 CFR part 2644 does not prescribe interest rates under the regulation; the rates prescribed in the regulation are those published in Statistical Release H.15. The appendix merely collects and republishes the rates in a convenient place. Thus, the interest rates in the appendix are informational only. Accordingly, the PBGC finds that notice of and public comment on this amendment would be unnecessary and contrary to the public interest. For the above reasons, the PBGC also believes that good cause exists for making this amendment effective immediately.

The PBGC has determined that this amendment is not a "major rule" within the meaning of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; nor create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects in 29 CFR Part 2644

Employee benefit plans, Pensions.

In consideration of the foregoing, part 2644 of subchapter F of chapter XXVI of title 29, Code of Federal Regulations, is amended as follows:

PART 2644—NOTICE AND COLLECTION OF WITHDRAWAL LIABILITY

1. The authority citation for part 2644 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3) and 1399(c)(6).

Appendix A [Amended]

2. Appendix A is amended by adding to the end of the table therein two new entries as follows:

From	To	Date of quotation	Rate (percent)
07/01/90	09/30/90	06/15/90	10.00
10/01/90	12/31/90	09/17/90	10.00

James B. Lockhart III,

BILLING CODE 7708-01-M

29 CFR Part 2676

Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal—Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections

BEST COPY AVAILABLE

4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table the rate series for the month of November 1990.

EFFECTIVE DATE: November 1, 1990.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington DC 20006; 202–778–8820 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 553 (b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 29 CFR Part 2676

Employee benefit plans and Pensions.

In consideration of the foregoing, part 2676 of subchapter H of chapter XXVI of title 29, Code of Federal Regulations, is amended as follows:

PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL

1. The authority citation for part 2676 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates therein the following new entry:

§ 2676.15 Interest.

* * * * *

(c) *Interest rates.*

BILLING CODE 7708-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Los Angeles/Long Beach Regulation 90-11]

Security Zone Regulations; Port of Los Angeles, CA

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a security zone in the Port of Los Angeles, California, around any vessels moored at LA BERTHS 54 and 55 during the effective period of these regulations. The zone is needed to safeguard vessels involved in military equipment outloads at LA BERTHS 54 and 55 against destruction, loss, or injury from sabotage or other subversive acts, accidents, or causes of a similar nature. Entry into this zone is prohibited unless authorized by the captain of the port.

EFFECTIVE DATE: This regulation becomes effective at 00:01 A.M., October 4, 1990. It terminates at 12 midnight, October 31, 1990.

FOR FURTHER INFORMATION CONTACT: LT R.F. Shields at (213) 499–5570.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rule making was not published for this regulation and good cause exists for making it effective in less than 30 days after Federal Register publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent destruction, loss, or injury to vessels involved in military equipment outloads at LA berths 54 and 55.

Drafting Information

The drafters of this regulation are LT R.F. Shields, project officer for the captain of the port, and LCDR J.J. Jaskot, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Regulation

The incident requiring this regulation will begin 00:01 a.m., on October 4, 1990. This security zone is necessary to ensure the security of vessels involved in military equipment outloads at LA berths 54 and 55.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, subpart D of part 165 of title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 33 CFR 160.5.

2. A new section 165.T1112 is added to read as follows:

§ 165.T1112 Security Zone: Vessels Moored at Berths 54 and 55, Port of Los Angeles, California.

(a) *Location.* The following area is a security zone:

The waters of Los Angeles Harbor within 100 yards of any vessels moored at LA berths 54 and 55.

(b) *Effective Date.* This regulation becomes effective at 00:01 a.m., October 4, 1990. It terminates at 12 midnight, October 31, 1990.

(c) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into this zone is prohibited unless authorized by the captain of the port. Section 165.33 also contains other general requirements.

Dated: October 10, 1990.

J.S. Morris,

Captain, U.S. Coast Guard, Captain of the Port, Los Angeles/Long Beach.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[MS-014; FRL 3851-6]

Approval and Promulgation of Implementation Plans Mississippi: Approval of Revisions to the Prevention of Significant Deterioration (PSD) Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is today approving revisions to the Mississippi State Implementation Plan (SIP). These revisions were submitted to EPA by the State of Mississippi through the Mississippi Department of Environmental Quality on July 16, 1990. The revisions being approved today incorporate by reference the federal PSD regulations into the Mississippi SIP.

EFFECTIVE DATES: This action will be effective December 14, 1990 unles notice is received within 30 days that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the Federal Register.

ADDRESSES: Written comments should be addressed to Kay Prince of EPA Region IV's Air Programs Branch (see EPA Region IV address below). Copies of the material submitted may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365

Air Quality Division, Bureau of Pollution Control, Department of Environmental Quality, Post Office Box 10385, Jackson, Mississippi 39209-0385

FOR FURTHER INFORMATION CONTACT: Kay Prince of the EPA Region IV Air Programs Branch at 404-347-2864 or FTS-257-2864 and at the above address.

SUPPLEMENTARY INFORMATION: On June 28, 1990, the Mississippi Commission on Environmental Quality adopted Regulation APC-S-5, "Regulations for the Prevention of Significant Deterioration of Air Quality." The State of Mississippi through the Department of Environmental Quality submitted the revisions to the Mississippi SIP to EPA on July 16, 1990, which became state effective on July 29, 1990. Mississippi requested that the revisions be adopted as part of the federally approved SIP. EPA is today approving Mississippi Regulation APC-S-5.

All of the subsections of 40 CFR 52.21 other than subsections (a) [Plan disapproval], (q) [public participation], (s) [Environmental impact statement], and (u) [Delegation of authority] are adopted and incorporated by reference as official regulations of the State of Mississippi. The term "administrator" as it appears in 40 CFR 52.21 means the Mississippi Environmental Quality Permit Board, except:

(1) In subparagraph (b)(3)(iii) [relating to "net emissions increase"], it means either the Mississippi Environmental Quality Permit Board or the Administrator of the United States Environmental Protection Agency (USEPA).

(2) In the following subsections it continues to mean the Administrator of the USEPA:

(a) (b)(17) [definition of "federally enforceable"];

(b) (f)(1)(v), (f)(3), (f)(4)(i) [Exclusions from increment consumption];

(c) (g)(1)-(g)(6) [Redesignation];

(d) (1)(2) [Air quality models];

(e) (p)(1)-(p)(f2) [Sources impacting Federal Class I areas];

(f) (t) [Disputed permits or redesignations].

The procedural requirements of 40 CFR 51.166(q) [excluding the phrase "The plan shall provide that-"] are adopted and incorporated by reference except:

(1) The phrase "specified time period" means thirty (30) days; and

(2) The words "one year" in subparagraph (q)(2) are replaced by the words "one hundred and fifty (150) days."

The term "Administrator" in subparagraph (q)(2)(iv) continues to mean the Administrator of the USEPA.

The regulation also requires transmittal to the Administrator of the USEPA a copy of each permit application filed under the Mississippi PSD Regulations and notification to the Administrator of USEPA of each significant action taken on the application.

The revisions being approved meet all of the requirements for incorporating the federal PSD regulations into the Mississippi SIP. Due to the simplicity of this action, no technical support document has been prepared.

Final Action:

EPA is today approving the revisions to the Mississippi PSD air quality regulations listed above. All of the revisions being approved are consistent with Agency policy.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no significant comments on them. The public should be advised that this action will be effective 60 days from date of this Federal Register notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a comment period.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the Federal Register on January 19, 1989 (54 FR 2214-2225). On January 6, 1989, the Office of

Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by December 14, 1990. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements.

Note: Incorporation by reference of the State Implementation Plan for the State of Mississippi was approved by the Director of the Federal Register on July 1, 1982.

Dated: October 5, 1990.

Patrick M. Tobin,

Acting Regional Administrator.

Part 52, chapter I, title 40, Code of Federal Regulations, is amended as follows:

PART 52—[AMENDED]

Subpart Z—Mississippi

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.1270 is amended by adding paragraph (c)(21) to read as follows:

§ 52.1270 Identification of plan.

* * * * *

(c) * * *

(21) Revisions to APC–S–5 of the Mississippi Air Pollution Control Act which were submitted on July 16, 1990.

(i) *Incorporation by reference.* (A) Regulation APC–S–5, Regulations for the Prevention of Significant Deterioration of Air Quality, effective on July 29, 1990.

(ii) *Other material.* (A) Letter of July 16, 1990, from the Mississippi Department of Environmental Quality.

§ 52.1280 [Amended]

3. Section 52.1280 is amended by:

Removing paragraphs (a) and (b) and redesignating paragraph (c) as (a).

Federal Register
Vol. 55, No. 199
Monday, October 15, 1990

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 984

[FV-90-388-PR]

Expenses and Assessment Rate for Walnuts Grown in California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order No. 984 for the 1990–91 marketing year established under the walnut marketing order. Funds to administer this program are derived from assessments on handlers. This action is needed in order for the Walnut Marketing Board (Board), the agency responsible for the administration of the order, to have sufficient funds to meet the expenses of operating the program. This facilitates program operations. An annual budget of expenses is prepared by the Board and submitted to the U.S. Department of Agriculture (Department) for approval.

DATES: Comments must be received by October 25, 1990.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, F&V, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456. All comments should reference the docket number and the date and page number of this issue of the Federal Register and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, P.O. Box 96456, room 2524–S, Washington, DC 20090–6456; telephone: (202) 475–3861.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 984 (7 CFR part 984), as amended, regulating the handling of walnuts grown in California. The marketing order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 65 handlers of walnuts grown in California who are subject to regulations under the walnut marketing order and approximately 5,000 producers of walnuts in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual revenues of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of walnut producers and handlers may be classified as small entities.

The walnut marketing order requires that the assessment rate for a particular marketing year shall apply to all assessable walnuts handled from the beginning of such year. An annual budget of expenses is prepared by the Board and submitted to the Department for approval. The Board consists of handlers, producers, and a non-industry member. They are familiar with the Board's needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Board is derived by dividing anticipated expenses by expected shipments of walnuts. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the Board's expected expenses. The recommended budget and rate of assessment are usually acted upon by the Board shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, the budget and assessment rate approval must be expedited so that the Board will have funds to pay its expenses.

The Board met on September 14, 1990, and unanimously recommended 1990–91 marketing order expenditures of $1,703,505 and an assessment rate of $0.0088 per kernelweight pound of walnuts. Assessment income for the 1990–91 marketing year is estimated at $1,711,370 based on a merchantable supply of 194,474,000 kernelweight pounds of walnuts. Comparative actual expenditures in 1989–90 were $1,321,415 and the assessment rate was $0.0085 per kernelweight pound of walnuts. Estimated assessment income in 1989–90 was $1,539,707 based on a merchantable supply of 181,142,000 kernelweight pounds of walnuts.

Major budget categories for the 1990–91 marketing year $855,000 for the domestic market research and development program, $346,382 for walnut production research, $126,840 for administrative and office salaries, and $40,000 for walnut crop estimates. Comparable actual expenditures for the 1989–90 marketing year were $664,368, $298,122, $121,654, and $37,000 respectively. The domestic market research and development program increase from $664,368 to $855,000 is due to the Board's recommendation to further expand and improve existing markets and create new markets for California walnuts. The increase from $298,122 to $346,382 for walnut production research is due to seven new additional research projects that were recommended by the Board. The majority of these studies concern various methods to control codling moths which cause walnut tree damage. The increase in the administrative and

office salaries category reflects a 4.7 percent raise in administrative and office salaries which was recommended by the Board.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. some of the additional costs may be passed on to producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of 10 days is appropriate because the budget and assessment rate approval for the program needs to be expedited. The Board needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 984

Marketing agreements, Reporting and recordkeeping requirements, and Walnuts.

For the reasons set forth in the preamble, 7 CFR part 984 is proposed to be amended as follows:

1. The authority citation for 7 CFR part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 984—WALNUTS GROWN IN CALIFORNIA

2. A new section 984.342 is added to read as follows:

§ 984.342 Expenses and assessment rate.

Expenses of $1,703,505 by the Walnut Marketing Board are authorized and an assessment rate of $0.0068 per kernelweight pound of merchantable walnuts is established for the 1990–91 marketing year ending on July 31, 1991. Unexpended funds from the 1989–90 fiscal year may be carried over as a reserve.

Dated: October 10, 1990.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[FI-84-90]

RIN 1545-AP11

Exception from the Prohibition of Federal Guarantees—Permitted Investments of Tax-Exempt Bond Proceeds

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the rules and regulations portion of this issue of the Federal Register, the Internal Revenue Service is issuing temporary regulations relating to the prohibition of federal guarantees with respect to bonds the interest on which is excludable from gross income. The temporarty regulations provide that investments in obligations issued by the Resolution Funding Corporation pursuant to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 are excepted from the prohibition of federal guarantees. The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be received by December 14, 1990. These regulations are proposed to be effective for investments made on or after October 2, 1990.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:CORP:T:R (FI–84–90), room 4429, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: William P. Cejudo, 202–566–3283 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations published in the rules and regulations portion of this issue of the Federal Register add new § 1.149(b)(3)–1T to the Income Tax Regualtions (26 CFR part 1). The new temporary regulations permit investments of tax-exempt bond proceeds in obligations issued by the Resolution Funding Corporation. The text of the new temporary regulations serves as a comment document for this notice of proposed rulemaking.

For the text of the temporary regulations, see T.D. 8313 published in the rules and regulations portion of this issue of the Federal Register.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Internal Revenue Service by any person who also submits written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Drafting Information

The principal author of these proposed regulations is William P. Cejudo, Office of the Assistant Chief Counsel (Financial Institutions and Products), Internal Revenue Service. However, other personnel from the Service and Treasury Department participated in their development.

List of Subjects 26 CFR 1.61–1.281–4

Deductions, Exemptions, Income taxes, Reporting and recordkeeping requirements, Taxable income.

Proposed Amendments to the Regulations

The temporary regulations, T.D. 8313, published in the Rules and Regulations portion of this issue of the Federal Register, are hereby also proposed as final regulations under section 149 of the Internal Revenue Code.

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

31 CFR Part 103

Proposed Amendment to the Bank Secrecy Act Regulations Relating to Recordkeeping for Funds Transfers by Banks and Transmittals of Funds by Other Financial Institutions

AGENCY: Departmental Offices, Treasury.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: To assist in the investigation and prosecution of money laundering and other financial crimes, Treasury is proposing enhanced recordkeeping requirements relating to funds transfers by banks and to transmittals of funds by other financial institutions subject to the Bank Secrecy Act. Each domestic bank involved in a funds transfer will have to retain certain information about the transfer. The amount and type of information will depend upon the bank's role in the funds transfer process. In addition, banks will be required to verify the name and address and obtain additional identifying information on originators and beneficieries of funds transfers who are not deposit accountholders. Financial institutions other than banks that transmit and receive funds will have similar recordkeeping requirements. Finally, the regulations permitting Treasury to target for reporting certain transactions with foreign financial institutions are proposed to be amended to permit Treasury to require reports of all funds transfers by banks and transmittals of funds by financial institutions other than banks.

DATES: Comments are due on November 29, 1990.

ADDRESSES: Comments should be sent to Amy G. Rudnick, Director, Office of Financial Enforcement, Office of the Assistant Secretary (Enforcement), Department of the Treasury, Room 4320, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Linda Noonan, Senior Counsel for Financial Enforcement, Office of the Assistant General Counsel (Enforcement), (202) 566-2941.

SUPPLEMENTARY INFORMATION: The Bank Secrecy Act, Public Law 91-508 (codified at 12 U.S.C. 1829b and 1951-1959, and 31 U.S.C. 5311-5328), authorizes the Secretary of the Treasury to require financial institutions to keep records and file reports that the Secretary determines have a high degree of usefulness in criminal, tax and regulatory matters. The primary purpose of the Bank Secrecy Act is to identify the sources, volumes and movements of moneys moving into and out of the country and through domestic financial institutions. See H.R. Rep. No. 975, 91st Cong., 2d Sess. 11-13 (1970). In exercising this far-reaching authority, Treasury has been mindful of issues concerning implications of foreign laws and has been careful not to encumber the free flow of legitimate international trade and commerce.

On October 31, 1989, Treasury published an Advance Notice of Proposed Rulemaking to deal with the problem of money laundering through the international funds transfer system. 54 FR 45769. Funds transfers are a series of messages to and through one or more banks that are intended to result in the payment of funds from one person to another. This usually is accomplished through a debit to the account of the person sending the money (the "originator") and a corresponding credit to the person receiving the funds (the "beneficiary").

Money laundering is a vital component of drug trafficking and other criminal activity throughout the world. Currently, illegal funds are being transferred domestically and from and to the United States and "cycled" through intricate money laundering schemes involving international payments, particularly funds transfers. Several recent money laundering operations, which have been discovered by Treasury and other Federal law enforcement agencies, such as Operations C-Chase and Polar Cap, are testaments to this phenomenon. In an April 26, 1989, submission to the Director, Office of National Drug Control Policy, reprinted in the Congressional Record of May 18, 1989, the American Bankers Association stated that, "Funds transfers, which are essentially unregulated, have emerged as the primary method by which high volume launderers ply their trade." 135 Cong. Rec. S5555.

The Advance Notice of Proposed Rulemaking focused on funds transfers through banks. There is also a serious money laundering problem involving non-bank financial institutions that are subject to recordkeeping and reporting requirements of the Bank Secrecy Act, such as transmitters of funds and telegraph companies. Therefore, this proposal also addresses recordkeeping by these financial institutions with respect to funds they transmit and receive.

Major Comments Received to the Advance Notice of Proposed Rulemaking

In the Advance Notice, Treasury set forth seven different regulatory proposals that it was considering implementing. There were a total of 114 comments on these proposals. Of those comments, 81 were from banks. The remainder were from non-bank financial institutions, trade associations, government agencies, and other miscellaneous institutions and individuals. Generally, most of the commenters noted their opposition to drugs and their desire to assist in fighting the problem. However, they also noted that the essence of the automated international payments system is the speed with which it moves funds and that anything which slows down the system would make United States banks less competitive. Most commenters also pointed out that the vast majority of international payments are legitimate.

In addition, many commenters noted that some of the proposals might violate foreign privacy laws and that Treasury should be sensitive to other countries' concerns. Other commenters suggested that the proposals, if adopted, would unreasonably burden the international payments system and financial institutions in general. The comments expressed concern that regulations would be costly to implement, and they suggested that Treasury focus on other money laundering "choke points," *e.g.*, the points where cash enters the financial system, to detect criminal activity.

Treasury appreciates the willingness of financial institutions to cooperate in combating drug trafficking and money laundering. In developing the regulations proposed today and in considering any final regulations, Treasury will balance the law enforcement need for the information against the costs to financial institutions and the effect on the payments system and the free flow of legitimate funds through the funds transfer process. Treasury understands that privacy laws in other countries may prohibit financial institutions from disclosing the names of customers to United States financial institutions on a routine basis, and has taken this into account in issuing the proposed regulations.

The comments also raised questions about the use of domestic funds transfers to launder money, and suggested that the regulations cover both domestic and international funds transfers. Currently, § 103.33 of the regulations, 31 CFR 103.33, requires only records on certain international funds transfers, not information on domestic funds transfers. In response to these comments, Treasury has included in the proposed regulations provisions that cover both domestic and international

funds transfers. Records on domestic funds transfers have been included because often it is impossible for a financial institution to know whether an incoming funds transfer originated abroad or whether an outgoing funds transfer is destined ultimately for a place outside the United States.

Comments Received on Specific Proposal

#1: Require a report or record by the financial institution originating or receiving an international wire transfer of funds for a customer which includes identifying and account information about the originator, beneficiary and the person on whose behalf the payment was made or received and whether the sender or receiver is aware of any separate payment instructions regarding the payment unknown to the financial institution.

#2: Require that all international wire transfer messages contain all known third party identifying information, e.g., account numbers, addresses, and names of the originator and beneficiary of the payment.

The vast majority of the comments received by Treasury were directed at these two proposals. Generally, if commenters expressed a preference, it was for recordkeeping, not reporting. In addition to the general comments, many commenters noted that the funds transfer system was highly automated with no manual review, and that any requirement to delay a transfer in order to verify information would disrupt international payments. The commenters requested that, if Treasury were to require reporting, the report contain only "knows" information, with the preference for it being filed electronically. Most commenters stated that it was easier to get information on transfers that originated in the United States, as opposed to transfers that originated from abroad, because United States financial institutions can more readily obtain information about transfers originating at their institutions. Many commenters noted that foreign financial institution privacy laws would prohibit foreign banks from providing the name of a foreign originator.

There was a split of opinion among the commenters on whether exemptions should be permitted to any reporting or recordkeeping requirements for funds transfers. Those expressing concern about exemptions were worried that the system would be modeled after the currency transaction reporting exemption system, *i.e.*, on an account-by-account basis. Those in favor of exemptions suggested a broad exception program instead, suggesting that exceptions be permitted for categories of transactions such as transfers conducted for: corporations traded on one of the public stock exchanges; the bank's own account; a company rated by one of the securities ratings services or recognized by a credit ratings service; public utilities; government agencies; and businesses who make regular transfers commensurate with their business activity.

Many commenters suggested some sort of monetary threshold for records or reports for funds transfers, such as $10,000. Several commenters stated that Treasury should be clearer about the terminology used, and that any regulation should use the same terminology as is used in proposed Uniform Commercial Code (UCC) Article 4A on funds transfers. There was concern over whether a transaction had to be refused or payment delayed if the required information was not available.

Finally, there also were questions concerning the ability of a financial institution to determine whether an apparently domestic funds transfer was part of an international payment. This is because where intermediary financial institutions are used in many funds transfers, the originating financial institution or beneficiary's financial institution may not be aware when a particular payment order relates to funds originating with an international funds transfer. Some commenters recommended that the same recordkeeping requirements be placed on all transfers—domestic and international. Several commenters noted that it would be administratively easier for them to keep the records on all transfers.

Treasury has decided to propose only enhanced recordkeeping requirements at this time. Reporting of international funds transfers or of categories of funds transfers is still under consideration. Treasury is considering either routine reporting or only reporting of suspicious funds transfers, based on a suspicious transfer profile developed by Treasury and supplemented by individual institutions. Treasury continues to be interested in comments on the concept of reporting and how reporting would relate to recordkeeping measures taken in response to this proposal.

Under the proposed regulations, domestic banks, depending upon their role in the funds transfer process (originator's bank, beneficiary's bank, or intermediary bank), will have to keep certain records on all funds transfers, regardless of amount. Generally, there are no exemptions from recordkeeping requirements under the Bank Secrecy Act. However, Treasury is proposing that funds transfers between domestic banks for their own accounts will be exempt from these recordkeeping requirements in view of the lack of law enforcement utility for such records. In the future, if Treasury proposes reporting of funds transfers, Treasury will consider other appropriate exemptions.

Treasury agrees that, in many situations, it is not apparent whether the funds involved in a funds transfer are domestic or international in origin. Treasury has determined that there is law enforcement value in having records of all transfers. Therefore, Treasury is proposing that the recordkeeping regulations apply to both international and domestic transfers.

#3: Require that prior to originating international payments on a customer's behalf, either through a book entry transfers of credit or through international wire transfers of funds, financial institutions apply model "know your customer" procedures to verify the legitimate nature of the customer's business and that the transfers are commensurate with legitimate business activities.

Many commenters stated that they felt that a "know your customer" procedure made good business sense. Many also noted, however, that the nature of funds transfers was different from the nature of currency transactions and that different procedures should be applicable. Most commenters have difficulty with any requirement that they verify the nature of the customer's business and the amount of the transactions, because they would be unable to determine prior to the transfer (or even after) that the customer's business was legitimate and that the amount of the funds transfer was commensurate with the customer's legitimate business. Several commenters asked Treasury to provide guidance or prescribe what the procedures would be and to propose uniform industry standards. More than one commenter noted that the guidelines should avoid reliance on subjective factors.

Several commenters felt that it was not part of their function as a financial institution to investigate in detail the legitimate nature of a customer's business. However, others thought that know your customer procedures should be extended to all areas of a financial institution in order to protect the financial institution against money laundering, and that they would have no problem in attempting to determine whether a funds transfer was commensurate with the customer's business. Several commenters already

have know your customer procedures. Some commenters suggested reviewing the funds transfer after it is completed so as not to disturb the payment process.

After consideration of the comments, Treasury has decided not to pursue this option at the present time, but plans to address this topic in the future in connection with mandatory and comprehensive know your customer procedures for financial institutions. In the meantime, Treasury is encouraged by the many financial institutions who have voluntarily instituted know your customer policies and procedures and reminds all financial institutions to familiarize themselves with their customers' activities to become aware of any suspicious activities or deviations from their normal activities in the funds transfer and other areas. Unless a financial institution knows its customers, it will be vulnerable to money laundering and will not be able to fulfill its obligation to report possible criminal violations of law. *See e.g.*, 12 CFR 21.12.

#4: Require special identification procedures and recordkeeping or reporting of international payments sent or received without established account relationships at financial institutions.

There was a consensus among the commenters, at least for those financial institutions who do PUPID (pay upon proper identification) funds transfers, that they are willing to put into place reasonable special identification procedures for noncustomers receiving funds transfers. Some suggested that the procedures not require more information than is currently required when filling out a Currency Transaction Report on currency transactions exceeding $10,000.

Many banks said that they do not originate funds transfers for nondeposit accountholders or that, if they permit them, they only originate payment orders for small amounts, (*e.g.*, $1,000) and rarely or never receive incoming transfers for nondeposit accountholders. Of those banks which receive these transfers, most said that they ask for at least one piece of identification before releasing the funds to the beneficiary.

Information on originators and beneficiaries who do not have account relationships with banks often is lacking or cannot be retrieved making it difficult for law enforcement authorities to trace funds transfers. Thus, after consideration of the comments, Treasury has decided to propose special identification procedures for funds transfers involving originators or beneficiaries of funds transfers who are nondeposit accountholders.

#5: Require that financial institutions develop a suspicious international wire transfer profile and report suspicious payments to Treasury; the profile might include certain criteria suggested by Treasury, for example, the presence of large currency deposits prior to an outgoing transfer or the existence of an incoming transfer followed by issuance of a cashier's check

It was the overwhelming opinion of the commenters that Treasury, not the financial institutions, should develop suspicious wire transfer profiles, or that financial institution regulators and/or a group of financial institutions should develop the profile. Many commenters felt that they did not have sufficient expertise to develop profiles on their own and indicated that it is often difficult to distinguish between suspicious and legitimate transactions. Some commenters pointed out that because the nature of a funds transfer is different from the nature of currency transactions, it is more difficult to determine what is suspicious activity.

Several commenters stressed that because the funds transfer system is automated and most payment orders are not reviewed before they go out, regulations requiring review prior to transmittal could stop the payment order, and impede the international payments system. Most commenters also noted that their internal computer systems are not integrated and that, as a result, they cannot determine what account activity preceded a funds transfer, *e.g.*, whether there had been a recent large cash deposit.

One bank commenter said that it produces a weekly suspected money laundering report and runs the information against variable parameters to identify activity that is suspicious in relationship to an account's overall activity. Another commenter said that it could use its current capability to sort funds transfer activity by customer and account officer and have the account officer identify unusual patterns of activity by certain customers. Some commenters noted that the guidelines should be objective, specific and clear so that the financial institution will not be "second-guessed" at a later date if they do not file a suspicious activity report.

After consideration of the comments, Treasury has decided not to require reporting of suspicious funds transfers at this time. However, Treasury is encouraged by the many financial institutions that have developed suspicious funds transfer profiles and encourages other financial institutions to develop their own programs to identify suspicious funds transfers and other suspicious activity. Treasury strongly urges financial institutions to report suspicious activity, including suspicious funds transfers, to the local office of the Internal Revenue Service's Criminal Investigation Division, and in the case of suspicious international wire transfers, notify the local office of the U.S. Customs Special Agent in Charge, and where applicable, also to file the required Criminal Referral Form with the bank regulatory agency. In order to prevent the use of financial institutions by money launderers and other criminals, currency transaction reporting and recordkeeping must be coupled with the reporting of possible violations of law or regulation.

#6: Require that: (A) when an institution, typically a bank, receives a 103.25 targeting order it must obtain to the extent possible, information from other domestic banks involved in the transfer regarding the identity of the originator or beneficiary of the transfer; and (B) that those other domestic banks cooperate in providing this information on a timely basis to the targeted institution

Because the recordkeeping requirements being proposed should obviate the need for financial institutions to obtain additional information from other financial institutions in order to respond to a targeting order issued under 31 CFR 103.25, Treasury has decided not to pursue this option.

#7: Add a category for international book transfers not involving wire transfers, such as transfers of credit in the books of a foreign and a domestic institution, to the 103.25 categories of information that may be requested.

Book transfers generally are transfers of credit between affiliated financial institutions. These institutions can be foreign and domestic branches or subsidiaries of the same financial institution corporation, for example, a corporation's New York branch and its U.K. branch. Transfers between affiliates may be made without use of any wholesale wire transfer systems through private communication systems or even by telephone. Under the Bank Secrecy Act regulations, 31 CFR part 103, a foreign branch is treated as a separate financial institution.

While most financial institutions offered no objection to this proposed provision, they raised several questions about Treasury's purpose in adding a category for international book transfers not involving the use of wholesale wire transfer systems to 31 CFR 103.25. The commenters requested that Treasury be very clear about what it was referring to

and asked Treasury to define all terms. Several commenters noted that they treated book transfers the same way as they treat all other types of funds transfers, and that book transfers should be subject to the same regulations as other funds transfers. Several commenters stated that they do not have foreign branches or do not do book transfers.

Treasury has decided to specify that records relating to all types of funds transfers by banks and transmittals of funds by financial institutions other than banks may be requested in any order issued under § 103.25. The term "funds transfer" as defined in the proposal would include book transfers. The proposal also specifies that if an order issued under § 103.25 calls for information about funds transfers or funds transmittals by financial institutions other than banks, all information required to be maintained with respect to the transfer required in proposed subsections 103.33 (e) and (f) could be required to be furnished.

Proposed Amendments

Several amendments are being proposed today.

Funds Transfers through Banks

Definitions

Initially, Treasury is proposing that several additions be made to the definitions section of the regulations, § 103.11, to cover the funds transfer terminology used in the other proposed regulations. 31 CRF 103.11. In response to the comments, most of the proposed definitions are based upon proposed UCC Article 4A definitions dealing with funds transfers.

A definition of *funds transfer* has been proposed. As noted above, a funds transfer is a series of transactions, beginning with the originator's payment order, made for the purpose of making payment to the beneficiary of the order. The term includes any payment order issued by the originator's bank or an intermediary bank intended to carry out the originator's payment order. Definitions of the various parties in a funds transfer also are being proposed. *The originator or originator of a payment order* is the person causing the initiation of a funds transfer. *The beneficiary or beneficiary of a payment order* is the person to be paid the proceeds of the funds transfer. The *originator's bank* is the first bank to send a payment order to carry out the originator's order. The *beneficiary's bank* is the bank that pays the beneficiary of the payment order. An *intermediary bank* is a financial institution in the funds transfer process which is neither the originator's nor the beneficiary's bank.

Example #1: Ashley Martin, a Kansas bookseller, wishes to send $5,000 to Allingham Books in London to pay for books she is selling at her store. She goes to her bank, the Bank of Main Street, and requests that $5,000 be transferred from her account to the account of Allingham Books in London at Kensington Bank. The Bank of Main Street uses a participant bank in the New York Clearinghouse's Interbank Payments System (CHIPS), CHIPSBank, with which it has a correspondent relationship, to make the transfer to the Kensington Bank, with which CHIPSBank has a correspondent relationship. In this example, Ashley Martin is the originator of the payment order; the Bank of Main Street is the originator's bank; Allingham Books is the beneficiary of the payment order; Kensington Bank is the beneficiary's bank, and CHIPSBank is the intermediary bank. Some funds transfers may have more than one intermediary bank in the funds transfer chain, depending upon the correspondent relationships of the banks involved.

The proposed regulations will require retention of the "date" of the funds transfer. There are two relevant dates, definitions of which are proposed. The *Execution Date* is the date upon which a payment order is to be issued; normally the execution date is the date upon which the order is received by the bank originating the funds transfer. The *Payment Date* of a funds transfer is the day on which the beneficiary's bank is to pay the beneficiary. Many times, these two dates are the same.

Example #2: John James of Chicago requests his bank to send $500 from his savings account on July 6 to his mother Mary Jones in Omaha, payable immediately. The bank receives the request for the transfer on July 6th and sends out the payment order the same day. Mary Jones' bank receives the payment order on July 6th and immediately credits her account for $500. In this example, July 6th is both the execution date and the payment date.

A definition of "payment order" also is being proposed. A *Payment Order* is an instruction of a person to a receiving bank transmitted orally, electronically, or in writing, to pay, or to cause another bank to pay, a fixed or determinable amount of money to a beneficiary (but does not include ACH payment orders) if: (a) The instruction does not state a condition to payment to the beneficiary other than time of payment; (b) the receiving bank is to be reimbursed by debiting an account of, or otherwise receiving payment from, the sender; and (c) the instruction is transmitted by the originator of the payment order directly to the originator's bank or to an agent, funds transfer system, or communication system for transmittal to the receiving bank.

This definition includes not only traditional funds transfers through wholesale wire transfer systems, but also covers book entries, and other ways of transmitting funds by banks, for example, through a bank's internal communication system that links its foreign and domestic affiliates.

Enhanced Recordkeeping for Funds Transfers

Treasury is proposing that financial institutions be required to retain specific information concerning funds transfers *except* funds transfer between domestic banks for their own accounts. Under current regulations, the only information required is a record of the advice, instruction, or request for international funds transfers over $10,000. However, the regulation does not specify what information must be contained in the record. As a result, many financial institutions have complete, comprehensive information on their funds transfers, while other financial institutions have almost none, making it very difficult for law enforcement to trace the money and for Treasury to use its targeting authority under 31 CFR 103.25 effectively. Drug and other illegal-source money is being sent through the funds transfer system domestically and internationally, in all amounts.

Treasury is proposing that the originator's bank retain the following information for each funds transfer:

(1) The name of the originator of the payment order, and the originator's account number, if applicable;

(2) Unless the originator is a publicly traded corporation, public utility, or government agency, the name of any person on whose behalf the funds transfer was originated, if different from the originator (1);

(3) The amount of the funds transfer;

(4) The execution date of the funds transfer;

(5) The payment instructions, if any;

(6) The identity of the beneficiary's bank; and

(7) The name of the beneficiary of the payment order, and the account number, if applicable.

Treasury also is proposing that a bank which acts as an intermediary bank retain whatever information it receives from the preceding bank, be it the originator's bank or another intermediary bank.

Finally, Treasury is proposing that a bank retain the following information for each funds transfer for which it is the beneficiary's bank:

(1) The name of the beneficiary of a payment order (whether or not a deposit accountholder), and the account number, if applicable;

(2) Unless the beneficiary is a publicly traded corporation, public utility or government agency, the name of any person on whose behalf the funds transfer was received, if different from the beneficiary (1);

(3) The amount of the funds transfer;

(4) The payment date of the funds transfer;

(5) The payment instructions, if any;

(6) The identity of the originator's bank; and

(7) The name of the originator of the payment order, and the account number, if applicable and known.

Treasury is proposing that these records be retrievable by the name of the originator and the account number of the originator, if applicable, for an originator's bank, and by the name of the beneficiary and the account number of the beneficiary, if applicable, for a beneficiary's bank. As with other records maintained under the Bank Secrecy Act, these records may be maintained on paper, microfilm or microfiche or magnetic tape so long as they are available in readable form when requested by the Treasury Department or other law enforcement or regulatory agency. *See* 31 CFR 103.32.

Treasury will consider comments regarding a possible delayed effective date for certain provisions until proposed changes in the format of wire transfer messages for wholesale wire transfer systems can accommodate the additional information.

The term "on whose behalf" has the same meaning that it has with respect to currency transactions reportable under 31 CFR 103.22. For further guidance in this area, financial institutions may refer to Bank Secrecy Act Administrative Ruling 88–8, dated December 21, 1988, (55 FR 1021, January 11, 1990) which discusses "on whose behalf" in the context of currency transactions reportable under 31 CFR 103.22.

Treasury continues to be receptive to alternative suggestions for recordkeeping that would minimize costs to banks without jeopardizing the underlying purpose of these regulations, including suggestions for possible additional exemptions from these requirements.

If in the future, Treasury requires reporting of funds transfers, the information reported may also include the address of the originator, for a report by an originator's bank, and the address of the beneficiary, for a beneficiary's bank.

Nondeposit Accountholder Transactions

Treasury is proposing special identification verification and recordkeeping procedures for a bank that acts as an originator's bank for a funds transfer for a customer who does not have a deposit account at the institution. Treasury is proposing that in that instance, prior to the initiation of the funds transfer, the bank must verify the name and address of the person requesting the funds transfer, and maintain a record, in addition to any other required information, of that person's name, address, social security number, and date of birth.

Similarly, if a bank acts as a beneficiary's bank for a customer who does not hold a deposit account at that institution, the bank must verify the name and address of the beneficiary and maintain a record, in addition to any other required information, of the beneficiary's name, address, social security number, and date of birth prior to payment of the funds.

Time Deadlines

Treasury is proposing that a domestic bank which acts as originator or originator's bank for a funds transfer have the required information prior to the initiation of the funds transfer. Because the originator's bank is located in the United States, the bank should be able to obtain the required information prior to initiating the particular payment order. The intermediary bank merely will retain whatever information is received from the originator's bank or intermediary bank preceding it in the chain of the funds transfer.

Treasury is proposing that a financial institution which acts as a beneficiary's bank for a beneficiary who is not a deposit accountholder have the required information prior to payment of the funds. A bank which acts as a beneficiary's bank with respect to a funds transfer for a deposit accountholder would be required to have the required information within 15 days after payment of the funds transfer to the beneficiary of the payment order if the information is not available at the time of payment.

In the case of a deposit accountholder, if the beneficiary's bank has been unable to secure the necessary information, including the name of the foreign originator, either from the information accompanying the payment order or by contacting the deposit accountholder, it shall nevertheless not be deemed to be in violation of the Bank Secrecy Act if: (1) It made a reasonable effort to secure such information, and (2) it maintains a list containing the names, addresses, and account numbers of the beneficiaries of payment orders on which there is incomplete information. The names, addresses and account numbers would be made available to the Secretary upon request. This is similar to the requirement to obtain taxpayer identification numbers by banks, securities brokers and dealers, casinos, and currency dealers and exchangers. 31 CFR 103.34(a); 31 CFR 103.35(a); 31 CFR 103.36(a); 31 CFR 103.37(a). Treasury suggests that possible "reasonable efforts" would include contacting the deposit accountholder by letter or telephone and then sending a follow-up letter if there is no response to the initial communication.

Treasury stresses that it is not requiring that United States financial institutions contact foreign financial institutions for any additional information. Treasury realizes that a foreign financial institution may be precluded from providing any information because of its financial privacy laws. Thus, Treasury is requiring that United States financial institutions obtain the necessary information from its U.S. customers. Treasury recognizes that in situations where both the originator and beneficiary are outside the U.S. all of the information may not be obtainable due to the operation of foreign secrecy laws. These transactions generally are of far less interest to U.S. law enforcement authorities than transactions that begin and end in the United States.

Nonbank Transmitters of Funds

As noted above, the proposed regulations impose parallel recordkeeping requirements on financial institutions subject to the recordkeeping and reporting requirements of the Bank Secrecy Act, other than banks, which transmit or receive funds for domestically and internationally. *See* 31 CFR 103.11(i). These institutions may be doing business as telegraph companies or check cashers or "fronting" as other businesses, typically as travel agencies. The methods of transmitting funds by nonbank financial institutions also are diverse. The funds may be transmitted through funds transfers through banks, through private communications systems or by a telephone directive to transfer credit in a corresponding nonbank financial institution, such as a foreign exchange dealer in Latin America. However accomplished, records relating to these transmittals of funds and their receipt are of

comparable law enforcement interest to records of funds transfers through banks.

Therefore, Treasury is proposing that financial institutions, other than banks, that transmit funds for customers or receive funds from other financial institutions or foreign financial agencies for payment to any person be required to retain specific information about such transmittals or receipts of funds.

A nonbank financial institution transmitting funds would be required to maintain a copy of any application or form the person initiating the transmittal completes and to record the following information prior to transmitting funds for any person or on its own behalf:

(A) The name, address, social security number, and date of birth of the person instructing that the funds be transmitted and the account number, if applicable;

(B) The name of any person on whose behalf the funds were transmitted if different from (A);

(C) The amount of funds transmitted;

(D) The date of the funds transmission;

(E) Any payment instructions;

(F) The identity of the person or financial institution receiving the funds on behalf of the recipient; and

(G) The name and address of the recipient of the funds transmitted, and account number, if applicable.

A nonbank financial institution receiving a transmittal of funds would be required to maintain a copy of any form or receipt the person receiving the funds completes and to record the following information prior to making payment to any person:

(A) The name, address, social security number, and date of birth of the person receiving the funds and the account number, if applicable;

(B) The name of any person on whose behalf the funds are received if different from (A);

(C) The amount of funds received;

(D) The date the funds were received;

(E) Any payment instructions;

(F) The identity of the person or financial institution transmitting the funds on behalf of the person who instructed transmittal of funds; and

(G) The name and address of the person who ordered the funds transmittal, and account number, if applicable and known.

As in the case of banks dealing with funds transfers for nondeposit accountholders, a nonbank financial institution transmitting funds would be required to verify and record the identity of the person instructing the transmittal prior to transmitting funds, and a nonbank financial institution receiving funds would be required to verify and record the identity of the person receiving payment prior to making payment.

Similar to records of funds transfers maintained by banks, nonbank financial institutions will be required to maintain these records such that they would be retrievable by Treasury or another law enforcement agency by the name of the person instructing the transmittal and by the account number of that person, if applicable, for a financial institution transmitting funds, and by the name of the recipient for financial institutions receiving funds. These records would have to be maintained on-site at the financial institution transmitting or receiving the funds and like all other records under the Bank Secrecy Act, would have to be retained for five years.

Treasury is receptive to alternative suggestions for recordkeeping that would minimize costs to non-bank financial institutions without jeopardizing the underlying purpose of these regulations.

The following are examples of the application of these recordkeeping requirements for nonbank financial institutions:

Example #3: Mary Daker, a California resident, wishes to send $2,500 to her son Peter in Maine. She goes into the local agent of a telegraph company, tenders the funds and arranges to have payment made to her son at the office of the agent of the telegraph company in Maine where Peter Daker then picks up the funds. The agency in California communicates the payment instruction to the agency in Maine through the telegraph company's private communication network and deposits the currency to the agency's own account in California.

The telegraph company agency in California is a nonbank financial institution and its transmittal of funds would be subject to the recordkeeping requirements of proposed § 103.33(g), including the requirement that Mary Daker's identity be verified and recorded. The record would have to be maintained on-site at the California agency. The telegraph company agency in Maine receiving the instruction to make payment to Peter is a nonbank financial institution receiving a transmittal of funds. It would be subject to the recordkeeping requirement of proposed § 103.33(f), including the requirement that Peter's identity be verified and recorded. The record would have to be maintained on-site at the Maine agency. There is no funds transfer involving a bank in this example.

Example #4: Sun and Fun Travel Agency, which also transmits funds on behalf of its customers is a financial institution for purposes of the Bank Secrecy Act regulations. Robert Smith is a customer who wishes to send $500 to his grandmother, Maria Smith, in Peru. Robert Smith gives $500 to Sun and Fun by a personal check. Sun and Fun contacts a foreign currency broker in Peru with which it has an established relationship. The currency broker debits an account in the name of Sun and Fun in Peru, and pays Maria Smith $500. Sun and Fun is acting as the transmitter of funds and must record this transaction prior to initiating it under proposed § 103.33(f). Sun and Fun deposits Robert Smith's check to its account at a local bank and this transaction would be subject to the recordkeeping requirement in proposed § 103.33(f)(2). Sometime later, Sun and Fun will originate a payment to the foreign currency broker covering a number of similar transactions by arranging a funds transfer through its bank to the account of the foreign currency broker in a bank in Peru. Sun and Fun's bank, as an originator bank, would be required at that time to make a record of the transaction as required by proposed § 103.33(e).

Example #5: Casa Check Casher in New York City operates out of a storefront in an ethnic community containing many recent immigrants. Casa is a financial institution under the Bank Secrecy Act regulations. A customer gives Casa $3,000 (in any form, *eg.*, cash, check or money order) to send to his mother in his native country. Casa does not have the ability to arrange for a transmittal of funds directly. Instead, Casa goes to Bank A, its local bank, where it has a deposit account and arranges for its account to be debited $3,000 and for that amount to be transferred through a funds transfer to Bank B, a bank in the native country of Casa's customer. Bank B will arrange payment to the customer's mother. In this situation, Casa would be required to keep the records required by proposed § 103.33(f)(1)(i) as a financial institution transmitting funds.

A separate record of the funds transfer originated by Casa's bank would be maintained by Bank A pursuant to proposed § 103.33(e)(1)(i). Casa would be the originator of the funds transfer. Its customer would be the person on whose behalf Casa was originating payment.

Targeting Orders

Treasury is proposing that in § 103.25, which permits Treasury to issue orders to financial institutions to require reports of certain types of transactions

with foreign financial agencies, be expanded to include in the case of a bank receiving an order, all funds transfers, including book entries, and in the case of financial institutions other than a bank, all transmittals or receipts of funds by the institution. The information that could be requested in the order would be the same information required to be maintained under proposed subsections 103.33 (f) and (g).

Example #4: Metrobank has branches in New York and London. James Smith, a customer of Metrobank in New York, wishes to make payment to Michael Blank, a customer of Metrobank in London, for some paintings. He requests Metrobank New York to debit his account $50,000 and credit it to Michael Blank in London. Metrobank New York telephones Metrobank London to convey Mr. Smith's payment order. The bank notes in its account records that $50,000 was moved from one of its accounts to another. Information required to be retained pursuant to proposed § 103.33(e) about this transaction could be requested in an order issued under § 103.25.

Submission of Comments

Treasury requests comments from all interested persons concerning the proposed amendments. While comments on all aspects of the regulations are welcome, Treasury is particularly interested in receiving comments on how long financial institutions will need to put new regulations into effect. Treasury also is interested in comments on the appropriate format for maintaining the required records in machine-readable form if it is determined to implement routine reporting in the future. All comments received before the closing date will be carefully considered. Oral comments must be reduced to writing and submitted to Treasury to receive consideration. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future action. The Treasury Department will not recognize any materials or comments, including the name of any person submitting comments, as confidential. Any material not intended to be disclosed to the public should not be included in comments. All comments submitted will be available for public inspection during the hours that the Treasury Library is open to the public. The Treasury Library is located in room 5030, 1500 Pennsylvania Ave., NW. Washington, DC 20220. Appointments must be made to view the comments. Persons wishing to view the comments submitted should contact the Office of Financial Enforcement at (202)566-8022.

Executive Order 12291

In the Advance Notice of Proposed Rulemaking, Treasury asked commenters to provide information about the cost of implementing the various proposals including the proposal for enhanced recordkeeping. Treasury did not receive detailed comments in this regard which would lead us to conclude that this proposed rule if adopted as a final rule, would be a major rule for purposes of Executive Order 12291. Therefore, we have no basis to believe that the proposal will have an annual effect on the economy of $100 million or more. It will not result in a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions. It will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or foreign markets. A Regulatory Impact Analysis therefore is not required. However, Treasury will entertain comments on this point.

Regulatory Flexibility Act

It is hereby certified under section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities. The requirements for recordkeeping will affect a number of small non-bank financial institutions, but we do not believe that the requirements will pose a substantial recordkeeping burden on those entities.

Paperwork Reduction Act

The collections of information contained in this Notice of Proposed Rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collections of information and the burden estimate should be directed to the Office of Financial Enforcement at the address noted above or to the Office of Management and Budget, Paperwork Reduction Project (1505-0063), Washington, DC 20503.

The collections of information in this regulation are authorized by 12 U.S.C. 1829b and 1951–1959 and 31 U.S.C. 5311–5326. The likely recordkeepers are banks that perform funds transfers or other financial institutions performing transmittals of funds for themselves or other persons.

Estimated total annual reporting and/or recordkeeping burden: 7.5 million hours.

Estimated average annual burden per respondent and/or recordkeeper: 187½ hours.

Estimated number of respondents and/or recordkeepers: 40,000

Estimated annual frequency of responses: Upon request.

Drafting Information

The principal author of this document is the Office of the Assistant General Counsel (Enforcement). However, personnel from other offices participated in its development.

Authority delegations (Government agencies), Banks and banking, Currency, Foreign banking, Investigations, Law Enforcement, Reporting and recordkeeping requirements, Taxes.

Proposed Amendment

For the reasons set forth in the preamble, it is proposed to amend 31 CFR part 103 as set forth below:

PART 103—FINANCIAL RECORDKEEPING AND REPORTING OF CURRENCY AND FOREIGN TRANSACTIONS

1. The authority citation for Part 103 would continue to read as follows:

Authority: Pub. L. 91–508, Title I, 84 Stat. 1114 (12 U.S.C. 1829b and 1951–1959; and the Currency and Foreign Transactions Reporting Act, Pub. L. 91–508, Title II, 84 Stat. 1118, as amended (31 U.S.C. 5311–5326).

2. It is proposed to amend § 103.11 by redesignating present paragraphs (c) through (h) as (e) through (j); present paragraphs (i) through (k) as (l) through (n); present paragraphs (l) and (m) as (q) and (r); present paragraphs (n) through (q) as (w) through (z); present paragraphs (r) through (u) as (aa) through (dd); and by adding new paragraphs (c), (d), (k), (o), (p), (s) (t), (u) and (v), all to read as follows:

§ 103.11 Meaning of Terms.

* * * * *

(c) *Beneficiary or Beneficiary of a payment order.* The beneficiary of a payment order, with respect to a funds transfer, is the person to be paid the proceeds of the funds transfer.

(d) *Beneficiary's bank.* The beneficiary's bank, with respect to a funds transfer, is the bank that pays the beneficiary of the payment order.

* * * * *

(k) *Execution Date.* In connection with a funds transfer, the execution date is the date upon which a payment order is to be issued; normally the execution date is the date upon which the order is received by the originator's bank.

* * * * *

(o) *Funds Transfer.* Funds transfer means the series of transactions, beginning with the originator's payment order, made for the purpose of making payment to the beneficiary of the order. The term includes any payment order issued by the originator's bank or an intermediary bank intended to carry out the originator's payment order. A funds transfer is completed by acceptance by the beneficiary's bank of a payment order for the benefit of the beneficiary of the originator's payment order.

(p) *Intermediary bank.* An intermediary bank, with respect to a funds transfer, is a bank in the funds transfer chain which is neither the originator's nor the beneficiary's bank.

* * * * *

(s) *Originator or originator of a payment order.* The originator of a payment order, with respect to a funds transfer, is the person causing the initiation of a funds transfer.

(t) *Originator's bank.* The originator's bank, with respect to a funds transfer, is the first bank to send a payment order to carry out the originator's order.

(u) *Payment date.* The payment date of a funds transfer means the day on which the amount of the order is payable to the beneficiary.

(v) *Payment Order.* A payment order means an instruction of a person given to a receiving bank, transmitted orally, electronically, or in writing, to pay, or to cause another bank to pay, a fixed or determinable amount of money to a beneficiary (but does not include ACH payment orders) if:

(1) The instruction does not state a condition to payment to the beneficiary other than time of payment;

(2) The receiving bank is to be reimbursed by debiting an account of, or otherwise receiving payment from, the sender; and

(3) The instruction is transmitted by the originator directly to the originator's bank or to an agent, funds transfer system, or communication system for transmittal to the receiving bank.

* * * * *

3. It is proposed to revise paragraph (b)(2) of § 103.25 to read as follows:

* * * * *

§ 103.25 Report of transactions with foreign financial agencies.

* * * * *

(b) * * *

(2) Funds transfers or transmittals of funds received by respondent financial institution from a foreign financial agency or sent by respondent financial institution to a foreign financial agency, including all information required to be maintained with respect to such transaction by subsections § 103.33(e) or (f) of this subpart.

4. It is proposed to amend § 103.33 by adding new paragraphs (e) and (f) to read as follows:

§ 103.33 Records to be made and retained by financial institutions.

* * * * *

(e)(1) A bank shall retain either the original or a microfilm or other copy or reproduction of—

(i) The following information for each funds transfer for which it is the originator's bank:

(A) The name of the originator of the payment order, and the account number, if applicable;

(B) Unless the originator is a publicly traded corporation, public utility or government agency, the name of any person on whose behalf the funds transfer was originated, if different from (A);

(C) The amount of the funds transfer;

(D) The execution date of the funds transfer;

(E) The payment instructions, if any;

(F) The identity of the beneficiary's bank; and

(G) The name of the beneficiary of the payment order, and the account number, if applicable.

(ii) When acting as an intermediary bank for a funds transfer, any information received by the institution by the originator's bank or another intermediary bank;

(iii) The following information for each funds transfer for which it is the beneficiary's bank:

(A) The name of the beneficiary of the payment order, and the account number, if applicable;

(B) Unless the beneficiary is a publicly traded corporation, public utility or government agency, the name of any person on whose behalf the funds transfer was received, if different from (A);

(C) The amount of the funds transfer;

(D) The payment date of the funds transfer;

(E) The payment instructions, if any;

(F) The identity of the originator's bank; and

(G) The name of the originator of the payment order, and the account number, if applicable and known by the beneficiary. (2)(i)(A) A bank which acts as the originator's bank with respect to a funds transfer for a deposit accountholder must obtain the information required in paragraph (f)(1)(i) prior to the initiation of the first payment order.

(B) Prior to acting as an originator's bank with respect to a funds transfer for a nondeposit accountholder, the financial institution must verify the originator's name and address by examination of a document that contains the name and address of the originator and record that information and the type and number of the identification documentation reviewed. The bank shall maintain a record, in addition to the information required in paragraph (e)(1)(i), of the person's name, address, social security number, and date of birth.

(ii)(A) A bank which acts as a beneficiary's bank with respect to a funds transfer for a deposit accountholder must obtain the information required in paragraph (e)(1)(iii) within 15 days after payment of the funds transfer to the beneficiary. In the event that a financial institution has been unable to secure the required information, it shall nevertheless not be deemed to be in violation of this section if

(*1*) it has made a reasonable effort to secure such information, and

(*2*) it maintains a list containing the names, addresses, and account numbers of those persons originating funds transfers on which there is incomplete information.

The names, addresses and account numbers shall be made available to the Secretary upon request.

(B) Prior to acting as a beneficiary's bank with respect to a funds transfer for a nondeposit accountholder, the bank must verify the name and address of the beneficiary of the funds transfer by examination of a document that contains the name and address of the beneficiary and record that information and the type and number of the identification document reviewed. In addition, the bank also must maintain a record, in addition to the information required in paragraph (e)(1)(iii), of the person's name, address, social security number and date of birth.

(3) The information required in paragraph (e)(1)(i) to be maintained by the originator's bank shall be retrievable by the name of the originator of the funds transfer and by the originator's account number, if applicable. The information required in paragraph (e)(1)(ii) to be maintained by the beneficiary's bank shall be retrievable by the name of the beneficiary of the funds transfer and by the account number of the beneficiary, if applicable.

(4) Funds transfers between domestic banks for their own accounts are not subject to the requirements of this paragraph (e).

(f)(1)(i) A financial institution (other than a bank) that transmits funds for a person or on its own behalf shall retain the original or a microfilm or other copy or reproduction of the following information or record with respect to each transmittal of funds:

(A) The name, address, social security number, and date of birth of the customer instructing that the funds be transmitted and the account number, if applicable;

(B) The name of any person on whose behalf the funds were transmitted if different from (A);

(C) The amount of funds transmitted;

(D) The date of the funds transmittal;

(E) Any payment instructions;

(F) The identity of the person or financial institution receiving the funds on behalf of the recipient;

(G) The name and address of the recipient of the funds transmitted, and account number, if applicable, and

(H) Any application or form completed by the person instructing the transmittal relating to the transmittal.

(ii) Prior to transmitting funds, the financial institution must verify the name and address of the person instructing the transmittal by examination of a document that contains the name and address of the person and record that information and the type and number of the identification document reviewed.

(2)(i) A financial institution (other than a bank) that receives funds for any person or on its own behalf, shall retain the original or a microfilm or other copy or reproduction of the following information with respect to each transmittal of funds it receives:

(A) The name, address, social security number, and date of birth of the person receiving the funds and the account number, if applicable;

(B) The name of any person on whose behalf the funds were received if different from (A);

(C) The amount of funds received;

(D) The date the funds were received;

(E) Any payment instructions;

(F) The identity of the person or financial institution transmitting the funds on behalf of the person who instructed transmittal of funds;

(G) The name and address of the person who ordered the funds transmittal, and account number, if applicable and known; and

(H) Any receipt or form completed by the recipient relating to the receipt of funds.

(ii) Prior to disbursing funds, the financial institution must verify the name and address of the person receiving the funds transmitted by examination of a document that contains the name and address of the recipient and record that information.

(3) The information required in paragraph (f)(1)(i) by the financial institution transmitting funds shall be retrievable by the name of the customer instructing the funds to be transmitted and by the customer's account number, if applicable, and shall be maintained at the location of the branch, agency or office of the financial institution making the transmittal. The information required in paragraph (f)(2)(i) by the financial institution receiving a transmission of funds shall be retrievable by name of the funds recipient of the funds transmitted and shall be maintained at the location of the branch, agency or office of the financial institution receiving the transmittal.

Dated: October 9, 1990.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87-267, DA 90-1379]

Broadcast Services; AM Technical Assignment Criteria

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The Commission extends the time for filing comments in its proceeding reviewing AM technical assignment criteria from October 15, 1990, to November 16, 1990, and the time for filing reply comments from November 14, 1990, to December 17, 1990. The deadline for submitting non-binding letters of intent to migrate to the expanded AM band is also extended from October 15, 1990, to November 16, 1990. The *Notice of Proposed Rulemaking* in this proceeding (FR Doc. 90-18020) may be found at 55 FR 31607 (August 3, 1990). The action is taken because of the complex technical matters at issue in this Docket.

DATES: Comments are now due on November 16, 1990, reply comments are due on December 17, 1990, and non-binding letters of intent to migrate to the expanded AM band are now due on November 16, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Henry Straube, Mass Media Bureau, (202) 632-6955.

SUPPLEMENTARY INFORMATION:

Order

Adopted: October 4, 1990.
Released: October 4, 1990.
By the Chief, Mass Media Bureau.

1. On July 13, 1990, the Commission released a *Notice of Proposed Rulemaking* in MM Docket 87-267 that proposes to revise the AM technical standards to bring about a reduction of interference in the existing AM band and proposes a means of implementing the expanded (1605kHz-1705kHz) AM band that became available for use on July 1, 1990.[1] The deadlines for filing comments and reply comments are currently October 15, 1990, and November 14, 1990, respectively. Non-binding letters of intent to migrate to the expanded AM band are currently due to be filed October 15, 1990.[2]

2. On September 26, 1990, a request for extension of these deadlines was filed by the Association of Federal Communications Consulting Engineers (AFCCE). That request asks for a sixty (60) day extension of the October 15, 1990, and November 14, 1990, comment and reply comment filing dates.

3. In support of its request for extension of the filing deadlines, the AFCCE argues that, given the complexity of the various proposed changes to the AM technical rules, additional time is required to perform the requisite analyses necessary for developing a comprehensive response.

4. While we agree with AFCCE that many of the proposed changes to our AM rules involve complex technical matters, we nevertheless believe that sufficient and thorough analyses of these proposals can be accomplished within an additional 30 day period.

5. Accordingly, *It is ordered* That the request to extend the comment and reply comment dates filed by the Association of Federal Communications Consulting Engineers *is granted to the extent indicated herein.* The dates for filing comments and reply comments on the NRPM *are extended* to November 16, 1990 and December 17, 1990, respectively. On our own motion, the deadline for filing non-biding letters of

[1] FCC 90-136, adopted April 12, 1990, 5 FCC Rcd 4381 (1990).

[2] 55 FR 31607 (August 3, 1990).

intent to migrate to the expanded band *is extended* to November 16, 1990. No further extension of these dates is contemplated.

6. This action is taken pursuant to authority found in §§ 4(i) and 303(r) of the Communications Act of 1934, as amended and §§ 0.204(b), 0.283, 1.46, and 1.45 of the Commission's Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Mass Media Bureau.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 90-437, RM-7284]

Radio Broadcasting Services; Marion and Orrville, AL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for a rule making filed on behalf of Marion Radio, Inc., permittee of Station WJAM-FM, Channel 248A, Marion, Alabama. Petitioner seeks the substitution of Channel 247A for Channel 248A, as well as a change in the community of license for WJAM-FM from Marion to Orrville, Alabama, and the concomitant modifications of its permit to specify operation on the substitute channel. Coordinates for Channel 247A at Orrville are 32-18-00 and 87-09-30.

DATES: Comments must be filed on or before November 30, 1990, and reply comments on or before December 17, 1990.

ADDRESSES: Federal Communications Commission, Washington, DC 20554 In addition to filing comments with the FCC, interested parties should serve the petitioner, as follows: Marion Radio, Inc., Attn: Paul Reynolds, President, 415 North College, Greenville, AL 36037.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 90-437, adopted September 21, 1990, and released October 9, 1990. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contracts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 394

[FHWA Docket No. MC-90-2]

RIN 2125-AC49

Notification and Reporting of Accidents; Property Damage

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking and request for comments.

SUMMARY: The FHWA proposes to amend its definition of a "reportable accident" for motor carriers operating in interstate commerce by changing the criterion for reporting accidents resulting in property damage under part 394 of the Federal Motor Carrier Safety Regulations (FMCSR). The current property dollar value assessment would be replaced with a "towaway" criterion. "Towaway" is defined as "one or more vehicles incurring disabling damage as a result of the accident and transported away from the scene by a tow truck or another vehicle." Integral to this definition is the term "disabling damage," which is defined to mean road vehicle damage which precludes departure of the vehicle from the scene of the accident in its usual operating manner in daylight after simple repairs. This proposed amendment does not affect the requirement to report accidents involving injury or death. This action is being taken in an effort to standardize and simplify State and motor carrier industry accident reporting procedures by removing the uncertainty of estimating a dollar value amount. The FHWA is also soliciting comments on two other potential changes: (1) Revising the FMCSR definition of a reportable accident to be consistent with the American National Standard Institute (ANSI) D-16 definition of a motor vehicle traffic accident and (2) removing the instructions for the preparation of the Motor Carrier Accident Reports, Forms MCS 50-T and 50-B, from § 394.20 of the FMCSRs, and printing the instructions on the back of the forms.

DATES: Written comments must be received on or before December 14, 1990.

ADDRESSES: Submit written, signed comments to FHWA Docket No. MC-90-2, room 4232, HCC-10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Commenters may, in addition to submitting "hard copies" of their comments, submit a floppy disk (either 1.2Mb or 360Kb density) in a format that is compatible with either word processing programs, Word Perfect or WordStar. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m. ET, Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. William H. Blount, Office of Motor Carrier Standards, (202) 366-2981; Ms. Bonnie Bass, Office of Motor Carrier Information Management and Analysis (202) 366-0089, or Mr. Edward J. Mullaney, Office of the Chief Counsel, (202) 366-1353, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION:

Background

Public concern over accidents involving large trucks and buses remains strong. Each year about 4,500 [1]

---

[1] Information abstracted from Fatal Accident Reporting System 1988: A Review of Information on Fatal Traffic Accidents in the United States in 1988, U.S. Department of Transportation, National Highway Traffic Safety Administration, Report DOT HS 807-345, March 1990.

people lose their lives in commercial motor carrier accidents. Yet, national truck accident statistics, which are based mainly on data from State police accident reports, vary tremendously from one Federal agency to another. The variations in truck accident statistics can be attributed in large part to differences in the States' definitions of accidents and vehicle types. The lack of uniformity among the States in the types of truck accident data collected and the inconsistency in the definitions of those data elements make nationwide analysis of interstate truck accident data very difficult and evaluation and comparison of data among the States virtually impossible.

Research Undertaken

In an effort to mitigate these problems, the FHWA contracted with the National Governors' Association (NGA) to identify a minimum set of truck accident data elements that could be collected and defined uniformly by all States. To do this, the NGA assembled a Technical Advisory Group (TAG) made up of State officials from law enforcement agencies, public safety departments, transportation departments and transportation associations. The TAG developed a set of 23 commercial motor vehicle accident data elements and associated definitions. The Governors, at their 1988 winter meeting, unanimously adopted a policy recommending that States collect information on commercial motor vehicle accidents using the same data elements and the same definitions. The NGA endorsed the inclusion of information on the driver, motor carrier, vehicle, roadway, environmental conditions, type of accident, accident events, involvement of hazardous materials and accident results. The collection of standard accident data will enable the States and the Federal government to more effectively evaluate safety programs designed to reduce the volume and severity of commercial motor vehicle accidents. The FHWA will be able to better understand the causes of commercial motor vehicle accidents and to propose more effective countermeasures by evaluating accident data.

Discussion

From the onset of the project, the TAG strived to develop a uniform data set that was objective, simple to understand, and easy to collect. In keeping with this approach, the TAG opted for a "towaway" definition in lieu of the traditional dollar value of damage to categorize accidents involving only property damage. In the opinion of the TAG, the "towaway" approach had several distinct advantages over the property damage dollar value estimate approach. First of all, a "towaway" criterion is observable. It is certainly much easier for the attending officer to determine if a vehicle was towed than to try to subjectively estimate the severity of the property damage and determine whether it exceeds a specified property damage dollar value threshold.

Second, the "towaway" approach is not affected by inflation. The effect of inflation on dollar amount thresholds has long been a problem. When the costs of repairs rise, more accidents will be reported, even though there may have been no increase in the number or severity of accidents. Therefore, a dollar amount threshold is not a good measure for historical comparison (i.e., trend analyses). The FHWA and some States have attempted to deal with this problem by adjusting their thresholds to account for inflation. (NGA, Capital Ideas, June 1988).

Third and perhaps most important, a "towaway" criterion provides for greater uniformity by eliminating the variation among the States caused by differing property damage thresholds. The NGA's June 1988 edition of Capital Ideas reported that 39 States use property damage thresholds ranging from $100 in Louisiana to $1,000 in Massachusetts. Investigating officers often have difficulty assessing the severity of the damage in terms of cost. As a result, accident statistics vary widely among States due mainly to the definition of a reportable accident based on a dollar value threshold.

At the Federal level, a major problem which results from the use of a property damage threshold is the need to regularly update the dollar value threshold in order to make property damage estimates comparable from year to year. On February 20, 1986, the FHWA published a final rule in the Federal Register (51 FR 6121) (FHWA Docket No. MC–117; Amendment Number 83–16), which raised the dollar value threshold for reporting property damage accidents from $2,000 to $4,200 based upon the increased cost of repairs and replacement of property. The FHWA believed that adopting any fixed figure for this criterion would be inappropriate because of the changing value of the dollar. Therefore, it was decided to update the $2,000 property damage criterion for reporting accidents by applying the Gross National Product (GNP) deflator to the 1979 figure, and to undertake an annual adjustment of the property damage amount used in defining "reportable accidents."

In 1987, the FHWA adjusted the accident reporting dollar value threshold to $4,400 (52 FR 7278, March 10, 1987). Since then, the FHWA has reviewed the process by which the accident reporting minimum is adjusted. The relatively minor adjustment of $200 provided by the annual review in arriving at the reporting threshold for 1987 did not provide enough benefit to offset the uncertainty of estimating the dollar value difference that would have been caused within the motor carrier industry. As a consequence, the FHWA considered foregoing adjustment of the formal reporting minimum unless the changes would be at a last 10 percent of the current reporting minimum, rounded to the nearest $500. The FHWA finds this process to be cumbersome, confusing and ineffective.

The FHWA reviewed State accident files in conjunction with staff from the National Highway Traffic Safety Administration (NHTSA) in order to determine the effect of amending the current definition of accidents involving reportable property damage only, as contained in 49 CFR 394.3. The FHWA identified only one State (Indiana) that included information on the dollar amount of property damage as well as whether a vehicle was towed from the scene of the accident. Based on an analysis of Indiana's 1987 truck accident data, it was estimated that 1,258 accidents had damage above the FHWA's $4,400 threshold. If the FHWA changed its definition to embrace the term "towaway," 1,790 accidents would need to have been reported instead of 1,258. In relative terms, however, the impact on the industry would be minor. In 1988, the vast majority of property damage accidents were reported by medium (20–99 vehicles) and large motor carriers (100 and over vehicles). Even so, in 1988, these carriers submitted an average of fewer than one property damage accident report (.8) per carrier. The FHWA estimates the impact of changing to a "towaway" definition would increase this number to about 1.1 property damage accident reports annually or require one additional accident report per carrier every 3 years. For small motor carriers (1–19 vehicles), which represent 94% of all interstate carriers, the impact would be even less because they submit an average of less than 1 property damage accident report every 10 years.

In addition, the FHWA believes there is a potential for long-term benefits to the industry from this change. When the FHWA accident reporting program,

Safetynet,[2] is operational in all States, the FHWA will reassess its program of requiring commercial motor carriers to report their accidents using the Form MCS 50–T or MCS 50–B.

In view of the foregoing, the FHWA is proposing to amend § 394.3 by revising paragraph (a)(3). This paragraph would replace the dollar value threshold criterion with a "towaway" criterion. Section 394.3(a)(3) will then read as follows: "One or more vehicles incurring disabling damage as a result of the accident and transported away from the scene by a two truck or another vehicle."

It is proposed to add § 394.5, Disabling damage, to make this definition identical to the definition found in section 2.3.10 of the ANSI D–16 "Manual On Classification of Motor Vehicle Traffic Accidents," 4th Edition, December 2, 1984. The FHWA believes this definition will be important to ensure that only serious motor carrier accidents are reported. The FHWA is seeking more information from interested parties on how adoption of the "towaway" definition would affect FHWA accident trends and whether it would be a significant additional burden on industry.

Other Issues Relating to Accident Reporting

The FHWA is also soliciting comments on two other issues: (1) Revising the Federal definition of an accident to be more consistent with the ANSI D–16 definition of a motor vehicle traffic accident and (2) removing the Forms MCS 50–T and 50–B preparation instructions from § 394.20 of the FMCSRs.

The FHWA is considering an amendment and requesting comments to that portion of the definition of "reportable accident" found at § 394.3(a) to be consistent with the ANSI D–16 definition of "traffic accident." The ANSI definition more precisely defines the circumstances under which an accident should or should not be reported. It includes the term "trafficway" to explain where the accident occurred as well as the type of accident to be reported. For the purposes of motor carriers, the term "trafficway" includes the roadway (travelled portion of the road), the shoulders of the road (if any) and the rest of the right-of-way between the shoulders and the boundaries of the adjacent property line. In a traffic accident, either the unstabilized situation must originate on a trafficway or a harmful event must occur on a trafficway. An "unstabilized situation" is a set of events not under human control. It originates when control is lost and terminates when control is regained or, in the absence of persons who are able to regain control, when all persons and property are at rest. A "harmful event" is the occurrence of an injury (bodily harm to a person) or damage (harm that causes reduction in monetary value of property).

A major effect of replacing the current FHWA definition with the ANSI D–16[3] definition is that motor carriers will be required to submit only a Form MCS 50–T or 50–B accident report to the FHWA for accidents that originated or occurred on a trafficway and not at such places as terminal yards or construction sites. This should have the effect of reducing the number of accidents that must be reported.

Another major effect of replacing the current FHWA definition of "reportable accident" with the ANSI D–16 definition is that it will also make the definition used by the FHWA consistent with the one used by the NHTSA.

The FHWA specifically requests comments on the following issues:

1. How important is it for the FHWA to continue to receive accident reports for accidents that originate or occur in places other than a trafficway?

2. What effect, if any, would the adoption of the ANSI D–16 standard definition have on the motor carrier industry?

3. Who is using the ANSI D–16 accident definitions?

4. What is ANSI D–16 specifically being used for?

5. Will FHWA adoption of the ANSI D–16 standard conflict with other definitions used by the nation's law enforcement agencies?

The FHWA is also soliciting comments on a proposal to remove the instructions for the preparation of Forms MCS 50–T and 50–B from § 394.20 of the FMCSRs because any revision to the Forms MCS 50–T and 50–B requires rulemaking action. The FHWA believes this is burdensome and hampers efforts to keep the information collected from the MCS 50–T and 50–B forms current and relevant.

To ensure that carriers have ready access to the MCS 50–T and 50–B instructions, the instructions would be printed on the back of the approved form, available from commercial distributors or from any FHWA field Office. The address and telephone number of the regional offices are listed in § 390.27 of the FMCSRs. The FHWA specifically requests comments on the following issues:

1. What advantages are there, if any, in keeping the Forms MCS 50–T and 50–B preparation instructions in the FMCSRs?

2. Would any group(s) be adversely affected if the instructions were removed and republished elsewhere?

Regulatory Impact

The impact of this proposal will not result in an annual effect on the economy of $100 million, a major increase in costs or prices, or have a significant adverse effect on the nation's economy. The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or a significant regulations under the regulatory policies and procedures of the Department of Transportation. The proposed revisions contained in this document would simplify State and motor carrier industry accident reporting procedures by removing the uncertainty of estimating a dollar value amount. Although more accidents would have to be reported, the actual impact on the industry would be minor. It is estimated that this proposal would result in the preparation of only one additional accident report per medium and large motor carrier every three years. For smaller motor carriers, this number would be even less. Therefore, a full regulatory evaluation is not required. Commenters may submit any data they may have regarding benefits and/or costs of this proposal.

For the foregoing reasons and under the criteria of the Regulatory Flexibility Act, the FHWA certifies that this action will not have a significant economic impact on a substantial number of small entities.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

---

[2] Safetynet is an automated information management system designed to support the Motor Carrier Safety Assistance Program by allowing the safety performance of commercial motor carriers to be monitored by participating State and Federal DOT Offices.

[3] The ANSI D–16 definition of traffic accident is found in the Manual on Classification of Motor Vehicle Accidents. Copies may be purchased from the National Safety Council, 444 North Michigan Avenue, Chicago, Illinois 60611.

Federalism Assessment

This proposed rule would change the reporting threshold for motor carrier accidents that result in damage to property only. Nothing in this document directly preempts any State law or regulation. The FMCSRs establish minimum safety requirements which, at the present time, may be supplemented by the States, except for the adoption of inconsistent regulations. The statutory basis for Federal regulation of interstate commerce has been outlined above. A single issue is addressed in this proposed rule and does not involve policies that have federalism implications. This proposed rule would not limit the policymaking discretion of the States. Accordingly, it is certified that the policies contained in this document have been assessed in light of the principles, criteria, and requirements of the Federalism Executive Order.

Environmental Impact Assessment

This regulation does not significantly affect the environment. An environmental impact statement is not required under the National Environmental Policy Act of 1969.

List of Subjects in 49 CFR Part 394

Highway safety, Motor carriers, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Program Number, 20.217, Motor Carrier Safety)

Issued on: October 5, 1990.

T.D. Larson,

Administrator.

In consideration of the foregoing, the FHWA is proposing to amend part 394 of title 49, Code of Federal Regulations, to read as set forth below:

PART 394—[AMENDED]

1. The authority citation for part 394 continues to read as follows:

Authority: 49 U.S.C. App. 2505; 49 U.S.C. 504 and 3102; 49 CFR 1.48.

2. In § 394.3, paragraph (a)(3) is revised to read as follows:

§ 394.3 Definition of "reportable accident."

(a) * * *

(3) One or more vehicles incurring disabling damage as a result of the accident and transported away from the scene by a tow truck or another vehicle.

* * * * *

3. A new § 394.5 is added to read as follows:

§ 394.5 Disabling damage.

The term disabling damage means road vehicle damage which precludes departure of the vehicle from the scene of the accident in its usual operating manner in daylight after simple repairs.

(a) *Inclusions.* Vehicles which could be driven but would be further damaged if so driven.

(b) *Exclusions.* (1) Damage which can be remedied temporarily at the accident scene without special tools or parts other than tires.

(2) Tire disablement without other damage even if no spare tire is available.

(3) Headlamp or taillight damage, which would make nighttime driving hazardous but would not affect daytime driving.

(4) Damage to turn signals, horn, or windshield wipers which makes them inoperative.

§ 394.20 [Removed and Reserved]

4. Section 394.20 is removed and reserved.

[FR Doc. 90-24239 Filed 10-12-90; 8:45 am]

BILLING CODE 4910-22-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 14

RIN 1018-AB22

Humane and Healthful Transport of Wild Mammals and Birds to the United States

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to amend a rule establishing standards for the humane and healthful transport of wild mammals and birds to the United States. The amendments are intended to alter provisions of the rule that rendered it difficult to enforce, that might have contributed to inhuman shipping conditions, or that would have been inappropriate or unrealistic for shippers, carriers, or importers.

DATES: The Service will consider comments received by December 14, 1990, in formulating a final rule.

ADDRESSES: Office of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Mr. Marshall P. Jones, Chief, Office of Management Authority, U.S. Fish and Wildlife Service, telephone (703) 358-2093.

SUPPLEMENTARY INFORMATION: The Lacey Act Amendments of 1981 (Publ L. 97-79, 95 Stat. 1073), enacted on November 16, 1981, required the Secretary of the Interior to prescribe requirements for the humane and healthful transport of wild animals and birds to the United States. This requirement was delegated to the Service, which held a public meeting on march 28, 1982, in Wahington, DC, to receive information and comments regarding the development of appropriate regulations. On June 30, 1982 (47 FR 28432), the Service published a notice of intent that summarized the issues raised and discussed at the March 28, 1982, public meeting and invited comments and recommendations from all interested persons. On December 4, 1985, the Service published a proposed rule (50 FR 49709-49736). Comments received in response to the notice of intent were summarized in that proposal. A final rule was published in the Federal Register on November 10, 1987 (52 FR 43274), and was to have taken effect on February 8, 1988. A notice correcting several typographical errors appeared in the Federal Register of December 3, 1987 (52 FR 46019).

Before the effective date of the final rule, the Service received a significant number of comments indicating the likelihood of impediments to its enforcement, the possibly inhumane treatment that could be brought about by compliance with some of its provisions, and the possibility that some of the rule's requirements could without good reason render the transport of some animals virtually impossible. In addition, the Service received indications that some air carriers were prepared to refuse all wildlife shipments bound for the United States because of a perceived inability to assure compliance with the new rule. Critics of the rule met with Service officials on January 22, 1988, to discuss their reservations over its implementation. Service officials also met during late January 1988 with representatives of groups supporting implementation of the rule. Subsequently, a decision was made to extend the effective date until August 1, 1988, so that a thorough evaluation could be conducted. Notice of the extension and of the opening of a 30-day comment period was published in the Federal Register of February 10, 1988 (53 FR 3894). A further notice of explanation appeared on March 17, 1988 (53 FR 8765).

On April 18, 1988, however, responding to a lawsuit seeking implementation of the November rule, the United States District Court for the District of Columbia issued a preliminary injunction ruling that delay of the effective date was without good cause. Consequently, the Service issued a notice of effective date and enforcement policy on April 27, 1988 (53 FR 15041) and a further notice of enforcement policy on May 23, 1988 (53 FR 18287).

On August 10, 1988, the Service published a notice of intent (53 FR 30077) indicating those provisions of the November 1987 rule that appeared to warrant amendment or clarification and inviting public comment to assist in developing a proposed rule. The comment period for that notice closed on September 9, 1988. The proposed rule presented below is based on analysis of the existing rule in the light of comments received since its adoption and is intended to embody a reasonable, enforceable, and effective means of promoting the humane and healthful transport of wild mammals and birds to the U.S.

A comparison of the newly proposed rule with the present version is presented below in section-by-section order. Where section numbers have been changed, existing sections are cited in square brackets. Minor changes intended to minimize redundancy, improve clarity of expression, or correct grammatical errors are not explained in detail.

Section-by-Section Analysis

Section 14.101 Purposes.

The purposes of the rule would remain unaltered.

Section 14.102 Definitions.

Several definitions would be added, deleted, or altered, as noted below.

Ambient air temperature. This definition would be reworded to clarify the intention that temperatures are to be measured outside, rather than within, primary enclosures.

Auxiliary ventilation. This definition would be added in order to avoid repetitive descriptions of the term in the text of the rule.

Carrier. This definition would remain unchanged, as recommended by several commenters.

Domesticated. This term would be newly defined in order to better indicate what animals are considered "wild," and therefore covered by the rule.

In advanced stages of pregnancy. This definition would be eliminated because the term is not used in either the current rule or the proposed revision.

Injured. Although it has been suggested that this term be defined in order to clarify its meaning in § 14.105(c), the Service believes that the meaning is clear without provision of a further regulatory definition. The term is intended to apply to animals suffering from unhealed injuries that are life-threatening or disabling.

Marine mammal. This term would be defined in the sense of its application for this rule.

Normal rigors of transportation. A new definition would be provided for this expression because the current definition is difficult to understand. The proposed version would refer to the unavoidable stress to an animal caused by transport. Several commenters recommended changes in the existing definition, and the Service has referred to these in formulating its proposal. The definition should be understood in relation to its use in § 14.105(b). The intention is that, before being accepted by a carrier, animals be certified by a qualified veterinarian as able to withstand the stresses that are unavoidably associated with transport.

Noxious machinery. This term is undefined in the current regulations and would not be defined in this proposal. In addition, the word "noxious" would be deleted from § 14.111. The current regulation requires that animals be protected from harassment by noxious machinery. The Service intends the proposed rule to require that animals not be exposed unnecessarily to machinery that makes noise; emits fumes, heat, or light; or causes vibrations, and consequently would add these descriptive terms to the proposed regulation.

Obvious distress. This term would remain undefined because it has no specialized meaning within the regulation.

Old-world primate. This definition would be deleted, along with the requirement in § 14.121 of the existing rule that animals so defined test negative for tuberculosis before being accepted by a carrier. The rationale for removing this requirement is explained below in the discussion of § 14.121.

Physical trauma. The Service finds no compelling reason to define this term in a way to alter its ordinary meaning.

Primary conveyance. Because of confusion regarding the intent of the existing definition, a new definition is proposed that would make it clear that any conveyance playing a significant role in transporting an animal to the United States is considered "primary", and that more than one "primary conveyance" may be employed during a given shipment.

Professionally-accepted standards. A minor alteration is proposed for this definition so that the noun "standards" would not be defined by an adjectival phrase.

Psychological trauma. A new definition would be provided in response to comments indicating that the existing definition is vague. The intent is to give a more objective and verifiable description of what is meant by this expression.

Recently given birth. This definition would be deleted because the term is not used in either the present rule or the proposed revision.

Unhealthy conditions. This definition would be deleted because the term is not used in either the current rule or this proposed revision.

Wild. This term would be newly defined in order to indicate the intended scope of the rule. The Service believes that the use of this term is sufficiently distinct in this regulation to warrant a definition separate from that of "wildlife" in 50 CFR 10.12.

Section 14.103 Prohibitions.

This section would not change.

Section 14.104 Translations.

The title of this section would be changed to better reflect its content. English translations of certificates would continue to be required. A clarifying change would indicate that this provision applies to health certificates only, since these are the only certificates required by the subpart.

Section 14.105 Consignment to carrier.

A veterinary examination would be required to be performed by a veterinarian whose qualifications are certified by the country in which transport begins. It is not intended that a carrier verify the qualifications of the examining veterinarian beyond ascertaining that he or she has been issued a license, certificate, or other documentation customarily used by the country to establish professional veterinary qualifications. The Service considers a requirement that the examining veterinarian be a salaried employee of the country in which the certificate is issued to be beyond its ability to enforce. Evidence of inadequate national certification procedures in a country of origin, however, may lead the Service not to accept certificates issued in that country. Any such intention not to accept certificates would be announced

BEST COPY AVAILABLE

beforehand with an explanation for its basis.

The proposal would revise the upper and lower limits for the length of time before scheduled departure during which a shipment could be consigned to a carrier. The existing rule requires that consignment be between 6 and 10 hours before scheduled departure. The Service now believes that a lower limit of 2 hours is reasonable and consistent with normal consignment practices, and more particularly, considers the 6-hour lower limit to be potentially excessive. An upper limit of 8 hours appears to be sufficient to ensure that animals are transported expeditiously and are not kept in holding areas for excessive lengths of time. In addition, the upper limit is believed to be long enough to avoid the difficulty of having animals held for unreasonable periods on the ground because they could not be consigned to an airline, as feared by some respondents.

The requirement that transport be accomplished expeditiously and stopovers be minimized would be removed from this section because it is identical to a requirement in § 14.109, where it is more appropriately placed.

The proposal would not allow the transport of un-fledged chicks for purposes other than medical treatment, in addition to the existing restriction on transport of un-weaned mammals. Chicks that have not yet developed their adult plumage are difficult to identify correctly, more prone to disease, and more susceptible to the stresses and rigors of transportation.

Section 14.108 Primary enclosures.

This section would be reorganized for greater clarity, and several substantive changes would be introduced as well:

Compliance with the Live Animals Regulations (LAR) adopted by the International Air Transport Association (IATA) would still be required, but the statement that such compliance would meet minimum requirements for this subpart would be deleted as having no real significance and being possibly misleading. Similarly, the statement that enclosures are to comply with other requirements of this subpart would be deleted as redundant.

The size requirements for spacer bars (bars attached to enclosures to ensure adequate space for ventilation between enclosures) would be altered so that a bar would never be required to exceed 6 inches (15 centimeters) in width, although the existing requirement that its width equal at least 10% of the longer dimension of the side to which it is attached would be retained below that limit. Rather than requiring a proportionality relationship between the width of spacers and the number of animals contained within an enclosure, the required width would be doubled, up to the same limit of 6 inches (15 centimeters), for enclosures containing more than one animal. The Service believes that these changes will ensure that enclosures have adequate spacers, but not bars so large as to be potentially destabilizing. Despite objections from some commenters, the Service does not believe the 10% formula to be confusing.

The requirement for a paper lining in the bottom of an enclosure containing birds would be deleted, as recommended by most respondents. The Service recognizes that a paper liner or loose litter could become hazardous to birds during transport.

The requirement that an enclosure be marked "THIS SIDE UP" on one of its sides has been deleted because of the potential for confusion. The requirement for markings with arrows indicating upright position is believed to more appropriately ensure that the enclosure will be stowed in the proper position.

The requirement that instructions for care and copies of shipping documents be attached to enclosures is retained because of the necessity of such documents to insure humane conditions and allow adequate inspections. The Service does not consider it unreasonable to require that such documents be readily available.

Rather than specifying that a wooden float be placed in a water trough intended for birds, the proposal would allow a foam or sponge insert or other device to prevent spillage or drowning. The Service recognizes the potential danger that a wooden float could pose for some kinds of birds.

Section 14.107 Primary conveyance.

The requirement that an enclosure be positioned in the conveyance in such a way as to be easily removed in an emergency would be deleted as difficult to comply with in many circumstances and of little practical value in most emergencies that are likely during transport. In addition, placement for easy removal (e.g. near a doorway) could in some instances require the enclosure to be moved or off-loaded more frequently than would be consistent with humane treatment. The Service recognizes the concerns expressed by some commenters as to the necessity of this or a similar requirement, but declines to prescribe the positioning of enclosures within a conveyance in the absence of evidence that inconvenience of removal has contributed to inhumane conditions.

The provision requiring sufficient air for normal breathing, which has been challenged as unenforceable, would be deleted. Although there is evidence that lack of proper ventilation has contributed to inhumane transport conditions, the Service knows of no way to establish that particular instances of morbidity or mortality can be ascribed to insufficient air. It is hoped that the provisions requiring that enclosures be adequately vented and fitted with spacer bars, that cargo holds be pressurized, and that shipments be periodically observed will ensure that animals are able to breathe normally during transport.

Other requirements of this section would be retained substantially in their current form.

Section 14.109 Food and water.

The requirement that animals be provided "potable" water would be replaced by one that requires "water suitable for drinking" to avoid possible confusion with potability standards for drinking water intended for human consumption, which may not be suitable for some animals. It is understood that water provided for animals is to be clean and not a source of contagion. The Service considers "potable" and the term proposed to replace it to be functionally equivalent and this wording change to be without substantive effect on the regulation.

Because of the possibility that an animal arriving in the United States may have exhausted its supply of water or other source of moisture and that it may remain for some time before being claimed by a consignee, requirements have been added that it be observed periodically, fed according to the shipper's instructions and that water or another suitable source of moisture be made available as necessary upon arrival.

The requirement that veterinary care be provided if an animal is observed to be in distress during a stopover would be deleted from this section because it is understood to duplicate the similar requirement that is more properly located in § 14.109(a).

Section 14.109 Care in transit.

This section would be reorganized to improve clarity and reduce duplication. Paragraphs (e)–(g) of this section would be relocated to § 14.111, where they are more appropriately placed.

In addition, several substantive changes would be made. The requirement that an enclosure be inspected "as frequently as circumstances allow" would be deleted

because it is vague and could lead to disturbance of animals by too-frequent inspection. Inspection would continue to be required at least every 4 hours when an enclosure is accessible.

Provision would be made for an examining veterinarian to authorize a variation from the existing pressurization requirement when this would be advantageous to the animal being transported.

The text would be altered to indicate that a carrier is responsible to inspect for signs of distress, including those described in a document attached to an enclosure. The Service recognizes that normal behavior in some animals might be mistaken for distress by persons unfamiliar with them, and wishes to avoid the possibility of encouraging inappropriate attempts to alleviate non-existent "stress." The proposal requires shippers to affix a document with food, water, and care instructions, and signs of stress, to each enclosure; in the absence of such a document, the carrier remains responsible to inspect for signs of distress. The Service recognizes that some shippers may not know all of the signs of distress in the species being shipped, but urges shippers to indicate all available information on the aforementioned document.

At the suggestion of shippers, a carrier would be required to consult with the shipper before providing veterinary care to an animal in distress.

An allowance would be made for an examining veterinarian to specify temperatures outside the ranges generally required for mammals in transport when such temperatures would be more appropriate for a given kind of mammal. The Service recognizes that some mammals may require higher or lower temperatures than those specified in order to be shipped healthfully and humanely.

Section 14.110 Terminal facilities.

The requirement to separate species of primates in a holding area has been deleted and incorporated in § 14.123, in the specifications for primates.

Section 14.111 Handling.

Generally, provisions that duplicate requirements found elsewhere in the subpart would be eliminated from this section and editorial changes would be made to improve clarity. In lieu of defining the term "noxious," which is used in paragraph (e) of the current regulation, the primary disturbing effect that might be caused by machinery would be enumerated.

The requirement that animals be first loaded and last unloaded would be replaced by one that specifies loading as late as possible and unloading as early as possible. The Service has been persuaded by the comments of shippers that animals could be held within conveyances for excessive lengths of time or stowed in inaccessible areas of cargo holds if the provisions of the existing regulation are complied with.

The express requirement that incompatible animals not be held within visual or olfactory contact would be deleted as unnecessarily specific. The Service considers that the proposed provisions of § 14.111(c), requiring that incompatible animals not be held in proximity, provides an adequate mechanism to enforce reasonable separation of such animals.

Section 14.112 Other applicable provisions.

The existing section of this number, titled "Harm during shipment," has been deleted as essentially redundant. The Service will continue to consider evidence establishing compliance with temperature, pressure, and ventilation standards, including evidence provided through automatic instrumentation or personal observation, in evaluating possible violations of this subpart. The Service no longer considers it necessary, however, to include a section that essentially does no more than reinforce requirements contained in other sections.

Proposed § 14.112 would coordinate the general and specific provisions of part 14, so that both the requirements of §§ 14.101–14.111 and the specifications for particular groups would have to be complied with for a given shipment. This coordination is currently contained in a paragraph under "Consignment to carrier" within each set of specifications.

Specifications for Non-Human Primates

Section 14.121 Primary enclosures. [present § 14.122]

In the existing regulations, the section with this number is titled "Consignment to carrier for transport." As noted above, the portion of the section functioning to coordinate the general and specific provisions of the part would be deleted from each set of specifications, and the coordination would be accomplished by a new § 14.112.

The second paragraph of the existing section, which requires a negative tuberculosis test for old-world primates, would also be eliminated. The Service no longer believes that this one communicable disease should be singled out for screening while all others are subject only to the health certification requirements of § 14.105(b).

No substantive changes would be made to the provisions dealing with enclosures.

Section 14.111 Food and water. [present § 14.123]

No substantive changes would be made to this section.

Section 14.123 Care in transit. [present § 14.124]

This section would remain essentially unchanged except that the provisions now located in § 14.110(a), requiring separation of primate species in terminal facilities, would be incorporated. The Service believes that this provision is reasonable in light of the behavioral characteristics of primates, which make disease transmission a particular problem with members of this group. They may, for instance, throw food or feces between enclosures.

[present § 14.125]

This section would be deleted because it largely duplicates the general provisions of § 14.111. Requiring compliance with two sets of slightly different standards covering the same subject matter is likely to engender confusion and reduce enforceability.

Specifications for Marine Mammals

Section 14.131 Primary enclosures. [present § 14.132]

As explained above under § 14.121, the contents of the section now bearing this number would be deleted.

Only minor editorial changes and deletions of redundant provisions would be made to the provisions dealing with enclosures.

Section 14.132 Food and water. [present § 14.133

This section would be consolidated somewhat and shortened by removal of unnecessary explanatory language.

Section 14.133 Care in transit. [present § 14.134]

Only minor editorial changes to promote understanding would be made to this section.

[present § 14.135]

This entire section would be deleted for the reasons explained above under § 14.125.

Specifications for Elephants and Ungulates

Section 14.141 Consignment to carrier.

As noted above, the coordinating function now served by this section would be placed in new § 14.112. The remainder of existing § 14.141 would remain in this section.

Section 14.142 Primary enclosures.

The requirement to provide a water trough would be altered in order to make it more easily understandable and to avoid possible injuries to animals. Otherwise only clarifying changes would be made.

Specifications for Sloths, Bats, and Flying Lemurs (Cynocephalidae)

Section 14.151 Primary enclosures. [present § 14.122]

Starting with this section, all the remaining sections would be renumbered to eliminate a gap in the numerical series that is present in the existing regulations. In addition, the order of this set of specifications and those covering other terrestrial mammals would be reversed.

No substantive changes would be made in this section.

[present § 14.173]

This section would be deleted entirely for the reasons given above for previous similar sections.

Specifications for Other Terrestrial Mammals

Section 14.161 Primary enclosures. [present § 14.182]

Only minor clarifying changes would be made in this section.

[present § 14.153]

This section would be deleted entirely for the reasons explained above under § 14.125.

Specifications for Birds

All the sections dealing with birds would be consolidated under this set of specifications in order to reduce duplication.

Section 14.171 Consignment to carrier. [present §§ 14.181, 14.191, 14.201]

Other than the consolidation of these provisions in a single section, no substantive changes would be made.

Section 14.172 Primary enclosures. [present §§ 14.182, 14.192, 14.202]

This section would be reorganized, and the following substantive changes are proposed.

The confusing requirement that perching birds be afforded sufficient room to "stretch each wing" while perched would be replaced by one that there be sufficient space for all birds to perch simultaneously. This is believed to provide sufficient space for humane conditions when combined with a newly proposed limit of 50 birds in any one enclosure. In order to conform with the IATA Live Animals Regulations, large psittacine birds (longer than 23 cm, or 9 inches) are proposed to be limited to 25 birds in any one enclosure.

The requirement that the enclosure be large enough to permit perching without the tail feathers being damaged would be deleted because it is nearly impossible to enforce and is easily circumvented by plucking or clipping the feathers.

Section 14.173 Temperature standards. [present § 14.183, 14.193, 14.203]

This section would be renamed, and minor clarifying changes would be made to it.

[present §§ 14.184, 14.194, 14.204]

As with several similar sections above, these would be entirely deleted.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposal are hereby solicited.

Executive Order 12291 and the Regulatory Flexibility Act

It has been determined that the proposed revisions to 50 CFR part 14 do not constitute a "major" rule under the criteria established by Executive Order 12291. The revisions principally represent clarifications of existing provisions that are expected to make compliance more practical and enforcement more efficient. It has also been certified that these revisions will not have a significant economic effect on a substantial number of small entities as described by the Regulatory Flexibility Act. Small entities are already required to comply with the current regulations. It is expected that the proposed revisions would reduce the burden on small entities by making requirements clearer, but not more stringent.

Author

The authors of this proposed rule are Dr. John J. Fay, Division of Endangered Species and Habitat Conservation, and Dr. Susan S. Lieberman, Office of Management Authority, U.S. Fish and Wildlife Service, Washington, DC 20204 (703/358-2095).

Proposed Regulation Promulgation

PART 14—[AMENDED]

Accordingly, it is hereby proposed to amend part 14 of chapter I of title 50 of the Code of Federal Regulations to read as follows:

1. The authority citation for part 14 reads as follows:

Authority: 16 U.S.C. 42; 16 U.S.C. 3371–3378; 16 U.S.C. 1538(d)–(f), 1540(f); 16 U.S.C. 1382; 16 U.S.C. 704, 712; 31 U.S.C. 483(a); 16 U.S.C. 852(c).

2. Subpart J is revised to read as follows:

Subpart J—Standards for the Humane and Healthful Transport of Wild Mammals and Birds to the United States

Subpart J—Standards for the Humane and Healthful Transport of Wild Mammals and Birds to the United States

§ 14.101 Purpose.

The purpose of this subpart is to prescribe importation requirements necessary to ensure that live mammals and birds shipped to the United States arrive alive, healthy, and uninjured and that transportation of such animals occurs under humane and healthful conditions. These regulations implement section 9(d) of the Lacey Act Amendments of 1981.

§ 14.102 Definitions.

In addition to the definitions contained in part 10 of this subchapter B, in this subpart—

Ambient air temperature means the temperature of the air surrounding a primary enclosure containing a wild mammal or bird.

Auxiliary ventilation means cooling provided by such means as vents, fans, blowers, or air conditioning.

Carrier means any person operating an airline, railroad, motor carrier, shipping line or other enterprise engaged in the business of transporting any wild mammal or bird for hire, for commercial purposes, or for exhibition.

Communicable disease means any contagious, infectious, or transmissible disease of wild mammals or birds.

Domesticated means belonging to a species that has been habituated through human genetic selection for many generations to living in close proximity to humans and that has been bred to fulfill human requirements for food, fiber, aesthetic enjoyment, or companionship, or as a subject of scientific research.

Do not tip means do not excessively rock or otherwise move from a vertical to a slanting position, knock over, or upset.

Handle means feed, manipulate, crate, shift, transfer, immobilize, restrain, treat or otherwise control the movement or activities of any wild mammal or bird.

Holding area means a designated area at or within a terminal facility that has been specially prepared to provide shelter and other requirements of wild mammals or birds being transported to the United States, and in which such mammals or birds are maintained prior to, during, or following such shipment.

Kept clean means maintained free from dirt, trash, refuse, excreta, remains from other cargo, and impurities of any type.

Marine mammal means an individual of a species of the orders Cetacea, Pinnipedia, or Sirenia, or a polar bear (*Ursus maritimus*) or sea otter (*Enhydra lutris*).

Non-compatible means not capable of existing together in harmony.

Non-human primate means any non-human member of the order Primates.

Normal rigors of transportation means the stress that wild animal can be expected to experience as a result of exposure to unaccustomed surroundings, unfamiliar confinement, caging, unfamiliar sounds, motions, and other conditions commonly encountered during transport.

Primary conveyance means any vehicle, vessel, or aircraft employed to transport an animal for a significant distance between its origin and destination.

Primary enclosure means any structure used to restrict a mammal or bird to a limited amount of space, such as a cage, room, pen, run, compartment, pool, hutch, or compartment thereof.

Professionally accepted standards means a level of practice established as acceptable by a body of qualified persons of the veterinary medical profession.

Psychological trauma means an episode of exposure to abnormally stressful conditions resulting in significant behavioral abnormality including, but not limited to, manifestations of unaccustomed aggressiveness, self-mutilation, or refusal of food or water.

Sanitize means to make physically clean and, as far as possible, free of toxic or infectious agents injurious to the health of wild mammals or birds.

Scheduled departure time means the time listed on a time-table of departures and arrivals or, in the absence of a time-table, means the time of departure agreed to by a carrier and shipper.

Shipper means any person, other than a carrier, involved in the transport of wild animals to the United States regardless of the purpose of such transport, e.g., exporter, importer, or agent.

Terrestrial mammals means mammals other than marine mammals.

Transport means to move, convey, carry, or ship by any means, or to deliver or receive for the purpose of movement, carriage, or shipment, by air, land, or sea.

Transporting device means any vehicle or device used to transport an animal between a primary conveyance and terminal facility, or in and around a terminal facility of a carrier, or within a primary conveyance.

Wild means belonging to a species that has not been domesticated, or belonging to a population of an otherwise domesticated species that has not been genetically altered for many generations by human intervention to render it compatible with close human contact.

§ 14.103 Prohibitions.

Unless the requirements of this subpart are fully satisfied, and all other legal requirements are met, it is unlawful for any person to transport to the United States, cause to be transported to the United States, or allow to be transported to the United States any live wild mammal or bird. It shall be unlawful for any person to import, to transport, or to cause or permit to be transported to the United States any wild mammal or bird under inhumane or unhealthful conditions or in violation of this subpart J.

§ 14.104 Translations.

Any health certificate required by this subpart to accompany a mammal or bird transported to the United States and written in a foreign language must be accompanied by an accurate English translation.

§ 14.105 Consignment to carrier.

(a) No carrier shall accept any live wild mammal or bird for transport to the United States that has not been examined within 10 days prior to commencement of transport to the United States by a veterinarian certified as qualified by the national government of the initial country from which the mammal or bird is being exported.

(b) A health certificate, signed by the examining veterinarian, stating that the animal has been examined, is healthy, appears to be free of any communicable disease, and is able to withstand the normal rigors of transport must accompany the mammal or bird. A mammal in the last trimester of pregnancy, if this is detectable using professionally accepted standards, shall not be accepted for transport to the United States except for medical treatment and unless the examining veterinarian certifies in writing that the animal has been examined, the state of pregnancy has been evaluated, and that despite the medical condition requiring treatment, the animal is physically able to withstand the normal rigors of transportation to the United States.

A nursing mother with young, an unweaned mammal unaccompanied by its mother, or an un-fledged bird, shall be transported only if necessary for medical treatment. An unweaned animal shall not be transported to the United States without its mother unless it is accompanied by an attendant.

(c) A sick or injured wild mammal or bird shall be permitted transport to the United States only if the primary purpose of such transport is for needed medical treatment and upon certification in writing by the examining veterinarian that the animal is able to withstand the normal rigors of travel in its present condition. A sick or injured animal shall be accompanied throughout the transport process by an individual qualified to care for and treat it. This individual shall be in possession of or have ready access to all medications to be administered during the transport.

(d) No carrier shall accept any wild mammal or bird for transport to the United States presented by the shipper less than 2 hours or more than 6 hours prior to the scheduled departure of the primary conveyance on which it is to be transported.

§ 14.106 Primary enclosures.

No carrier shall accept for transport to the United States any live wild mammal or bird in a primary enclosure that does not conform to the following requirements:

(a) The current container requirements of the Live Animal Regulations (LAR) adopted by the International Air Transport Association (IATA) shall be complied with by all parties transporting wild mammals or birds to the United States.

(b) A primary enclosure shall be constructed so that—

(1) The strength of the enclosure is sufficient to contain the mammal or bird and to withstand the normal effects of transport;

(2) The interior of the enclosure is free from any protrusion that could be injurious to the mammal or bird within;

(3) No part of the animal can extend or protrude outside of the primary enclosure in such a way as to cause injury to the contained animal, to nearby persons or animals, or to handlers of the primary enclosure;

(4) Access to the primary enclosure is closed and secured with an animal-proof device designed to prevent accidental opening and release of the mammal or bird;

(5) The opening of the enclosure is easily accessible for emergency removal of the mammal or bird by authorized personnel;

(6) The enclosure has sufficient opening to ensure adequate circulation of air at all times.

(7) The material of which the primary enclosure is constructed is not treated with any paint, preservative, or other chemical that is injurious or otherwise harmful to the health or well-being of mammals and birds.

(c) Unless the enclosure is permanently affixed in the primary conveyance or has an open top, as specified by LAR or below for certain large mammals, spacer bars allowing circulation of air around the enclosure shall be fitted to the exterior of its top, sides, and base. Spacer bars on an enclosure need extend no more than 6 inches (15 centimeters) from the surface of the enclosure. Within this 6-inch limit, the spacers on an enclosure containing one animal shall extend from the surface to which they are attached a distance equal to at least 10% of the longer dimension of the surface and the spacers on an enclosure containing more than one animal shall extend a distance equal to at least 20% of the longer dimension of the surface to which they are attached.

Hand-holds required by § 14.106(c) may serve as spacer bars for the sides of the enclosure to which they are attached. A primary enclosure constructed with one or more slanted or curved walls containing ventilation openings need not be fitted with spacer bars on such walls.

(d) An enclosure that is not permanently affixed within the primary conveyance shall have adequate hand-holds or other devices for lifting by hand or to facilitate lifting and carrying by machine. Such hand-holds or other devices shall be made an integral part of the enclosure, shall enable it to be lifted without excessive tipping, and shall be designed so that the person handling the enclosure will not come into contact with its contents.

(e) An enclosure shall have a solid, leak-proof bottom or removable, leak-proof collection tray under a slatted or wire mesh floor. The slatted or wire mesh floor shall be designed and constructed so that the spaces between the slats or the holes in the mesh cannot trap the limbs of animals contained within the enclosure. An enclosure for mammals shall contain unused absorbent litter on the solid bottom or in the leak-proof tray in sufficient quantity to absorb and cover excreta. This litter shall be safe and non-toxic and shall not resemble food normally consumed by the mammals. An enclosure used to transport marine mammals in water, in a water-proof enclosure, a sling, or on foam is exempt from the requirement to contain litter. An enclosure used to transport birds shall not contain litter.

(f) If an enclosure has been previously used to transport or store wild mammals or birds, it shall have been cleaned and sanitized in a manner that will destroy pathogenic agents and pests injurious to the health of mammals and birds before the enclosure can be re-used.

(g) An enclosure that is not permanently affixed in the primary conveyance shall be clearly marked in English on the outside of the top and one or more sides of the enclosure, in letters not less than 2.5 centimeters (1 inch) in height, "LIVE ANIMALS," "DO NOT TIP," "ONLY AUTHORIZED PERSONNEL MAY OPEN CONTAINER," and other appropriate or required instructions. All enclosure sides shall also be conspicuously marked on the outside with arrows to indicate the correct upright position of the enclosure. These arrows should extend up the sides of the enclosure so that the point of the arrow is visible and clearly indicates the top of the enclosure.

(h) Food and water instructions as specified in § 14.108, information regarding what constitutes obvious signs of stress (when known to the shipper) in the species being transported, and information about any drugs or medication to be administered by a qualified attendant or animal care expert shall be securely attached to each enclosure. Copies of shipping documents accompanying the shipment shall also be securely attached to the primary enclosure. Original documents shall be carried in the carrier's pouch or manifest container, or by the shipper's attendant travelling with the cargo.

(i) Any food and water troughs shall be securely attached to the interior of the enclosure in such a manner that the troughs can be filled from outside the enclosure. Any opening providing access to a trough shall be capable of being securely closed with an animal-proof device. A water trough in an enclosure containing birds shall contain a foam or sponge insert, a perforated wooden block, or other suitable device to prevent spillage or drowning.

(j) When an enclosure is permanently affixed within a primary conveyance so that its front opening is the only source of ventilation, the opening shall face the outside of the conveyance or an unobstructed aisle or passageway within the conveyance. The opening shall occupy at least 90 percent of the total surface area of the front wall of the enclosure and be covered with bars, wire mesh or smooth expanded metal mesh.

§ 14.107 Primary conveyance.

(a) The animal cargo space of a primary conveyance used to transport wild mammals or birds to the United States shall be designed, constructed, and maintained so as to ensure the humane and healthful transport of the animals.

(b) The cargo space shall be constructed and maintained so as to prevent the harmful ingress of engine exhaust fumes and gases produced by the conveyance.

(c) No wild mammal or bird shall be placed in a cargo space of a primary conveyance that does not provide sufficient air for it to breathe normally. Primary enclosures shall be positioned in a cargo space in such a manner that each animal has access to sufficient air for normal breathing.

(d) The interior of an animal cargo space shall be kept clean of disease-causing agents.

(e) A wild mammal or bird shall not be transported in a cargo space that contains any material, substance or device that may reasonably be expected to result in inhumane conditions or be injurious to its health unless all reasonable precautions are taken to prevent such conditions or injury.

§ 14.108 Food and water.

(a) No carrier shall accept any wild mammal or bird for transport to the United States unless written instructions from the shipper concerning the animal's food and water requirements are securely affixed to the outside of its primary enclosure. Such instructions shall be consistent with professionally accepted standards of care and include specifically the quantity of water required, the amount and type of food required, and the frequency of feeding and watering necessary to ensure that it is transported humanely and healthfully.

(b) A mammal or bird requiring drinking water shall have water suitable for drinking made available to it at all times prior to commencement of transport to the United States, during intermediate stop-overs, and upon arrival in the United States, or as directed by the shipper's written instructions.

(c) A mammal or bird that obtains moisture from fruits or other food shall be provided such food prior to commencement of transport to the United States, during stop-overs, and upon arrival in the United States, or as directed by the shipper's written instructions.

(d) During a stop-over or while still in the custody of the carrier after arrival in the United States, a mammal or bird in transit shall be observed no less frequently than once every four hours and given food and water according to the instructions required by § 14.106(a).

(e) The shipper shall be responsible for providing food to be made available during transport unless other arrangements are contracted for between shipper and carrier.

(f) Additional requirements for feeding and watering particular kinds of animals are found below in the specifications for the various groups.

§ 14.109 Care in transit.

(a) During transportation to the United States, including any stopovers during transport, the carrier shall visually inspect each primary enclosure not less than once every 4 hours, or in the case of air transport, every 4 hours whenever the cargo hold is accessible. During such inspections, the carrier shall verify that the ambient air temperature is within allowable limits, that enclosures have not been damaged, that adequate ventilation is being provided, and when transport is by air, that air pressure suitable to support live animals is maintained within the cargo area (pressure equivalent to a maximum altitude of 8000 feet or as otherwise specified in writing as not harmful by the examining veterinarian). During these observations the carrier shall also determine whether any animals are in obvious distress as described in documents attached to the enclosure. The absence of such a document or the absence of information as to signs of distress shall not remove responsibility from the carrier. The carrier shall attempt to correct any condition causing distress and shall consult the shipper concerning any possible need for veterinary care if no veterinarian or qualified attendant is traveling with the shipment.

(b) Unless otherwise allowed by the specifications below for particular groups of species or specified in writing by the examining veterinarian, the ambient air temperature in a holding area, transporting device, or primary conveyance containing mammals shall not be allowed to fall below 7.2 degrees C (45 degrees F), to exceed 23.9 degrees C (75 degrees F), nor to exceed 21.1 degrees C (70 degrees F) for more than 4 hours at a time. Auxiliary ventilation shall be provided when the ambient air temperature is 21.1 degrees C (70 degrees F) or higher. Temperature standards for birds are set out below in § 14.174.

§ 14.110 Terminal facilities.

(a) Any terminal facility used for wild mammal or bird transport in the country of export, stopover countries, or the United States shall contain an animal holding area or areas. No carrier or shipper shall co-mingle live animal shipments with inanimate cargo in an animal holding area.

(b) A carrier or shipper holding any wild mammal or bird in a terminal facility shall provide the following:

(1) A holding area cleaned and sanitized so as to destroy pathogenic agents, maintained so that there is no accumulation of debris or excreta, and in which vermin infestation is minimized;

(2) An effective program for the control of insects, ectoparasites, and pests of mammals or birds;

(3) Sufficient fresh air to allow the animals to breathe normally, with ventilation maintained so as to minimize drafts, odors, and moisture condensation;

(4) Ambient air temperatures maintained within prescribed limits as specified in § 14.109(b) or more specific temperature limits found below for particular species of animals.

§ 14.111 Handling.

(a) Care shall be exercised to avoid handling the primary enclosure in a manner likely to cause physical or psychological trauma to the mammal or bird.

(b) A primary enclosure used to move any mammal or bird shall not be dropped, tipped excessively, or otherwise mishandled and shall not be stacked or placed in a manner that may reasonably be expected to result in its falling or being tipped.

(c) Animals incompatible with one another shall not be crated together or held in close proximity.

(d) Transport of mammals or birds to the United States shall be accomplished by the carrier in the most expeditious manner, with the fewest stop-overs possible, and without unnecessary delays.

(e) Consistent with other procedures and requirements of the carrier, live wild mammals or birds shall be last loaded and first unloaded from an aircraft.

(f) A carrier shall not allow mammals or birds to remain for extended periods of time outside a holding area, and shall move them between a holding area and a primary conveyance as expeditiously as possible. A carrier or shipper maintaining mammals or birds in a holding area or transporting them to or from a holding area or between a holding area and a primary conveyance, shall provide the following:

(1) *Shelter from sunlight.* When sunlight is likely to cause overheating or discomfort, sufficient shade shall be provided to protect animals from the direct rays of the sun.

(2) *Shelter from precipitation.* Animals shall be provided protection so that they remain dry during rain, snow or other forms of precipitation.

(3) *Shelter from cold.* Animals shall be provided protection from cold when ambient air temperatures fall below 10 degrees C (50 degrees F). Protection shall include, but not be limited to, that provided by covering and heating of transporting devices.

(4) *Protection from harassment.* Animals shall be protected from disturbances, including, but not limited to, harassment by humans, other animals, or machinery that makes noise, emits fumes, heat, or light, or causes vibration.

§ 14.112 Other applicable provisions.

In addition to the provisions of §§ 14.103–14.111 above, the requirements of §§ 14.121–14.172 applicable for particular groups of animals shall be met for all shipments of wild mammals and birds covered by this part.

Specifications for Non-Human Primates

§ 14.121 Primary enclosures.

(a) No more than one primate shall be transported in a primary enclosure. However, a mother and her nursing young being transported to the United States for medical treatment, an established male-female pair, a family group, a pair of juvenile animals that have not reached puberty, or other pairs of animals that have been habitually housed together may be shipped in the same primary enclosure. Individually housed non-human primates of different species shall not be shipped together in an enclosure having more than one compartment.

(b) A primary enclosure used to transport a primate shall be large enough to ensure that the animal has sufficient space to turn around freely in a normal manner, lie down, stand up (as appropriate for the species), and sit in a normal upright position without its head touching the top of the enclosure. However, a primate may be restricted in its movements according to professionally accepted standards of care when greater freedom of movement would constitute a danger to the primate or to its handler or other persons.

(c) Except as provided in § 14.103(i), when ventilation openings are located on two opposite walls of a primary enclosure, the ventilation opening on each wall shall comprise at least 30 percent of the total surface area of the wall and be situated above the midline of the enclosure. If ventilation openings are located on all four walls of the enclosure, the openings on each wall shall comprise at least 20 percent of the total surface area of the wall and be situated above the midline of the primary enclosure.

§ 14.122 Food and water.

(a) A non-human primate shall be provided water suitable for drinking within 4 hours prior to commencement to transport to the United States unless the shipper's written instructions direct otherwise. A carrier shall provide suitable drinking water to any primate at least every 12 hours after acceptance for transport to the United States or as instructed by the shipper.

(b) After acceptance for transport, and unless otherwise instructed by the shipper, a carrier shall provide suitable food to any non-human primate at least once in each 24 hour period if it is an adult 1 year of age or over, and at least once every 12 hours if it is less than 1 year of age.

§ 14.123 Care in transit.

(a) A primate shall be observed for condition and given food and water according to the shipper's instructions during any intermediate stop that lasts more than 4 hours.

(b) Care shall be taken to keep enclosures containing primates sufficiently separated in the primary conveyance or holding area to minimize the risk of spread of disease from one species to another.

Specifications for Marine Mammals (Cetaceans, Sirenians, Sea Otters, Pinnipeds, and Polar Bears)

§ 14.131 Primary enclosures.

(a) A primary enclosure that is not open on top shall have air inlets situated at heights that provide cross ventilation at all levels and that are located on all four sides of the enclosure. Such ventilation openings shall comprise not less than 16 percent of the total surface area of each side of the enclosure.

(b) Straps, slings, harnesses, or other such devices used for body support or restraint when transporting marine mammals such as cetaceans or sirenians shall meet the following requirements:

(1) The devices shall not prevent attendants from having access to the mammal to administer care during transportation;

(2) The devices shall be equipped with sufficient padding to prevent trauma or injury at points of contact with the mammal's body;

(3) Slings or harnesses shall allow free movement of flippers outside of the harness or sling;

(4) The devices shall be capable of preventing the mammal from thrashing about and causing injury to itself, handlers, or other persons, but shall be designed so as not to cause injury to the mammal.

(c) A primary enclosure used to transport marine mammals shall be large enough to assure the following:

(1) A sea otter or polar bear has sufficient space to turn about freely with all four feet on the floor and to sit in an upright position, stand, or lie in a natural position;

(2) A pinniped has sufficient space to lie in a natural position;

(3) If a sling, harness or other supporting device is used, there are at least 3 inches of clearance between any body part and the primary enclosure;

(d) A marine mammal may be restricted in its movements according to professionally accepted standards of care when freedom of movement would constitute a danger to the animal or to handlers or other persons.

(e) All marine mammals contained in a given primary enclosure shall be of the same species and be maintained in compatible groups. A marine mammal that has not reached puberty shall not be transported in the same primary enclosure with an adult marine mammal other than its mother. Socially dependent animals (e.g., siblings, mother and offspring) transported in the same primary conveyance shall be allowed visual and, when appropriate for the species, olfactory contact. A female marine mammal shall not be transported in the same primary enclosure with any mature male marine mammal.

§ 14.132 Food and water.

A marine mammal shall not be transported for more than a period of 36 hours without being offered suitable food unless the shipper's written instructions or the shipper's attendant traveling with the mammal direct otherwise. After feeding, a marine mammal shall be rested for 6 hours prior to resuming transport.

§ 14.133 Care in transit.

(a) Any marine mammal shall be accompanied, in the same primary conveyance, by the shipper or an authorized representative of the shipper knowledgeable in marine mammal care to provide for the animal's health and well-being. The shipper or representative shall observe such marine mammals to determine whether or not they need veterinary care and shall provide or obtain any needed veterinary care as soon as possible. Care during transport shall include the following (on a species-specific basis):

(1) Keeping the skin moist or preventing the drying of the skin by such methods as covering with wet cloths,

spraying it with water or applying a non-toxic emollient;

(2) Assuring that the pectoral flippers (when applicable) are allowed freedom of movement at all times;

(3) Making adjustments in the position of the mammal when necessary to prevent necrosis of the skin at weight pressure points; and

(4) Calming the mammal to prevent struggling, thrashing, and other activity that may cause over-heating or physical trauma.

(b) Unless otherwise directed by a shipper or authorized representative, at least one-half of the floor area in a primary enclosure used to transport sea otters to the United States shall contain sufficient crushed ice or ice water to provide each otter with moisture necessary to maintain its hair coat by preventing it from drying and to minimize soiling of the hair coat with urine and fecal matter.

(c) A marine mammal exhibiting excited or otherwise dangerous behavior shall be taken from its primary enclosure except under extreme emergency conditions and then only by the shipper or other authorized individual who is capable of handling the animal safely.

Specifications for Elephants and Ungulates

§ 14.141 Consignment to carrier.

Species that grow antlers shall not be accepted for transport unless the antlers have been shed or surgically removed.

§ 14.142 Primary enclosures.

(a) Except as provided in § 14.106(j), when required ventilation openings are located on two opposite walls of the primary enclosure, these ventilation openings shall comprise at least 16 percent of the total surface area of each wall. When ventilation openings are located on all four walls of the primary enclosure, the openings shall comprise at least 8 percent of the total surface area of each wall. At least one-third of the minimum area required for ventilation shall be located on the lower one-half of the primary enclosure and at least one-third of the total minimum area required for ventilation shall be located on the upper one-half of the primary enclosure.

(b) No more than one elephant or ungulate shall be transported in a primary enclosure. However, a mother and nursing young may be shipped in the same primary enclosure if the shipment complies with the provisions of § 14.105(b).

(c) A primary enclosure used to transport an elephant or ungulate shall be large enough to allow the animal to lie or stand in a natural upright position with the head extended, but not large enough for the animal to roll over.

(d) A primary enclosure used to transport an elephant or ungulate with horns or tusks shall be designed and constructed to prevent the horns or tusks from becoming trapped or injuring the animal itself, other animals nearby, attendants, or cargo handlers.

(e) A primary enclosure for an elephant or ungulate shall be equipped with a removable water trough that can be securely hung within the enclosure above the floor and can be filled from outside the enclosure.

Specifications for Sloths, Bats, and Flying Lemurs

§ 14.151 Primary enclosures.

(a) Except as provided § 14.106(j) of this subpart, when required ventilation openings are located on two opposite walls of the primary enclosure, the ventilation openings shall comprise at least 16 percent of the total surface area of each wall. When ventilation openings are located on all four walls, the openings shall comprise at least 8 percent of the total surface area of each wall. At least one-third of the total minimum area required for ventilation of the primrary enclosure shall be located on the upper one-half of the primary enclosure.

(b) No more than one sloth, bat, or flying lemur (Cynocephalidae) shall be transported in a primary enclosure. However, a mother and her nursing young being transported for medical reasons, an established male-female pair, a family group, a pair of juvenile animals that have not reached puberty, or other groups of animals that have been habitually housed together may be shipped in the same primary enclosure.

(c) A primary enclosure used to transport sloths, bats, or flying lemurs shall be large enough to ensure that each animal has sufficient space to move freely and in a normal manner and shall have a wide perch, bar or mesh of suitable strength fitted under the top of the enclosure and spaced from it in such a way that the animals may hang from it in a natural position.

Specifications for Other Terrestrial Mammals

§ 14.161 Primary enclosures.

(a) Except as provided in § 14.106(j), when required ventilation openings are located on two opposite walls of the primary enclosure, these openings shall comprise at least 16 percent of the total surface area of each wall. When openings are located on all four walls of the enclosure, the openings shall comprise at least 8 percent of the total surface area of each wall. At least one-third of the minimum area required for ventilation shall be located on the lower one-half of the enclosure, and at least one-third of the total minimum area required for ventilation shall be located on the upper one-half of the enclosure.

(b) No more than one terrestrial mammal (other than rodents) shall be transported in a primary enclosure. However, a mother and her nursing young may be shipped in the same primary enclosure if the shipment complies with the provisions of § 14.105(b).

(c) More than one rodent may be transported in the same primary enclosure if they are members of the same species and are maintained in compatible groups. Rodents that are incompatible shall be transported in individual primary enclosures that are stored and transported so they are visually separated. A female with young being transported for medical reasons shall not be placed in a primary enclosure with other animals. The following chart specifies allowable densities for transporting rodents that fall within the specified weight limitations. Rodents weighing more than 5,000 grams shall be transported in individual enclosures.

DENSITY GUIDELINES FOR RODENTS

Wt. in grams of rodent	Max. No.	Space/animal		Ht. of box	
		cm^2	in^2	cm	in
220 or less	20	194	30	15	6
220–450	12	968	60	20	8
450–1,000	6	770	120	25	10
1,000–5,000	2	2,310	360	30	12

(d) A primary enclosure used to transport terrestrial mammals shall be large enough to ensure that each animal has sufficient space to turn around freely in a normal manner. The height of the primary enclosure shall provide adequate space for the animal to stand upright in a normal posture. The length of the primary enclosure shall be great enough to enable the animal to lie in a full prone position.

Specifications for Birds

§ 14.171 Consignment to carrier.

(a) A personally owned pet bird originally transported from the United States and being returned to this country with its original United States health certificate within 60 days of departure may be accepted by a carrier without a new veterinary examination.

(b) No carrier shall accept for transport to the United States any bird that was captured in the wild unless a qualified veterinarian, authorized by the national government of the country from which the bird is being exported, certifies that the bird has been held in captivity for at least 14 days.

§ 14.172 Primary enclosures.

(a) A primary enclosure for birds shall have ventilation openings on two vertical sides that comprise at least 16 percent of the surface area of each side and are positioned so as to decrease the likelihood of creating a draft.

(b) Perches shall be provided for birds that rest by perching. The diameter of the perch shall be sufficient to permit the birds to maintain a firm, comfortable grip. Perches shall be placed so that droppings do not fall into food or water troughs or onto other perched birds. There shall be enough head room to allow the birds to move onto and off the perches without touching the top of the enclosure.

(c) An enclosure used to transport one or more perching birds shall be large enough to ensure that each bird has sufficient perch space to perch comfortable at the same time. No more than 50 perching birds shall be transported in one primary enclosure, with the exception of large psittacines (longer than 25 cm, or 9 inches), which are limited to a maximum of 25 per primary enclosure.

(d) A primary enclosure used to transport a raptorial bird shall be large enough to transport the bird comfortably and to permit it to turn around freely and stretch its wings without injury. Only one raptorial bird shall be contained in a primary enclosure.

(e) A primary enclosure containing non-perching, non-raptorial birds shall be large enough for the birds to turn around, to lie down, to stand fully erect, and to change posture in a normal manner.

(f) Nectar-feeding birds shall either be transported in a primary enclosure equipped with feeding bottles accessible from outside the enclosure for replenishment, or hand-carried and fed in accordance with the written instructions of the shipper.

(g) Birds transported in the same primary enclosure shall be of the same species and be compatible with one another. Birds that are incompatible shall be placed in individual primary enclosures and these enclosures shall not be stored or transported in visual proximity to one another.

§ 14.173 Temperature standards.

The following standards shall apply for birds in holding areas, transporting devices, and primary conveyances, unless an examining veterinarian certifies in writing higher or lower temperatures that will not be harmful for a particular shipment:

(a) The ambient air temperature for perching birds shall not be allowed to fall below 12.8 degrees C (55 degrees F), to exceed 29.5 degrees C (85 degrees F), nor to exceed 26.7 degrees C (80 degrees F) for more than 4 hours. Auxiliary ventilation shall be provided when the ambient air temperature is higher than 26.7 degrees C (80 degrees F).

(b) The ambient air temperature for a raptorial bird shall not be allowed to fall below 7.2 degrees C (45 degrees F), to exceed 29.5 degrees C (85 degrees F), exceed 23.9 degrees C (75 degrees F) for more than 4 hours, nor to exceed 26.7 degrees C (80 degrees F) for more than 45 minutes. Auxiliary ventilation shall be provided when the ambient air temperature exceed 23.9 degrees C (75 degrees F).

(c) The ambient air temperature for non-perching, non-raptorial birds other than penguins or auks shall not be allowed to fall below 7.2 degrees C (45 degrees F), to exceed 29.5 degrees C (85 degrees F), nor to exceed 18.3 degrees C (65 degrees F) for more than 4 hours. Auxiliary ventilation shall be provided when the ambient air temperature exceed 23.9 degrees C (75 degrees F).

(d) The ambient air temperature for penguins and auks shall not be allowed to exceed 18.3 degrees C (65 degrees F) at any time. Auxiliary ventilation shall be provided when the ambient air temperature exceeds 15.6 degrees C (60 degrees F).

Dated: June 1, 1990.

RIN 1018-AB42

Endangered and Threatened Wildlife and Plants; Proposal to List the Mussel Cumberland Pigtoe (Pleurobema gibberum) as an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes to list the Cumberland pigtoe (*Pleurobema gibberum*) as an endangered species under the Endangered Species Act of 1973, as amended. This species is endemic to the Caney Fork River system (a Cumberland River tributary) in Grundy, Van Buren, Warren, and White Counties, Tennessee. Although presumably once widely distributed in the Caney Fork system, the species is presently known from short reaches in only four Caney Fork River tributaries. The species has been and continues to be impacted by water quality deterioration resulting from siltation contributed by coal mining and poor land use practices, by other water pollutants, and by impoundments. Comments and information are sought from the public on this proposal.

DATES: Comments from all interested parties must be received by December 14, 1990. Public hearing requests must be received by November 29, 1990.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Asheville Field Office, 100 Otis Street, Room 224, Asheville, North Carolina 28801 (704/259-0321). Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Richard G. Biggins (704/259-0321 or FTS 672-0321).

SUPPLEMENTARY INFORMATION:

Background

The Cumberland pigtoe mussel (*Pleurobema gibberum*), which was described by Lea (1838), is apparently endemic to the Caney Fork River System above the Great Falls Lake Dam is now located at the Great Falls), Cumberland River basin, Tennessee (Anderson 1990, Gordon and Layzer 1989). This small freshwater mussel (rarely exceeds 60 mm in length) has a triangular, compressed, somewhat heavy shell. The shell's outer surface on young individuals is a yellowish-brown color; adults have a dark mahogany shell. The inside of the shell is a distinctive peach to orange color (Anderson 1990). Like other freshwater mussels, this animal feeds by filtering food particles from the water. It has a complex reproductive cycle in which the mussel's larvae likely parasitize fish. The mussel's life span, parasitic host, and most aspects of its life history are unknown.

Historic mussel collection records reviewed by Anderson (1990) revealed that the Cumberland pigtoe has been reported from five Caney Fork River tributaries, all above the Great Falls Reservoir. Anderson (1990) conducted a

mussel survey of the Caney Fork River system above and below the Great Falls Reservoir and reported that the species is now restricted to isolated populations in short reaches of four Caney Fork tributaries—Barren Fork, Warren County; Calfkiller River, White County; Cane Creek, Van Buren County; and Collins River, Warren and Grundy Counties. Although the species likely occurred in the main stem of the Caney Fork and has been historically collected from Hickory Creek, no specimens were taken at the four sampling stations in the Hickory Creek system, nor was the mussel collected in any unimpounded reaches of Caney Fork River. It is believed that the species has now been extirpated from both of these areas. The mussel was also not taken in collections made in other Caney Fork tributaries—Big Creek, Big Hickory Creek, Charles Creek, Dry Branch Barren River, Falling Water River, Firescald Creek, Fultz Creek, Little Hickory Creek, Mountain Creek, Pine Creek, Rocky River, Sink Creek, Smith Fork, Smith Fork Creek, and West Fork Hickory Creek.

The Cumberland pigtoe's distribution has been impacted by such factors as impoundments and the general deterioration of water quality resulting from siltation and other pollutants contributed by coal mining, poor land use practices, and waste discharges. These factors continue to impact the species and its habitat. Because the populations inhabit only short river reaches, they are also very vulnerable to extirpation from accidental toxic chemical spills.

On December 8, 1989, the Service notified by mail (30 letters) the appropriate interested individuals, Federal and State agencies, and local governments within the species' present range that a status review was being conducted specifically to determine if the Cumberland pigtoe should be protected under the Act. A total of five written responses was received as a result of the December 8, 1989, notification. No objections to the potential listing of the Cumberland pigtoe were received. No additional information on the species' status and its former and present distribution was provided.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Cumberland pigtoe mussel (*Pleurobema gibberum*) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Based on historic mussel collection records from the Cumberland River system (Anderson 1990, Gordon and Layzer 1989), the Cumberland pigtoe is restricted to the Caney Fork River basin above the Great Falls. Within this isolated river basin the species has been reported from only five Caney Fork River tributaries. However, historic mussel collection records from the upper Caney Fork system are very limited. Thus, considering the extent of the mussel's preferred habitat (riffle areas with sand and gravel with occasional mud and cobble substrates (Anderson 1990, Gordon and Layzer 1989)), which was inundated by the construction of Great Falls Reservoir at the site of the Great Falls in the 1910s, the species was likely much more widely distributed within the upper Caney Fork system than available records indicate.

Presently, the species is restricted to isolated populations in short reaches of four Caney Fork tributaries—Barren Fork, Warren County; Calfkiller River, White County; Cane Creek, Van Buren County; and Collins River, Warren and Grundy Counties (Anderson 1990). These populations are adversely affected by impoundments and the general deterioration of water quality resulting from siltation and other pollutants contributed by coal mining, poor land use practices, and waste discharges. Mussel populations in adjacent watersheds with similar geology (upper Duck and Elk Rivers) have already lost much of their mussel fauna because of poor land management practices and impoundments (Anderson 1990).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* There is no indication that overutilization has been a problem for this species. However, because of the mussel's restricted range, its slow growth rate, and low reproductive capacity, collection of the species could be a problem if specific locations of populations were known. Therefore, the present range of the species has been described only in general terms.

C. *Disease or predation.* Although the Cumberland pigtoe is consumed by predatory animals, there is no evidence that predation is a serious threat to the species. However, freshwater mussel die-offs have recently (early to mid-1980s) been reported throughout the Mississippi River basin (Richard Neves, Virginia Polytechnic Institute and State University, personal communication, 1989). The cause of the die-offs has not been determined, but significant losses have occurred in some populations.

D. *The inadequacy of existing regulatory mechanisms.* The State of Tennessee prohibits taking fish and wildlife, including freshwater mussels, for scientific purposes without a State collecting permit. However, the species is generally not protected from other threats. Federal listing will provide additional protection for the species from mussel collectors by requiring Federal endangered species permits to take the species and by requiring Federal agencies to consult with the Service when projects they fund, authorize, or carry out may adversely affect the species.

E. *Other natural or manmade factors affecting its continued existence.* As the Cumberland pigtoe is presently restricted to short river reaches, it is also very vulnerable to extirpation from accidental toxic chemical spills; and as the populated reaches are physically isolated from each other by impoundments, recolonization of any extirpated population would not be possible without human intervention. Additionally, because natural gene flow among populations is no longer possible, the long-term genetic viability of these remaining isolated populations is questionable.

The Service has carefully assessed the best scientific and commercial information regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list the Cumberland pigtoe mussel (*Pleurobema gibberum*) as endangered. Presently only four isolated populations are known to exist. Because of the restricted nature of these populations and their vulnerability, endangered status appears to be the most appropriate classification for the species. (See "Critical habitat" section for a discussion of why critical habitat is not being proposed for the Cumberland pigtoe mussel.)

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for this species. Such

a determination would result in no known benefit to the species.

As part of the development of this proposed rule, Federal agencies were notified of the Cumberland pigtoe mussel's distribution, and they were requested to provide data on proposed Federal actions that might adversely affect the species. No specific projects were identified. Should any future projects occur in the Caney Fork system, the involved Federal agency will already have the distributional data needed to determine if the species may be impacted by their action. Thus, no additional benefits would accrue from critical habitat designation that would not also accrue from the listing of the species.

In addition, this species is rare, and taking for scientific purposes and private collecition could be a threat. The publication of critical habitat maps and other publicity accompanying critical habitat designation could increase that threat. The locations of populations of this species have consequently been described only in general terms in this proposed rule. Precise locality data would be available to appropriate Federal, State, and local governmental agencies from the Service office described in the "ADDRESSES" section.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in the destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The Service notified Federal agencies that may have programs affecting the species. No specific proposed Federal actions were identified. Federal activities that could occur and impact the species include, but are not limited to, the carrying out or the issuance of permits for hydroelectric facility construction and operation, reservoir construction, river channel maintenance, stream alterations, wastewater facility development, pesticide registration, and road and bridge construction. However, it has been the experience of the Service that nearly all section 7 consultations can be resolved so that the species is protected and the project objectives met.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities.

In some instances permits may be issued for a specified time to relieve undue economic hardship that would be suffered if such relief were not available. This species is not in trade, and such permit requests are not expected.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species;

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of this species; and

(4) Current or planned activities in the subject area and their possible impacts on this species.

Final promulgation of the regulation on this species will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the office described in the "ADDRESSES" section.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to Section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

RIN 1018-AB52

Endangered and Threatened Wildlife and Plants; To Determine the Uncompahgre Fritillary Butterfly To Be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes a butterfly, the Uncompahgre fritillary (*Boloria acrocnema*), to be an endangered species. Critical habitat is not being proposed. This butterfly has been verified at only two major sites above 4,040 meters (13,200 ft.) elevation in the San Juan Mountains of southwestern Colorado. In 1989, the total known population was estimated to be less than 1,000 individuals. Taking by collectors, adverse climatic conditions, lack of protective regulations, small population size, and low genetic variation endanger the species. Its habitat is potentially threatened by trampling from humans and livestock. This proposal would implement the protection provided by the Endangered Species Act of 1973, as amended. Comments on this proposal are sought.

DATES: Comments from all interested parties must be received by December 14, 1990. Public hearing requests must be received by November 29, 1990.

ADDRESSES: Comments and materials concerning this proposal should be sent to the State Supervisor, Fish and Wildlife Enhancement, U.S. Fish and Wildlife Service, 730 Simms Street, Room 290, Golden, Colorado 80401. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. John Anderson, Biologist, Fish and Wildlife Enhancement, 529 25 1/2 Road, Suite B-113, Grand Junction, Colorado 81505 at (303) 243-2778 or FTS 322-0351.

SUPPLEMENTARY INFORMATION:

Background

The Uncompahgre fritillary butterfly was discovered on Mount Uncompahgre, Hinsdale County, Colorado, on July 30, 1978. It was subsequently described as a new species (*Boloria acrocnema*) by Gall and Sperling (1980). The butterfly also has been included in the genus *Clossiana* (Ferris 1984), although this name is more properly considered a subgenus of *Boloria*.

The most recent treatment of North American butterflies lists this taxon as a species (Ferris 1989). Other major books published in the last 10 years also consider the Uncompahgre fritillary to be a full species (Ferris and Brown 1981, Gall 1983, Pyle 1981). However, one recent book considers the Uncompahgre fritillary to be a subspecies (*Boloria improba* ssp. *acrocnema*) of the Dingy Arctic fritillary (*Boloria improba*) (Scott 1986). For the purpose of this listing action, the Service will recognize this taxon at the species level. If the Uncompahgre fritillary is later recognized as a subspecies of *B. improba*, the designation of this taxon as an endangered species will remain valid because section 3(15) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*) permits the listing of subspecies.

The Uncompahgre fritillary is a small butterfly with a 2-3 centimeter (1 in.) wingspan. Males have rusty brown wings criss-crossed with black bars; females' wings are somewhat lighter (Gall 1983). Underneath, the forewing is light ochre and the hindwing has a bold, white jagged bar dividing the crimson brown inner half from the purple-grey scaling on the outer wing surface. The body has a rusty brown thorax and a brownish black abdomen (Gall and Sperling 1980).

The Uncompahgre fritillary has the smallest total range of any North American butterfly species. Its habitat is limited to two verified major sites and two possible small colonies in the San Juan Mountains in Hinsdale County in southwestern Colorado. One major site is the type locality on Mount Uncompahgre, which is managed by the Forest Service. The second major site was discovered in 1982 on land managed by the Bureau of Land Management and is not generally known. Because of the potential threat from collecting, the location of this colony is referred to herein only as "site 2."

Despite numerous attempts to locate other populations, no other major populations have been verified. In 1988, three individuals were captured at one

new location and one individual was captured at another new location. These sites must be investigated to determine if they represent possible new colonies. There is a report of five colonies in the San Juan Mountains, but these unverified sites, if extant, have been kept secret by their discoverer. As the butterfly is found only in remote, generally inaccessible areas, it is possible that the species may occur in other mountain ranges in Colorado, but there have been no reports of the butterfly from these other mountain ranges.

All known populations are associated with large patches of snow willow (Salix nivalis) above 4,040 meters (13,200 ft.), which provide food and cover. The species has been found only on northeast-facing slopes, which are the coolest and wettest microhabitat available in the San Juans (Brussard and Britten 1980). The females lay their eggs on snow willow, which is also the larval food plant, while adults take nectar from a wide range of flowering alpine plants.

Brussard and Britten (1980) believe that the species has a biennial life history, which means that it requires 2 years to complete its life cycle. Eggs laid in 1980 (even-year brood) will be caterpillars in 1981 and mature into adults in 1982. Similarly, eggs laid in 1981 (odd-year brood) will become adults in 1983. The odd- and even-year broods function as essentially separate populations. It is assumed that odd- and even-year populations existed at both major sites historically, since there is anecdotal evidence that butterflies flew each year at these sites prior to 1987 (Brussard and Britten 1980).

During 1987 and 1988, field surveys and genetic studies were carried out by Dr. Peter Brussard and students under a contract funded by the Forest Service, Bureau of Land Management, and Fish and Wildlife Service (Brussard and Britten 1988). Though they visited over 50 sites that appeared to satisfy the butterfly's habitat requirements, they found only the few individuals at the two new sites previously mentioned.

These researchers believe there has been a decline in the butterfly's known population. The even-year broods at the two known sites appear to be declining, and the odd-year brood at the type locality may be extinct. The status of the odd-year brood at site 2 is unclear. On Mount Uncompahgre, the 1978 population (even-year brood) was estimated to be 632 individuals (Interagency Agreement 1984); the 1988 population was estimated to be 208 individuals (Brussard and Britten 1988). At site 2, the 1982 population was estimated to be between 1,000 and 1,500 individuals (Interagency Agreement 1984); the 1988 estimate was 300 individuals (Brussard and Britten 1988). There are anecdotal reports of an odd-year population at Mount Uncompahgre prior to 1987, but no Uncompahgre fritillaries were captured in 1987. The status of the odd-year population at site 2 is difficult to assess due to a lack of historical data on estimated population size. Assuming the species has a biennial life history, then adding the 1987 and 1988 data results in a total estimated population size at the two known sites of approximately 700 individuals.

Brussard and Britten (1988) also used electrophoretic techniques to examine population genetic variability. Their studies revealed low genetic variability in the Uncompahgre fritillary when compared to the level of genetic variability in fritillaries, in general. This low genetic variability would indicate less environmental adaptability, which would reduce its ability to adapt to a changing environment.

The species faces many threats. As it is one of the few new North American butterfly species discovered in the last half century, it is attractive to collectors. Its sedentary nature, weak flying ability, and tendency to fly low to the ground make it easy to collect. Possible overcollection is considered the greatest human-caused threat to the species. Other actual or potential threats to the species include adverse climatic conditions, lack of protective regulations, small population size, and low genetic variability. There is a minor potential threat from trampling by humans and livestock. The species' small population size, together with the threats listed above, justifies the proposal of the Uncompahgre fritillary butterfly as an endangered species.

On November 5, 1979, the Service was petitioned by Lawrence F. Gall to list the butterfly under provisions of the Endangered Species Act of 1973. In response, the Service published a notice of status review on the butterfly on February 8, 1980 (45 FR 8029), which solicited public comments. Comments from the public supported listing and protection under the Act, but the Service did not propose its listing. Subsequently, the Service included the butterfly in a notice of petition findings on January 20, 1984 (49 FR 2485), which stated that listing the butterfly was warranted but precluded, and noted that it was a category 2 species (a species which may be appropriate to list, but for which there is not enough biological data at the time to support the listing). Its status was changed from category 2 to category 1 (a species for which there is sufficient biological data on hand to support listing) in the Invertebrate Notice of Review published on May 22, 1984 (49 FR 21664). The Service made 1-year findings that listing the species was warranted but precluded on May 10, 1985 (50 FR 19761); January 9, 1986 (51 FR 996); June 30, 1987 (52 FR 24312); July 7, 1988 (53 FR 25511); December 29, 1988 (53 FR 52746); and April 25, 1990 (55 FR 17475). This proposal constitutes the final finding for the petitioned action.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Uncompahgre fritillary butterfly (*Boloria acrocnema*) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The known populations of the butterfly are on Federal land. The Mount Uncompahgre habitat is in the Big Blue Wilderness in the Uncompahgre National Forest, while site 2 is in a wilderness study area on land administered by the Bureau of Land Management. Both areas are above timberline, hence there are no threats from logging. Mining activity does not appear to be a threat to the known populations. Historically, herds of sheep were driven over both mountains where the butterflies occur, but there is no grazing currently at the major sites.

The main hiking trail to the summit of Mount Uncompahgre bisects the colony on that mountain, but there seems to be no evidence that hikers or pack horses have damaged the nature of the butterfly's habitat. One day's observation by the author of this rule demonstrated that hikers do not linger or rest in the colony area. Moreover, pack horses are uncommon on this trail. A hiking trail passes near site 2, but routing changes were made to the trail to reduce the likelihood that hikers will deviate from the trail and cross through the butterfly site. Trampling of the colonies by collectors or biologists is a potential threat, but there has been no demonstrated habitat change due to this factor.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* The Uncompahgre fritillary

butterfly has been the subject of intense sampling by biologists and collectors since its discovery. In 1961, collection of the species for research or marketing to private collectors probably exceeded 100 adults, or up to 20 percent of the Mount Uncompahgre population (Interagency Agreement 1984). The genus *Boloria* is extremely popular with collectors. Specimens of *B. acrocnema* have been offered by dealers for prices exceeding $100 for males and even higher prices for females (Gall 1983). Collecting from small colonies or repeated handling and marking (particularly of females and/or in years of low abundance) could seriously damage the populations through loss of individuals and genetic variability. Collection of females dispersing from a colony also can reduce the probability that new colonies will be founded. Extremely small populations, such as those of the Uncompahgre fritillary, should not be subjected to undue pressure from collectors.

C. *Disease or predation.* There are no known diseases of the butterfly that could threaten its continued existence. Wilcove (1980) recorded an instance of direct predation on the butterfly by a brown-capped rosy finch (*Leucosticte australis*), and identified other potential avian predators. However, there is no indication as yet that predation is a significant threat.

D. *The inadequacy of existing regulatory mechanisms.* The Mount Uncompahgre site is in the Big Blue Wilderness. In addition to wilderness management restrictions, the Forest Service has prohibited the collection of butterflies on Mount Uncompahgre since 1984. There is no sheep grazing on the site at the present time, and there is a proposal to restrict horse use to an area downslope from the butterfly site. Nevertheless, it has been reported that some collectors may be collecting the species despite the ban. Site 2 is located in a wilderness study area. The Bureau of Land Management has terminated grazing in this area, but there is no prohibition against collecting. The Colorado Division of Wildlife does not possess the legal authority to protect the species. The Colorado Natural Areas Program has registered, but not yet designated, the Mount Uncompahgre site as a State Natural Area. This means that the site has been identified as one deserving special attention, but a management agreement has not been finalized. In 1984, the Forest Service and Bureau of Land Management signed an interagency agreement for the conservation of the Uncompahgre fritillary. The parties are implementing this agreement, but the level of implementation is limited by available funding.

These voluntary efforts on the part of the Forest Service, Bureau of Land Management, and the Colorado Natural Areas Program are commendable. Having identified the Uncompahgre fritillary as a species in need of protection, they have taken important steps to protect this species. However, the species-specific protections are discretionary and could be withdrawn or lapse in effectiveness if funding diminishes. Federal listing of the butterfly would provide a greater level of protection. Listing would ensure that Federal agencies would not take actions likely to jeopardize the species, and promote efforts toward species recovery. It would also allow for the prosecution of collectors under Federal law and provide for the issuance of permits to limit and manage those who wish to conduct scientific studies of the butterfly. Finally, it would improve the cooperating agencies' chances of obtaining additional funding to protect, research, and recover the species.

E. *Other natural or manmade factors affecting its continued existence.* Many other factors threaten the continued existence of the Uncompahgre fritillary. First, the butterfly exists only in the highest, wettest peaks in southwestern Colorado. Biologists who completed population surveys of the butterfly in 1987–88 believe that several recent drought years have stressed the butterfly, which evidently requires a cool and wet microhabitat to successfully complete development (Brussard and Britten 1989). Climatic stress may be a major factor underlying recent population declines.

If the species does have a biennial life history, then the possible extinction of the odd-year population at Mount Uncompahgre is cause for concern. Odd-year and even-year broods function essentially as separate populations. It may be possible for an extinct odd-year population to be reestablished if a few individuals from the even-year brood at the same site take 3 years instead of 2 to complete development, but reestablishment would be very slow.

The small population size and limited genetic variability of the species is itself a threat. The small size of the known populations makes them vulnerable to extinction from natural (*e.g.*, drought, exceptionally warm temperatures) or human (*e.g.*, overcollection) causes. In addition, random demographic effects (*e.g.*, skewed sex ratios) and/or the loss of alleles due to random genetic effects could cause permanent loss of one or both populations.

As noted earlier, this butterfly has the smallest known range of any North American species when the total area occupied by the two verified colonies are considered. Although small habitat size might normally be a threat in itself, the colonies are placed such that snow avalanches are not likely, and fire or other kinds of calamities are not likely.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list the Uncompahgre fritillary butterfly (*Boloria acrocnema*) as endangered. Since the species' discovery in 1978, only two major sites have been identified, and, based on available data, their populations have declined. The odd-year population at the type locality already may be extinct. Despite the administrative protections currently being implemented, the remaining populations are endangered by taking by collectors, adverse climatic conditions, lack of protective regulations, small population size, and low genetic variation. The species' habitat is potentially threatened by trampling from humans and livestock. These factors could lead to the species' extinction throughout all or a significant portion of its range.

The Service recognizes that listing the species may increase collection pressures due to the loss of protective anonymity. However, the Service is required to list species deserving of the Act's protection, and final listing will provide additional protection, as explained above, and encourage actions to recover the species.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for the Uncompahgre fritillary. As discussed under Factor B in the "Summary of Factors Affecting the Species," possible overcollection of this butterfly is one of the major threats to its existence. Though some collectors know of the Mount Uncompahgre site, the exact location of site 2 is not generally known. Publication of the exact location of these sites would endanger the species further. The Forest Service and the Bureau of Land

Management, upon whose land the butterfly occurs, are aware of the location of the butterfly populations and the importance of protecting this species' habitat. Protection of this species' habitat will be addressed through the recovery process and through section 7 procedures.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Current Federal involvement and management for the species were discussed earlier. Long-term monitoring should be continued, as well as research into the species' life history and habitat requirements. If possible, artificial recolonization should be attempted to establish additional colonies in suitable habitat to reduce the risk of extinction.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. Requests for copies of the regulations on animals and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, Room 432, 4401 N. Fairfax Dr., Arlington, Virginia 22203 (703/358-2093, FTS 921-2093).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposal are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to the Uncompahgre fritillary;

(2) The location of any additional populations of the Uncompahgre fritillary and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the subject area and their possible impacts on the Uncompahgre fritillary.

Final promulgation of the regulation on the Uncompahgre fritillary will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the State Supervisor (see **ADDRESSES**).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99-625, 100 Stat. 3500, unless otherwise noted.

2. It is proposed to amend § 17.11(h) by adding the following in alphabetical order, under INSECTS to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

Endangered and Threatened Wildlife and Plants; Proposal to Determine the Plant *Eutrema penlandii* (Penland alpine fen mustard) To Be a Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes that *Eutrema penlandii* (Penland alpine fen mustard) be designated a threatened species under the Endangered Species Act of 1973, as amended (Act). There are eight small occurrences, totalling 5,200 plants, over a 40 kilometer (25 mile) length of the Continental Divide in central Colorado. The species is found growing above 3,810 meters (12,500 feet) elevation on small calcareous wetlands with perennially subirrigated peat soils. Most sites are on Federal land (Forest Service and Bureau of Land Management). The species' fragile wetland habitat is threatened by desiccation from ditches and ruts from off-road vehicles and mining activities, as well as groundwater acidification from mine drainage. Some subpopulations not seen since 1980 are thought to be lost. A determination that *E. penlandii* is threatened would implement the Federal protection and recovery provisions provided by the Act. Comments and materials related to this proposal are solicited.

DATES: Comments from all interested parties must be received by December 14, 1990. Public hearing requests must be received by November 29, 1990.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Colorado State Supervisor, U.S. Fish and Wildlife Service, Fish and Wildlife Enhancement, 730 Simms Street, Room 290, Golden, Colorado 80401, or to the U.S. Fish and Wildlife Service, Western Colorado Sub-office, 529 25½ Road, Suite B-113, Grand Junction, Colorado 81505-8199. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above addresses.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Anderson, Botanist, at the above Grand Junction address (303/243-2778 or FTS 322-0351).

SUPPLEMENTARY INFORMATION:

Background

The Penland alpine fen mustard was first collected at "Hoosier Pass" in the Mosquito Range in 1936 by C.W.T. Penland, late professor at Colorado College, and recollected in 1948. A description was published a year later by R. Rollins (1950), an expert in the mustard family. The "Hoosier Pass" population, the type locality, is located at Hoosier Ridge in actuality. It contains approximately half the species' population and is the largest population known.

Eutrema penlandii is a small, herbaceous perennial, 3–8 centimeters (1.2–3.2 inches) tall. It is a shiny green, glabrous (hairless) plant with long-petioled (long-stemmed), heart-shaped basal leaves up to 35 centimeters (14 inches) long and clusters of small, white flowers 2–3.5 millimeters (approximately 0.1 inch) long atop the stems. The generic name refers to the hollow fruits (other mustards have an interior partition called a replum) that are small and rounded, 1.5 millimeter (0.06 inches) wide, and 4–8 millimeters (0.2–0.3 inches) long.

This taxon is closely related to *Eutrema edwardsii*, a circumboreal (inhabiting the northern regions of North America and Eurasia) species in the Arctic that also extends into the mountains of central Asia (Weber and Shashan 1955). Rollins (1982) chose to recognize *E. penlandii* at the species level. Weber (1987) treated this taxon as a subspecies of *E. edwardsii* (*E. edwardsii* ssp. *penlandii*).

For the purposes of this listing action, the Service will recognize this taxon at the species level. If *E. penlandii* is later recognized as a subspecies of *E. edwardsii*, the designation of this taxon as a threatened species will remain valid because section 3(15) of the Endangered Species Act (Act) of 1973, as amended, (16 U.S.C. 1532 *et seq.*) permits the listing of subspecies.

E. penlandii is highly habitat-specific and requires a combination of several environmental factors in its microenvironment. These factors include moss-covered peat fens with perennial subirrigation and calcareous (basic) substrate derived from limestone or dolomite above 3,810 meters (12,500 feet) in elevation. The peat mats form on small, flat benches in leeward cirques (steep-walled rounded glacial valleys) with persistent snowfields that provide the subirrigation. The conditions for maintaining these persistent snowfields only exist along this east-west trending portion of the Continental Divide. Most portions of the Continental Divide are north-south trending and are exposed to snow-melting winds.

This unique habitat is also significant biogeographically. As noted above, the nearest relative of *E. penlandii is E. edwardsii*, an Arctic circumboreal species. All other species of *Eutrema* occur in Asia. *E. penlandii* is thus an extremely disjunct species, separated by more than 1,600 kilometers (1,000 miles) from its nearest relative and the only representative of a primarily Asiatic genus in the lower 48 states. Other rare alpine taxa with Arctic affinities also occur on limestone in the Mosquito Range, either as separate species (*e.g., Sausseria weberi*) or disjunct species (*e.g., Armeria scabra* ssp. *sibirica, Braya glabella*, and *Braya humilis*). *E. penlandii* is the rarest of these, however. This biogeographic pattern, wherein a genus is represented by extremely disjunct species in central Asia and interior western North America, is represented, as well, by several other genera in the mustard family, including *Braya, Stroganowia, Smelowskia*, and *Parrya* (Rollins 1982). The alpine disjunctions have been interpreted as Pleistocene glacial relicts that migrated south from the Arctic along the glacial front and were left stranded in small pockets of habitat with the retreat of the glaciers. Alternatively, *E. penlandii* and others may be Tertiary relics of a more widespread northern hemisphere flora with a continental (interior) climate, which then migrated northward from the Canadian Rockies into the Arctic onto barren habitats newly opened along the front of the retreating glaciers (Weber 1987).

The second and third largest populations were the next discovered. W.A. Weber from the University of Colorado found these in 1967, south of Hoosier Ridge at Mosquito Pass and the Four Mile Creek cirque (between Mount Sheridan and Mount Sherman). Johnston et al. (1981) mapped out these three known populations at Hoosier Ridge, Mosquito Pass, and Mt. Sherman in a 1980 status report. The three populations extend over a 40 kilometer (25 mile) range along the Continental Divide, or approximately 10 kilometers (12 miles) in a straight line, and within 4 kilometers (2.5 miles) of the Continental Divide.

Federal action involving *E. penlandii* began with section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, the Fish and Wildlife Service (Service) published a notice (40 FR 27847) of its acceptance of this report as a petition within the context of section 4(c)(2), now section 4(b)(3)(A), of the Act and of its intention thereby to review the status of those plants. *E. penlandii* was included for review as endangered in the July 1, 1975, petition.

In 1976, the Service proposed the species for endangered status, along with 1,700 other plant species (41 FR 24535), but this proposal was eventually withdrawn in 1979 because a final rule had not been prepared within the time limits required under the 1978 Amendments to the Act. On December 15, 1980 (45 FR 82485), the Service published an updated notice reviewing the native plants being considered for classification as threatened or endangered. *E. penlandii* was included in this notice as a category 2 species. Category 2 consists of taxa for which there is some evidence of vulnerability, but for which there is not enough data to support listing proposals at that time.

Section 4(b)(3)(B) of the Endangered Species Act, as amended in 1982, required the Secretary of the Interior to make findings on certain petitions within 1 year of their receipt. Section 2(b)(1) of the Act's amendments of 1982 further required that all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. Because the 1975 Smithsonian report was accepted as a petition, all the taxa contained in the notice, including *E. penlandii*, were treated as being newly petitioned on October 13, 1982.

Based on recommendations from Johnston et al. (1981), in November 28, 1983 (48 FR 53665), the Service dropped *E. penlandii* to category 3C, which consists of taxa that are no longer being considered for listing because they are more abundant and/or widespread than previously thought. In a notice published January 24, 1984 (49 FR 2485), the Service announced a "not warranted" finding on *E. penlandii* due to its reclassification to category 3C. This finding terminated the need for 1-year petition findings on the species. *E. penlandii* remained as a category 3C species in the September 27, 1985, Notice of Review (50 FR 39552). However, if additional information or changes in habitat indicated a significant decline in a taxon's status, it could be reconsidered for inclusion on the candidate list.

In a 1985–1986 reconnaissance survey, Steve O'Kane from the Colorado Natural Areas Program found one new, small population at Pennsylvania Creek consisting of 200 individuals on 0.4 hectares (1 acre). However, he was unable to relocate all of the 1980 occurrences. He also observed threats from ditching associated with renewed gold mining operations that could dessicate the peat fens' hydrologic regime (O'Kane 1988).

The Service funded a new status report through its Section 6 Cooperative Agreement with the Colorado Natural Areas Program in 1988. Only four new populations of 0.4–0.8 hectares (1–2 acres) each were found during the 1988 status survey, all within the previously documented range and representing only about 10 percent of the whole' species' population. Total numbers estimated for the Penland alpine fen mustard are eight populations, 5,200 individuals, and 25 hectares (62 acres) (Naumann 1988). Two subpopulations, at London Mountain Saddle below Mosquito Pass and the Dauntless Mine site below Mount Sherman, were not found again. Also, the dessicating effects of ditching from off-road vehicle ruts and mining activities were observed at several of the populations. For these reasons, Naumann (1988) recommended returning *E. penlandii* to the candidate list. On February 21, 1990, it was added to the 1990 Notice of Review (55 FR 6295) as a category 1 candidate species, which is a species for which the Service has substantial information to support a proposal to list as threatened or endangered.

Most Penland alpine fen mustard plants occur on Federal land: Hoosier Ridge (Forest Service); Mosquito Pass, London Mountain Saddle (Bureau of Land Management); as well as portions of other, smaller sites (Forest Service, Bureau of Land Management). Approximately 15 percent of the species' habitat is on private land (Naumann 1988).

Summary of Factors Affecting the Species

Section 4(a) (1) of the Endangered Species Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a) (1). These factors and their application to *Eutrema penlandii* (Penland alpine fen mustard) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Because of its high degree of habitat specificity, which requires the combination of several microenvironmental factors as described earlier, the Penland alpine fen mustard only occupies a small area in Colorado estimated at 25 hectares (62 acres) (Naumann 1988). This habitat is rare in Colorado, and most areas in Colorado with high potential as habitat were surveyed in 1988 (Naumann 1988). *E. penlandii* might be found in Wyoming and Montana, but specimens never have been collected outside Colorado. Therefore, few, if any, additional populations will likely be found, and any impacts to its habitat are significant.

Hydrology is the most fragile aspect of the Penland alpine fen mustard's habitat. Perennial subirrigation is required to maintain the peat fens. Ditching, from the ruts of off-road vehicle tracks or mining activity, can cause desiccation of a peat fen supporting Penland alpine fen mustard. The result can be loss of habitat and, consequently, plants. The Mosquito Pass/London Mountain Saddle site, which contains the second largest population, is in a popular recreational area, and active mines are in operation within this cirque of South Mosquito Creek. In addition, survey markers observed in 1988 mark the route of an annual burro race from Mosquito Pass to Alma, Colorado, through the population. The smaller populations at Mt. Sherman, Pennsylvania Mountain, Cooney Lake, and Buckskin Mountain have also been affected by ditching.

Calcareous substrate is another necessary habitat element for the Penland alpine fen mustard. Acid drainage from mine tailings can affect its habitat by lowering pH and changing it from basic to acidic, contributing to loss of plants. Small subpopulations at London Mountain Saddle below Mosquito Pass and the Dauntless Mine below Mt. Sherman that were observed in 1980 could not be found again in 1988 and were presumably lost due to ditching and acid mine drainage, respectively (Naumann 1988).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* No detrimental uses of these plants are known.

C. *Disease or Predation.* No such threats are known. There is evidence of pika and microtene rodent feeding on these plants, but the significance of such herbivory is unknown.

D. *The inadequacy of existing regulatory mechanisms.* No Federal or State laws protect *E. penlandii*. A Research Natural Area has been proposed for the Hoosier Ridge population on Forest Service land. Final designation is still pending. The Act would provide additional protection and encourage active management through the "Available Conservation Measures" discussed below.

E. *Other natural or manmade factors affecting its continued existence.* This species' pattern of rarity, with few small populations on small areas of specialized habitat, makes it particularly vulnerable to the threats described above.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Eutrema penlandii* as threatened. This species is a restricted endemic with threats to its fragile wetland habitat. At the present time, there is no acid mine drainage problem at the Hoosier Ridge site, which contains the largest *E. penlandii* population. Existing management at this site should be adequate to maintain the population (Naumann 1988). Nearly all other populations are threatened by acid mine drainage and/or off-road vehicle traffic. At their present level, these threats are not likely to result in species extinction in the foreseeable future. However, with these threats acting on *E. penlandii's* small populations and limited range, this species could become endangered within the foreseeable future throughout all or a significant portion of its range; thus, *E. penlandii* is a threatened species as defined by the Act. For reasons given below, it is not considered prudent to propose designation of critical habitat.

Critical Habitat

Section 4(a) (3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be listed as endangered or threatened. The Service finds that designation of critical habitat is not prudent for *E. penlandii* for the following reasons:

First, it may be inadvisable to designate critical habitat because the publication of detailed critical maps would expose this little-known species to the threat of deliberate taking and vandalism, when no such threat existed before.

Second, it is unlikely that designation of critical habitat will provide any benefits to the species beyond those achieved by species listing. Most plants occur on lands under Federal jurisdiction. In fact, the two largest populations (Hoosier Ridge: 2,000+ plants; Mosquito Pass/London Mountain Saddle: 1,300+ plants) occur on Federal land. Listed species on lands managed by a Federal agency are protected under section 7(a) (2) of the Act, which requires that the Federal agency insure that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of the species. Per 50 CFR 17.61 and 17.71, it is also unlawful to remove and reduce to possession any listed plant from an area under Federal jurisdiction. Hence, there will be protective safeguards for plants on Federal lands following listing. Moreover, if the Forest Service designates the area containing the Hoosier Ridge population as a Research Natural Area, this is expected to provide additional protection, if only through notification.

All involved parties and landowners (public and private) have been or will be notified of the location and importance of protecting this species' habitat. Protection will be addressed through the consultation and recovery processes.

Consequently, it would not be prudent to determine critical habitat for *E. penlandii*.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to proposed or listed species and with respect to critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, Section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

E. penlandii occurs primarily on Federal land administered by the Forest Service and Bureau of Land Management. Their involvement could include section 7 consultation on mining activities and land exchanges. A recreation plan is needed to manage off-road vehicle use. On both Federal and private land, the Service expects that listing would elevate the awareness of this plant's status and foster efforts aimed toward its conservation.

The Act and its implementing regulations found at 50 CFR 17.71 and 17.72 set forth a series of general trade prohibitions and exceptions that apply to all threatened plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.71, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale this species in interstate or foreign commerce, or to remove and reduce to possession the species from areas under Federal jurisdiction. Seeds from cultivated specimens are exempt from these prohibitions provided that a statement of "cultivated origin" appears on their containers. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.72 also provides for the issuance of permits to carry out otherwise prohibited activities involving threatened species under certain circumstances. With regard to *E. penlandii*, it is anticipated that few, if any, trade permits would ever be sought or issued since this species is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, Room 432, 4401 N. Fairfax Drive, Arlington, Virginia 22203 (703/358-2093, FTS 921-2093).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any interested party concerning this proposal are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *E. penlandii*;

(2) The location of any additional populations of *E. penlandii* and reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of *E. penlandii*; and

(4) Current or planned activities in the subject area and their possible impacts on *E. penlandii*.

Final promulgation of the regulation on *E. penlandii* will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Colorado State Supervisor, U.S. Fish and Wildlife Service, Golden, Colorado (see **ADDRESSES** above).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17— [AMENDED]

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361-1407; 16 U.S.C. 1531-1544; 16 U.S.C. 4201-4245; Pub. L. 99-625, 100 Stat. 3500, unless otherwise noted.

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order, under the family Brassicaceae to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

* * * * *

(h) * * *

SPECIES		Historic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Brassicaceae—Mustard family:						
Eutrema penlandii	Penland alpine fen mustard	U.S.A. (CO)	T		NA	NA

Dated: September 25, 1990.

Richard N. Smith,

Acting Director, Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[No. LS-90-109]

Beef Promotion and Research; Board and State Beef Council Addresses

AGENCY: Agricultural Marketing Service; USDA.

ACTION: Notice.

SUMMARY: This document updates the Notice published in the Federal Register on Thursday, October 16, 1986 (51 FR 36832). This Notice (1) Updates the address of the Cattlemen's Beef Promotion and Research Board and the addresses of the initial 40 Qualified State Beef Councils; (2) adds the addresses of four (4) new Qualified State Beef Councils subsequently certified by the Board for a total of 44 State beef councils; and (3) deletes the column listing addresses to be used by persons requesting refunds of assessments since refunds are no longer authorized.

FOR FURTHER INFORMATION CONTACT: Ralph L. Tapp, Chief, Marketing Programs Branch (202) 382-1115.

SUPPLEMENTARY INFORMATION: Pursuant to the Beef Promotion and Research Act (7 U.S.C. 2901 et. seq.), a Beef Promotion and Research Order (Order) was published in the July 18, 1986, Federal Register (51 FR 26132). Regulations implementing the Order were published in the October 1, 1986, issue of the Federal Register (51 FR 35196).

The Order and the Regulations provide that, beginning October 1, 1986, cattle sold in the United States are subject to an assessment of $1 per head. Persons who collect assessments from producers under the Order and Regulations are required to remit those assessments to the Qualified State Beef Council in the State where they reside or to the Cattlemen's Beef Promotion and Research Board (Board) if there is no Qualified State Beef Council located in their State. Imported cattle, beef, and beef products are also subject to equivalent assessments; these are paid through the U.S. Customs Service.

The Beef Promotion and Research Act (7 U.S.C. 2901 et. seq.) required that a referendum be conducted by the Secretary 22 months after the issuance of the Order to determine if the Order shall be continued or suspended. Any person had the right to demand and receive from the Board a one-time refund during the period prior to the approval of the continuation of the order pursuant to the referendum. On May 10, 1988, the referendum was conducted and producers voted to continue the checkoff program. After the passage of the referendum, refunds were no longer available.

This Notice provides updated addresses for the original 40 Qualified State Beef Councils. Since the publication of these addresses in the Federal Register on October 16, 1986 (51 FR 36832), four (4) newly established State Beef Councils have been certified by the Board. General business and inquiries of these new State Councils should be forwarded to: (1) Delaware Beef Advisory Board, 4601 South Dupont Highway, Dover, Delaware 19901, (2) Hawaii Beef Industry Council, Seven Water Front Plaza, suite 400, 500 Ala Moana Boulevard, Honolulu, Hawaii 96813, (3) Maine Beef Industry Council, Maine Department of Agriculture, Deering Building, State House Station 28, Augusta, Maine 04333, and (4) Vermont Beef Industry Council, P.O. Box 7503, Monshire Museum, suite 200, Norwich, Vermont 05055. Addresses for remittance of assessments and accompanying reports may differ from those for general business and inquiries.

This Notice provides the current addresses of the Board and the 44 Qualified State Beef Councils have different addresses for different purposes. Accordingly, this notice includes two columns for such addresses; one for inquiries and general business and one for remitting assessments and accompanying reports. For inquiries and general business, the address of the Board is Cattlemen's Beef Promotion and Research Board, P.O. Box 3316, Englewood, Colorado 80155. For remitting assessments and accompanying reports, the address of the Board is Cattlemen's Beef Promotion and Research Board, P.O. Box 27-275, Kansas City, Missouri 64180-0001.

BILLING CODE 3410–02–M

Forest Service

Rocky Mountain Region: Colorado, Kansas, Nebraska, South Dakota, Eastern Wyoming, Legal Notice of Appealable Decisions

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: Deciding Officers in the Rocky Mountain Region will publish notice of decisions subject to administrative appeal under 36 CFR part 217 in the legal notice section of the newspapers listed in the Supplementary Information section of this notice. As provided in 36 CFR 217.5, such notice shall constitute legal evidence that the agency has given timely and constructive notice of decisions that are subject to administrative appeal. Newspaper publication of notices of decisions is in addition to direct notice to those who have requested notice in writing and to those known to be interested in or affected by a specific decision.

DATES: Use of these newspapers for purposes of publishing legal notices of decisions subject to appeal under 36 CFR part 217 shall begin April 5, 1990.

FOR FURTHER INFORMATION CONTACT: John P. Halligan, Regional Appeals and Litigation Coordinator, Rocky Mountain Region, 11177 W. 8th Ave., Box 25127, Lakewood, Colorado 80225, Area Code 303–236–9430.

SUPPLEMENTARY INFORMATION: Deciding Officers in the Rocky Mountain Region will give legal notice of decisions subject to appeal under 36 CFR part 217 in the following newspapers which are listed by Forest Service unit. Where more than one newspaper is listed for any unit, the first newspaper listed is the primary newspaper which shall be used to constitute legal evidence that the agency has given timely and constructive notice of decisions that are subject to administrative appeal. As provided in 36 CFR 217.5(d), the timeframe for appeal shall be based on the date of publication of a notice of decision in the primary newspaper.

Decisions by the Regional Forester

The Denver Post, published daily in Denver, Denver County, Colorado, for decisions affecting National Forest System lands in the States of Colorado, Nebraska, Kansas, and eastern Wyoming and for any decision of Region-wide impact. In addition, notice of decisions made by the Regional Forester will also be published in the Rocky Mountain News, published daily in Denver, Denver County, Colorado.

Notice of decisions affecting National Forest System lands in the State of South Dakota will also be published in The Rapid City Journal, published daily in Rapid City, Pennington County, South Dakota.

For those decisions affecting a particular unit, the newspaper specific to that unit will be used.

Arapaho and Roosevelt National Forests, Colorado

Forest Supervisor Decisions

The Denver Post, published daily in Denver, Denver County, Colorado.

District Ranger Decisions

Redfeather and Estes-Poudre Districts: Coloradoan, published daily in Fort Collins, Larimer County, Colorado.

Pawnee District: Greeley Tribune, published daily in Greeley, Weld County, Colorado.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of Export Administration.

Title: Report of Requests for Restrictive Trade Practice or Boycott—Single or Multiple Transactions.

Form Number: BXA-621P and BXA-6051P; OMB—0694-0012

Type of Request: Extention of the expiration date of a currently approved collection.

Burden: 2,000 respondents; 34,000 reporting/recordkeeping hours. Average hours per respondent is 1 hr. for BXA-621P and 20 hrs. for BXA-6051P.

Needs and Uses: Used to carefully and accurately monitor requests for participation in foreign boycotts against countries friendly to the U.S. which are received by U.S. persons. Used to note trends in such boycott activity and to assist in carrying out U.S. policy of opposition to such boycotts. Submitted mainly by individuals or organizations that do business in the Middle East.

Affected Public: Businesses or other for-profit institutions; small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Marshall Mills, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Marshall Mills, OMB Desk Officer, room 3208 New Executive Office Building, Washington, DC 20503.

Dated: October 9, 1990.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of Export Administration.

Title: Foreign Availability Procedures and Criteria.

Form Number: Export Administration Regulations, § 791.8; OMB—0694-0004.

Type of Request: Extention of the expiration date of a currently approved collection.

Burden: 47 respondents; 4,935 reporting/recordkeeping hours. Average time per respondent is 105 hours

Needs and Uses: This information is collected in order to respond to requests by Congress and industry to make foreign availability determinations. Exporters are urged to submit data regarding the foreign product's technical characteristics and the availability of these products in foreign markets to determine if similar U.S. products should not be subject to export restrictions.

Affected Public: Businesses or other for-profit institutions; small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Marshall Mills, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Marshall Mills, OMB Desk Officer, room 3208 New Executive Office Building, Washington, DC 20503.

Dated: October 9, 1990.
Edward Michels,
Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-07-M

Bureau of the Census

Census Advisory Committee (CAC) of the American Economic Association (AEA), et al.; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463 as amended by Pub. L. 94-409), we are giving notice of a joint meeting followed by separate and jointly held (described below) meeting of the CAC of the AEA, CAC of the AMA, CAC of the ASA, and CAC on Population Statistics. The joint meeting will convene on October 18, 1990 at the Old Colony Inn, 625 First Street, Alexandria, Virginia 22313.

The CAC of the AEA is composed of nine members appointed by the president of the AEA. It advises the Director, Bureau of the Census, on technical matters, accuracy levels, and conceptual problems concerning economic surveys and censuses; reviews major aspects of the Census Bureau's programs; and advises on the role of analysis within the Census Bureau.

The CAC of the AMA is composed of nine members appointed by the president of the AMA. It advises the Director, Bureau of the Census, regarding the statistics that will help in marketing the Nation's products and services and on ways to make the statistics the most useful to users.

The CAC of the ASA is composed of 12 members appointed by the president of the ASA. It advises the Director, Bureau of the Census, on the Census Bureau's programs as a whole and on their various parts; considers priority issues in the planning of censuses and surveys; examines guiding principles, advises on questions of policy and procedures; and responds to Census Bureau requests for opinion concerning its operations.

The CAC on Populations Statistics is composed of four members appointed by the Secretary of Commerce and five members appointed by the president of the Population Association of America from the membership of that Association. The CAC on Population Statistics advises the Director, Bureau of the Census, on current programs and on plans for the decennial census of population.

The agenda for the October 18 combined meeting that will begin at 8:45 a.m. and end at 10:15 a.m. is: (1) Introductory remarks by the Director, Bureau of the Census; (2) economic and agriculture censuses update; (3) improving the quality of economic statistics (Boskin Report); (4) 1990 census update; and (5) the Census Bureau's international programs.

The agendas for the four committees in their separate and jointly held meeting that will begin at 10:30 a.m. and adjourn at 5:15 p.m. on October 18 are as follows:

The CAC of the AEA: (1) Census Bureau responses to recommendations and activities of special interest to the CAC of the AEA, (2) annual report on the work of the Center for Economic Studies, (3) report on the Recordkeeping Practices Survey (joint with the CAC of the AMA), (4) coping with budget cuts: the current industrial report experience (joint with the CAC of the AMA), and (5) report on the economic censuses advertising and response survey/response improvement strategy for the 1992 Economic Censuses (joint with the CAC of the AMA).

The CAC of the AMA: (1) Census Bureau responses to recommendations and activities of special interest to the CAC of the AMA, (2) Topologically Integrated Geographic Encoding and Referencing System (TIGER) (joint with the CAC of the ASA and on Population Statistics), (3) report on the Recordkeeping Practices Survey (joint with the CAC of the AEA), (4) coping with budget cuts: the current industrial report experience (joint with the CAC of the AEA), and (5) report on the economic censuses advertising and response survey/response improvement strategy for the 1992 Economic Censuses (joint with the CAC of the AEA).

The CAC of the ASA: (1) Census Bureau responses to recommendations and activities of special interest to the CAC of the ASA, (2) Topologically Integrated Geographic Encoding and Referencing System (TiGER) (joint with the CAC of the AMA and on Population Statistics), (3) report on findings/progress of enthnographic studies (joint with the CAC on Population Statistics), (4) preliminary census counts, postcensal estimates, and demographic analysis (joint with the CAC on Population Statistics), and (5) report on adjustment and the Post-Enumeration Survey (joint with the CAC on Population Statistics).

The CAC on Population Statistics: (1) Census Bureau responses to recommendations and activities of special interest, (2) Topologically Integrated Geographic Encoding and Referencing System (TIGER) (joint with the CAC of the AMA and ASA), (3) report on findings/progress of ethnographic studies (joint with the CAC of the ASA), (4) preliminary census counts, postcensal estimates, and demographic analysis (joint with the CAC of the ASA), and (5) report on adjustment and the Post-Enumeration Survey (joint with the CAC of the ASA).

The agendas for the October 19 meetings that will begin at 8:45 a.m. and adjourn at 1 p.m. are:

The CAC of the AEA: (1) Expansion of services (joint with the CAC of the AMA), (2) survey of minority-owned business enterprises (joint with the CAC of the AMA), (3) development and discussion of recommendations, and (4) closing session including (a) Continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

The CAC of the AMA: (1) Expansion of services (joint with the CAC of the AEA), (2) survey of minority-owned business enterprises (joint with the CAC of the AEA), (3) development and discussion of recommendations, and (4) closing session including (a) Continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

The CAC of the ASA: (1) Directions and plans for the statistical standards and methodology areas (joint with the CAC on Population Statistics), (2) further information and detail on the redesign of demographic surveys, (3) development and discussion of recommendations, and (4) closing session including (a) Continued committee and staff discussions (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

The CAC on Population Statistics: (1) directions and plans for the statistical standards and methodology area (joint with the CAC of the ASA), (2) 1990 census subject and supplementary reports, (3) development and discussion of recommendations, and (4) closing session including (a) Continued committee and staff discussions, (b) plans and suggested agenda for next meeting, and (c) comments by outside observers.

All meetings are open to the public, and a brief period is set aside on October 19 for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Census Bureau Committee Liaison Officer at least 3 days before the meeting.

Persons wishing additional information regarding these meetings or who wish to submit written statements may contact the Committee Liaison Officer, Mrs. Phyllis Van Tassel, Room 2423, Federal Building 3, Suitland, Maryland. (Mailing address: Washington DC 20233). Telephone: (301) 763-5410.

Dated: October 11, 1990.

Barbara Everitt Bryant,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

International Trade Administration

[A-570-601]

Preliminary Results of Antidumping Duty Administrative Reviews: Tapered Roller Bearings and Parts Thereof From the People's Republic of China

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: In response to requests by the Timken Company, the Department of Commerce is conducting administrative reviews of the antidumping duty order on tapered roller bearings and parts thereof (TRBs) from the People's Republic of China (PRC). The reviews cover Premier Bearing and Equipment, a Hong Kong trading company and exporter of this merchandise to the United States. The first review covers the period from February 6, 1987, to May 31, 1988. The second review covers the period from June 1, 1988, to May 31, 1989. Using best information available, we preliminarily determine the dumping margin to be 0.97% for both reviews. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: October 15, 1990.

FOR FURTHER INFORMATION CONTACT: Kate Johnson or John Beck, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-4103 or (202) 377-3464, respectively.

SUPPLEMENTARY INFORMATION:

Background

The original investigation of TRBs from the PRC included two companies, the China National Machinery and Equipment Import and Export Corporation (CMEC), and Premier Bearing and Equipment (Premier). CMEC is a producer and exporter of the subject merchandise in the PRC and is unrelated to Premier. Premier is a Hong Kong trading company.

On May 27, 1987, the Department published in the Federal Register (52 FR 19748) the Final Determination of Sales at Less Than Fair Value on TRBs from the PRC. No margins were found on exports by CMEC. Therefore, CMEC was excluded from the determination. An Antidumping Duty Order covering Premier only was published on June 15, 1987 (52 FR 22637). Pursuant to an order by the Court of International Trade, Commerce amended the Final Determination of Sales at Less Than Fair Value and published a new order on February 28, 1990 (55 FR 6669). This new order included CMEC as well as Premier.

Administrative reviews were requested by the petitioner, Timken Company, on June 30, 1988 (1987/88 review), and June 30, 1989 (1988/89 review), in accordance with section 353.53(a) of the Commerce Regulations (19 CFR 353.53a(a) (1988)). We published a notice of initiation for the 1987/88 review on July 28, 1988 (53 FR 28423), and for the 1988/89 review on July 25, 1989 (54 FR 30915). The Department is now conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended ("the Tariff Act"). Since the order for CMEC was not published until February 28, 1990, CMEC has not been covered in these two administrative reviews.

Scope of review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et. seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number.

Imports covered by these reviews are shipments of tapered roller bearings and parts thereof from the PRC. During the review period such merchandise was classifiable under items 680.30, 680.39, 681.10 and 692.32 of the Tariff Schedules of the United States (TSUS). The merchandise is currently classifiable under HTS item number 8482.20.00, 8482.91.00.60, 8482.99.30, 8483.20.40, 8483.20.80, 8483.30.80, 8483.90.20, 8483.90.30, and 8483.90.80. The HTS and TSUS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The reviews cover one exporter, Premier Bearing and Equipment, to the United States of tapered roller bearings and parts thereof. The first review covers the period February 6, 1987 through May 31, 1988. The second review covers the period June 1, 1988 through May 31, 1989.

Best Information Available

On August 16, 1988, the Department presented respondent with a questionnaire for the 1987/88 administrative review. On October 17, 1988, the Department received a response to this questionnaire. After reviewing the information contained in this response, the Department presented respondent with a deficiency letter on October 27, 1989. This letter included directions on model matching. The response to this letter was received on November 13, 1989. On October 10, 1989, the Department presented respondent with a questionnaire for the 1988/89 administrative reivew. The Department received a response to this questionnaire on December 18, 1989.

Since the respondent was not able to follow completely the model matching directions contained in the October 27 letter in the 1987/88 review, and no model matching directions had been provided in the questionnaire for the 1988/89 review, the Department presented a letter to respondent for each of the two administrative reviews on July 11, 1990. These letters requested clarification of certain parts of respondent's questionnaire responses and provided directions on model matching. These deficiency letters were supplemented by another Department letter presented to respondent on August 10, 1990, which provided additional instructions for model matching.

The new instructions requested that respondent match every U.S. product with the closest third country product on the basis of five matching characteristics used in past TRB cases. These characteristics included: outside diameter; inside diameter; width; dynamic load rating; and Y2 factor; all of which were explained in the August 10, 1990 letter. Respondent was required to separately list the measurements for each of these five characteristics for each U.S. and third country bearing. Respondent was then required to match every U.S. bearing with a third country bearing using the greatest single deviation method, which was fully explained in the letter. Respondent was also notified during the week of July 16, 1990, that it was to use sales to Turkey and Singapore in the first review and

sales to Taiwan in the second review as the basis for foreign market value.

On August 22, 1990, the Department received the responses to the July 11, 1990 and August 10, 1990 deficiency letters. These responses, however, did not include the list of the five matching characteristics for every U.S. and appropriate third country bearing. Furthermore, no information was provided regarding the acquisition cost of the bearings, which we indicated in our July 11, 1990 letter might be used as the basis for difference in merchandise adjustments. Therefore, it is impossible for the Department to use respondent's information for purposes of determining the most similar third country bearing with which to match every U.S. bearing and of applying a difference in merchandise adjustment. Since the information on the record is inadequate, we are using best information available (BIA) for purposes of these preliminary results.

In deciding what to use as best information available, 19 CFR 353.37(b) of the Department's regulations provides that the Department may take into account whether a party refused to provide requested information. Thus, the Department determines on a case-by-case basis what is best information available. When a company has cooperated with the Department's request for information but fails to provide the information requested in a timely manner or in the form required, the Department may assign the affected company the highest margin assigned that company in any previous review. Since these preliminary results are for the first two administrative reviews, we are using the margin rate (0.97%) calculated in the final determination of sales at less than fair value (52 FR 19748 (May 27, 1987)). We believe that this rate is the most appropriate basis for BIA because the rate from the final determination was calculated from verified information in the investigation and because respondent has attempted to cooperate with the Department.

Currency Conversion

In the original investigation we used the official exchange rates in effect on the dates of U.S. sales, in accordance with section 773(a)(1) of the Tariff Act, as amended by section 615 of the Trade and Tariff Act of 1984. All currency conversions were made at the rates certified by the Federal Reserve Bank.

Preliminary Results of the Review

We preliminarily determine the margin to be:

Manufacturer/ Exporter	Time period	Margin (percent)
Premier	5/08/87-05/31/88	0.97

The Department will issue appraisement instructions concerning Premier directly to the Customs Service upon completing of these administrative reviews.

Furthermore, the following deposit requirements will be effective upon publication of our final results of these administrative reviews for all shipments of Chinese TRBs entered, or withdrawn from warehouse, for consumption on or after that publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for any shipments of this merchandise manufactured or exported by the remaining known manufacturers/exporters not covered in this review will continue to be at the rate published in the final determination of sales at less than fair value, as amended, for these firms (55 FR 6669, Feb. 26, 1990); (2) the cash deposit rate for Premier will be that established in the final results of these administrative reviews; and (3) the cash deposit rate for any future entries of this merchandise from a new producer and/or exporter, not covered in these administrative reviews or in the original investigation, whose first shipments occurred after May 31, 1989 and who is unrelated to the reviewed firm or any firm which was subject to the original investigation will be the same as the rate established for Premier. These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

Public Comment

In accordance with § 353.38 of the Department's regulations, case briefs or any other written comments must be submitted in at least ten copies to the Assistant Secretary for Import Administration no later than 30 days after the publication of these determinations, and rebuttal briefs no later than 37 days after publication of these determinations. In accordance with section 353.38(b) of the Department's regulations, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Such hearing will be held 44 days after the publication of these determinations at the U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Interested parties who wish to participate in the hearing must submit a written request to the Assistant Secretary for Import Administration, Room B-099, at the above address within ten days of the publication of this notice. Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; (3) the reasons for attending; and (4) a list of the issues to be discussed. In accordance with section 353.38(b) of the Department's regulations, an interested party may make an affirmative oral presentation only on arguments included in its briefs.

These administrative reviews and notice are in accordance with sections 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5) (1989).

Dated: October 9, 1990.

Eric I. Garfinkel,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897; 15 CFR 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 2841, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 90-167. *Applicant:* President and Fellows of Harvard College, Harvard Medical School, Richardson Building room 411, 25 Shattuck Street, Boston, MA 02115. *Instrument:* Stopped Flow Spectrophotometer, Model SF17MV. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* The instrument will be used for studies of cells and vesicles, primarily human red cells, but also cells and vesicles prepared and purified from rat kidneys. The properties of the cells and vesicles investigated are those concerned with the transport of materials, primarily water, sodium, potassium and chloride

ions and sugar across the boundary membrane of the cell or vesicle. *Application Received by Commissioner of Customs* August 23, 1990.

Docket Number 90-168. *Applicant:* U.S. Environmental Protection Agency, Sabine Island, Gulf Breeze, FL 32561. *Instrument:* Electron Microscope, Model EM902/PC. *Manufacturer:* Carl Zeiss, Inc., West Germany. *Intended Use:* The instrument will be used to study biological materials including tissue samples from freshwater and marine organisms and preparations of microbial agents including viruses, bacteria, protozoans and fungi. Experiments will consist of: (1) Assessment of risk of MPCAs (natural and genetically altered) on non-target organisms and the assessment of their fate and survival in the aquatic environment, (2) bioassay exposures and tissue evaluations to determine effects of toxics and pesticides on marine organisms, (3) development of aquatic animals as carcinogen assay models and indicator species of carcinogens in the environment, (4) the study and diagnosis of disease causing organisms, and (5) studies to determine the effects of various xenobiotics and environmental stresses on host/parasite relationships. *Application Received by Commissioner of Customs:* August 23, 1990.

Docket Number: 90-169. *Applicant:* University of Maryland at Baltimore, Division of Procurement and Supply, 737 West Lombard Street, Baltimore, MD 21201-1401. *Instrument:* Electron Microscope, Model H-7000. *Manufacturer:* Hitachi, Japan. *Intended Use:* The instrument will be used for studies of organic brain tissues used in a variety of experiments aimed at identifying the morphological sequelae of neurotoxicity in the mammalian central nervous system in experimental animals. Neuroanatomical studies of schizophrenic and control brain tissue will be conducted. *Application Received by Commissioner of Customs:* August 27, 1990.

Docket Number: 90-170. *Applicant:* The Pennsylvania State University, 503 Dieke Bldg, University Park, PA 16802. *Instrument:* Radiation Detector, Model AB-5 and Accessories. *Manufacturer:* Pylon Electronic Development Co., Canada. *Intended Use:* The instrument will be used for the study of the distribution and abundance of radon in soil gas and the distribution and abundance of radium by use of radon analysis. In addition, the instrument will be used for educational purposes in the course Geosc 600/601, Thesis Research.

Docket Number: 90-171. *Applicant:* The University of Tennessee, Department of Anatomy and Neurobiology, 875 Monroe Avenue, Room 102, Memphis, TN 38163. *Instrument:* Electron Microscope, Model JEM-2000 EXII/SEG/DP/DP. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instrument will be used for experiments that include axonal tracing studies to determine the synaptic connections between neurons in various regions of the brain, intracellular staining studies to determine patterns of synaptic connections among neurons within a brain region and immunocytochemical studies of the localization of proteins and other substances within neurons of normal subjects and those with experimental or natural nervous system disorders. In addition, the instrument will be used for educational purposes in the course Anatomy and Neurobiology 824, Techniques in Neurobiology. *Application Received by Commissioner of Customs:* August 30, 1990.

Docket Number: 90-172. *Applicant:* University of California, San Diego, CA 92093. *Instrument:* Rotating Anode X-ray Generator Model FR-C. *Manufacturer:* Rigaku Corporation, Japan. *Intended Use:* The instrument will be used in a high speed data collection system for protein crystallography. The system will collect date to find the three-dimensional structure of proteins or enzymes using X-ray diffraction methods. *Application Received by Commissioner of Customs:* September 4, 1990.

Docket Number: 90-173. *Applicant:* U.S. Department of Commerce, NOAA, National Marine Fisheries Service, Northeast Fisheries Center, Woods Hole, MA 02543. *Instrument:* Water Temperature Sensor. *Manufacturer:* Scanmar A.S., Norway. *Intended Use:* The instrument is intended to be used to monitor trawl gear. Experiments will be conducted evaluating gear performance such as bottom type, currents and changes in gear configuration during vessel fishing power. Varying scopes and towing speeds and turning maneuvers will be utilized. *Application Received by Commissioner of Customs:* September 4, 1990.

Docket Number: 90-174. *Applicant:* University of Florida, Department of Chemistry, Gainesville, FL 32611-2046. *Instrument:* Mass Spectrometer, Model Magnetic Sector SIMS. *Manufacturer:* VG Instruments, United Kingdom. *Intended Use:* The instrument will be used in determinations of elemental compositions and distributions in surfaces and in studies of organic molecules adsorbed to surfaces. A wide variety of substances will be studied, including gallium arsenide, silicon, metals, polymers adsorbed to metals, plant and animal tissues. As an integral part of an undergraduate and graduate curriculum, the instrument provides example spectra for courses, a modern instrument for training of graduate students specializing in mass spectrometry, and training in the capabilities of modern mass spectrometry for students specializing in synthesis and other chemical areas. *Application Received by Commissioner of Customs:* September 9, 1990.

Docket Number: 90-176. *Applicant:* University of Tennessee-Memphis, 711 Jefferson Avenue, Ste 523, Memphis, TN 38163. *Instrument:* Automated Rapid Karyotyping for Chromosome Analysis, Model RK2. *Manufacturer:* Image Recognition Systems, Ltd., United Kingdom. *Intended Use:* The instrument will be used in experiments which related to the examination of several human disease conditions for chromosome abnormalities. These include diagnosis of genetic conditions such as Down's Syndrome. *Application Received by Commissioner of Customs:* September 7, 1990.

Docket Number: 90-177. *Applicant:* University of Medicine and Dentistry of New Jersey, 401 Haddon Avenue, Camden, NJ 08103. *Instrument:* Mass Spectrometer, SIRA Series-II. *Manufacturer:* VG Instruments, United Kingdom. *Intended Use:* The instrument will be used for measuring stable isotopes in body fluids, (urine, saliva and blood) as part of a research program to investigate protein and energy metabolism in AIDS patients. *Application Received by Commissioner of Customs:* September 10, 1990.

Docket Number: 90-178. Applicant: VA Medical Center, 4801 Linwood Boulevard, Kansas City, MO 64128. *Instrument:* Photomultiplier, Model PM-60. *Manufacturer:* Hi-Tech Ltd., United Kingdom. *Intended Use:* The instrument is an accessory to an existing stopped flow spectrophotometer which is used for the study of a group of enzymes of typical pyridine-nucleotide linked dehydrogenases, specifically focused on L-glutamate dehydrogenase from bovine liver and from Clostridium symbosium. *Application Received by Commissioner of Customs:* September 11, 1990.

Docket Number: 90-179. *Applicant:* University of Illinois at Urbana-Champaign, Purchasing Division, 506 South Wright Street, Urbana, IL 61801. *Instrument:* FTI Spectrometer System, Model DA 8.12. *Manufacturer:* Bomem, Canada. *Intended Use:* The instrument will be used in experiments to identify

those vibrational, electronic and magnetic excitations important to understand the special properties of the materials under study, e.g., the superconductivity of HTS's and the structure/property/impurity relationships in semiconductor heterostructures and in metallic or magnetic superlattices. In addition, the instrument will be used for educational purposes in the courses Physics 397 and Physics 497, Independent Study and Physics 499, Thesis Research.

Application Received by Commissioner of Customs: September 11, 1990.

Docket Number: 90–180. *Applicant:* University of California, Los Angeles, 405 Hilgard Avenue, Los Angeles, CA 90024. *Instrument:* Mass Spectrometer, Model VG Sector 54–30. *Manufacturer:* VG Isotech, United Kingdom. *Intended Use:* The instrument will be used for the study of natural geologic whole rock and separated mineral samples via the established Rb–Sr, Sm–Nd, U–Pb and Lu–Hf systematics. The principal goals are constraining the origin of Island Arc magmas, magma chamber processes and the mechanism of formation and differentiation of the lower crust by measuring the isotopic ratios of the above characteristic trace elements. Of particular interest is the development of a (geologically) short time scale chronometer. *Application Received by Commissioner of Customs:* September 11, 1990.

Docket Number: 90–181. Applicant: University of North Dakota, Center for Aerospace Sciences, P.O. Box 8216, University Station, Grand Forks, ND 58202. *Instrument:* NO_x Analyzer and O_3 Ozone Monitor, Model LMH–3. *Manufacturer:* Scintrex Inc., Canada. *Intended Use:* The instrument will be used in conjunction with others to study the transport by cumulus clouds of pollutants such as NO, NO_x, CO, CO_2, SO_2 and particulate. Another objective is the study of the formation of acidic species in cloud droplets. *Application Received by Commissioner of Customs:* September 11, 1990.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 90–24252 Filed 10–12–90; 8:45 am]

BILLING CODE 3510–DS–M

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 2841, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 89–177R.
Applicant: William Paterson College of New Jersey, 300 Pompton Road, Wayne, NJ 07470.
Instrument: Mass Spectrometer, Model JMS–DX303HF.
Manufacturer: JEOL, Ltd., Japan. Original notice of this resubmitted application was published in the Federal Register of August 1, 1989.

Docket Number: 89–191R.
Applicant: Ohio State University, Department of Physiological Chemistry, 333 West 10th Avenue, Columbus, OH 43210.
Instrument: Stopped Flow Spectrofluorimeter, Model SF.17MV.
Manufacturer: Applied Photophysics, United Kingdom. Original notice of this resubmitted application was published in the Federal Register of August 21, 1989.

Docket Number: 89–286R.
Applicant: University of Illinois, Urbana-Champaign, Purchasing Division, 506 So. Wright Street, Urbana, IL 61801.
Instrument: Mass Spectrometer System, Model VG 70–VSE.
Manufacturer: VG Analytical Ltd., United Kingdom. Original notice of this resubmitted application was published in the Federal Register of January 11, 1990.

Docket Number: 89–291R.
Applicant: University of Kentucky, College of Pharmacy, Rose Street Pharmacy Bldg., Lexington, KY 40536–0082.
Instrument: Mass Spectrometer, Model CONCEPT 1H.
Manufacturer: Kratos Analytical, United Kingdom. Original notice of this resubmitted application was published in the Federal Register of January 29, 1990.

Docket Number: 90–003R.
Applicant: University of Alaska-Fairbanks, Geophysical Institute, Fairbanks, AK 99775–0800.
Instrument: Fixed Frequency HF Radar System.
Manufacturer: Department of Physics, University of Adelaide, Australia. Original notice of this resubmitted application was published in the Federal Register of February 1, 1990.

Docket Number: 90–009R.
Applicant: University of Washington, Chemistry Department, Bagley Hall, BG–10, Seattle, WA 98195.
Instrument: Gas Chromatograph/Mass Spectrometer System, Model HV–1.
Manufacturer: Kratos Analytical, United Kingdom. Original notice of this resubmitted application was published in the Federal Register of February 21, 1990.

Docket Number: 90–040R.
Applicant: Pennsylvania State University, Department of Meteorology, 503 Walker Building, University Park, PA 16802.
Instrument: Two (2) Copper Lasers, Model CU15–A.
Manufacturer: Oxford Lasers, Ltd., United Kingdom. Original notice of this resubmitted application was published in the Federal Register of March 22, 1990.

Docket Number: 90–155.
Applicant: University of Minnesota, Department of Veterinary Biology, 1988 Fitch Avenue, St. Paul, MN 55108.
Instrument: Electron Microscope, Model JEM 1200EX.
Manufacturer: JEOL, Ltd., Japan.
Intended Use: The instrument will be used to study the ultrastructural anatomy of brain cells, cells from the retina of the eye, muscle cells, cells from the digestive tract, cells from the pancreas and various cell types from the blood. Various experiments will be conducted but the major endpoint of each will be to examine the tissue to observe the localization of certain chemicals or structures inside cells, to observe pathological changes that have occurred within the cells or in the tissue of interest or to examine the normal relationships of cells within a particular tissue. In addition, the instrument will be used on a one-to-one basis for training veterinary and graduate students and interns.
Application Received by Commissioner of Customs: August 8, 1990.

Docket Number: 90–157.
Applicant: Department of Geology, 1112 Turlington Hall, Gainesville, FL 32611.
Instrument: Upgrade of Mass Spectrometer, PRISM Series II with 10-Sample Cracker.
Manufacturer: VG Instruments, Ltd., United Kingdom.

Intended Use: The instrument will be used for the study of past changes in the Earth's climate and modern water cycle. It will also be used to introduce students to isotopic techniques in paleoclimatology and hydrology in courses in paleoceanography and hydrology.

Application Received by Commissioner of Customs: August 9, 1990.

Docket Number: 90-158. *Applicant:* Louisiana State University, Coastal Ecology Institute, Baton Rouge, LA 70803. *Instrument:* MC 100 Microcell and Model 781 Oxygen Meter. *Manufacturer:* Strathkelvin Instruments, United Kingdom. *Intended Use:* The instrument will be used to measure the oxygen evolution of phtoplankton as a by-product of photosynthesis. The photosynthesis measurements will be made at several sites monthly throughout Fourleague Bay, Louisiana in an attempt to determine the manner in which shallow waters interact with wetland to produce regions of high productivity. *Application Received by Commissioner of Customs:* August 10, 1990.

Docket Number: 90-159. *Applicant:* The Research Foundation of State University New York, Erie County Medical Center, 462 Grider Street, Buffalo, NY 14215. *Instrument:* Electron Microscope, Model H-7000. *Manufacturer:* Hitachi, Japan. *Intended Use:* The instrument will be used for studies of the following:

(a) Pathogenesis of gonococcal infections during human infection with emphasis on studies of the antigenic nature of the oligosaccharides of the lipooligosaccharide component of the organism,

(b) *Haemophilus influenzae* in secretions obtained from the middle ear during otitis media and from the cerebrospinal fluid after meningitis,

(c) Intracellular calmodulin traffic using immunoelectron microscopic analysis,

(d) Glucose transport protein in the brain of aged rats,

(e) Meningeal tissue for receptor to the meningococcal C capsular polysaccharide using anti-idiotype antibodies,

(f) Ultrastructural changes in cardiac and pulmonary tissue after experimental stress.

Application received by Commissioner of Customs: August 14, 1990.

Docket Number: 90-160. *Applicant:* Solar Energy Research Institute, 1617 Cole Blvd., Golden CO 80401. *Instrument:* Ultrasonic Anemometer, Model DAT-310. *Manufacturer:* Kaijo-Denki, Co. Ltd., Japan. *Intended Use:* The instrument will be used to study the 3-D structure of small-scale atmospheric turbulence related to the operation, efficiency and fatigue life of wind turbine generators and their component parts. *Application received by Commissioner of Customs:* August 14, 1990.

Docket Number: 90-161. *Applicant:* Oregon State University, College of Oceanography, Oceanography Administration Building 104, Corvallis, OR 97331-5503. *Instrument:* Towed Underwater Vehicle, Model SEASOR. *Manufacturer:* Chelsa Instruments, Ltd., United Kingdom. *Intended Use:* The instrument will be used in conjunction with existing conductivity-temperature depth sensors for the study of ocean circulation and hydrographic characteristics in the world's oceans. Primarily, measurements of the conductivity and temperature of seawater at depths of 0 to 300 meters will be made. Studies will concentrate on rapidly sampling the large-scale circulation and temperature-salinity structure of ocean areas. The information gained through use of the instrument will become part of the research projects of a number of M.Sc. and Ph.D candidates. *Application received by Commissioner of Customs:* August 14, 1990.

Docket Number: 90-162. *Applicant:* University of California, Department of Geological Sciences, Santa Barbara, CA 93106. *Instrument:* ICP Mass Spectrometer, Model, PlasmaQuad PQ2. *Manufacturer:* VG Elemental, United Kingdom. *Intended Use:* The instrument will be used for the analysis of natural waters (lake, river and ocean) and sedimentary materials (rocks, shells, ocean bottom sediments, etc.) which are collected for research purposes only or are received from nationally archived research collections. Experiments are generally of the form in which a suite of sample from a series of water bodies or sequence of rocks is analyzed to determine the natural distribution of trace elemental concentrations. *Application received by Commissioner of Customs:* August 15, 1990.

Docket Number: 90-163. *Applicant:* Texas Tech University Health Sciences Center, 3601 4th Street, Lubbock, TX 79430. *Instrument:* Electron Microscope Accessories. *Manufacturer:* Nissei Sangyo, Japan. *Intended Use:* The instruments are accessories to an existing electron microscope in a facility that provides basic research in areas of medical research and material science research. This research will involve elucidation of locating trace elements in tissue and elemental components in geological samples and the causes of failure in glass. *Application Received by Commissioner of Customs:* August 16, 1990.

Docket Number: 90-164. *Applicant:* The Pennsylvania State University, Department of Physics, 104 Davey Lab, University Park, PA 16802. *Instrument:* High-Resolution Low Energy Electron Diffraction System. *Manufacturer:* Leybold Vacuum Products, West Germany. *Intended Use:* The instrument will be used for studies of the nature of surface defects on single crystals and their effect on the ordering of adsorbed layers. *Application Received by Commissioner of Customs:* August 12, 1990.

Docket Number: 90-165. *Applicant:* The Pennsylvania State University, Aerospace Engineering Department, 233 Hammond Building, University Park, PA 16802. *Instrument:* 12-Channel Anemometer with Accessories. *Manufacturer:* AA Lab Systems, Ltd., Israel. *Intended Use:* The instrument will be used for the study of unsteady convective heat transfer in aircraft propulsion units. Detailed experiments in a turbine rig will be conducted in order to obtain a better understanding of unsteady heat transfer. The instrument will also be used for educational purposes in the course Aerospace Propulsion, Theory of Turbines Linary. *Application Received by Commissioner of Customs:* August 21, 1990.

Docket Number: 90-166. *Applicant:* University of California, Irvine, Department of Mechanical Engineering, Irvine, CA 92717. *Instrument:* Electron Microscope, Model CM 201 with Accessories. *Manufacturer:* N V Philips Electronics, The Netherlands. *Intended Use:* The instrument will be used for studies of ceramic, metals, and composite materials. Several different phenomena will be investigated including: gelation in sol-gel systems, grain boundary structure and chemistry in ceramic materials, structural characterization and chemical analyses of interfacial reactions at metal/ceramic interfaces, development of dislocation structure during creep in metallic alloys, and the development of defects in ceramics after high temperature deformation. The experiments to be conducted will involve the preparation of TEM samples during various stages of processing or after appropriate exposure to mechanical deformation or high temperature environments. In addition, the instrument will be used for educational purposes in the courses: (1)

Introduction to Electron Microscopy, (2) Advanced Transmission Electron Microscopy Techniques, (3) Materials Characterization Laboratory and (4) M.S. and Ph.D. Research. *Application Received by Commissioner of Customs:* August 21, 1990.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico Fishery Management Council will hold a public meeting of the Florida/Alabama Habitat Advisory Panel on October 24, 1990, from 9 a.m. to 4 p.m. The meeting will be held at the Holiday Inn University Center, 316 West Tennessee Street, Tallahassee, FL. The panel will discuss propeller damage to seagrass beds, the Intracoastal Waterway maintenance dredging and associated spoil disposal problems, the Florida Growth Management Act/Wetland Protections, the regulatory functions Standard Operating Procedures in Jacksonville District, and the Alabama Coastal Waters Initiative.

For more information contact Wayne F. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL; telephone: (813) 228-2815.

Dated: October 9, 1990.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Gulf of Mexico Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico Fishery Management Council will hold a public meeting of its Shrimp and Reef Advisory Panels (AP) on October 23, 1990, from 1 p.m. to 5 p.m. The meetings will be held at the New Orleans Airport Hilton & Conference Center, 901 Airline Highway, Kenner, LA. The following will be discussed:

The review of the Council's proposed amendment to the Reef Fish Fishery Management Plan (FMP) to modify the target date of January 1, 2000, implemented in 1990 for rebuilding the reef fish stocks in the Gulf of Mexico. The target date for rebuilding red snapper must be extended beyond the year 2000. Alternative rebuilding time periods will be evaluated and recommendations will be made for Council consideration. The Shrimp Advisory Panel will meet on October 24, 1990, from 8 a.m. to 12 p.m., to review draft Amendment #5 to the Shrimp Fishery Management Plan (FMP) that specifies a definition of overfishing for the Gulf shrimp fisheries and possible management actions to prevent overfishing.

The amendment would also set the cooperative seasonal closure of the Exclusive Economic Zone off Texas to conform with a recent change in the closure of state waters.

For more information contact Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL; telephone: (813) 228-2815.

Dated: October 9, 1990.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Mid-Atlantic Fishery Management Council Public Meeting & Public Hearing

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Mid-Atlantic Fishery Management Council will hold a public meeting on October 31 and November 1, 1990. The meeting will be held at the Holiday Inn, 45 Industrial Highway, Essington, PA; telephone # (215) 521-2400. The Council will begin meeting on October 31 and 8:30 a.m., and adjourn on November 1 at approximately 12 noon.

The Council will discuss Amendment #1 to the Summer Flounder Fishery Management Plan (FMP), Amendment #3 to the Atlantic Mackerel, Squid and Butterfish Fishery Management Plan (FMP), the Overfishing Definition for the Billfish Fishery Management Plan (FMP), and other fishery management matters may be discussed as deemed necessary. The Council also may hold a closed session (not open to the public) to discuss personnel and/or national security matters.

Additionally, on October 31 at 7 p.m., there will be a public hearing on Amendment #3 to the Atlantic Mackerel, Squid and Butterfish Fishery Management Plan (FMP), and also on October 31 at 8 p.m., there will be another public hearing on the Overfishing Definition for the Billfish Fishery Management Plan (FMP).

For further information contact John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 South New Street, Dover, DE 19901; telephone: (302) 674-2331.

Dated: October 9, 1990.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1990 Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1990 commodities to be produced and a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: November 13, 1990.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: On August 17 and 24, 1990, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (55 F.R. 33748 and 34726) of proposed additions to Procurement List 1990, which was published on November 3, 1989 (54 F.R. 46540). After consideration of the material presented to it concerning capability of qualified workshops to produce the commodities and provide the service at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodities and service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

I certify that the following actions will not have a significant impact on a

substantial number of small entities. The major factors considered for this certification were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and service listed.

c. The actions will result in authorizing small entities to produce the commodities and provide the service procured by the Government.

Accordingly, the following commodities and service are hereby added to Procurement List 1990:

Commodities

Bandage, Gauze, Compressed, Camouflaged
6510-00-200-3185

Cap, Disposable
8415-00-NSH-0052
(Requirements of the Naval Supply Center, Bremerton, WA)

Coveralls, Disposable
8415-00-NSH-0049
(Requirements of the Naval Supply Center, Bremerton, WA)

Hood, Disposable
8415-00-NSH-0051
(Requirements of the Naval Supply Center, Bremerton, WA)

Shoe Cover, Disposable
8415-00-NSH-0053
(Requirements of the Naval Supply Center, Bremerton, WA)

Sleeves, Disposable
8415-00-NSH-0050
(Requirements of the Naval Supply Center, Bremerton, WA)

Trousers, Camouflage

Procurement List 1990 Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1990 a commodity to be produced and services to be provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 13, 1990.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and services to Procurement List 1990, which was published on November 2, 1989 (54 F.R. 46540):

Commodity

Bottle, Urine Specimen
6640-00-165-5778

Services

Janitorial/Custodial
A.A. Ribicoff Federal Building
450 Main Street
Hartford, Connecticut

Janitorial/Custodial
Army and Air Force Exchange Service

BILLING CODE 6820-33-M

COMMODITY FUTURES TRADING COMMISSION

New York Cotton Exchange: Proposed Amendments Relating to the Two-Year U.S. Treasury Note Futures Contract and the Five-Year U.S. Treasury Note Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The New York Cotton Exchange ("NYCE" or "Exchange") has submitted proposed amendments to the Two-Year U.S. Treasury Note futures contract and the Five-Year U.S. Treasury Note futures contract. For each of the two futures contracts, the proposed amendment would convert the current book-entry physical delivery system to a cash settlement system based on the results of the U.S. Treasury Department's auction held during the contract month. The Acting Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission"), in accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that these proposals are of major economic significance. On behalf of the Commission, the Acting Division Director is requesting comment on these proposals.

DATES: Comments must be received on or before November 14, 1990.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the amendments to the NYCE Two-Year U.S. Treasury Note futures contract and/or the amendments to the NYCE Five-Year U.S. Treasury Note futures contract.

FOR FURTHER INFORMATION CONTACT: Richard Shilts, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581; telephone (202) 254-7303.

SUPPLEMENTARY INFORMATION: The Exchange submitted proposed amendments for the two-year U.S. Treasury note futures contract and the five-year U.S. Treasury note futures contract that would:

(1) For both contracts, delete all rules relating to the current book-entry physical delivery system and replace

them with rules setting up a cash settlement system based upon the results obtained in the Treasury auction held during the calendar month in which the futures contract expires. The final cash settlement value shall be equal to 100 minus the stop-out yield as reported by the U.S. Treasury or its agent. The stop-out yield is the highest accepted by the Treasury in allocating the offering among competitive bidders at the Treasury auction.

(2) Increase the size of the trading unit for the two-year U.S. Treasury note futures contract to $500,000 from $200,000. Increase the size of the trading unit for the five-year U.S. Treasury note futures contract to $250,000 from $100,000.

(3) For each contract, change the pricing basis to an index based on the annual yield in basis points with a minimum allowable price fluctuation of ½ of 1 basis point (.005 of 1 percent of yield). The index shall be 100.00 minus the yield in basis points. This would replace the current pricing system based on a percentage of par and the minimum allowable price fluctuation of ¼ of 1/32 *i.e.*, 1/128) of 1 percent of par.

(4) For each contract, change the last trading day of expiring futures contracts to correspond to the day of the Treasury auction for the relevant Treasury note. Currently, the eighth last business day of the expiring contract month is the last trading day.

(5) For each contract, modify the provision for the spot month speculative position limit to reflect the size of the Treasury auction. Currently, the spot month speculative limit is 2,500 contracts effective two business days before the first delivery day. This existing limit would remain in effect throughout the expiring contract month under the proposal. However, effective on the business day following the announcement of the Treasury auction, the spot month speculative limit would be equal to the lesser of 2,500 contracts or 10 percent of the public offering amount announced by the Department of the Treasury.

In support of the proposals, the Exchange stated that:

> The Treasury issues debt on a regular basis so that the market will have a predictable schedule which should minimize the cost of issuing debt and maximize the capacity of the market to absorb such debt. Thus the dealers know what to expect, the amount of financing the Treasury needs to do, the maturity spectrum and when the issues will come to market. This information reduces the uncertainty when the Treasury comes to [illegible].
>
> The Treasury auctions notes on a yield basis. Competitive bidders bid yields to two decimal points for specific amounts of the issue.
>
> The stop out yield is determined by the bids the Treasury receives and the amount it needs to borrow. The average yield of those receiving an allocation is used to determine the coupon of the new note. The Treasury sets the coupon to the nearest ⅛ of 1% necessary to make the average price 100 or less. Once the coupon is set, each bidder is charged a price such that the yield to maturity on the security is equal to the bid yield. * * *
>
> * * * [I]nformation [about the auction] is widely disseminated through wire and news services. The official auction results are reliable, acceptable, publicly available and timely.

The Exchange further noted that there are several reasons why these contracts will not be subject to manipulation. In particular, the Exchange stated that:

> There is a broad participation in the auction process and there are no restrictions on who can participate in the auction. Primary dealers, banks, insurance companies, pension funds and corporations, foreign central banks and institutions as well as individuals with small amounts of money participate in the auctions * * *.
>
> There are limits on the amount of securities that any one entity can purchase through an auction. Individuals who bid noncompetitively are limited to one million dollars. Competitive bidders cannot takedown more that 35% of the public offering * * *.
>
> Primary dealers are expected to participate meaningfully in the auctions * * *. A dealer is expected to submit bids in every auction. At a minimum, the bids should be a percentage of the total being sold that is comparable to the dealer's share of total customer transaction volume reported to the Federal Reserve. A dealer is not required to be awarded a particular amount of securities, but the minimum amount of bids a dealer is expected to submit should be in a realistic price range relative to current market conditions * * *.
>
> The Federal Reserve does monitor positions of the primary dealers. Primary dealers must show the Federal Reserve Bank of New York a breakdown of their trading by type * * *.
>
> The stop-out yield is determined at the margin since it is the last accepted yield. There are no guarantees that a submitted bid will be the last bid accepted. Knowledge of the distribution and sizes of the bids for the total auction is not sufficient to guarantee that a bid will be the last accepted bid. This cash settlement procedure is not based on an average, where an abnormally low yield bid for a small amount of the issue could affect the computed average.
>
> To effectively manipulate the settlement procedure, it is necessary to take down the whole auction amount to guarantee setting the stop-out yield and to benefit from the manipulation it is necessary to have a long futures position in excess of the offering amount. This long futures positions, must be some multiple of the cash position to make the risk reward ratio worthwhile * * *.

On behalf of the Commission, the Division is seeking comment on the proposed amendments. In particular, the Division is seeking comment on the suitability of the proposed cash settlement of the subject Treasury note futures contracts based on the results of the stop-out yield at the U.S. Treasury auction, and whether this settlement procedure would be susceptible to price distortion or price manipulation.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the amended terms and conditions of the Two-Year U.S. Treasury Note futures contract and the Five-Year U.S. Treasury Note futures contact can be obtained from the Office of Secretariat by mail at the above address, or by telephone at (202) 254–6314.

The materials submitted by the Exchange in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR 145 (1987)). Requests for copies of such materials should be made to FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the proposed amendments should send such material to Jean A Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC, on October 9, 1990.

Paul M. Architzel,

Acting Director.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

Action: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number:

Police Record Check; DD Form 369; OMB Control Number 0704–0007.

Type of Request: Reinstatement.

Average Burden Hours/Minutes per Response: .033 hours.

Responses per Respondent: 1.

Number of Respondents: 141,400.

Annual Burden Hours: 4,666.

Annual Responses: 141,400.

Needs and Uses: Per sections 504, 505, and 520(a), title 10, U.S.C., applicants for enlistment must be screened to identify any discreditable involvement with police or other legal officials. Form is sent to FBI as part of the entrance National Agency Check. Results are used to determine general enlistment eligibility and job skill placement.

Affected Public: State and/or local governments.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Office: Dr. J. Timothy Sprehe.

Written comments and recommendations on the proposed information collection should be sent to Dr. J. Timothy Sprehe at Office of Management and Budget, Desk Officer, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written request for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202–4302.

Dated: October 9, 1990.

L.M. Bynum,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

Department of the Army

Privacy Act of 1974; New Record Systems

AGENCY: Department of the Army, DOD.

ACTION: Addition of Record Systems.

SUMMARY: The Department of the Army proposes to add two record systems to its inventory of record systems subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a). The system notices for the new systems are set forth below.

DATES: The proposed actions will be effective without further notice on November 14, 1990, unless comments are received which result in a contrary determination.

ADDRESSES: Send comments to Ms. Alma Lopez, Office of Systems Management Branch (ASOP–MP) Ft. Huachuca, AZ 85613–5000.

SUPPLEMENTARY INFORMATION: The Department of the Army record system notices subject to the Privacy Act of 1974, as amended, have been published in the Federal Register as follows:

50 FR 22090, May 29, 1985 (DoD Compilation, changes follow)
51 FR 23576, Jun. 30, 1986

SYSTEM NAME:

Corps of Engineers Automated Legal System (CEALS) Training Information Program.

SYSTEM LOCATION:

Main data base is the Corps of Engineers Automated Legal System computer, Army Engineer Automation Support Activity, 2500 First Street NW, Washington, DC 20001–1022, with input and access locations at Corps of Engineers field operating offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Corps of Engineers legal services employees in the headquarters and field operating offices.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records relating to training courses completed by employees of the Corps of Engineers legal services offices. The system will provide a variety of data, training courses, conference or seminar subjects, training sources, costs and attendee's views and comments. Data stored within the system will include, but not be limited to, employee's name, office, office telephone number, and job series; training vendor's name, training location, training subject matter; course title and number; tuition cost; training dates; course evaluation and course referral.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 4101, et seq., Government Employees Training Act of 1958; and Executive Order 9397.

PURPOSE(S):

To provide an automated system that will allow the Corps of Engineers legal services office to identify worthwhile, relevant and cost effective training opportunities; to assist in budget preparation and execution; to plan training; and to assist in developing and tracking budgets.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Not applicable.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tapes/disks and printouts.

RETRIEVABILITY:

By individual's name, telephone number, office symbol, and job series; training vendor and location; training course title; subject area; tuition; referral and value.

SAFEGUARDS:

Access is restricted to authorized users in Corps of Engineers legal field operating offices. Computer records are maintained in a building protected by security guards. Printed records in field operating offices will be kept in locked offices.

RETENTION AND DISPOSAL:

Records will be retained for 5 years from the time they are entered into the data base, and then purged from the system.

SYSTEM MANAGER(S) AND ADDRESS:

Chief Counsel, U.S. Army Corps of Engineers, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this record system should address written inquiries to the Chief Counsel, U.S. Army Corps of Engineers, ATTN: CECC–C, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this record system should address written inquiries to the Chief Counsel, U.S. Army Corps of Engineers, ATTN: CECC–C, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

CONTESTING RECORD PROCEDURE:

The Army's rules for accessing records and for contesting contents and appealing initial agency determinations are contained in Department of the Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Corps of Engineers Legal Services employees who have completed training.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

A1110CE

SYSTEM NAME:

Recreational Use and Expenditure Survey on or Adjacent to Navigable Waters.

SYSTEM LOCATION:

Office of the Chief of Engineers, Headquarters, Department of the Army, 20 Massachusetts Avenue NW, Washington, DC 20314–1000 and the Engineer Division and District Offices. Official mailing addresses are published as an appendix to the Army's compilation of record system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Voluntary participants in recreational use and expenditure surveys on or adjacent to navigable waters.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual's name, address, telephone number, county, survey ID, recreation activities, quantities of and expenditures for durable goods such as boating, fishing, hunting, and camping equipment, and ancillary support facilities such as boat lifts; expenditures for nondurable goods such as food, lodging, fishing, boating, hunting services and other expenses.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

16 U.S.C. 460d, 33 U.S.C. 652 and 42 U.S.C. 1962.

PURPOSE(S):

To identify and evaluate recreation use and expenditures for impact assessment in environmental assessments, and environmental impact statements. Evaluations will be made for both existing and proposed projects.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING USERS AND PURPOSES OF SUCH USES:

Not applicable.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file cabinets and on magnetic tape or optical systems.

RETRIEVABILITY:

Records are retrieved by response number or by the participant's name.

SAFEGUARDS:

Records are maintained in areas accessible only to authorized persons having official need therefor. Records are housed in buildings protected by security guards or locked when not in use. Information in automated media is further protected by physical security devices: Access to or update of information in the system is protected through a system of passwords thereby preserving integrity of data.

RETENTION AND DISPOSAL:

Records are destroyed two years after termination of the study.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Chief of Engineers, Headquarters, Department of the Army, 20 Massachusetts Avenue NW., Washington, DC 20314–1000. Official mailing addresses are published as an appendix to the Army's compilation of record system notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Office of the Chief of Engineers, Headquarters, Department of the Army, 20 Massachusetts Avenue NW., Washington, DC 20314–1000.

Individual must provide full name, present address and telephone number, response number, specifics concerning the type of survey, if known, and the request must be signed.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this record system should write to the Office of the Chief of Engineers, Headquarters, Department of the Army, 20 Massachusetts Avenue NW., Washington, DC 20314–1000.

Individual must provide full name, present address and telephone number, response number, specifics concerning the type of survey, if known, and the request must be signed.

CONTESTING RECORD PROCEDURES:

The Army's rules for accessing records, and for contesting contents and appealing initial agency determinations are contained in Department of the Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information is obtained from the individual and Army records and/or reports.

EXEMPTION CLAIMED FOR THE SYSTEM:

None.

[FR Doc. 90-24187 Filed 10-12-90; 8:45 am]
BILLING CODE 3810-01-M

DELAWARE RIVER BASIN COMMISSION

Proposed Amendment of Project Review Filing Fee Schedule

AGENCY: Delaware River Basin Commission.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: Notice is hereby given that the Delaware River Basin Commission will hold a public hearing in accordance with this notice to receive comments on proposed amendments to its schedule of project review filing fees for review of water resources projects.

DATES: The public hearing will be held on December 12, 1990 at 1:30 p.m.

ADDRESSES: The hearing will be held in the Goddard Conference Room of the Commission's offices at 25 State Police Drive, West Trenton, New Jersey. Written comments should be submitted to Susan M. Weisman, Commission Secretary, Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628.

FOR FURTHER INFORMATION CONTACT: Susan M. Weisman, Commission Secretary, Delaware River Basin Commission, Telephone (609) 883–9500.

SUPPLEMENTARY INFORMATION: On June 28, 1972, the Commission adopted a regulation requiring that a filing fee be paid to the Commission at the time of filing applications pursuant to Section 3.8 of the Delaware River Basin Compact. Staff time and other costs incurred by the Commission in reviewing water resources projects proposed by other public agencies, private entities and individuals had become substantial and it was deemed timely and in the public interest to initiate a program of allocating a portion of the project review costs to the applicant or project sponsor. On April 23, 1975, the Commission amended the filing fee regulation by increasing the level of filing fees in recognition of the fact that revenues obtained from the filing fees since 1972 amounted to considerably less than the cost of administering the Commission's project review program. Although fee levels were increased, government agencies continued to be exempt from such filing fees.

At this time, the Commission is proposing amendments to its schedule of project review filing fees to make the project review program more self-sustaining. Proposed revision would: require filing fees for project review pursuant to Section 3.8 and Article 10 of the Delaware River Basin Compact; no longer exempt government agencies from such filing fees; and establish a new fee schedule, increasing the minimum fee to $1,000 for any project requiring Commission action. In addition, each substantial project modification following Commission action would require an additional filing fee.

The subject of the hearing will be as follows:

Amendment of Project Review Filing Fee Schedule

The proposed amendment would read as follows:

1. A filing fee shall be paid to the Commission, according to the schedule herein, at the time of filing each application for project review, pursuant to Section 3.8 and Article 10 of the Delaware River Basin Compact.

2. The project review filing fee is the greater of (a) or (b) as follows:

(a) minimum fee: $1,000 for any project that requires Commission action;

(b) alternative fee:

(1) 1/10 of 1% of project cost to $10,000,000;

(2) 1/20 of 1% of remaining cost above $10,000,000 but not to exceed a maximum fee of $50,000 as to any one project.

3. The project cost shall include the estimated costs of design, supervision of construction, legal services, contract administration, land, materials, equipment, construction and fabrication.

4. Revenues received pursuant to this regulation shall go into the Commission's general fund and be subject to specific appropriation by the Commission.

5. Each substantial project revision or modification following Commission action requires an additional filing fee.

6. These amendments become effective January 1, 1991.

Authority: Delaware River Basin Compact, 75 Stat. 688.

Dated: October 3, 1990.

Susan M. Weisman,

Secretary.

BILLING CODE 6360–01–M

DEPARTMENT OF EDUCATION

National Advisory Committee on Accreditation and Institutional Eligibility; Meeting

AGENCY: National Advisory Committee on Accreditation and Institutional Eligibility, Education.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the proposed agenda of a meeting of the National Advisory Committee on Accreditation and Institutional Eligibility. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of its opportunity to attend and to extend an invitation to interested third parties to present comments on petitions for recognition of accrediting and state approval bodies.

DATES AND TIMES: November 13, 14, and 15—8:30 a.m. until 5 p.m.

LOCATION: To be announced in a further notice.

FOR FURTHER INFORMATION CONTACT: Steven G. Pappas, Executive Director, National Advisory Committee on Accreditation and Institutional Eligibility, U.S. Department of Education, 400 Maryland Avenue, SW., room 3915, ROB–3, Washington, DC 20202–5151, (202) 708–8888.

SUPPLEMENTARY INFORMATION: The National Advisory Committee on Accreditation and Institutional Eligibility is established under section 1205 of the Higher Education Act as amended by Public Law 98–374 (20 U.S.C. 1145). The Committee advises the Secretary of Education regarding his responsibility to publish a list of nationally recognized accrediting agencies and associations, State agencies recognized for the approval of public postsecondary vocational education, and State agencies recognized for the approval of nurse education. The Committee also advises the Secretary of Education on policy matters concerning recognition of accrediting and State approval bodies and institutional eligibility for participation in Federally funded programs.

AGENDA: The meeting on November 13–15 is open to the public. The Advisory Committee will review petitions and interim reports of accrediting agencies and State approval bodies related to continued recognition by the Secretary of Education. The Committee also will hear presentations by representatives of these following petitions and interims reports are scheduled to be reviewed:

1. Petitions for Renewal of Recognition as Nationally Recognized Accrediting Agencies and Associations

Accrediting Bureau of Health Education Schools.

Accrediting Council for Continuing for Education and Training, Accrediting Commission.

American Association for Marriage and Family Therapy, Commission on Accreditation for Marriage and Therapy Education.

American Medical Association, CAHEA: in cooperation with—Accreditation Review Committee for Educational Programs in Surgical Technology.

American Council for Construction Education.

American Speech-Language-Hearing Association, Educational Standards Board.

Association of Independent Colleges and Schools, Accrediting Commission.

Computing Sciences Accreditation Board, Inc., Computer Sciences Accreditation Commission.

Liaison Committee on Medical Education of the Council on Medical Education of the American Medical Association and the Executive Council of the Association of American Medical Colleges.

Middle States Association of Colleges and Schools, Commission on Higher Education.

Middle States Association of Colleges and Schools, Commission on Secondary Schools.

National Association of Schools of Theatre.

New York State Board of Regents, Nursing Education Unit.

Note: The Department urges third parties interested in commenting on any of the agencies and associations scheduled for review to submit their comments in writing by November 1, to Mr. Pappas at the above address.

While the Committee is required to accept all written materials up through the date of its meeting, the Committee strongly urges that written comments be submitted by November 1, to facilitate the work of the Committee by providing for advance review and analysis of third party positions. All petitions, interim reports, and those third party comments received in advance of the meeting will be available for public inspection in room 3036, ROB-3, 7th & D Street SW., Washington, DC between the hours of 8 a.m. and 4:20 p.m., Monday through Friday.

Also, requests for oral presentations before the Advisory Committee should be submitted in writing to Mr. Pappas by November 1, 1990. Requests should include names of all persons seeking an appearance, the organization they represent, and the purpose for which the presentation is requested. Time constraints may limit oral presentations.

The acceptance of written and oral third party comments is limited to issues relevant to an accrediting or State agency's compliance with the Secretary's recognition regulations (Criteria for Recognition).

A record will be made of the proceedings of the meeting and will be available for public inspection at the Office of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 3036, ROB-3) Washington, DC between the hours of 8 a.m. and 4:30 p.m. Monday through Friday.

Authority: 5 U.S.C.A. Appendix 2.

Dated: October 9, 1990.

Leonard L. Haynes III,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

Subject Area Committees #1 and #2; Teleconference

AGENCY: National Assessment Governing Board, Education.

ACTION: Notice of meetings.

SUMMARY: This notice sets forth the schedule and proposed agenda of forthcoming teleconference meetings of the Subject Area Committee #1, and the Subject Area Committee #2 of the National Assessment Governing Board. Notice of these meetings are required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: October 17, 1990, Subject Area Committee #1. October 18, 1990, Subject Area Committee #2.

TIME: 11 a.m. (e.d.t.), both dates.

PLACE: National Assessment Governing Board, Suite 7322, 1100 L Street, NW., Washington, DC, 20005-4013, Telephone: (202) 357-6938.

SUPPLEMENTARY INFORMATION:

CONTACT: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Education Progress Improvement Act (NAEP Improvement Act), title III-C of the Augustus F. Hawkins—Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100-297), (20 USC 1221e-1).

The Board is established to advise the Commissioner of the National Center for Education Statistics on policies and actions needed to improve the form and use of the National Assessment of Educational Progress, and develop specifications for the design, methodology, analysis, and reporting of test results. The Board also is responsible for selecting subject areas to be assessed, identifying the objectives for each age and grade tested, and establishing standards and procedures for interstate and national comparisons. The Subject Area Committees of the National Assessment Governing Board will meet via teleconference on October 17, and October 18, 1990. Subject Area Committee #1 will meet on October 17, 1990 from 11 a.m. (e.d.t.) until the completion of business. Subject Area Committee #2 will meet on October 18, 1990 from 11 a.m. (e.d.t.) until the completion of business. Because these are teleconference meetings, facilities will be provided so the public will have access to the Committees' deliberations. The purpose of each meeting is to act on the Board's behalf to approve the final test items to be included in the 1991 field tests of the 1992 reading, writing, and mathematics assessments. Subject Area Committee #1 will review and approve the reading and writing items. Subject Area Committee #2 will review and approve the mathematics items. Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Suite 7322, 1100 L. Street, NW., Washington, DC., from 8:30 a.m. to 5 p.m.

Christopher T. Cross,

Assistant Secretary for Educational Research and Improvement.

[FR Doc. 90-24363 Filed 10-12-90; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Intent To Prepare an Environmental Impact Statement and Conduct a Public Scoping Meeting for the Proposed Hopkins CFB Repowering Project

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS), and to conduct a public scoping meeting to assess the environmental effects of the construction and operation of the proposed Circulating Fluidized Bed (CFB) Boiler at the Arvah B. Hopkins Station, Tallahassee, Florida.

SUMMARY: DOE announces its intent to prepare an EIS pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended, to evaluate the environmental impacts of the proposed construction and operation of a project proposed by the City of Tallahassee (CoT) in Florida. The proposed project involves repowering the Arvah B. Hopkins Generating Station Unit 2, a nominal 250-megawatt electric (MWe), natural gas-fired or oil-fired, boiler with a coal-fired atmosphere CFB boiler to provide steam to an existing turbine generator.

Preparation of the EIS will be in accordance with NEPA, the Council on Environmental Quality (CEQ) NEPA regulations (40 CFR 1500-1508), and the DOE NEPA guidelines (52 FR 47662, December 15, 1987). The purpose of this Notice is to invite public participation in the process that DOE will follow to comply with NEPA and to solicit public comments on the proposed scope and content of the EIS.

INVITATION TO COMMENT AND DATES: To ensure that the full range of issues related to this proposal are addressed, DOE invites comments on the proposed scope and content of the EIS from all interested parties. Written comments or suggestions to assist DOE in identifying significant environmental issues and the appropriate scope of the EIS will be considered in preparing the draft EIS and should be postmarked by November 14, 1990. Written comments postmarked after that date will be considered to the degree practicable.

DOE will also hold a public scoping meeting in which agencies, organizations, and the general public are invited to present oral comments or suggestions. The location, date, and time for the scoping meeting are provided in the section of this Notice entitled Scoping Meeting. Written and oral comments will be given equal weight and will be considered in determining the scope of the draft EIS. When the draft EIS is completed, its availability will be announced in the Federal Register, and public comments will again be solicited. Comments on the draft EIS will be considered in preparing the final EIS. Requests for copies of the draft and/or final EIS, or questions concerning the project, should be sent to Mr. Bruce J. Bevinger at the address noted below.

ADDRESS: Written comments or suggestions on the scope of the EIS, requests to speak at the scoping meeting, or questions concerning the project, should be directed to:

Bruce J. Bevinger, Environmental Specialist D06, U.S. Department of Energy, Morgantown Energy Technology Center (METC), P.O. Box 880, Morgantown, WV 26505, Telephone: (304) 291-4379. Envelopes should be labeled "Scoping for COT EIS."

FOR FURTHER INFORMATION CONTACT: For general information on the EIS Process, please contact:

Ms. Carol M. Borgstrom, Director, Office of NEPA Oversight (EH-25), U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, DC 20585, Tel. (202) 586-4600.

SUPPLEMENTARY INFORMATION:

Background and Need for the Proposed Action

Under terms of Public Law No. 99-190, Congress provided approximately $400 million to DOE to support the construction and operation of demonstration facilities selected for funding as part of DOE's CCT Demonstration Program. The CCT projects cover a broad spectrum of technologies having the following things in common: (1) all are intended to increase the use of coal in an environmentally acceptable manner and (2) all are ready to be proven at the demonstration level.

On February 17, 1988, DOE issued Program Opportunity Notice (PON) Number DE-PS01-88FE20986 for Round I of the CCT program, soliciting proposals to conduct cost-shared projects to demonstrate both "new" and "retrofit" applications of clean coal technologies, whether intended to displace oil and natural gas or to utilize coal more cleanly, efficiently, and/or economically than presently available (at the time of issuance of the PON) technology. In response to the solicitation, 51 proposals were received, including the City of Tallahassee's Hopkins CFB Repowering Project. Nine projects were selected by

DOE for negotiation in July 1990. In addition, a list of alternate candidates was established from which replacement selections could be made, should any of the original nine projects not proceed. On June 22, 1989, the aforementioned proposal by the CoT was selected for negotiation from the list of alternate candidates.

The CoT requested financial assistance from DOE to construct and operate the Hopkins CFB Repowering Project, which involves the repowering of the Unit 2 nominal 250-MWe natural gas-fired or oil-fired boiler with a coal-fired atmospheric CFB boiler to provide steam to an existing turbine generator. The boiler will be the largest of its type in the world. After construction and shakedown, Hopkins Unit 2 with its CFB boiler will be operated for a 24-month demonstration period, burning three or more different eastern coals. Final coal selection will be based on a fuels selection study to be completed early in the project. Cost, environmental, and technical data from the Hopkins CFB Project will be developed for use by the utility industry in evaluating this technology as a commercially viable power generation alternative.

Proposed Action

The DOE proposes to provide cost-shared funding to the City of Tallahassee for the construction and operation of the Hopkins CFB Repowering Project. The objective of the Hopkins CFB Repowering Project is to demonstrate the feasibility of using a CFB boiler for generating electricity from coal and to evaluate the technology with regard to performance that is efficient, economical, and environmentally acceptable. The work to be performed under the Cooperative Agreement between the CoT and DOE includes the design, construction, and operation of the demonstration project. The total cost of the project scope to be shared by the Government is estimated at $277 million, with DOE's share being approximately $75 million, or 27 percent of the total. Construction of the project is scheduled to begin in June 1992. Operation of the project during the 24-month demonstration period, scheduled to begin in November 1995, would provide the information and experience needed for future applications of the CFB technology at large scale commercial operations.

The existing 2-unit Hopkins power plant is located on a 230-acre site in Leon County, approximately 7.5 miles (12 km) west of the city of Tallahassee and approximately 1 mile north of the community of Norfleet. The plant consists of two oil/gas dual fuel steam boilers that each drives a steam turbine electric generator. There are also two combustion gas turbine electric generators that are used for peaking operations during high load periods. Combustion Gas Turbine 1 was installed in 1970 and can generate 16 MWe, and Combustion Gas Turbine 2 was installed in 1977 and has a 27-MWe capacity. The Hopkins plant also includes two evaporative cooling towers, fuel oil storage tanks, two exhaust stacks, an electrical switchyard, water supply wells, water treatment ponds, storage areas, and offices. Unit 1 has a 76-MWe capacity and was installed in 1971. Unit 2, which was installed in 1977 with a nominal 250-MWe capacity, will be repowered with a CFB boiler of the same nominal capacity.

The site is located atop a low east-west trending ridge in an area of low rolling terrain that once was shoreline sand dunes. The elevation differences in the area are small. Higher elevations tend to have sandy soil and are generally well drained, while lowland areas may be seasonally wet and/or subject to occasional flooding. The terrain supports various vegetation communities, depending on the elevation and soil type. Much of the surrounding area is forested with mature stands of deciduous and coniferous trees. The site property is bordered to the north and south by two small stream channels. The area around the site is primarily rural land, with some low-density residential development approximately 1 mile east and south of the plant. A main branch of the Seaboard Coast Line Railroad borders the site on the northeast.

The Hopkins CFB Repowering Project will occupy approximately 118 acres of the existing 230-acre site and will include the following additions to the existing power plant:

- A coal handling system to receive, store, crush, and convey coal.
- Limestone handling and sizing equipment.
- Repowering of the gas/oil-fueled steam generator with a CFB boiler.
- A baghouse to collect particulates.
- A stack to handle an increased volume of exhaust gas from burning coal.
- An ash storage and disposal system.
- A clay-lined coal pile and ash disposal runoff control system.
- Installation of new plant instrumentation and control system.

Alternatives

Under its authority pursuant to Pub. L. 99-190, DOE is presented with only two alternatives: (1) To cooperatively fund the proposed project; and (2) to decline to fund it (the "no action" alternative). In the latter case, the project would not contribute to the objective of the CCT program, which is to make available to the U.S. energy marketplace a number of advanced, more efficient, economically feasible, and environmentally acceptable, coal technologies. The facility probably would not be constructed and operated; therefore, potential environmental impacts resulting from the project would not occur.

DOE acknowledges the obligation to examine reasonable alternatives which are beyond its immediate authority to implement, but which could also meet the objectives of the CCT Program. DOE is requesting public comment on reasonable alternatives to the Hopkins CFB Repowering Project.

A Final Programmatic Environmental Impact Study (PEIS) for the CCT program was issued by DOE in November 1989 (DOE/EIS-0146). Two alternatives were evaluated in the PEIS: (1) The "no action" alternative, which assumed that the CCT program was not continued and that conventional coal-fired technologies with flue gas desulfurization and NO_x controls to meet New Source Performance Standards would continue to be used; and (2) the proposed action, which assumed that CCT projects were selected and funded, and that successfully demonstrated technologies would undergo widespread commercialization by the year 2010.

Identification of Environmental Issues

The following issues associated with the construction and operation of the Hopkins CFB Repowering Project will be considered in detail by DOE during its evaluation. This list is neither intended to be all inclusive, nor is it a predetermination of potential impacts. Additions to or deletions from this list may occur as a result of the scoping process.

(1) Air Quality: The effects of air emissions within the region surrounding the site.

(2) Water Resources and Water Quality: The qualitative and quantitative effects on water resources and other water users in the region.

(3) Socioeconomics: Potential bearing on communities that might be affected by the project.

(4) Land use: The potential consequences to land, utilities, transportation routes, and traffic patterns resulting from the project.

(5) Solid Waste: The environmental effects of generation, treatment, transport, storage, and disposal of solid wastes.

(8) Biological Resources: Potential disturbance or destruction of species, including the potential effects on threatened or endangered species of flora and fauna.

(7) Cultural Resources: Potential effects on historical, archaeological, scientific, or culturally important sites.

(8) Cumulative Impacts: NEPA requires that the EIS evaluate the potential cumulative effects of the various alternatives in relation to the past, present, and foreseeable future development (of any kind), both on-site and off-site. Cumulative impacts will be evaluated within the EIS for all important issues in the vicinity of the site.

Issues that are not considered significant will be discussed in less detail, or as appropriate to clarify and distinguish impacts among alternatives.

NEPA and the Scoping Process

DOE will comply with the NEPA process as outlined in the Council on Environmental Quality's Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (40 CFR 1500–1508) and DOE's Guidelines for Compliance with the National Environmental Policy Act (52 FR 47662, December 15, 1987).

Scoping, which is an integral part of the NEPA process, is a procedure that solicits public input to the EIS process to ensure that: (1) Issues are identified early and properly studied; (2) issues of little significance do not consume time and effort; (3) the draft EIS is thorough and balanced; and (4) delays occasioned by an inadequate draft EIS are avoided (40 CFR 1501.7). The scope of issues to be addressed in a Draft EIS will be determined from written comments submitted by mail, or comments presented orally or in writing at the public scoping meeting. The results of the scoping process will be incorporated into a document called an Implementation Plan, which provides guidance for the preparation of an EIS.

The above preliminary identification of reasonable alternatives and environmental topics is not meant to be exhaustive or final. There will be some reasonable alternatives and potential environmental topics that, although not specified above, will be evaluated as part of the NEPA analysis and will be discussed in the EIS. DOE identified the reasonable alternatives and potential environmental topics shown above based on its experience with similar subjects that have been raised for other comparable DOE projects. DOE considers the scoping process to be open and dynamic in the sense that alternatives other than those given above may warrant examination, and new matters may be identified for potential evaluation. Interested parties are invited to participate in the scoping process to both refine the preliminary alternatives and environmental topics to arrive at significant issues to be analyzed in depth, and to eliminate from detailed study those alternatives and environmental matters that are not significant or pertinent.

The scoping process will involve all interested agencies (Federal, State, County, and local) groups, and members of the public. Comments are invited on both the alternatives and the topics to be considered in the EIS. A public scoping meeting will be held at the location on the date and at the time indicated below. This scoping meeting will be informal, with a presiding officer designated by DOE who will establish procedures governing the conduct of the meeting.

Scoping Meeting

In addition to receiving written comments, DOE will conduct a public scoping meeting to assist DOE in determining the appropriate scope of the EIS and the significant environmental issues to be addressed. The meeting is scheduled as follows:

Date: Tuesday, October 30, 1990
Time: 7:00 P.M.
Place: City Hall Commissioners Chambers, 300 South Adams Street, Tallahassee, Florida

The meeting will not be conducted as an evidentiary hearing, and those who choose to make statements may not be cross-examined by other speakers. To ensure that everyone who wishes to speak has a chance to do so, five minutes will be allotted to each speaker. Depending on the number of persons requesting to be heard, DOE may allow longer times for representatives of organizations. Persons wishing to speak on behalf of an organization should identify that organization in their request to speak. Persons who have not submitted a request to speak in advance may register to speak at the scoping meeting. They will be called on to present their comments as time permits. Both oral and written comments will be considered and will be given equal weight by DOE.

A complete transcript of the public scoping meeting will be retained by DOE and made available for inspection during business hours, Monday through Friday, at the Department of Energy Freedom of Information Reading Room, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, and at the Department of Energy, Morgantown Energy Technology Center, P.O. Box 880, 3610 Collins Ferry Road, Morgantown, West Virginia 26505. Additional copies of the public scoping meeting transcript will also be made available during normal business hours at the following location:

City of Tallahassee, Electric Department, City Hall, 300 South Adams Street, Tallahassee, Florida.

In addition, copies of the public scoping meeting transcript will be made available for purchase. Those interested parties who do not wish to submit comments or suggestions at this time, but who would like to receive a copy of the Draft EIS when it is prepared, should notify Bruce J. Buvinger, Environmental Specialist, Morgantown Energy Technology Center, at the address given in the INVITATION TO COMMENT AND DATES section of this Notice.

Signed in Washington, DC, this 11th day of October 1990, for the United States Department of Energy.

Paul L. Elsner,

Assistant Secretary, Environment, Safety and Health.

BILLING CODE 6450-01-M

[Number DE-PS07-90ID13022]

Amendment No. 1 to Solicitation for Financial Assistance; Participation in the Department of Energy Electric and Hybrid Vehicle Site Operator Program

The U.S. Department of Energy (DOE), Idaho Operations Office, published a complete solicitation in the Federal Register (Vol. 55, No. 180, Page Numbers 38134 through 38137) on September 17, 1990, which requested applications on the basis of open competition, for cost sharing the test and evaluation of electric hybrid vehicles in support of its Electric and Hybrid Vehicle (EVH) Program. The purpose of Amendment No. 1 is to change the due dates contained therein (on Page No. 38137), as follows:

1. Applications are now due, 4 p.m., Mountain Daylight Time, November 16, 1990. Late applications will still be handled in accordance with 10 CFR 600.13.

2. Written questions regarding the solicitation are now due on October 19, 1990.

3. Selection is now expected to be made November 29, 1990.

4. Award(s) (earliest) is now expected to be made January 11, 1990.

BILLING CODE 6450-01-M

Voluntary Agreement and Plan of Action to Implement the International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(i)), the following meeting notice is provided:

A meeting of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on Monday, October 22, 1990, at the offices of the Organization for Economic Cooperation and Development (OECD), 2, rue Andre Pascal, Paris, France, beginning at 9:30 a.m. The purpose of this meeting is to permit attendance by representatives of U.S. company members of the IAB at a meeting of the IEA's Standing Group on Emergency Questions (SEQ), which is scheduled to be held at the aforesaid location on that date.

The agenda for the meeting is under the control of the SEQ. It is expected that the following draft agenda will be followed:

Agenda

1. Adoption of the agenda.
2. Summary Record of SEQ Meeting of September 24, 1990.
3. IAB Meeting of October 18, 1990.
4. The Emergency Response Potential of IEA/OECD Countries (Draft Report by the SEQ to the IEA Government Board Meeting of October 31, 1990).
5. Emergency Reserve and Net Import Situation of IEA Countries.

—Emergency Reserve and Net Import Situation of IEA Member countries on July 1, 1990.

6. Emergency Data Systems.

—Simplification of Questionnaire C.
—Questionnaire B Data Quality.
—Base Period Final Consumption 2Q89-1Q90; Base Period Final Consumption 3Q89-2Q90.
—Monthly Oil Statistics to June 1990; Monthly Oil Statistics to July 1990.

7. Quarterly Oil Forecast 4Q90/3Q90.
8. Any of other business.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, the meeting is open only to representatives of members of the IAB, their counsel, representatives of the Departments of Energy, Justice, State, the Federal Trade Commission, and the General Accounting Office, representatives of Committees of the Congress, representatives of the IEA, representatives of members of the SEQ, representatives of the Commission of the European Communities, and invitees of the IAB, or the IEA.

Issued in Washington, DC, October 9, 1990.

Stephen A. Wakefield,

General Counsel.

BILLING CODE 6450-01-M

Advisory Committee on Nuclear Facility Safety; Notice of Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Advisory Committee on Nuclear Facility Safety.

Date and Time: Tuesday, October 30, 1990, 8 a.m. to 6 p.m. Wednesday, October 31, 1990, 8 a.m. to 1 p.m.

Place: U.S. Department of Energy, Forrestal Building, room 1E-257, 1000 Independence Ave., SW., Washington, DC 20585.

Contact: Wallace R. Kornack, Executive Director, ACNFS, AC-21, 1000 Independence Ave., SW., Washington, DC 20585, 202/586-1770.

Purpose of the Committee: The Committee was established to provide the Secretary of Energy with advice and recommendations concerning the safety of the Department's production and utilization facilities, as defined in section 11 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2014).

Tentative Agenda

October 30, 1990

8 a.m.: Chairman John F. Ahearne Opens Meeting; Review of selected technical issues.
Noon: Lunch.
1 p.m.: Review of facility safety issues.
5:30 p.m.: Public comments.
6 p.m.: Meeting adjourned until next day.

October 31, 1990

8 a.m.: Review of selected technical issues; Committee Business; Subcommittee Reports.
1 p.m.: Meeting ends.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Wallace Kornack at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: The transcript of the meeting will be available for public review and copying at the Freedom of Information Public Reading room, 1E-190, Forrestal Building, 1000 Independence Ave., SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on October 10, 1990.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

[FR Doc. 90-24244 Filed 10-12-90; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. EL90-6-000, et al.]

Illinois Power Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

October 4, 1990.

Take notice that the following filings have been made with the Commission:

1. Illinois Power Co.

[Docket No. EL90-6-000]

Take notice that on October 1, 1990, Illinois Power Company tendered for filing its revised refund report in the above referenced docket.

Comment date: October 18, 1990, in accordance with Standard Paragraph E at the end of this notice.

2. Gulf States Utilities Co.

[Docket No. ER90-578-000]

Take notice that Gulf States Utilities Company (Gulf States) on September 26, 1990, tendered for filing a description of an oral agreement between Gulf States and Alabama Electric Cooperative, Inc. (AEC) for the short-term sale of up to 200 MW of replacement energy at a rate of 21.54 mills/kwh beginning September 8, 1990. On September 26, 1990, Gulf States supplemented this filing by tendering for filing a copy of a letter agreement between Gulf States and AEC memorializing the term of the oral agreement.

Gulf States states that it and AEC are currently negotiating an Interchange Agreement which, among other things, would provide for the sale and purchase of replacement energy. However, the negotiation of the Interchange Agreement will not be completed in time to allow for the short-term transaction beginning September 8, 1990.

Pursuant to § 35.11 of the Commission's regulations, Gulf States requests an effective date for the letter agreement of September 8, 1990, the date on which the short-term sale began. Gulf States requests a waiver of the notice requirements of the Federal Power Act

and the Commission's regulations to allow this effective date.

Copies of the filing were served on Alabama Electric Cooperative, Inc.

Comment date: October 18, 1990, in accordance with Standard Paragraph E at the end of this notice.

3. Multitrade Limited Partnership

[Docket No. ER90-485-000]

Take notice that on September 24, 1990, Multitrade Limited Partnership tendered for filing its response to Staff's request for additional information in the above referenced docket.

Comment date: October 18, 1990, in accordance with Standard Paragraph E at the end of this notice.

4. Northeast Utilities Service Co.

[Docket No. ER90-558-000]

Take notice that on September 26, 1990, Northeast Utilities Company (NUSCO) tendered for filing supplemental information regarding a proposed rate schedule, a System Energy Sales—Exchange Agreement between NUSCO and Green Mountain Power Corporation.

NUSCO states that the amendment was filed in response to a request from the Commission for additional information regarding maximum capacity charge rate.

NUSCO states that copies of this information have been mailed or delivered to each of the parties.

NUSCO requests that the Commission waive its standard notice periods and filing regulations to the extent necessary to permit the rate schedule to become effective February 1, 1988.

Comment date: October 18, 1990, in accordance with Standard Paragraph E at the end of this notice.

5. Cajun Electric Power Cooperative, Inc. v. Louisiana Power & Light Co.; Louisiana Energy and Power Authority v. Louisiana Power & Light Co.

[Docket Nos. EL90-12-001, EL90-15-001]

Take notice that on September 5, 1990, Louisiana Power & Light Company filed pursuant to the Federal Energy Regulatory Commission's May 3, 1990 order in these consolidated proceedings a plan for distribution to wholesale customers of appropriate proportional amounts of judgment proceeds which it had received from United Gas Pipe Line Company.

Comment date: October 18, 1990, in accordance with Standard Paragraph E at the end of this notice.

6. Gulf States Utilities Co.

[Docket No. ER90-583-000]

Take notice that Gulf States Utilities Company on September 25, 1990, tendered for filing (1) an Agreement For Wholesale Electric Service bwtween Gulf States Utilities Company (Gulf States) and Tex-La Electric Cooperative of Texas, Inc. (Tex-La) (Agreement), (2) Exhibit A to the Agreement, (3) Rate Schedule WPS—Wholesale Power Service, (4) Rider A to the Agreement, and (5) Service Schedule EP Emergency Power.

Gulf States states that Tex-La will become a new wholesale customers of Gulf States. The rates for the wholesale service to be provided to Tex-La as set forth in Rate Schedule WPS are the same as Gulf States' rates for wholesale service to other customers.

Gulf States requests an effective date for the Agreement and rate and service schedule so that service may begin on December 3, 1990.

Copies of the filing were served on Tex-La and each wholesale customer of Gulf States which purchases service under Rate Schedule WPS or a comparable rate schedule.

Comment date: October 18, 1990, in accordance with Standard Paragraph E at the end of the notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission are are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24186 Filed 10-12-90; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP91-3-000, et al.]

Florida Gas Transmission Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

[Docket Nos. CP91-3-000, CP91-4-000, CP91-5-000]

October 4, 1990.

Take notice that on October 1, 1990, Florida Gas Transmission Company (FGT), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in the above-referenced dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under its blanket certificate issued in Docket No. CP89-555-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[1]

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related ST docket numbers of the 120-day transactions under Section 284.223 of the Commission's Regulations, has been provided by FGT and is summarized in the attached appendix.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at the end of this notice.

[1] These prior notice requests are not consolidated.

2. Southern Natural Gas Company

[Docket No. CP90-2310-000]

October 5, 1990.

Take notice that on September 28, 1990, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP90-2310-000 an application pursuant to section 7(b) of the Natural Gas Act for an order granting permission and approval to abandon a field compressor and all appurtenances thereto, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern states that it requests authority to abandon its 600 horsepower No. 2 field compressor located at Southern's Corinne Compressor Station, Monroe County, Mississippi. Southern further states that the compressor it seeks to abandon was rented and installed, in November 1979, by Black Warrior Pipeline Company (BWP), a Mississippi intrastate pipeline owned by Southern, to effectuate the transportation of natural gas from the Corinne field to a local distribution company. Subsequently, Southern indicates that it acquired the rights to purchase such natural gas, liquidated BWP and acquired all of BWP's gathering and transmission facilities, including assignment of the commercial lease under which the subject compressor was rented and operated. The Commission approved Southern's acquisition and operation of BWP's facilities by order issued in Docket No. CP82-102-000 on February 22, 1982, 18 FERC ¶ 62,293 (1982), it is stated.

Southern states that on December 1, 1982, it purchased the rental compressor from the vendor under the authority of its blanket certificate of public convenience and necessity issued in Docket No. CP82-406-000, as reported in its annual blanket report. Southern further states that the compressor was installed and operated to receive natural gas supplies purchased by Southern from various wells in the Corinne Field, Monroe County, Mississippi and is no longer needed as a result of steadily decreasing deliverability in the Corrine Field. Furthermore, Southern indicates that it does not anticipate its need in the foreseeable future. Southern further indicates that in order to save maintenance expenses and to simplify the operation of the Corinne Compressor Station, it proposes to remove the compressor and sell it at book value to Sonat Intrastate-Alabama Inc. for use in its intrastate pipeline system in Alabama. The book value, calculated as of December 31, 1990, is approximately $115,610. It is stated that the proposed abandonment would not affect the capacity of Southern's pipeline system or require termination of any service to Southern's customers.

Comment date: October 26, 1990, in accordance with Standard Paragraph F at the end of this notice.

3. El Paso Natural Gas Company

[Docket No. CP91-8-000]

October 5, 1990.

Take notice that on October 1, 1990, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas 79978, filed a request with the Commission pursuant to Section 157.205 the Commission's Regulations under the Natural Gas Act (NGA), to provide an interruptible transportation service for Mar Oil and Gas Corporation (Mar Oil), under its blanket certificate issued in Docket No. CP88-433-000, all as more fully set forth in the request which is open for public inspection.

El Paso proposes an interruptible natural gas transportation service, under its FERC Rate Schedule T-1, of 1,030 MMBtu on peak days, 258 MMBtu on average days, and 94,170 MMBtu annually for Mar Oil. El Paso would transport the gas for Mar Oil's account from various receipt points on its system to two Jal, Lea County, New Mexico, delivery points. El Paso further states it commenced transporting natural gas for Mar Oil's account under Section 284.223(a) of the Regulations on August 24, 1990, as reported in Docket No. ST90-4727.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at the end of this notice.

4. Florida Gas Transmission Company, U-T Offshore System, United Gas Pipeline Company

[Docket Nos. CP90-2336-000, CP90-2337-000, CP90-2338-000, CP90-2339-000, CP90-2340-000, and CP90-2341-000]

October 5, 1990.

Take notice that Applicants filed in the respective dockets prior notice requests pursuant to Sections 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under their blanket certificates pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[2]

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related docket numbers of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by Applicant and is summarized in the attached appendix.

Applicants state that each of the proposed services would be provided under an executed transportation agreement, and that Applicant would charge the rates and abive by the terms and conditions of the referenced transportation rate schedules.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at the end of this notice.

5. U-T Offshore System

[Docket Nos. CP90-2342-000, CP91-18-000, CP91-19-000]

October 5, 1990.

Take notice that on September 28, 1990, U-T Offshore System (UTOS), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP90-2342-000 and that on October 2, 1990, UTOS filed in Docket Nos. CP91-18-000 and CP91-19-000 requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on an interruptible basis pursuant to UTOS's Rate Schedule IT on behalf of various shippers under UTOS's blanket certificate issued by the Commission's Order No. 509, pursuant to section 7 of the Natural Gas Act, corresponding to the rates, terms and conditions filed in Docket No. RP89-99-000, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection.[5]

Information applicable to each transaction, including the identity of the shipper, the peak day, average day and annual volumes, and the initiation service dates and related docket numbers of the 120-day transactions under § 284.223 of the Commission's Regulations, has been provided by UTOS and is summarized in the attached appendix. It is explained that the gas would be received by UTOS at existing points located in West Cameron Blocks 116 and 167, offshore Louisiana and would be redelivered for the various accounts at existing interconnections at the Johnson's Bayou Plant in Cameron Parish, Louisiana.

6. Natural Gas Pipeline Company of America, ANR Pipeline Company, ANR Pipeline Company, ANR Pipeline Company, Colorado Interstate Gas Company, Colorado Interstate Gas Company

[Docket Nos. CP90-2300-000,[4] CP90-2301-000, CP90-2302-000, CP90-2303-000, CP90-2304-000, CP90-2305-000, CP90-2333-000.

October 5, 1990.

Take notice that on September 26, 1990, and September 28, 1990, the Applicants filed in the above referenced dockets, prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under their respective blanket certificate's issued pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the prior notice requests which are on file with the Commission and open to public inspection and in the attached appendix.

Information applicable to each transaction including the Applicant's address, the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day, and annual volumes, and the docket numbers and initiation dates of the 120-day transactions under § 284.223 of the Commission's Regulations has been provided by the Applicants and is included in the attached appendix.

The Applicants allege that they would provide the proposed service for each shipper under an executed transportation agreement and would charge rates and abide by the terms and conditions of the referenced transportation rate schedules.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at the end of this notice.

7. Pontchartrain Natural Gas System

[Docket No. CP90-2281-000]

October 5, 1990.

Take notice that on September 24, 1990, Pontchartrain Natural Gas System (Pontchartrain), 1600 Smith, Suite 4775, Houston, Texas 77002, filed in Docket No. CP90-2281-000 an (NGA) application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing: 1) the continued exchange of up to 100,000 Mcf of natural gas per day between ANR Pipeline Company (ANR) and Pontchartrain, as successor to Bayou Interstate Pipeline System (Bayou), originally authorized in Docket No. CP64-68-001; and 2) Pontchartrain to be subject to the jurisdiction of the Federal Energy Regulatory Commission (Commission) pursuant to the NGA only with respect to the exchange transaction for which certificate authority is requested in this proceeding, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Pontchartrain states that it is a Hinshaw pipeline and that its facilities and operations are located wholly within the State of Louisiana. While this proposal would potentially allow 36,500,000 Mcf per year to be exchanged between Pontchartrain and ANR, Pontchartrain asserts that only 1,020,761

Mcf (1.1 percent of Pontchartrain's total throughput in 1989) was exchanged between Bayou and ANR during 1989. Accordingly, Pontchartrain requests that it be subject to the jurisdiction of the Commission under the Natural Gas Act only with respect to this proposal.

Pontchartrain states that Bayou, an affiliated company, proposes to abandon its exchange service with the ANR by assignment to Pontchartrain (Docket No. CP90-2282-000). Pontchartrain explains that Bayou currently sells its exchange volumes to Pontchartrain; however, if Bayou's requested abandonment is granted, Bayou would assign the purchase contracts for its total gas supply to Pontchartrain. Finally, because Bayou also proposes to abandon the requisite facilities for the exchange by selling to Acadian Gas Pipeline System (Acadian), an affiliated intrastate pipeline providing transportation pursuant to section 311 of the Natural Gas Act and subpart C of part 284 of the Commission's Regulations, Pontchartrain states that it would have to secure transportation services from Acadian to accomplish the continued delivery of the exchange volumes to itself.

Comment date: October 26, 1990, in accordance with Standard Paragraph F at the end of the notice.

8. United Gas Pipe Line Company

[Docket No. CP91-14-000]

October 5, 1990.

Take notice that on October 2, 1990, United Gas Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP91-14-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport gas on an interruptible basis for Coast Energy Group (Coast), a marketer, under United's blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United states that pursuant to a transportation service agreement dated October 24, 1989, it proposes to transport up to 30,000 Mcf per day for Coast. United states that it would receive the gas at specified points located in Louisiana and redeliver the gas at other specified points located in Louisiana. United estimates that the maximum day and average day volumes would be 30,900 million Btu and that the annual volumes would be 11,278,500 million Btu. It is stated that on September 1, 1990, United initiated a 120-day transportation service for Coast under § 284.223(a), as reported in Docket No. ST90-6750-000.

United further states that no facilities need be constructed to implement the service. United indicates that the service would continue on a month-to-month basis until terminated. United proposes to charge rates and abide by the terms and conditions of its Rate Schedule ITS.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at this end of this notice.

9. Bayou Interstate Pipeline System

[Docket No. CP90-2283-000]

October 5, 1990.

Take notice that on September 24, 1990, Bayou Interstate Pipeline System (Bayou), 1600 Smith, Suite 4775, Houston, Texas 77002, filed in Docket No. CP90-2282-000 an application pursuant to section 7(b) of the Natural Gas Act (NGA) for authority to abandon the certificated facilities, authorizations and services granted in Docket No. CP84-66-001, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Bayou states that with the grant of this abandonment, it would wind up all of its activities and cease to be a "natural gas company" as defined in the NGA. Bayou requested that the effective date of such abandonment authorization be issued as expeditiously as possible in order to allow for Bayou's cessation of all its services by the end of calendar year 1990.

Bayou proposes to accomplish its abandonment, in part, by selling its facilities to Acadian Gas Pipeline System, an affiliated intrastate pipeline, and to Pelican Interstate Gas System, an affiliated interstate pipeline and by assigning its exchange service with ANR Pipeline Company to Pontchartrain Natural Gas System, an affiliated Hinshaw pipeline. Bayou states that other services and authorizations would be terminated, without assignment, on the date of the authorization requested herein. Lastly, Bayou asserts that the proposed abandonment would have no adverse impact on its customers.

Comment date: October 26, 1990, in accordance with Standard Paragraph F at the end of this notice.

10. Georgia-Pacific Corporation

[Docket No. CP90-2288-000]

October 5, 1990.

Take notice that on September 25, 1990, Georgia-Pacific Corporation (G-P), P.O. Box 105605, Atlanta Georgia 30348, filed in Docket No. CP90-2288-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities which have previously been certificated for the transportation of natural gas for G-P's own use in interstate commerce, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

G-P states that its certificated system is comprised of: (i) Approximately 2.5 miles of 24-inch pipeline extending from gathering facilities in the Monroe Field, Louisiana to compression facilities that are utilized to boost the pressure of gas purchases in the area to a level necessary to accommodate further transmission to G-P's pulp and paper plant at Crossett, Arkansas; (ii) three 350 horsepower (HP) compressors and one 750 HP compressor; (iii) approximately 2.8 miles of 12¾ inch pipeline from the outlet of the compression facilities extending generally northward; and (iv) 19.5 miles of 8⅝ inch pipeline extending from the 12-inch pipeline to G-P's plant. G-P states that these facilities are interconnected and have historically been utilized to provide natural gas to G-P's plant from G-P's own reserves as well as gas supplies purchased from producers in the Monroe Field.

G-P requests that it be authorized: (i) To abandon in place the approximately 2.8 miles of 12¾ inch pipeline; and (ii) to abandon by sale its 24-inch pipeline and the three 350 HP and one 750 HP compressors.

G-P further states that its pipeline facilities were constructed exclusively to bring gas for consumption at its plant to offset curtailments from its historical supplier, Mississippi River Transmission Corporation (MRT) in the early 1970's. G-P states that it has never utilized any of these facilities for the purchase and resale of natural gas or for the transportation of natural gas for others. Except for the fact that a state border was crossed in bringing these gas supplies to G-P's plant, G-P submits that no certificate authority would ever have been required.

G-P states that its solution to the MRT curtailments was to construct the 19.5 mile 8⅝ inch pipeline to bring its own production to its plant, 46 FPC 1209 (1971). In 1972, G-P concluded that the natural gas supply attached by its 8⅝ inch line was inadequte to provide the curtailment protection necessary to operate its plant. G-P states that it therefore developed additional reserves of its own in the Monroe Field as will as purchasing natural gas from an

unaffiliated producer in the same field. In order to attach the additional reserves, G–P states that it filed an application in Docket No. CP72–274 to extend the existing 8⅝ inch line by the construction of approximately 2.6 miles of 12-inch pipeline. G–P states that it also planned to construct and operate a 24-inch gathering line and compressor facilities to attach the available natural gas supplies and boost the pressure of the natural gas to allow entry into the proposed 12-inch line.

G–P submits that it did not originally seek certificated authority to construct and operate the 24-inch line and the compressor believing that such facilities were non-jurisdictional gathering facilities. However, during the course of the certificate proceeding involving the construction of the 12-inch line, G–P states that it agreed to amend its application to include these facilities.

G–P states that the certificate in Docket No. CP72–274, was granted, Opinion No. 669, 51 FPC 627 (1974), however, as a consequence of the natural gas supply shortage at the time, the Commission imposed certain volumetric limitations on G–P's use of its own supply line and also imposed certain restrictions on the end use to which G–P could put the gas at its plant.

In 1987, G–P states that it requested that the Commission remove the volumetric and end use restrictions imposed in Opinion No. 669 suggesting that the such controls were no longer required and were totally contrary to the competitive economic environment that the Commission was trying to create for natural gas nationwide. According to G–P, the Commission agreed and removed the restrictions, 41 FERC ¶61,248 (1987).

As a result of the elimination of the restrictions, G–P states that it diversified its natural gas supply. As a result of the diversification, G–P states that it no longer requires the continued use of all of its certificated facilities. G–P states that it now has an interconnection with Texas Gas Transmission Corporation (Texas Gas) on G–P's 8⅝ inch line, which has allowed G–P to contract for gas supplies from a number of sources and have the gas transported by Texas Gas. G–P states that it also has executed an interruptible transportation agreement with MRT and has reached agreement with an intrastate pipeline company in Louisiana to interconnect with G–P's facilities.

G–P states that it no longer requires, nor can it effectively utilize, these certificated facilities it owns south of the interconnections with Texas Gas and the intrastate pipeline. Those facilities consist of the 2.6 miles of 12-inch pipeline, the 24-inch pipeline and the compressor units between the two pipelines. G–P states that these portions of its facilities were only useful so long as the exclusive source of gas available to it was the low pressure gas from the Monroe Field. G–P states that it no longer produces its own gas nor contracts for the purchase of gas from that area. G–P further states that the gas supplies now transported by Texas Gas and the intrastate pipeline is high pressure gas which would prevent any of the Monroe Field gas to enter its system. Since it has never utilized these facilities to transport or sell gas to any other party, G–P states the abandonment will not adversely effect any other party.

While it can no longer utilize these facilities, G–P states that certain of them, namely the 24-inch line and the compressors, can be effectively utilized by producers in the Monroe Field to gather and compress natural gas for intrastate use. Once abandonment is granted, G–P proposes to abandon in place and put out of service the 2.6 miles of 12-inch pipeline. G–P states, however, that it has reached agreement with an independent producer operating in the Monroe Field, Mr. Jimmy Berry, to sell to him the 24-inch line and the compressors, as well as various small diameter gathering lines connected to the 24-inch line. G–P avers that the sale to Mr. Berry will afford him the opportunity to move his production, and that of other producers in the field, through these facilities to intrastate markets, without having to construct new facilities.

G–P states that at the west end of the 24-inch line is a gathering system owned and operated by Wintershall Pipeline Corporation which feeds into Wintershall's intrastate pipeline system in northern Louisiana. At the east end of the 24-inch line and compressors, G–P states there lies the intrastate pipeline facilities of Gulf States Pipeline Corporation. Thus, with very little operational adjustments, G–P states that the 24-inch line and compressor facilities can be put to efficient use by small producers in the area, allowing them to extract the maximum recoverable reserves from their wells in the Monroe Field.

According to G–P, these uses would clearly be intrastate in nature. Once abandoned, G–P avers that these facilities would not be used in interstate commerce since the 24-inch line and the compressors would no longer be connected with any certificated facilities, would not be used for sale or transportation in interstate commerce, and would be located entirely in the state of Louisiana. G–P submits that once the facilities are abandoned and sold to Mr. Berry, the 24-inch line and the compression facilities will no longer be jurisdictional under the Natural Gas Act, and G–P request that the Commission confirm this conclusion in an order granting abandonment in this proceeding.

Comment date: October 26, 1990, in accordance with Standard Paragraph F at the end of the notice.

11. Transwestern Pipeline Company, Transwestern Pipeline Company, Transwestern Pipeline Company, Arkla Energy Resources, a division of Arkla, Inc.

[Docket Nos. CP91–30–000, CP91–31–000, CP91–32–000, and CP91–40–000]

October 5, 1990.

Take notice that on October 1, 1990, Transwestern Pipeline Company, 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251–1188, and Arkla Energy Resources, a division of Arkla, Inc., 525 Milam Street, Shreveport, Louisiana 71151, (Applicants), filed in the above-referenced dockets prior notice requests pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas on behalf of various shippers under the blanket certificates issued in Docket No. CP86–133–000 and Docket No. CP88–820–000, respectively, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the requests that are on file with the Commission and open to public inspection.[5]

Information applicable to each transaction, including the identity of the shipper, the type of transportation service, the appropriate transportation rate schedule, the peak day, average day and annual volumes, and the initiation service dates and related ST docket numbers of the 120-day transactions under section 284.223 of the Commission's Regulations, has been provided by Applicants and is summarized in the attached appendix.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at the end of this notice.

[5] These prior notice requests are not consolidated.

Docket No. (date filed)	Shipper name (type)	Peak day average day annual MMBtu	Receipt points [1]	Delivery points	Contract date rate schedule service type	Related docket, start up date
CP91-30-000 (10-3-90)	Mesa Operating Limited Partnership (producer).	10,000 7,500 3,650,000	AZ, NM, OK, TX	AZ, NM, OK, TX	9-25-90, ITS-1, Interruptible.	ST90-4969-000, 9-25-90.

12. Transwestern Pipeline Company

[Docket No. CP91-29-000]

October 5, 1990.

Take notice that on October 5, 1990,[6] Transwestern Pipeline Company (Transwestern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP91-29-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Hadson Gas Systems, Inc. (Hadson), a marketer, under the blanket certificate issued in Docket No. CP88-133-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Transwestern states that pursuant to an agreement dated September 15, 1989, under its Rate Schedule ITS-1, it proposed to transport up to 100,000 MMBtu per day equivalent of natural gas for Hadson. Transwestern indicates that the gas would be transported from receipt points located in Arizona, New Mexico, Oklahoma, and Texas, and would be redelivered at delivery points located in New Mexico, Oklahoma, and Texas.

Transwestern advises that service under § 284.223(a) commenced May 5, 1990, as reported in Docket No. ST90-5345-000. Transwestern indicates that it would transport 75,000 MMBtu on an average day and 36,500 MMBtu annually.

Comment date: November 19, 1990, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commisison, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CR 157.20) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24189 Filed 10-12-90; 8:45 am]

BILLING CODE 6717-01-M

[6] Although the filing was received on October 3, 1990, the filing date corresponds with the date the filing fee was received, pursuant to Section 381.103(b)(2)(iii) of the Commission's Rules.

[Docket Nos. RP91-3-000, RP90-152-002, TM91-1-22-001, and TA90-1-22-004]

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

October 5, 1990.

Take notice that on October 3, 1990, CNG Transmission Corporation (CNG) pursuant to section 4 of the Natural Gas Act, and part 154 of the Commission's Regulations (18 CFR part 154) files six (6) copies of the following revised tariff sheets to First Revised Volume No. 1 of its FERC Gas Tariff:

Alternate Second Revised First Revised Sheet No. 31
Second Substitute First Revised Sheet No. 31
First Revised Original Sheet No. 31
First Revised Original Sheet No. 32
First Revised First Revised Sheet No. 31
Second Revised Original Sheet No. 32

The filing is a limited general rate increase application made for the purposes of changing CNG's base tariff rates: (1) To include the costs of converting a portion of CNG's firm sales agreement with Texas Eastern Transmission Corporation ("Texas Eastern") and Texas Gas Transmission

Corporation ("Texas Gas") to firm transportation; and, (2) to repaginate certain tariff sheets as described in detail in the filing. The effective date of the tariff sheets is November 1, 1990, the same date that the conversion of the Texas Eastern and Texas Gas agreements will become effective. It is proposed that the limited rate increase remain in effect until January 10, 1991, at which time the base rates in CNG's Docket No. RP89-143 will become effective.

CNG has also filed repaginated tariff sheets to conform to the Commission's new pagination convention adopted as part of its electronic filing requirements.

CNG states that copies of the filing were served upon affected customers and interested State commissions.

Any person desiring to be heard or to protest such filing should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 and 385.211. All motions or protests should be filed on or before October 25, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. GT91-1-000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

October 5, 1990.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on October 1, 1990 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the tariff sheets listed in appendix A of the filing.

Texas Eastern states that the purpose of this filing is to update Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1 to reflect new levels of service for Algonquin Gas Transmission Company, CNG Transmission Corporation, and National Fuel Gas Supply Corporation as provided in their CD-1, CD-2, and FT-1 Service Agreements and to reflect the execution of a new Service Agreement between Texas Gas Transmission Corporation and Texas Eastern under Rate Schedule FT-1.

The proposed effective date of the tariff sheets listed in Appendix A of the filing is November 1, 1990.

Texas Eastern states that copies of the filing were served on Texas Eastern's jurisdictional customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 16, 1990. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Office of Fossil Energy

[FE Docket No. 90-67-NG]

ENSA Corporation; Application To Export Natural Gas to Mexico

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application to export natural gas to Mexico.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on October 1, 1990, of an application filed by Ensa Corporation (ENSA) for authorization to export up to 500 MMcf per day of natural gas to Mexico up to an aggregate of 912 Bcf over a five-year period beginning with the date of first export. ENSA proposes to export the natural gas through a new pipeline facility at the international border in Zapata County, Texas, and to sell the gas exported to Petroleos Mexicanos ("PEMEX"), the Mexican national oil and gas corporation, for resale to PEMEX' industrial customers in the region of Monterey, Mexico. As payment, ENSA will receive from PEMEX volumes of residual fuel oil, which the exported gas will displace in Mexican industrial applications.

The application is filed pursuant to section 3 of the Natural Gas Act (NGA) and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene, notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 14, 1990.

ADDRESSES: Office of Fuels Programs, Office of Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Linda Silverman, Office of Fuels Programs, Office of Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-094, 1000

Independence Avenue, SW., Washington, DC 20585, (202) 586–7249.
Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, room 6E–042, GC–32, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: ENSA is a Texas corporation with its principal place of business in Dallas, Texas. The company, which will build and operate the new pipeline facility, the Laredo Pipeline, is applying to the Federal Energy Regulatory Commission (FERC) for authorization to construct the proposed new pipeline, which will consist of approximately 250 feet of thirty-six inch diameter pipeline, which then will interconnect with a new PEMEX pipeline to be constructed in Mexico.

The gas to be exported will originate in the South Texas area. Under the export proposal, ENSA will exchange the natural gas with PEMEX in return for residual fuel oil, which ENSA maintains is in high demand in U.S. markets. In support of its application, ENSA asserts that this exchange transaction will not reduce the net energy available to the United States because the exports of gas will be offset by the imports of residual oil. Also, the company holds that this exchange will improve the overall security of energy supply by reducing U.S. dependence on Persian Gulf oil. In addition, the company states that the gas to be exported is incremental to current market needs, and that its export will benefit domestic producers, who have suffered from the ongoing natural gas oversupply and depressed prices.

Discussions toward finalization of an export sales/exchange agreement between ENSA and PEMEX are currently proceeding. The export sales/exchange agreement with PEMEX will be filed with DOE when it is finalized. ENSA foresees entering into a long-term contract with PEMEX at an exchange value to be determined, but less than the BTU equivalent price of residual fuel oil. In exchange, ENSA will receive volumes of residual fuel oil in kind for import into the United States. ENSA contends that the intended agreement will provide for market-sensitive and competitive pricing for the natural gas to be exported, because those prices will be intrinsically related to the price on the international market of residual fuel oil, a competing energy source to natural gas. The precise exchange relationship of exported natural gas for residual fuel oil remains subject to final negotiation between ENSA and PEMEX, but ENSA attests that it, and not U.S. suppliers or consumers, will assume all risks should the contract terms diverge from market trends. According to the company, the five-year term of the requested authorization is the minimum sufficient to assure the security of the investment required in related pipeline facilities.

This export application will be reviewed under section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In reviewing natural gas export applications, domestic need for the gas to be exported is considered, and any other issues determined to be appropriate in a particular case, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they relate to the requested export authority. ENSA asserts that there is no regional or national need for the gas, particularly since the gas to be exported currently is in oversupply, any market need is fully expressed and satisfied without constraint within the same competitive market to which ENSA must itself turn for its supplies of gas, and, in light of the proposed U.S.-Mexican Free Trade Agreement, there are significant economic and international benefits to be obtained from the transaction. Parties opposing this arrangement bear the burden of overcoming this assertion.

ENSA indicates in its application that it will file quarterly reports detailing each export transaction.

NEPA Compliance

The National Environmental Policy Act (NEPA) (42 U.S.C. 4321, *et seq.*) requires the DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until the DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application.

All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trail-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of ENSA's application is available for inspection and copying in the Office of Fuels Programs Docket room, 3F–056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 9, 1990.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 90–24245 Filed 10–12–90; 8:45 am]
BILLING CODE 6450–01–M

[FE Docket No. 90-67-NG]

ICG Utilities (Manitoba) Ltd., Application for Blanket Authorization To Import and Export Natural Gas

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to import and export natural gas.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notices of receipt on July 30, 1990, of an application filed by ICG Utilities (Manitoba) Ltd. ("ICG") for blanket authorization to import and export natural gas from and to Canada. ICG seeks DOE authority to import up to 8 Bcf of natural gas from Canada and to export up to 8 Bcf of natural gas to Canada over a two-year term beginning on the date of first delivery.

ICG intends to use existing facilities in the United States for both imports and exports of natural gas. The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 14, 1990.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Linda Silverman, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–7248.

Diana Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, room 6E–042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: ICG, a corporation organized and existing under the laws of the Province of Manitoba, Canada, has its principal place of business in Winnipeg, Manitoba. ICG's ultimate parent corporation is Westcoast Energy Inc., a company incorporated pursuant to the laws of Canada. The company inends to import or export natural gas under short-term or spot-market sales arrangements for its own account or as agent for other parties. The terms of each transaction, including price and volume, will depend on the market demand for natural gas and will be structured to meet competition in the market place. There will be no fixed purchase obligations in ICG's import/export contracts.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In reviewing natural gas export applications, the domestic need for the gas to be exported is considered, and any other issues determined to be appropriate in a particular case, including whether the arrangement is consistent with the DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that the proposed import authority would be in the public interest because it will allow ICG to store its system supplies in U.S. storage facilities and to increase the supply of competitively-priced Canadian natural gas for U.S. purchasers. Further, the company states that the export proposal will advance U.S. goals to reduce trade barriers and to encourage the operation of market forces to achieve a more competitive and efficient distribution of goods between the United States and Canada. Parties opposing the arrangement bear the burden of overcoming these assertions.

All parties should be aware that if the requested import/export is approved, the authorization would be conditioned on the filing of quarterly reports detailing each transaction.

NEPA Compliance

The National Environmental Policy Act (NEPA) 42 U.S.C. 4321 *et seq.*, requires the DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until the DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures by provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of ICG's application is available for inspection and copying in the Office of Fuels Programs Docket room, 3F–056 at the above address. The

docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 9, 1990.

Clifford P. Tomaszewski,
Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

[FE Docket No. 90-78-NG]

Ocean State Power; Application for Blanket Authorization To Import and Export Natural Gas

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to import and export natural gas.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on August 31, 1990, of an application filed by Ocean State Power (Ocean State) for blanket authorization to import from and export to Canada up to 36.5 Bcf of natural gas for a two-year term beginning on the date of first import or export delivery. Ocean State requests authority to import and export the natural gas at any point on the U.S./Canadian border where existing pipeline facilities are located. No new construction would be involved. Ocean State also states it will submit quarterly reports to FE detailing each transaction.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 14, 1990.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Allyson C. Reilly, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6394

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, room 6E-042, GC-32, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667

SUPPLEMENTARY INFORMATION: Ocean State is a Rhode Island general partnership with its principal place of business in Boston, Massachusetts. Ocean State has authority to import from ProGas Limited (ProGas) up to 50,000 Mcf per day of Canadian natural gas for a 20-year term for use as fuel in Ocean State's 250 megawatt combined-cycle congeneration facility located in Burrillville, Rhode Island. (1 ERA Para. 70,778 (1988); 1 ERA Para. 70,810 (1988); and 1 FE Para. 70,242 (1989)). According to Ocean State, during the winter months, very low temperatures can cause the cogeneration facilities fuel requirement to increase above the full volumes for which Ocean State has contracted from ProGas. The import authority sought by Ocean State would give it the flexibility to purchase supplemental Canadian supplies to provide the fuel requirements for transporting the 50,000 Mcf per day of natural gas from the international border to the facility, and any temporary increase in the facility's normal fuel requirement needs.

Ocean State anticipates that all or most of its natural gas supply will be utilized in the cogeneration facility, but seeks authority to export natural gas when the contracted Canadian supplies are in excess of the facility's requirements due primarily to changing climate conditions or maintenance activities. Ocean State also mentions that it will not require the full contracted-for ProGas volumes of natural gas scheduled for purchase and import beginning November 1, 1990; the full volumes will not be required until the congeneration facility begins commercial operation at the end of the year. The proposed export authority would give Ocean State the flexibility to market its surplus natural gas. The natural gas Ocean State proposes to export would be sold on a spot basis to various entities in Canada including, but not limited, to pipelines, local distribution companies, electric utilities and industrial customers. The specific terms of each import and export arrangement would be negotiated on an individual basis at market responsive prices.

The decision on the application for import authority will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In reviewing natural gas export applications, the DOE considers the domestic need for the gas to be exported and any other issues determined to be appropriate in a particular case. However, since the source of the natural gas proposed to be exported involves only Canadian production and not sales of domestic gas to Canada, it is unnecessary to consider domestic need in connection with the export portion of Ocean State's proposal. Parties opposing the arrangement bear the burden of overcoming these assertions.

Nepa Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file

additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Ocean State's application is available for inspection and copying in the Office of Fuels Programs Docket room, 3F-056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 9, 1990.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Tennessee Gas Pipeline Company; Order Granting Blanket Authorization To Export Natural Gas From the United States to Mexico or Canada

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of an order granting blanket authorization to export natural gas to Mexico or Canada.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Tennessee Gas Pipeline Company (Tennessee) blanket authorization to export up to 200 Bcf of natural gas to Mexico or Canada over a two year period commencing on the date of first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 9, 1990.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3852-4]

Underground Injection Control Program; Hazardous Waste Disposal Injection Restrictions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent to grant case-by-case extension.

SUMMARY: EPA is proposing to grant the request from Celanese Engineering Resins, Inc., in Bishop, Texas, for a three-month extension of the November 8, 1990, effective date of the hazardous waste injection restrictions applicable to injected wastewaters with the hazardous waste codes: U001, U002, U019, U031, U056, U072, U080, U112, U115, U122, U123, U133, U134, U140, U154, U159, U161, U188, U226, D001, and F039. This action responds to a petition submitted under 40 CFR 148.4 according to procedures set out in 40 CFR 268.5, which allows any person to request that the Administrator grant, on a case-by-case basis, an extension of the applicable effective date based on a showing that the petitioner has entered into a binding contractual commitment to construct or otherwise provide adequate alternative treatment, recovery, or disposal capacity for the petitioner's waste. If this proposed action is finalized, Celanese Engineering Resins, Inc., can continue to inject the wastestream described above at the Bishop facility until February 8, 1991, but not later than this date without being subject to the prohibitions applicable to such wastes.

DATES: Comments on this notice must be received on or before November 13, 1990.

ADDRESSES: The public must send an original and two copies of their comments to: EPA, 1445 Ross Avenue, Dallas, Texas, 75202-2733. The docket for this action is located at EPA, 1445 Ross Avenue, Dallas, Texas 75202-2733, and is open during normal business hours from 8 a.m.-4 p.m. The public can review all docket materials by calling (214) 655-7160 to make an appointment.

FOR FURTHER INFORMATION CONTACT: For information contact Oscar Cabra, Jr. at (214) 655-7110 or Ronnie Crossland at (214) 655-7160.

Petition

A. Facility Summary

Celanese Engineer Resins, Inc., in Bishop, Texas, has petitioned EPA to grant them a three-month extension of the effective date of the hazardous waste injection restrictions applicable to the following wastes:

The specific hazardous liquid waste for which this case-by-case extension of the November 8, 1990 injection ban date is being sought include: U001, U002, U019, U031, U056, U072, U080, U112, U115, U122, U123, U133, U134, U140, U154, U159, U161, U188, U226, D001, and F039.

EPA is proposing to grant an extension of the effective date of the applicable restrictions for three months from the hazardous waste injection restrictions effective date of November 8, 1990 for this facility. The Celanese Engineering Resins, Inc., request and supporting documentation was available in the public docket for this rulemaking. Interested persons are invited to submit comments or written data on this petition. All Comments will be considered by EPA and addressed in a Federal Register notice stating the Agency's final decision to grant or deny the petition.

B. Description of Petitioning Facility

Celanese Engineering Resins, Inc., is a chemical manufacturing company which operates three hazardous waste injection wells in Bishop, Texas. Celanese manufactures industrial organic chemicals by the conversion of methane to methanol and further reacting the methanol and other aliphatic organics to produce formaldehyde, methylal, esters (n-butyl, n-propyl and ethyl acetates) pentaerythritol, trimethylolpropane, paraformaldehyde, Formcel formaldehyde, alcohols, aldehydes and glycols. Additionally, Celanese produces Celcon, Nylon, and Celanex engineering resins and bulk pharmaceuticals.

C. Case-by-Case Extension Petition Demonstrations

Celanese Engineering Resins, Inc.'s application for an extension of the effective date includes the following demonstrations:

40 CFR 268.5(a)(1) Celanese—Bishop has made a good-faith effort on a nationwide basis to locate and contract for adequate alternative treatment, recovery, or disposal

capacity, or to establish such capacity by the effective date of the applicable restrictions.

40 CFR 268.5(a)(2) Celanese—Bishop has entered into a binding contractual commitment to provide alternative treatment, recovery, or disposal capacity.

40 CFR 268.5(a)(3) Celanese—Bishop has shown that lack of alternative capacity is beyond its control.

40 CFR 268.5(a)(4) Celanese—Bishop has shown that there will be adequate alternative treatment, recovery, or disposal capacity for all the waste after the effective date established by the extension.

40 CFR 268.5(a)(5) Celanese—Bishop has provided a detailed schedule for obtaining alternative capacity, including dates.

40 CFR 268.5(a)(6) Celanese—Bishop has arranged for adequate capacity to manage the waste during the extension period.

40 CFR 268.5(a)(7) The surface impoundments or landfills used by Celanese—Bishop to manage the waste during the extension period will meet the requirements of 40 CFR 268.5(h)(2).

III. *EPA's Proposed Action*

For the reasons discussed above, the Agency believes that Celanese—Bishop's demonstrations have satisfied all the requirements for a case-by-case extension of the effective date of the hazardous waste injection restrictions applicable to U001, U002, U019, U031, U056, U072, U080, U112, U115, U122, U123, U133, U134, U140, U154, U159, U161, U188, U226, D001, and F039. Therefore, EPA is proposing to grant an extension of the November 8, 1990, effective date of the restrictions on U001, U002, U019, U031, U056, U072, U080, U112, U115, U122, U123, U133, U134, U140, U154, U159, U161, U188, U226, D001, and F039 for Celanese—Bishop. If the extension is granted, these wastes, which would not be prohibited from land disposal, could be injected over a three month period, starting from the effective date of November 8, 1990, but not later than February 8, 1991.

If Celanese—Bishop obtains a case-by-case extension, it would have to submit a progress report every two weeks after the date the extension is granted, addressing the progress being made to obtain alternative disposal capacity. The Agency must be notified of any change in the conditions specified in the petition. The extension would remain in effect unless Celanese—Bishop fails to make a good faith effort to meet the schedule for completion, the Agency denies or revokes any required permit, conditions certified in the application change, or if Celanese—Bishop violates any law or regulations implemented by EPA.

(Sections 1006, 2002(a), 3001, and 3004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6924)).

Dated: October 5, 1990.

Myron O. Knudson,

Director, Water Management Division (6W), EPA Region 6.

BILLING CODE 6560-50-M

[OPP-66144; FRL 3803-8]

Amitrole; Receipt of Request to Cancel Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of receipt.

SUMMARY: This Notice, pursuant to section 6 (f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 *et seq.*, announces: (1) EPA's receipt of a request from Rhone-Poulenc, a registrant of amitrole pesticide products, to voluntarily cancel four of its registrations, (2) EPA's intention to approve and give effect to this request and (3) EPA's determination regarding the disposition of existing stocks of the affected products.

EPA's approval will be effective October 25, 1990. As of that date, all future sales or distribution of these amitrole products shall be in accordance with the terms and conditions described herein.

DATES: The cancellation of registration shall be effective October 25, 1990.

FOR FURTHER INFORMATION CONTACT: Philip J. Poli, Review Manager, Special Review Branch, Special Review and Registration Division (H7508C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Third floor, Westfield Bldg., 2805 Jefferson Davis Highway, Arlington, VA, (202) 308-8038.

SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated July 5, 1990, and received by EPA July 9, 1990, Rhone-Poulenc Ag Company, a registrant of the herbicide amitrole, submitted a request to EPA asking that four of its amitrole product registrations be cancelled. The products are EPA Registration No. 264-88 Weedazol® herbicide, 264-124 Amizine® herbicide, 264-196 Liquid Amizine® herbicide, and 264-226 Amitrol T® (Lawn and Garden). Rhone-Poulenc also submitted revised labels for two other amitrole products, Amitrol T® (Liquid Herbicide) and Amizol® (Industrial Herbicide), which would permit application by ground boom method only. The request to modify allowable application methods is being considered separately by the EPA and is not a part of this notice.

In another letter dated August 3, 1990, and received by EPA August 6, 1990, the registrant submitted a request seeking a provision for the disposition of existing stocks along with its voluntary cancellation request. Rhone-Poulenc requested a 1-year inventory disposal period for all four product registrations. Specifically, Rhone-Poulenc requested permission to distribute and/or sell existing stocks of the products for a period of 1-year. A copy of the registrant's letter requesting cancellation of these amitrole products, has been included in the public docket for the Amitrole Special Review.

II. Existing Stocks Determination

The EPA has reviewed the registrant's existing stocks request and has considered the amounts of stock represented to be in existence and under the control of the registrant. The Agency has determined that continued sale and use of existing stocks is not inconsistent with the purposes of the statute and will not have unreasonable adverse effects on the environment. Therefore, the registrant and its dealers may proceed according to the plan described in its request for cancellation, and that existing stocks may not be sold or distributed except as provided for in this notice. No affected amitrole product subject to this notice may be sold, distributed, or released for shipment by the registrant or its agents after September 1, 1991. Amitrole products, subject to this notice may be sold or distributed by a retailer, dealer, or others excluding the registrant or its agents after September 1, 1991. End-users may use supplies of these amitrole products until exhausted.

III. Conclusion

EPA has received and expects to approve the request described above effective October 25, 1990, incorporating the requested action and the decision governing the existing stocks provision as described above.

List of Affected Registrations

Active Ingredient	Registrant	Product Numbers
Amitrole	Rhone-Poulenc	264-98 264-124 264-196 264-329

BILLING CODE 6560-50-F

[OPP-180000B; FRL 3798-3]

Dinoseb Pesticide Products; Continuation of Response Period for Submission of Claims for Indemnification

AGENCY: Environmental Protection Agency (EPA, the Agency).

ACTION: Final notice.

SUMMARY: This Notice amends a February 17, 1989 Federal Register Notice by announcing that EPA is continuing to accept claims for indemnification and/or requests for disposal for all suspended and cancelled dinoseb-containing pesticides under sections 15 and 19 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136m and 136q (prior to the FIFRA amendments of 1988). This Notice announces a new time frame for submitting claims for indemnification.

DATES: EPA is continuing to accept claims for indemnification. However, in order to expedite processing, claims for indemnification filed in response to this notice should be submitted by January 31, 1991, 2 months before the expiration date of the Agency's contract supporting the processing of claims.

ADDRESSES: All claims and requests filed in response to this Notice should be mailed to: Resource Management and Evaluation Branch (H-7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Attention: Ms. Guynin Myers.

FOR FURTHER INFORMATION CONTACT: By mail: Ms. Guynin Myers, Resource Management and Evaluation Branch (H-7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1002, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. (703) 557-5047

SUPPLEMENTARY INFORMATION: On February 17, 1989, EPA published in the Federal Register a notice announcing procedures for the submission of claims for indemnification and requests for disposal of dinoseb-containing pesticide products. In that notice, EPA stated that it was accepting claims for indemnification until August 15, 1989. In connection with the publication of the February 17, 1989 Notice, EPA conducted an extensive outreach effort to inform all dinoseb holders of the availability of this program. Despite EPA's efforts, a number of holders did not learn about the response period in time to submit claims by August 15, 1989. Further, publicity about the start of the dinoseb disposal operations has generated a number of inquiries from other holders about the availability of indemnification. Due to the unforeseen delay in initiating disposal operations, and to encourage owners of dinoseb products to dispose of dinoseb properly, EPA is issuing this Federal Register Notice announcing that it will continue to accept indemnification claims. In order to receive expedited processing, claims should be submitted before the expiration date of EPA's contract supporting the processing of claims.

Persons owning dinoseb who have not already submitted claims for indemnification are urged to contact EPA at the number listed above for copies of the necessary claim form and the Federal Register Notice of February 17, 1989. These persons should submit claims as soon as possible. Please note that the Agency has contracted with a firm to assist in processing of claims through March, 1991. Persons submitting new claims prior to the date established in this Federal Register notice will receive expedited consideration of their claims, up to the end of the support contract period. Claims received after March 31, 1991, will be processed by EPA staff only, and therefore, in such instances, claimants may experience delays in completion of the indemnification procedures.

Claimants also should be aware of the Federal statute of limitations for claims against the United States. Title 28 U.S.C. 2401(a) provides generally that any action concerning a claim against the United States shall be barred unless filed within 6 years of the date when the claim arose. This provision would bar a claimant from instituting any action to enforce a claim arising out of suspension and cancellation of any dinoseb product 6 years after the registration of the pesticide product was cancelled.

These dates apply only to the submission of claims for indemnification. Requests for disposal will continue to be accepted by the Agency until disposal operations are completed. Therefore, dinoseb holders who have not yet requested disposal should make every effort to do so immediately. Dinoseb holders also are reminded that they have a continuing responsibility to store the product safely and in accordance with all applicable Federal, State and local laws. For guidance on safe storage, holders are referred to the Federal Register Notice of February 17, 1989, (54 FR 7372). Copies are available from the address listed above. Additional guidance on storing dinoseb in accordance with the requirements of the Emergency Preparedness and Community Right to Know Act is available from the address listed above.

Dated: October 3, 1990.

Victor J. Kimm,

Acting Assistant Administrator, Office of Pesticides and Toxic Substances.

BILLING CODE 6560-50-F

[FRL-3852-5]

Listing Decisions for Virginia Under Section 304(1) of the Clean Water Act

AGENCY: Environmental Protection Agency.

ACTION: Notice of amendment of final listing decisions for the Commonwealth of Virginia under § 304(1) of the Clean Water Act.

SUMMARY: Notice is hereby given of the United States Environmental Protection Agency's (U.S. EPA) decision to amend the final listing decisions for the Commonwealth of Virginia under section 304(1) of the Clean Water Act as amended by the Water Quality Act of 1987. This decision deletes the Westvaco Corporation's Covington Mill from the 304(l)(1)(C) list and the Jackson River, its receiving stream, from the 304(l)(1)(B) list. Several comments were received and considered in reaching this decision on or before the end of the comment period following the proposed decision published June 12, 1990.

DATES: Comments were due on or before July 12, 1990.

ADDRESSES: The administrative record containing the U.S. EPA's documentation supporting its amendment to the final lists will be on file and may be inspected at the U.S. EPA Region III office between the hours of 9 a.m. and 4 p.m., Monday through Friday except holidays. To make arrangements to examine the

administrative record contact Thomas Henry (3WM53), Permits Enforcement Branch, U.S. EPA, Region III, 841 Chestnut Building, Philadelphia, PA 19107, telephone (215) 597–8243, [FTS] 597–8243.

SUPPLEMENTARY INFORMATION: Following the close of the comment period on the proposed listing decisions pursuant to section 304(1) of the CWA, 33 U.S.C. 1314, the Regional Administrator considered the comments and petitions and issued a response to those comments and petitions regarding the Commonwealth of Virginia. The notice of final decision and notice of availability of response was published in the **Federal Register** on March 28, 1990.

Today's decision amends the final list by deleting Westvaco's Covington Mill from the 304(l)(1)(C) list ("C" list) and the receiving stream, the Jackson River, from the 304(l)(1)(B) list ("B" list). This decision is based on EPA Region III's discovery subsequent to March 20, 1990, that Westvaco had submitted sampling data to an EPA Headquarters Office prior to the end of the comment period which was not considered in the March 20th decision. This information indicated that the discharge for the period covered by the sampling from the Westvaco Covington Mill did not and would not cause the receiving stream, the Jackson River, to exceed the applicable water quality standard for dioxin. Since this information was available during the comment period and the Agency believes that it supports a determination that Westvaco's discharge will not cause the receiving stream to exceed the applicable water quality standard for dioxin, EPA Region III is removing Westvaco's Covington Mill and the Jackson River from the "C" and "B" lists, respectively.

EPA accepted comments concerning this decision for thirty days from the date of publication of the proposed decision in the **Federal Register** on June 12, 1990. Comments to the proposed delisting did not oppose the decision. EPA's response to those comments is available in the administrative record noted above.

Since EPA determined that Westvaco's Covington Mill should be removed from the "C" list, no individual control strategy pursuant to section 304(l)(1)(D) of CWA will be required for the mill. EPA notes favorably, however, that Westvaco has requested from the Commonwealth of Virginia a modification to its National Pollutant Discharge Elimination System permit to include a numeric limitation for dioxin. This modification is presently being developed by Virginia. Effluent limitations are established to protect the ambient water quality of the receiving stream.

Dated: September 27, 1990.

Edwin B. Erickson,

Regional Administrator, EPA Region III.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

October 4, 1990.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on this information collection should contact Bruce McConnell, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785.

OMB Number: 3060–0435

Title: Section 80.361, Frequencies for narrow-band direct-printing (NB–DP) and data transmissions

Action: New collection

Respondents: Individuals or households, state or local governments, nonprofit institutions and businesses or other for-profit (including small businesses)

Frequency of Response: On occasion

Estimated Annual Burden: 2 responses, 2 hours average burden per response; 4 hours total annual burden

Needs and Uses: The reporting requirement contained in Section 80.361 is necessary to require applicants to submit a showing of need to obtain new or additional narrow-band direct-printing (NB–DP) frequencies. Applicants for new or additional NB–DP frequencies are required to show the schedule of service of each currently licensed or proposed series of NB–DP frequencies and to show a need for additional frequencies based on at least a 40% usage of existing NB–DP frequencies.

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

October 5, 1990.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on this information collection should contact Bruce McConnell, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–3785.

OMB Number: 3060–0054

Title: Application for Exemption From Ship Radio Station Requirements

Form Number: FCC Form 820

Action: Revision

Respondents: Individuals or households, and businesses or other for-profit (including small businesses)

Frequency of Response: On occasion

Estimated Annual Burden: 100 responses, 2.06 hours average burden per response; 206 hours total annual burden

Needs and Uses: In accordance with FCC Rules, applicants are required to complete FCC Form 820 to apply for exemption from radio provisions of statute, Treaty, or international agreement. The data is used by examiners to determine the applicants qualifications for the requested exemption. The revision of this information collection includes the fee processing data on the form and a slight increase in burden.

Comments Invited on New York Metropolitan Area Regional Public Safety Plan Amendment

October 5, 1990.

The Commission has received a proposed amendment to the public safety radio communications plan for the New York Metropolitan Area (Region 8). Specifically, the Region 8 Tri-State Radio Planning Committee voted at its September 27, 1990, meeting to approve the following changes to their channel allotment plan:

Channel	Freq.	Change from	Change to
611	821/866.1500	Orange County, NY [1]	Belleville Township, NJ.
634	821/866.4375	Unassigned	New York City PD, NY.
672	821/866.8375	Unassigned	Danbury Police Dept., CT.
697	822/867.2750	Unassigned	Old Bridge Township, NJ.
710	822/867.4375	Unassigned	Belleville Township, NJ.
721	822/867.5900	Unassigned	Essex County Police, NJ.
728	822/867.6125	Leonia PD, NJ [2]	Scarsdale Fire Dept., NY.
733	822/867.6250	Orange County, NY [1]	New York City PD, NY.
746	822/867.6975	Unassigned	Old Bridge Township, NJ.
760	823/868.3625	Mercer County, NJ [1] and Dutchess County, NY [1]	Fairfield Township, NJ.
814	823/868.7675	Orange County, NY [1]	Belleville Township, NJ.
816	823/868.8125	Orange County, NY [1]	Newark Housing Auth., NJ.
819	823/868.8500	Unassigned	Essex County Police, NJ.
820	823/868.8625	Unassigned	Town of Fairfield, CT.
821	823/868.8750	Unassigned	Jersey City Police, NJ and Secaucus Police, NJ.

[1] This assignment was previously a pool assignment. See Notes 1 and 2, page 94 of the currently approved plan for FCC Region 8. These changes were coordinated and approved by the affected adjacent FCC region.
[2] Leonia Police Department notified FCC Region 8 that it wished to withdraw its assignment. The FCC Region 8 approved the withdrawal without prejudice.

Channel	Freq.	Current allotment	Additional allotment
606	821/866.1125	Mercer County, NJ [1] and Stamford, CT	Howell Township, NJ.
608	821/866.2625	Essex/Passaic Red Cross, NJ	Eastern Union County Red Cross, NJ
696	821/866.8625	CT State Police, CT	Old Bridge Township, NJ.
696	822/867.1375	CT State Police, CT	Old Bridge Township, NJ.
716	822/867.5625	Port Authority, NY	Danbury Police Dept., CT.
724	822/867.8375	Norwalk PD, CT	Maywood Police Dept., NJ.
756	823/868.0625	Babylon, NY and Orange County, NY [1]	Danbury Police Dept., CT.

[1] This assignment was previously a pool assignment. See Notes 1 and 2, page 94 of the currently approved plan for FCC Region 8. These changes were coordinated and approved by the affected adjacent FCC region.
[2] Leonia Police Department notified FCC Region 8 that it wished to withdraw its assignment. The FCC Region 8 approved the withdrawal without prejudice.

In accordance with the Commission's Report and Order in General Docket No. 87-112 implementing the Public Safety National Plan, parties are hereby given thirty days from the date of Federal Register publication of this public notice to file comments and fifteen days to reply to any comments filed. [See Report and Order, General Docket No. 87-112, 3 FCC Rcd 905 (1987), at paragraph 57.)

Region 8 consists of: Fairfield, Litchfield, New Haven, and Middlesex Counties, Connecticut; Bronx, Kings, Nassau, New York, Orange, Putnam, Queens, Richmond, Rockland, Suffolk, Sullivan, Ulster, Dutchess, and Westchester Counties, New York; Bergen, Essex, Hudson, Morris, Passaic, Sussex, Union, Warren, Middlesex, Somerset, Hunterdon, Mercer, and Monmouth Counties, New Jersey. (General Docket No. 87-112, 3 FCC Rcd 2113 (1988).)

Comments should be clearly identified as submissions to General Docket No. 88-476, New York Metropolitan Area—Region 8, and commenters should send an original and five copies to the Secretary, Federal Communications Commission, Washington, DC 20554.

Concurrent with this notice and comment period, Region 8 has opened a third window application period beginning October 1, 1990, and ending November 1, 1990. Any applications submitted after November 1, 1990, will be rejected.

Questions regarding this public notice may be directed to Maureen Cesaitis, Private Radio Bureau, (202) 632-6497.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

FEDERAL RESERVE SYSTEM

Fidelity Bancorporation, Inc., et al; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 5, 1990.

A. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Fidelity Bancorporation, Inc.*, Dover, Delaware; to become a bank holding company by acquiring 100 percent of the voting shares of Fidelity Bank, Fort Worth, Texas.

2. *First National Bank of New Boston ESOP*, New Boston, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of New Boston Bancshares, Inc., New Boston, Texas, and thereby indirectly acquire First National Bank of New Boston, New Boston, Texas.

3. *Plains Bancorp Delaware, Inc.*, Wilmington, Delaware; to become a banking holding company by acquiring 100 percent of the voting shares of The First State Bank of Dimmitt, Texas.

4. *Plains Bancorp, Inc.*, Dimitt, Texas; to merge with Seagraves Bancshares, Inc., Seagraves, Texas, and thereby indirectly The First State Bank in Seagraves, Seagraves, Texas.

Board of Governors of the Federal Reserve System, October 9, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

Norwest Corp., et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition,

conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than November 5, 1990.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Norwest Corporation*, Minneapolis, Minnesota; to enter into a lease agreement and option to purchase a general insurance agency business from Gilco Leasing, Inc., Omaha, Nebraska, and thereby engage in general insurance agency activities pursuant to § 225.25(b)(8) of the Board's Regulation Y. Comments on this application must be received by October 19, 1990.

B. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Assistant Vice President) 101 Market Street, San Francisco, California 94105:

1. *Banque Nationale de Paris*, Paris, France; to acquire BAII Capital Markets, Inc., New York, New York, and thereby engage in securities brokerage activities pursuant to § 225.25(b)(15) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 9, 1990.

Signet Banking Corporation; Notice of Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 5, 1990.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Signet Banking Corporation*, Richmond, Virginia; to engage *de novo* through its subsidiary, Signet Trust Company, Richmond, Virginia, in serving as investment adviser to investment companies registered under the Investment Company Act of 1940 pursuant to § 225.25(b)(4)(ii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 9, 1990.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Office of the Assistant Secretary for Personnel Administration; Statement of Organization, Functions, and Delegations of Authority

Part A (Office of the Secretary) of the Statement of Organization, and Delegations of Authority for the Department of Health and Human Services (DHHS) is amended to reflect a realignment of functions in the Office of the Assistant Secretary for Personnel Administration. The change integrates the functions of the "Technical Services Center" into the "Personnel and Pay Systems Division", Office of Human Resource Information Management.

Specifically, chapter AH, Office of the Assistant Secretary for Personnel Administration, as last published at 53 FR 4720, February 17, 1988, is revised as follows:

In chapter AH, section AH.20 Functions, paragraph B.9 "Technical Services Center", remove the following: "9. Technical Services Center."

Dated: September 25, 1990.

Kevin R. Maley,
Assistant Secretary for Management and Budget.

Health Care Financing Administration

Statement of Organization, Functions, and Delegations of Authority

Part F. of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services, Health Care Financing Administration (HCFA), (Federal Register, Vol. 54, No. 12, p. 2229, dated Thursday January 19, 1989) is amended to reflect the establishment of the Physician Payment Reform Implementation Task Force in the Office of Program Operations Procedures, Bureau of Program Operations in the Office of the Associate Administrator for Operations. This task force will: (1) Design and oversee the operational activities related to the implementation of the Medicare Physician Payment Reform (PPR); (2) analyze, develop procedures and validate contractor data related to PPR; (3) test carrier instructional changes and conducts regional office and carrier training on PPR.

The specific amendment to part F. is described below:

- Section FP.20.A.3.e, Physician Payment Reform Implementation Task Force (FPA8-2) is added to reflect the establishment of a focal coordinating point for the development of new operational requirements. The new section reads as follows:

e. Physician Payment Reform Implementation Task Force (FPA8-2)

1. Designs and develops the activities related to the operational implementation of the Medicare Physician Payments Reform (PPR) provision of OBRA 89 (Section 6102).

2. Develops procedures and contractor operational instructions necessary to implement the January 1, 1992 PPR provisions.

3. Analyzes and validates contractor data to develop and monitor Physician Payment Reform.

4. Coordinates activities with Technical Advisory Groups, carriers and

other HCFA components for developing data analysis plans and instructions for Payment Policy Standardization implementation.

5. Develops the necessary test protocols and conducts tests of carrier instructional changes to determine accuracy of change and clarity of instructions.

6. Conducts regional office and carrier training on PPR. Develops guidelines and monitors carriers implementation of and compliance with educational activities.

This is a temporary organization that is expected to be in operation for approximately 2 years when its activities will be incorporated into other Office of Program Operations Procedures components.

Dated: October 2, 1990.

Robert A. Streimer,

Associate Administrator for Management.

National Institutes of Health

National Cancer Institute; Meeting (Division of Cancer Treatment Board of Scientific Counselors)

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, DCT, National Cancer Institute, National Institutes of Health, October 22-23, 1990, Building 1, Wilson Hall, 9000 Rockville Pike, Bethesda, Maryland 20892.

This meeting will be open to the public on October 22 from 8:30 a.m. to approximately 5:30 p.m., and again on October 23 from 8 a.m. until adjournment, to review program plans, concepts of contract recompetitions and budget for the DCT program. In addition, there will be scientific reviews by several programs in the Division. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552b(c)(6), title 5, U.S.C. and sec. 10(d) of Public Law 92-463, the meeting will be closed to the public on October 22 from 5:30 p.m. to approximately 6:30 p.m., for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Committee Management Office, National Cancer Institute, Building 31, room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496-5708) will provide summaries of the meeting and rosters of committee members upon request.

Dr. Bruce A. Chabner, Director, Division of Cancer Treatment, National Cancer Institute, Building 31, room 3A52, National Institutes of Health, Bethesda, Maryland 20892 (301/496-4291) will furnish substantive program information.

Dated: October 3, 1990.

Betty J. Beveridge,

Committee Management Officer, NIH.

National Institute of Child Health and Human Development; Meeting of the Board of Scientific Counselors, NICHD

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Child Health and Human Development, December 7, 1990, in Building 31, room 2A52.

This meeting will be open to the public from 9 a.m. to 12 noon on December 7 for the review of the Intramural Research Program and scientific presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Public Law 92-463, the meeting will be closed to the public on December 7 from 1 p.m. to adjournment for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Mary Plummer, Committee Management Officer, NICHD, Executive Plaza North, room 520, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496-1485, will provide a summary of the meeting and a roster of Board members, and substantive program information upon request.

Dated: October 3, 1990.

BILLING CODE 4140-01-M

National Institute of Environmental Health Sciences; Meeting of Advisory Council on Hazardous Substances Research and Training

Pursuant to Public Law 92-463, notice is hereby given on a meeting to be held at the National Institutes of Health, Building 31-C, Conference Room 6, Bethesda, Maryland on October 25, 1990. The meeting will be open to the public and will begin at 8:30 a.m. and end at 5 p.m.

The Superfund Amendments and Reauthorization Act of 1986 (SARA) established a university-based, basic research and education program within NIEHS. The purpose of the meeting is to provide the Advisory Council on Hazardous Substances Research and Training the opportunity to learn the status of these programs, which were previously described in the Federal Register of November 28, 1986 (51 FR 43069-43092) and March 9, 1987 (52 FR 7213-7223).

Topics to be discussed at the meeting may include, but are not limited to, recent research findings from the 12 universities receiving NIEHS Superfund Hazardous Substances and Training grants and summaries of four Superfund research conferences convened by NIEHS in 1990: Biomarkers of Human Exposure; Biodegradation of Hazardous Substances; Measuring Pathways of Human Exposure at Superfund Sites; and Health Effects of Hazardous Waste Incineration By-Products. In addition, representatives from the Agency for Toxic Substances and Disease Registry, the Department of Defense, the Department of Energy, and the Environmental Protection Agency will brief the Advisory Council on the status of Superfund research programs managed by those agencies.

Attendance is limited only by space available. For futher information, please contact Mr. Daniel C. VanderMeer, Executive Secretary, NIEHS, P.O. Box 12233, Research Triangle Park, NC, 27709 or telephone (919) 541-3484. The government representative for this meeting will be Dr. Anne P. Sassaman.

(Catalog of Federal Domestic Assistance Program No. 13.143, NIEHS Superfund Hazardous Substances Basic Research and Training Program, NIH)

Dated: October 8, 1990.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

Social Security Administration

Supplemental Security Income Modernization Project; Meeting

AGENCY: Social Security Administration, HHS.

ACTION: Notice of meeting.

The Social Security Administration (SSA) announces a meeting of the Supplemental Security Income (SSI) Modernization Project (the Project). This notice also describes the proposed agenda, purpose, and structure of the Project.

DATES: November 7–8, 1990, 9 a.m. to 5 p.m.

ADDRESSES: Federal Building, room 305, 26 Federal Plaza, New York, NY 10278. (Use the Duane Street entrance to the building.)

FOR FURTHER INFORMATION CONTACT: SSI Modernization Project Staff, room 300, 6401 Security Boulevard, Baltimore, MD 21235, (301) 965–3571.

SUPPLEMENTARY INFORMATION: SSA is undertaking a comprehensive examination of the SSI program, reviewing its fundamental structure and purpose. The SSI program has been in operation over 16 years. The purpose of the Project is to determine if the SSI program is meeting and will continue to meet the needs of the population it is intended to serve in an efficient and caring manner, recognizing the constraints in the current fiscal climate.

The first phase of this Project is intended to create a dialogue that provides a full examination of how well the SSI program serves the needy, aged, blind, and disabled.

To begin this dialogue, the Commissioner has involved 25 people who are experts in the SSI program and/or related public policy areas. The experts include a wide range of representatives of the aged, blind, and disabled from private and nonprofit organizations and Federal and State government as well as former SSA staff. Like members of the public attending this meeting, the experts will be able to express their individual views and concerns about the SSI program. Dr. Arthur S. Fleming, former Secretary of Health, Education and Welfare, will chair the meeting. The purpose of this initial dialogue is to exchange ideas and existing information about the program. This exchange will facilitate the sharing of ideas among attendees' constituencies, including advocacy groups, state and local government and academicians. The outcome will be a more informed public that has an interest in bringing individually produced innovative ideas for change in the SSI program to the Modernization Project.

The meeting is open to the public to the extent that space is available. Public officials, representatives of professional and advocacy organizations, concerned citizens, and SSI applicants and recipients may speak and submit written comments on the issues to be discussed. (This is the fourth in a series of meetings to be held throughout the country. Each of these meetings will also be open to the public. All meetings will be announced in the Federal Register. If you are interested in the Project but cannot attend the meeting on November 7–8, 1990, please call the Project staff at (301) 965–3571 so we may notify you of future meetings.)

There will be a public comment portion of the meeting beginning in the afternoon of November 7, 1990. A second public comment session will be held on November 8, 1990, in the morning. In order to ensure that as many individuals as possible are given the opportunity to speak in the time allotted for public comment, each individual will be limited to a maximum of 10 minutes. Because of the time limitation, individuals are requested to present comments in their order of importance. A written copy of comments should be prepared and presented to us, preferably in advance of the meeting. To ensure our full understanding and consideration of all of each speaker's concerns, we welcome written comments that provide a detailed and elaborative discussion of the subjects presented orally, as well as further written comments on other issues not presented orally. Individuals unable to attend the meeting also may submit written comments. Written comments will receive the same consideration as oral comments.

To request to speak, please telephone the Project Staff, at (301) 965–3571, and provide the following: (1) Name; (2) business or residence address; (3) telephone number (including area code) during normal working hours; (4) capacity in which presentation will be made; e.g., public official, representative of an organization, or citizen; and (5) time of day desired. To guarantee an opportunity to speak, requests must be received by November 1, 1990. Late requests to speak will be honored, if time permits.

A transcript of the meeting will be available at an at-cost basis. Transcripts may be ordered from the Project Staff. The transcript and all written submissions will become part of the record of these meetings.

Dated: October 9, 1990.

Peter Spencer,

Director, SSI Modernization Project Staff.

Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Susanville District Grazing Advisory Board, Susanville, CA.

ACTION: Notice of Meeting.

SUMMARY: Notice is hereby given that the Susanville District Grazing Advisory Board, created under the Secretary of Interior's discretionary authority on May 14, 1986, will meet on November 7, 1990.

The November 7 meeting will begin at 10 a.m. at the Surprise Resource Area Office, Bureau of Land Management, 602 Cressler Street, Cedarville, California.

Subjects to be covered during the meeting will include a report of progress on range improvements for FY 1990, proposed range improvements for FY 1991, a report on new and revised Allotment Management Plans (AMPs) for FY 1990, a discussion of cattleguard maintenance problems, a discussion of the proposed helicopter gathering of wild horses and burros for FY 1991, and a discussion of other items as appropriate.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3 p.m. to 4:30 p.m. on November 7, 1990 or file a written statement for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 705 Hall Street, Susanville, California 96130 by November 1, 1990. Depending upon the number of persons wishing to make oral statements, a per person time limit may be established.

Summary minutes of the Board meeting will be maintained in the District Office, and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Robert J. Sherve,

Associate District Manager.

BILLING CODE 4310-40-M

[CA-940-00-4111-15; CACA 16346]

California: Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Public Law 97-451, a petition for reinstatement of oil and gas lease CACA 16346 for lands in Kern County, California, was timely filed and was accompanied by all required rentals and royalties accruing from May 1, 1990, the date of termination.

No valid lease has been issued affecting the lands. The lessee has agreed to new lease terms for rentals and royalties at rates of $5.00 per acre and 16⅔ percent, respectively. Payment of a $500.00 administrative fee has been made.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease effective May 1, 1990, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above, and the reimbursement for cost of publication of this notice.

Dated: October 1, 1990.

Fred O'Ferrall,

Chief, Leasable Minerals Section

[FR Doc. 90-24164 Filed 10-12-90; 8:45 am]

BILLING CODE 4310-40-M

[NM-910-91-GPO-4111-15-403; NMNM 39120]

Proposed Reinstatement of Terminated Oil and Gas Lease; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Under the provision of 43 CFR 3108.2-3, Yates Petroleum Corporation, petitioned for reinstatement of oil and gas lease NMNM 39210, covering the following described land located in Eddy County, New Mexico:

T. 20 S., R. 24 E.
Sec. 6, lots 3, 4, 5, 6, and 7, SE¼NW¼, E½SW¼;
Sec. 7, lots 1, 2, and 3;
Sec. 17, NE¼.

Containing 594.38 acres.

It has been shown to my satisfaction that failure to make timely payment of rental was due to inadvertence.

No valid lease has been issued affecting the lands. Payment of back rentals and administrative cost of $500.00 has been paid. Future rentals shall be at the rate of $5.00 per acre per year and royalties shall be at the rate of 16⅔ percent. Reimbursement for cost of the publication of this notice shall be paid by the lessee.

Reinstatement of the lease will be effective as of the date of termination, December 1, 1989.

Dated: October 3, 1990.

Dolores L. Vigil,

Chief, Adjudication Section.

Realty Action—Exchange, California

AGENCY: United States, Department of the Interior, Bureau of Land Management.

ACTION: Notice of Realty Action, Exchange of Public and Private Lands in San Bernadino and Kern Counties, CA 27415.

SUMMARY: The following public lands in San Bernadino County have been examined and determined suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716). Selected lands:

San Bernadino Meridian, California

T.11N., R.6W.
Section 30, Lot 5
Containing 21.88 acres of public land, more less.

In exchange for these lands, the United States will acquire the following private lands in Kern County from The Nature Conservancy. Offered lands:

Mount Diablo Meridian, California

T. 31S., R. 36E.
Section 15: SE¼NW¼
Containing 40 acres of non-Federal lands, more or less.

SUPPLEMENTARY INFORMATION: The purpose of the exchange is to acquire private land in the designated Desert Tortoise Research Natural Area. The designated area encompasses lands which have historically supported the highest and most stable population of tortoise within its range. The desert tortoise has been listed as a threatened species under the Endangered Species Act of 1973. Publication of this notice in the Federal Register segregates the public lands from the operation of the public land laws and the general mining laws, but not the mineral leasing laws. The segregative effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

The exchange will be on an equal value basis. Full equalization of value will be achieved by acreage adjustment or by cash payment in the amount not to exceed 25 percent of the fair market value of the selected lands.

Lands transferred out of Federal ownership will be subject to the following reservations terms and conditions.

1. A reservation of right-of-way to the United States for ditches and canals, pursuant to the Act of August 30, 1890 (43 U.S.C. 945).

2. A right-of-way for solar-electric generation facilities, Serial Number CA-18774, held by Luz Solar Partners, Ltd.

3. A right-of-way for electric power transmission facilities, Serial Number LA-0145482, held by Southern California Edison Company.

FOR FURTHER INFORMATION CONTACT: Tom Gey, Ridgecrest Resource Area (619) 375-7125. Information relating to this exchange is available for review at the Ridgecrest Resource Area Office, 300 South Richmond Road, Ridgecrest, California 93555.

DATES: For a period of 45 days from the date of first publication of this notice interested parties may submit comments to the District Manager, California Desert District Office, Bureau of Land Management, in care of the above address. Objections will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of objections, this realty action will become the final determination of the Department of the Interior.

Dated: October 2, 1990.

H.W. Riecken,

Acting District Manager.

Colorado: Filing of Plats of Survey

October 4, 1990.

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10 a.m., October 4, 1990.

The plat representing the dependent resurvey of a portion of the east boundary and subdivisional lines and the subdivision of section 1, T. 36 N., R. 17 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted September 25, 1990.

The plat representing the dependent resurvey of portions of the west boundary of the Ute Ceded Lands, the Ninth Standard Parallel North (south boundary), the Second Guide Meridian West (east boundary), and subdivisional lines and the subdivision of certain sections, T. 37 N., R. 17 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted September 25, 1990.

These surveys were executed to meet certain administrative needs of the Bureau of Reclamation.

The plat representing the dependent resurvey of portions of the Eighth Standard parallel North (south boundary) and the subdivisional lines and the subdivision of certain sections, T. 36 N., R. 2 W., New Mexico Principal Meridian, Colorado, Group No. 701, was accepted September 25, 1990.

This survey was executed to meet certain administrative needs of the Bureau of Indian Affairs.

The plat representing the dependent resurvey of portions of the subdivisional lines, subdivision of section 23, and the metes-and-bounds survey in this section, and the further subdivision of section 23, T. 2 N., R. 75 W., Sixth Principal Meridian, Colorado, Group No. 864, was accepted September 25, 1990.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

The plat representing the dependent resurvey of a portion of the subdivisional lines and subdivision of sections 25 and 36, the metes-and-bounds survey of lot 2, section 36, and an informative traverse of a portion of the Government Highline Canal, T. 2 N., R. 2 W., Ute Meridian, Colorado, Group No. 914, was accepted September 25, 1990.

This survey was executed to meet certain administrative needs of the Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado, 80215.

Gary L. Gibson,

Acting Chief, Cadastral Surveyor for Colorado.

boundary), the Second Guide Meridian West (east boundary), and subdivisional lines and the subdivision of certain sections, T. 37 S., R. 17 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted September 25, 1990.

These surveys were executed to meet certain administrative needs of the Bureau of Reclamation.

The plat representing the dependent resurvey of portions of the Eighth Standard Parallel North (south boundary) and the subdivisional lines and the subdivision of certain sections, T. 33 N., R. 2 W., New Mexico Principal Meridian, Colorado, Group No. 764, was accepted September 25, 1990.

This survey was executed to meet certain administrative needs of the Bureau of Indian Affairs.

The plat representing the dependent resurvey of portions of the subdivisional lines, subdivision of section 23, and the metes-and-bounds survey in this section, and the further subdivision of section 23, T. 2 N., R. 75 W., Sixth Principal Meridian, Colorado, Group No. 884, was accepted September 25, 1990.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

The plat representing the dependent resurvey of a portion of the subdivisional lines and subdivision of sections 25 and 36, the metes-and-bounds survey of lot 2, section 36, and an informative traverse of a portion of the Government Highline Canal, T. 2 N., R. 2 W., Ute Meridian, Colorado, Group No. 914, was accepted September 25, 1990.

This survey was executed to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado, 80215.

Gary L. Gibson,

Acting Chief, Cadastral Surveyor for Colorado.

BILLING CODE 4310-JB-M

[OR-942-00-4730-12 GP1-005]

Filing of Plats of Survey: Oregon/Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Oregon State Office, Portland, Oregon, thirty (30) calendar days from the date of this publication.

Willamette Meridian

Oregon

T. 2 N., R. 3 W., accepted 9/14/90
T. 22 S., R. 3 W., accepted 9/28/90
T. 16 S., R. 8 W., accepted 9/28/90
T. 7 S., R. 3 E., accepted 9/14/90
T. 1 S., R. 47 E., accepted 8/31/90
T. 2 S., R. 47 E., accepted 8/31/90
T. 3 S., R. 47 E., accepted 8/31/90
T. 1 N., R. 48 E., accepted 8/31/90
T. 2 S., R. 48 E., accepted 8/31/90

If protests against a survey, as shown on any of the above plats, are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

The plats will be placed in the open files of the Oregon State Office, Bureau of Land Management, 1300 NE 44th Avenue, Portland, Oregon 97213, and will be available to the public as a matter of information only. Copies of the plats may be obtained from the above office upon required payment. A person or party who wishes to protest against a survey must file with the State Director, Bureau of Land Management, Portland, Oregon, a notice that they wish to protest prior to the proposed official filing date given above. A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within thirty (30) days after the proposed official filing date.

The above-listed plats represent dependent resurveys, survey and subdivision.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, 1300 N.E. 44th Avenue, P.O. Box 2965, Portland Oregon 97208.

Dated: September 28, 1990.

Robert E. Mollohan,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-33-M

[MT-920-00-4332-08]

Public Review of Mineral Survey Reports on Wilderness Study Areas (WSAs), Montana

ACTION: Notice of the availability of a Mineral Survey Report produced by the U.S. Geological Survey (USGS)/U.S. Bureau of Mines (USBM), on Bureau of Land Management (BLM) WSA in Montana. Announcement of a 60-day comment period to obtain previously unknown mineral information on the area.

SUMMARY: The Montana BLM is requesting the public to review a combined USGS and USBM "Mineral Survey Report" which has been completed for this preliminarily suitable WSA. If the public identifies significant differences in interpretation of the data presented in this report, or submits significant new minerals data for consideration, the BLM will request that USGS/USBM evaluate these comments in relation to their final Mineral Survey Report. The BLM will consider the USGS/USBM evaluations as well as the Mineral Survey Report in developing final wilderness suitability recommendations. A copy of the WSA report can be reviewed in BLM offices in Bilings and Butte, Montana.

DATES: New information will be accepted on the report until December 10, 1990.

ADDRESSES: Send information on report to the Deputy State Director, Division of Mineral Resources, Bureau of Land Management, Montana State Office, P.O. Box 36800, Billings, Montana 59107.

FOR FURTHER INFORMATION CONTACT: Jerry Klem, Bureau of Land Management, Montana State Office, P.O. Box 36800, Billings, Montana 59107, Telephone (406) 255-2825.

SUPPLEMENTARY INFORMATION: Section 603 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2785, directed the Secretary of the Interior to inventory lands having wilderness characteristics as described in the Wilderness Act of September 3, 1964, and from time to time report to the President his recommendations as to the suitability or nonsuitability of each area for preservation as wilderness. The USGS and USBM are charged with conducting mineral surveys for areas that have been preliminarily recommended suitable for inclusion into the wilderness system to determine the mineral values, if any, that may be present in such areas.

To ensure that all available minerals data are considered by the BLM prior to making its final wilderness suitability recommendations to the Secretary of the Interior, the Montana State Director is providing this public review and comment period. Usually, there is a 1- to 2-year lag time between actual field work and final printing of a Mineral Survey Report. New information may have been collected by the public during this lag time, or the public may have a

new interpretation of the data presented in the Mineral Survey Report. Any new data or new interpretations of data in the report will be assessed for its significance and validity by the BLM. Significant new minerals data or new interpretations of the minerals data will be forwarded to the USGS and USBM for further consideration. Evaluations received by the BLM from the USGS and USBM will be considered by the State Director in the final wilderness suitability recommendations.

Information requested from the public via this invitation is not limited to any specific energy or mineral resource. Information can be in the form of a letter and should be as specific as possible, and include:

1. The name and number of the subject WSA and Mineral Survey Report.

2. Mineral(s) of interest.

3. A map or land description by legal subdivision of the public land surveys or protracted surveys showing the specific parcel(s) of concern within the subject WSA.

4. Information and documents that depict the new data or reinterpretation of data.

5. The name, address, and phone number of the person who may be contacted by technical personnel of the BLM, USGS, or USBM assigned to review the information.

Geologic maps, cross-sections, drill hole records and sample analyses, etc., should be included. Public literature and reports may be cited. All information submitted and marked confidential will be treated as proprietary data, and will not be released to the public without consent.

New information will be accepted on the following Mineral Survey Report:

Mineral Resources of the Sleeping Giant Wilderness Study Area, Lewis and Clark County, Montana (Open File Report MT-041-7).

This report is available for review in BLM offices, but is not available for sale or removal from the office. Copies of the report may be purchased from: U.S. Geological Survey, Books and Open File Reports, P.O. Box 25425, Federal Center, Denver, CO 80225.

Dated: October 3, 1990.

Robert M. Fairchild,

Acting State Director.

BILLING CODE 4310-DN-M

DEPARTMENT OF THE INTERIOR

[WY-930-01-4214-10; WYW 121656]

Notice of Proposed Withdrawal and Opportunity for Public Meeting; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, has filed an application to withdraw 275.84 acres of National Forest System land for protection of the proposed Burgess Visitor Information Center Site while in the final development stages.

DATES: Comments and requests for a meeting should be received on or before January 14, 1991.

ADDRESSES: Comments and meeting requests should be sent to the Wyoming State Director, BLM, 2515 Warren Avenue, Cheyenne, Wyoming 82001.

FOR FURTHER INFORMATION CONTACT: Tamara Gertsch, BLM Wyoming State Office, 307-775-6115.

SUPPLEMENTARY INFORMATION: On September 17, 1990, the U.S. Department of Agriculture filed an application to withdraw the following described National Forest System land from location and entry under the United States mining laws, subject to valid existing rights:

Sixth Principal Meridian

Bighorn National Forest

T. 55 N., R. 88 W.,
Sec. 6, lots 1 and 2.
T. 56 N., R. 88 W.,
Sec. 31, SE¼;
Sec. 33, SW¼SW¼.

The areas described contain 275.84 acres in Sheridan County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

The application will be processed in accordance with the regulations set forth in 43 CFR part 2300.

For a period of 2 years from the date of publication of this notice in the Federal Register, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which will be permitted during this segregative period are those uses within the statutory authorities pertinent to National Forest System land and subject to discretionary approval.

The temporary segregation of the land in connection with this withdrawal application shall not affect the administrative jurisdiction over the land, and the segregation shall not have the effect of authorizing any use of the land by the Department of Agriculture.

Dated: September 27, 1990.

James K. Muelda,

Deputy State Director, Wyoming State Office.

BILLING CODE 4310-22-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Application; Arenol Chemical Corp.

Pursuant to § 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on July 23, 1990, Arenol Chemical Corporation, 185 Meister Avenue, Somerville, New Jersey 08876, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Amphetamine (1100)	II
Methamphetamine (1105)	II
Phenylacetone (8501)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than November 14, 1990.

Dated: October 4, 1990.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 90-24206 Filed 10-12-90; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances, Registration; M.D. Pharmaceutical

By Notice dated January 30, 1990, and published in the Federal Register on February 9, 1990, (55 FR 4728), M.D. Pharmaceutical Inc., 3501 West Garry Avenue, Santa Ana, California 92704, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Diphenoxylate (9170)	II
Methylphenidate (1724)	II

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and title 21, Code of Federal Regulations, § 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: October 4, 1990.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted on or before November 14, 1990.

ADDRESSES: Send comments to Ms. Susan Daisey, National Endowment for the Humanities, Grants Office, room 310, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202–786–0494) and Mr. Daniel Chenok, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503 (202–395–7316).

FOR FURTHER INFORMATION CONTACT: Ms. Susan Daisey, National Endowment for the Humanities, Grants Office, room 310, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202–786–0494) from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, or extensions, or reinstatements. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what the form will be used for; (6) an estimate of the number of responses; (7) the frequency of response; (8) an estimate of the total number of hours needed to fill out the form; (9) an estimate of the total annual reporting and recordkeepig burden. None of these entries are subject to 44 U.S.C. 3504(h).

Category: Revision

Title: NEH Teacher-Scholar Program for Elementary and Secondary School Teachers.

Form Number: 3136–0122.

Frequency of Collection: Annual.

Respondents: Individuals or households Academic scholars—teachers, administrators.

Use: The application instructions provide direction for preparing narrative and budgetary parts of applications for grant funds.

Estimated Number of Respondents: 500.

Frequency of Response: Once.

Estimated Hours for Respondents to Provide Information: 10 per respondent.

Estimated Total Annual Reporting and Recordkeeping Burden: 5,250 hours.

Music Advisory Panel Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Chorus Section) to the National Council on the Arts will be held on October 23, 1990 from 9 a.m.–6 p.m., October 24 from 8:30 a.m.–6 p.m. and October 25 from 8:30 a.m.–5 p.m. in room M14 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public on October 25 from 3 p.m.–5 p.m. The topics will be policy discussion and guidelines review.

The remaining portions of this meeting on October 23 from 9 a.m.–6 p.m., October 24 from 8:30 a.m.–6 p.m. and October 25 from 8:30 a.m.–3 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the

determination of the Chairman of August 7, 1990, as amended, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code.

Any interested persons may attend, as observers, meetings, or portions thereof, of advisory panels which are open to the public.

Members of the public attending an open session of a meeting will be permitted to participate in the panel's discussions at the discretion of the chairman of the panel if the chairman is a full-time Federal employee. If the chairman is not a full-time Federal employee, then public participation will be permitted at the chairman's discretion with the approval of the full-time Federal employee in attendance at the meeting, in compliance with this guidance.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682-5532, TTY 202/682-5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

Dated: September 26, 1990.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-3005 (which should be mentioned in all correspondence concerning this draft guide), is titled "Standard Format and Content for Emergency Plans for Fuel Cycle and Materials Facilities" and is intended for Division 3, "Fuels and Materials Facilities." This regulatory guide is being developed to provide guidance acceptable to the NRC staff on the information to be included in emergency plans for fuel cycle and materials facilities. The guide also would establish a format for presenting the information.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on the guide. Comments should be accompanied by supporting data. Written comments may be submitted to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by November 30, 1990.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with: (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Information Support Services. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a)

Dated at Rockville, Maryland, this 28th day of September 1990.

For the Nuclear Regulatory Commission.

Warren Minners,

Director, Division of Safety Issues Resolution, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-M

[Docket No. 50-483]

Union Electric Co. Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-30, issued to the Union Electric Company (the licensee), for operation of the Callaway Plant located in Callaway County, Missouri.

The amendment would revise Technical Specification 3/4.7.1.7 to allow an exception to Technical Specification 4.0.4. The proposed amendment would allow sufficient plant conditions to be established for steam generator atmospheric steam dump valve surveillance after entry into a mode (Mode 3) for which the surveillance requirements apply.

The proposed amendment is required prior to entry into Mode 3 at the conclusion of the current refueling outage. Mode 3 is currently scheduled to be entered on November 4, 1990.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has porovided an evaluation indicating that the proposed change does not involve a significant hazards consideration under the Commission's regulations in 10 CFR 50.92 as follows:

The proposed change does not involve a significant hazards consideration because operation of Callaway Plant with this change would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The change allows the surveillance for the ASD [Atmospheric Steam Dump] valves to be performed at conditions similar to those in which the valves would be required to function in the event of a SGTR [Steam Generator Tube Rupture]. Since no design change is being made the probability of an accident previously evaluated has not increased. The testing of valves at conditions similar to those anticipated when the valves are required to function provides assurance that the consequences of an accident and probability or consequences of a malfunction are not increased over those evaluated in the FSAR [Final Safety Analysis Report].

2. Create the possibility of a new or different kind of accident from any previously evaluated. This is based on the fact that no design changes are involved. The change provides assurance that the ASD valves will perform as designed.

3. Involve a significant reduction in a margin of safety. This change provides assurance that the ASD valves will perform as designed to mitigate the consequences of a postulated SGTR event. The margin of safety is not reduced.

Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within fifteen (15) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice.

Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By October 31, 1990, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document room, the Gelman Building, 2120 L Street NW., Washington, DC 20555 and at the Local Public Document Room located at the Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the basis of the contention and a concise statement of the alleged facts or expert

opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidience and cross-examine witnesses.

If the amendment is issued before the expiration of 30-days, the Commission will make a final determination on the issue of no significant hazards considerations. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves a no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards considerations. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the Federal Register a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1 (800) 325-6000 (in Missouri 1 (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John N. Hannon: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and the Gerald Charnoff, Esq. and Thomas A. Baxter, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC, 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.174(d).

For further details with respect to this action, see the application for amendment dated September 28, 1990, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the Local Public Document Room, the Callaway County Public Library, 710 Court St., Fulton, Missouri, 65251.

Dated at Rockville, Maryland, this 9th day of October 1990.

For the Nuclear Regulatory Commission.

John N. Hannon,

Director, Project Directorate III-3, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301-73]

Notice of Proposed Determination Under Section 304 of the Trade Act of 1974, as Amended, Regarding Thailand's Restrictions on Access to Its Cigarette Market; Request for Public Comment

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of, and request for written comments on, proposed determination under section 304 of the Trade Act of 1974 (the "Trade Act"), as amended, 19 U.S.C. 2414.

SUMMARY: Pursuant to section 304(a)(2) of the Trade Act, 19 U.S.C. 2414, as amended by section 1301 of the Omnibus Trade and Competitiveness Act of 1988, the United States Trade Representative ("USTR") is required to determine on or before November 25, 1990, whether United States' rights under a trade agreement are being denied by the Royal Thai Government's policies and practices with respect to the importation, distribution and sale of cigarettes and whether the Royal Thai Government practices at issue are unreasonable, and burden or restrict U.S. commerce, within the meaning of section 301(a)(1)(A) or 301(b)(1), 19 U.S.C. 2411(a)(1)(A) and 19 U.S.C. 2411(b)(1), respectively. The Trade Representative is also considering appropriate action (subject to the specific direction, if any, of the President) in response to the Royal Thai Government's practices. The USTR welcomes written comments regarding such determination or responsive action with respect to the subject Thai government practices.

DATES: Written comments from interested persons are due November 14, 1990.

ADDRESSES: Comments should be addressed to the Acting Chairman, section 301 Committee, Office of the United States Trade Representative, room 223, 600 17th Street, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Peter Collins, Director for Southeast Asian Affairs, (202) 395-6813, or Catherine Field, Associate General Counsel, (202) 395-3432.

SUPPLEMENTARY INFORMATION: On April 10, 1990, the United States Cigarette Export Association (CEA) filed a petition under section 302(a) of the Trade Act of 1974, as amended, 19 U.S.C. 2412(a), alleging that the Royal

Thai Government and its instrumentality, the Thailand Tobacco Monopoly (TTM), engaged in acts, policies and practices that are unreasonable or discriminate against imports and burden and restrict U.S. commerce. The Thai government maintains an effective ban on the importation of foreign cigarettes and prohibits foreign investment in cigarette manufacture. The petitioner alleged that these bans on importation and investment, combined with high tariffs, discriminatory domestic taxes and TTM distribution practices, deny U.S. firms fair and equitable market opportunities. Finally, the CEA alleged that Thai government restrictions on cigarette advertising are intended to put foreign cigarette brands at a competitive disadvantage.

On May 25, 1989, the Trade Representative initiated an investigation of the Thai government's policies and practices affecting fair and equitable access to the Thai cigarette market (54 FR 23724, June 2, 1989). On April 3, 1990, the GATT Council of Representatives ("GATT Council") authorized establishment of a dispute settlement panel, under GATT Article XXIII:2, to examine the United States' complaint regarding the effective ban on importation and discriminatory domestic taxes maintained by the Thai government. During the course of the panel proceedings, the Thai government issued ministerial regulations amending its tax policy with respect to cigarettes.

On September 21, 1990, the GATT dispute settlement panel issued a report concluding that Thailand's import restrictions on cigarettes are contrary to the provisions of GATT Article XI:1 and are not justified by Article XI:2(c)(i), Article XX(b), or paragraph 1(b) of Thailand's Protocol of Accession.

The panel recommended that the GATT Contracting Parties request Thailand to bring its import restrictions into conformity with its obligations under the GATT. These recommendations and the panel's report will be discussed at the GATT Council meeting on November 7, 1990.

Pursuant to section 304 of the Trade Act, the USTR is required to determine whether Thailand's policies and practices affecting access to the Thai cigarette market deny "rights to which the United States is entitled" under the GATT and whether such policies and practices are unreasonable and burden or restrict U.S. commerce. This determination must be made no later than November 23, 1990, which is 18 months after the date of initiation of this investigation.

In light of the GATT panel report on this matter, the Trade Representative proposes to determine that rights to which the United States is entitled under a trade agreement are violated by Thailand's restrictions on imports of cigarettes and that other policies and practices of the Thai government adversely affecting access to the Thai cigarette market, are unreasonable and constitute a burden or restriction on U.S. commerce.

PUBLIC COMMENT: The public is invited to comment on this proposed determination and on appropriate action that should be taken in response to Thailand's policies and practices. The comments submitted will be considered in determining actionability under section 301 and in recommending any action under section 301 to the USTR. All written submissions must be filed in accordance with 15 CFR 2006.8. Submissions are to be made in twenty (20) copies, in English, by noon on November 14, 1990 to Acting Chairman, Section 301 Committee, Office of the U.S. Trade Representative, room 223, 600 17th Street, NW., Washington, DC 20506.

Catherine E. Field,

Acting Chairman, Section 301 Committee.

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[International Series Release No. 166; File No. 265-15]

Emerging Markets Advisory Committee; Meetings

AGENCY: Securities and Exchange Commission.

ACTION: Notice of meeting of the Security and Exchange Commission Emerging Markets Advisory Committee.

SUMMARY: This is to give notice that the Securities and Exchange Commission Emerging Markets Advisory Committee will conduct a meeting on October 23, 1990 in room 1C30 at the Commission's main offices, 450 Fifth Street NW., Washington, DC, beginning at 10 a.m. The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT: Thomas L. Riesenberg, Office of General Counsel, (202) 272-3088, or Joseph G. Mari, Office of International Affairs, (202) 272-2306, Securities and Exchange Commission, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: In accordance with section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. app. 10a, the Securities and Exchange Commission Emerging Markets Advisory Committee hereby gives notice that it will conduct a meeting on October 23, 1990 in room 1C30 at the Commission's main offices, 450 Fifth Street NW., Washington, DC, beginning at 10 a.m. The meeting will consider and discuss requests for Commission technical assistance to emerging securities markets in Eastern Europe and elsewhere. There will also be a discussion regarding financial sector technical assistance being provided by U.S. government agencies to Eastern European countries. The meeting will be the second meeting of the Advisory Committee, and will be open to the public.

The Chairman has determined that this meeting should be held sooner than fifteen days after publication of this notice in the Federal Register in order to obtain the assistance of the Advisory Committee on areas in which Commission assistance has been requested and in view of prior scheduling commitments of the Committee members.

Dated: October 9, 1990.

Jonathan G. Katz,

Advisory Committee Management Officer.

National Highway Traffic Safety Administration

Meeting To Discuss Rulemaking, Research and Enforcement Programs; Correction

AGENCY: National Highway Traffic Safety Administration.

ACTION: Notice; Correction.

SUMMARY: The National Highway Traffic Safety Administration is correcting the dates on an announcement of a NHTSA quarterly public meeting and a meeting on child safety seats, published on Friday, October 5, 1990, on page 40977 of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Carnes, Office of Rulemaking, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Carnes telephone number is (202) 366-1810.

SUPPLEMENTARY INFORMATION: The following dates have been changed. The agency's quarterly public meeting will be held on November 16, 1990. Questions relating to the agency's rulemaking, research and enforcement programs, must be submitted in writing

by November 7, 1990. If sufficient time is available, questions received after the November 7, date may be answered at the meeting. A consolidated list of the questions submitted by November 7, 1990, and the issues to be discussed will be mailed to interested persons by November 9, 1990, and will also be available at the meeting. The meeting on child safety seats will also be held on November 10, 1990.

Issued on: October 10, 1990.

Barry Felrice,

Associate Administrator for Rulemaking.

Part II

Department of Defense
General Services Administration
National Aeronautics and Space Administration

48 CFR Parts 27 and 52
Federal Acquisition Regulation (FAR); Rights in Technical Data

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 27 and 52

Federal Acquisition Regulation (FAR); Rights in Technical Data

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: The objective of this advanced notice of proposed rulemaking is to:

1. Establish a rule on technical data for use by all government agencies to replace the current Department of Defense FAR Supplement Interim Rule in subpart 227.4 and the current FAR rule in subpart 27.4; and

2. Implement section 1(b)(6) of Executive Order 12591. This section requires the development of a uniform policy which will permit contractors to retain rights to software, engineering drawings, and other technical data generated under government contracts awarded to them, in exchange for a royalty-free use of the data by or on behalf of the government.

It is the government's intent to develop regulations on rights in technical data that are fair and equitable to both the government and industry. This is a difficult task not only because of the complexity of the subject but also because the interests of the government and of industry on this subject may not always be compatible. Accordingly, this advanced notice of proposed rulemaking is being published in a preliminary form to encourage comments, suggestions, recommendations and rewrites. We will also conduct at least six public meetings to allow additional comments, discussions and presentations on this rule and on the subject of rights in technical data.

DATES: *Public Hearings*: Hearings will be conducted from 9 a.m. to 4:30 p.m. local time as indicated below:

Date	Room
Friday, October 26	Hall of Flags.
Monday, November 19	Hall of Flags.
Friday, December 7	Herman Lay Room.
Friday, December 21	Herman Lay Room.
Friday, January 11	Herman Lay Room.

Should additonal hearings be required, the dates, times and location will be published in a subsequent Federal Register.

Comment Date: Comments concerning this advanced notice of proposed rulemaking should be submitted to the address shown below on or before January 31, 1991.

ADDRESSES:

Public Hearings: U.S. Chamber of Commerce, 1615 "H" Street, NW, Washington DC 20062.

Comments: Interested parties should submit written comments to: Linda W. Neilson, Procurement Analyst, ODASD(P)/DARS, c/o OUSD(A)(M&RS), room 3D139, Pentagon, Washington, DC 20301-3062.

Please cite FAR/DAR Case 90-436 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Linda W. Neilson, telephone (703) 697-7266.

SUPPLEMENTARY INFORMATION:

I. Background

The objective of this rulemaking is to establish a regulation common to all government agencies which replaces the DFARS 1988 Interim Rule and the present FAR subpart 27 and addresses both government and industry concerns with the present DFARS coverage. Accordingly, this advanced notice of proposed rulemaking is being published in preliminary form to encourage public comments and suggestions. It is planned that, after the public hearings and receipt of comments, a proposed rule will be published for additional public comment.

Since 1984, the DoD FAR Supplement subpart 227.4, "Technical Data, Other Data, Computer Software, and Copyrights", has been extensively rewritten to implement three major statutory changes to rights in technical data.

In October 1984, the Fiscal Year 1985 DoD Authorization Act (Pub. L. 98-525, also entitled "The Defense Procurement Reform Act of 1985) was enacted and, in part, amended section 2320 of title 10. The purpose of this legislative change was to emphasize a balancing of both DoD's and the contractor's interests in rights in technical data, to prohibit DoD from requiring contractors to relinquish their proprietary interests in technical data in order to do business with the government, and, to create a due process procedure validating technical data. Public Law 99-500, the Fiscal Year 1987 DoD Authorization Act, was enacted in October 1986. This law, in part, further amended section 2320 of title 10 to require negotiations in mixed funding situations to apportion rights in technical data between the government and the contractor. This led to the creation of a third standard right, Government Purpose License Rights. Finally, in December 1987, Public Law 100-180 was enacted. Again, section 2320 of the title 10 was amended placing a stronger emphasis on the requirements to negotiate rights in a mixed funding situation, and among other changes, requiring DoD to develop definition for certain terms such as, "developed exclusively at private expense."

An interim DFARS rule was published in October 1988 and is currently in effect. This Interim Rule implements the statutory changes, enumerated above, on rights in technical data.

Public comments on the DFARS Interim Rule focused primarily in the following areas: (a) Data rights of industry and government in mixed funding situations; (b) definition of "developed"; (c) developed exclusively at private expense; (d) developed exclusively with government funds; (e) required for the performance of a government contract or subcontract; (f) introduction of government purpose license rights. Some comments asserted that the revisions were overly restrictive, would stifle private innovation, and would allow the government to obtain a contractor's design and manufacturing data for which the government has no requirement, and which are essential to a contractor's competitive position.

For civilian agencies, the FAR has been changed once to address and support the requirements of Public Law 98-577, Small Business and Federal Procurement Competition Enhancement Act of 1984.

Related legislation includes the Competition in Contracting Act (CICA) which encourages competitive reprocurement for government spare parts contracting to a greater extent than prior to 1984; and the Freedom of Information Act, which provides for release of government held documents in response to requests from the public, including from potential competitors.

The areas enumerated above have continued to be sources of difficulty between industry and government. This advanced notice of proposed rulemaking effort addresses the specific data rights issues as they relate to the acquisition of technical data.

II. Overview of the Advanced Notice

This advanced notice of proposed rulemaking consists of prescriptive material and clauses containing guidance on the protection and allocation of rights in data (including computer software), developed, delivered, or used in the performance of government contracts. In the interest of conciseness, not all provisions are discussed below; however comments are solicited on the entire rule.

A. Policy Summary

It is the government's policy to obtain only those rights in data that it needs; assure the protection of contractors' rights in proprietary interest in data; assure that a contractor does not have to relinquish legitimate rights it has in data as a condition for obtaining a government contract; and provide rights in data as incentives to contractors to commercialize the results of government funding.

B. Definitions

In this advanced notice of proposed rulemaking, some of the more controversial definitions have been revised. For example, the definitions of "Developed," "Developed Exclusively with Government Funds," and "Developed Exclusively at Private Expense," as they appear in the DFARS interim rule have been incorporated and revised to clarify how direct and indirect funding would be treated.

Some definitions have been changed, added, or combined to more appropriately reflect the application of rights in data, or to meet statutory requirements for DoD to define terms. Some of the definitions added are: "Data base," "Manuals and instructional materials," "Mixed funding," and "Restricted rights computer software." This advanced notice of proposed rulemaking provides for "Government purpose rights." A new definition of "Computer Software" has been drafted. It does not include data bases, manuals and instructional materials, or software documentation.

C. Allocation of Rights

This advanced notice of proposed rulemaking addresses four types of rights, Unlimited, Limited, Restricted, and Government Purpose. Unlimited, limited, and restricted rights are set forth in paragraph (b) of the clause at 52.227–14. (GPR) apply when the basic clause is used with Alternate II. All rights are discussed in 27.404 and are summarized below.

1. Unlimited Rights

The government acquires unlimited rights to data resulting directly from government funding unless the contrator is permitted to copyright, or acquire government purpose rights, for such data. In these latter instances, the contractor has exclusive commercial rights, subject to appropriate license rights to the government for government purposes. In addition, the government acquires with unlimited rights or a copyright license (where applicable) for government purposes in delivered data that is form, fit, and function data, certain manuals and instructional materials, corrections or changes to government furnished data, and other delivered data which the contractor has not protected, or is not protectable, as limited rights data or restricted rights computer software.

2. Limited Rights

The government acquires limited rights only to data pertaining to items, components, or processes developed exclusively at private expense and such data has been protected by the contractor. Under such rights, the government may not use the data for purposes of manufacture or reprocurement. The data may be used for other internal government purposes, and may be released outside the government for specified limited purposes provided the government makes it subject to prohibitions against further disclosure and use.

A contractor is required to place a prescribed notice on limited right data when delivered to the government. This advanced notice of proposed rulemaking sets forth the governments rights regarding the data and imposes obligations on the government to protect the data from unauthorized disclosure and use. The government may also elect by insertion of Alternate I, to allow the contractor to provide form, fit and function data in lieu of limited rights data.

3. Restricted Rights

The government acquires restricted rights only to computer software developed at private expense. Under such rights the computer software may be used and disclosed at restricted sites or locations (usually the CPU for which it was acquired unless otherwise agreed), with certain rights in the government to make copies for backup, safekeeping, and backup purposes. Such computer software will be subject to disclosure prohibitions if so protected by the contractor; otherwise the government acquires a copyright license for the stated purposes.

A contractor is required to place a prescribed notice on restricted rights data when delivered to the government. This advanced notice of proposed rulemaking sets forth the governments rights regarding the data and imposes obligation on the government to protect the data from unauthorized disclosure and use. The government may also elect, by insertion of Alternate I, to allow the contractor to provide form, fit, and function data in lieu of restricted rights data.

4. Government Purpose Rights

The contractor may acquire government purpose rights to technical data and computer software which otherwise would be subject to unlimited rights under certain circumstances if the contractor states an intention to commercialize the items, components, or processes to which the data pertains, or the computer software. Such rights will normally be applicable unless certain stated reasons (based on statutory requirements or programmatic needs) exist. Government purpose rights may also be negotiated in mixed funding situations.

Under government purpose rights, the contractor retains exclusive commercial rights, subject to a license to the government for all government purposes (including reprocurement), subject to appropriate disclosure prohibitions. Time limitations, after which the data reverts to unlimited rights data or copyrighted data normally apply to government purpose rights. Such rights are applicable by use of the basic clause with its Alternate II.

D. Copyright

The basic approach of current FAR 27.4 has been adopted regarding copyright of data first produced under contract by the contractor (see 27.404–5(c) of this advanced notice of proposed rulemaking.) This provides more commercial exclusivity to the contractor than under the existing DFARS Interim Rule.

Two procedural approaches are provided to enable a contractor to be permitted to copyright such data: (1) By specific request (either at the time of contract or during contract performance for identified data items); or (2) by automatic permission for all data except as otherwise stated in the contract. The former approach is provided in the basic clause in this advanced notice of proposed rulemaking, and the latter approach is available when the clause is used with its Alternative IV.

BEST COPY AVAILABLE

Permission is to be granted under the former approach unless certain specifically stated reasons (based on programmatic needs or statutory requirements) exist. Permission is automatically granted for scientific and technical articles based on data first produced in the performance of the contract and published in academic, technical, or professional journals, symposia proceedings, or similar works. Permission also should be granted in all computer software procurements under a GSA Delegation of Procurement Authority (DPA).

E. Computer Software

This advanced notice of proposed rulemaking includes coverage of rights to computer software, as well as rights to technical data. However, definitional changes have been made to make more clear the distinction between computer software and technical data for the purpose of allocating restricted rights to privately developed computer software. Essentially, a functional definition of computer software has been adopted that includes all hierarchical levels of a computer program regardless of whether machine readable or human readable. Thus source code listings, design details, algorithms, processes, flow charts, formulas, and related material that would enable a computer program to be produced, created, or compiled receives the same treatment for rights purposes as executable code.

Concurrently, a definition of "data base" has been provided to enable data comprising a data base to be treated separately from computer software. Similarly, manuals and instructional material relating to a computer program are treated as data and not computer software.

The rights to privately developed computer software (i.e., restricted rights) are the same regardless of whether or not the software may be considered "commercial." However, for procedural convenience and simplicity, commercial computer software may be separately acquired under the clause at 52.227–19, Commercial Computer Software, for that purpose, rather than under the basic data rights clause (see paragraph 27.405(c) of this advanced notice proposed rulemaking.) This separate clause for commercial computer software is particularly directed to resolving any inconsistencies with a vendor's standard commercial license or lease agreement and the restricted right normally acquired by the government, as well as any pertinent Federal laws and regulations.

F. Notification and Negotiation of Data Rights

The provisions at 52.227–15 may be included in solicitations to require proposers to identify any data to be delivered with less than unlimited rights in data which qualifies as limited rights data or restricted rights computer software or data in which the proposer requests Government Purpose Rights. However, an offer may not be found unacceptable for purposes of award solely because the offeror refuses to sell or otherwise relinquish to the government rights in technical data to which the offeror is otherwise entitled under applicable law or regulation.

The advanced proposed rule at 27.405–2 provides guidance for those situations in which the parties cannot conclude negotiations of rights in data before contract award. Alternate III may be added to the clause at 52.227–14 to require the contractor to provide continuing notification of data to be delivered with other than unlimited rights after award and throughout the performance of the contract and gives the government the right to continue negotiation with regard to the rights to such data. The clause at 52.227–23 may also be used in these situations.

III. Issues Highlighted for Specific Consideration

A. Use of the Term "Required for Performance"

The definition, "required for performance of a government contract or subcontract", which is contained in the Defense FAR Supplement Interim Rule has been very controversial. Industry believes that this definition is harmful because it allows the government to acquire unlimited rights in independently initiated private development which occurred during performance of a government contract and where the product of the independent development is used in performance of the government contract. Industry wants the definition to be removed. The government believes that elimination of the definition is harmful because government would only be able to acquire unlimited rights when development is specified and fully funded. However, detailed specification of what an item, component, or process will finally be, is not always possible in the early development stages. DoD is also concerned that without the definition, contractors would be able to extract pieces of the development effort, privately develop it, and preclude government from acquiring unlimited rights.

This advanced notice of proposed rulemaking does not contain the definition of "required for performance" but does use the phrase "developed and necessary" for the performance of this contract in paragraph (b)(1)(i)(B) of the clause at 52.227–14, setting forth situations where the government acquires unlimited rights. We believe that the application of this concept has been narrowed in this advanced notice of proposed rulemaking. We recognize that further refinement may be possible.

We encourage comments and alternatives which would satisfy both industry and government's concerns. One such alternative may be to add language to 52.227–14 to state that during the performance of a contract to develop an item, the contractor may discover that it is necessary to develop some other item, component, or process in order to complete the contract, even though this other item, component, or process was not specified in the contract. In this event, the contractor will notify the government of this situation so that the parties can determine what rights the government should acquire. Another such alternative may be that when this type of situation arises the government acquire only Government Purpose Rights.

Comments on the manner in which the concept of "required for performance" is treated in the advanced proposed rule are encouraged.

B. Commercial Products

Rights in technical data for commercial products (other than commercial software) have not been addressed specifically in this advanced notice of proposed rulemaking. Issues include: Whether there should be separate coverage (recognizing that in certain circumstances for commercial products, other rights in data may exist); the definition of commercial products; and the allocation of rights to such products and their modifications (major and minor). It is possible that separate coverage may be more appropriate. Consideration may be given to such coverage in the final rule including consistency with the final rule of DFARS part 211 (Acquisition and Distribution of Commercial Products). The following is an outline of a suggested approach. Comments on the need for separate coverage and the following suggested approach are invited.

1. Definitions

"Commercial products" means items, including computer software, regularly used for other than government

purposes which, in the course of normal business operations:

(a) Have been sold or traded to the general public;

(b) Have been offered for sale to the general public at established prices but not yet sold;

(c) Although intended for sale or trade to the general public, have not yet been offered for sale but will be available for commercial delivery in a reasonable period of time;

(d) Are described in paragraphs (a), (b), or (c) above and would require only minor modification in order to meet the requirements of the procuring agency.

"Minor modification" means modification to a commercial product that does not alter the performance or physical characteristic of the product.

2. Minimum Government Needs

When the government procures commercial products or modified commercial products, the contractor should be required to provide to the government only that deliverable technical data as are normally delivered to its commercial customers, except for:

(i) Technical data required to properly maintain and repair the items when maintenance or repair is not otherwise the contractor's responsibility under the contract;

(ii) Technical data describing the proper operating or handling procedures for the items when such data are not customarily provided to the general public as part of an item's price;

(iii) Technical data required for training, installation, emergency repair, and overhaul;

(iv) Technical data describing the modifications made to the items in order to meet the requirements of the procuring agency.

3. Rights to Technical Data Pertaining to Commercial Products for Government Use

Items, components, or processes initially developed for and included in commercial products shall be considered items, components and processes developed at private expense. The government will acquire the same rights for data relating to these items, components or processes as are provided to commercial customers.

When the government requires technical data for a commercial product in a format different from, or supplemental to, that provided to commercial customers, the government will acquire the same rights as are provided to commercial customers, but may negotiate with the Contractor, or Subcontractor, to acquire additional government purpose rights, where appropriate.

4. Rights to Technical Data Pertaining to Modifications to Commercial Products for Government Use

When a commercial product is modified for Government use, the government will acquire government purpose rights to the technical data pertaining to the modification, except for

(i) Modifications which are fully funded by the Government and are segregable. The government may acquire unlimited rights to data pertaining to these modifications.

(ii) Modifications which are fully funded at private expense. The government will acquire the same rights as the commercial customer, or the same rights as the Government receives to the commercial product itself, to data pertinent to the modifications, but may negotiate with the Contractor, or Subcontractor, to acquire additional Government purpose rights, where appropriate.

(iii) Minor Modifications. Rights to data pertaining to a minor modification to a commercial product shall be the same as the rights to the data pertaining to the product modified.

Comments on the manner in which data rights for commercial products is treated in this advanced notice of proposed rulemaking are encouraged.

C. Concept of Segregability

Both 10 U.S.C. 2320 (for the DoD) and 41 U.S.C. 418a. (for the civilian agencies) require that the rights in technical data be determined on the basis of the funding of the development of the item, component, or process to which the technical data pertains. Industry has expressed concern that if the funding test is applied at a total product or system level, industry may lose its proprietary interests in data to lower level components which it developed at its own expense. This advanced notice of proposed rulemaking addresses this concern by specifying at 27.402(c) and 27.404(a)(4) that the principle of segregability will be used and that items, components, processes, and computer software will be identified at the lowest practical identifiable level, and the funding test will then be applied at this level.

Comments on the manner in which segregability is treated in the advanced notice of proposed rulemaking are encouraged.

D. Treatment of Government Purpose Rights

The treatment of government purpose rights would be expanded to make it clear that such rights are available either as an incentive to achieve commercial use of items, components, processes, or computer software developed in the performance of a government contract, or to provide a balancing of interests in mixed funding situations. Such rights would apply when the clause at 52.227–14 is used with its Alternate II. A discussion of such rights is at 27.404–4, and the procedures for acquiring them are at 27.405–2. Such rights would be available, for commercialization, when requested by the contractor along with a statement of an intent to commercialize the item, component, process or computer software that will be, or has been, developed under contract to which the data pertains. The request may be made either prior to contract or after contract award. The request for government purpose rights would be granted unless certain specified exceptions exist.

Also, government purpose rights may be requested, and made subject to negotiations, for technical data pertaining to any item, component, process, or computer software developed with mixed funding. This may occur either prior to contract, or during contract performance when the post award notification and negotiation procedures of 27.405–4 are used.

Comments on the manner in which government purpose rights are treated in this advanced notice of proposed rulemaking are encouraged.

List of Subjects in 48 CFR Parts 27 and 52

Government procurement.

Linda E. Greene,

Deputy Director, Defense Acquisition Regulatory System.

Therefore, it is proposed that 48 CFR parts 27 and 52 be amended as set forth below:

1. The authority citation for 48 CFR parts 27 and 52 continues to read as follows:

Authority. 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

PART 27—PATENTS, DATA, AND COPYRIGHTS

2. Subpart 27.4 is revised to read as follows:

Subpart 27.4—Rights in Data and Copyrights

Sec.
27.400 Scope of subpart.
27.401 Definitions.
27.402 Policy.
27.403 Rights in data—General.
27.404 Rights in data.
27.404-1 Unlimited rights data.
27.404-2 Limited rights data.
27.404-3 Restricted rights computer software.
27.404-4 Government purpose rights.
27.404-5 Copyrighted data.
27.404-6 Release, publication, and use of data.
27.404-7 Contractor licensing.
27.405 Notification and negotiation procedures.
27.405-1 Notification.
27.405-2 Negotiation of Government purpose rights.
27.405-3 Additional negotiations.
27.405-4 Postaward notification.
27.405-5 Negotiation factors.
27.406 Other data rights provisions.
27.407 Omitted, nonconforming, and unauthorized markings (validation).
27.407-1 Omitted and nonconforming markings.
27.407-2 Unauthorized markings and validations.
27.408 Acquisition of data, general procedures.
27.409 Rights to technical data in successful proposals.
27.410 Solicitation provisions and contract clauses.

27.400 Scope of subpart.

This subpart prescribes policies, procedures, and contract clauses for executive agencies with respect to the rights (including copyright) in, and the acquisition of, data (including technical data and computer software) produced, furnished, or specifically used in the performance of a Government contract or subcontract.

27.401 Definitions.

Computer software, as used in this subpart, means—

(1) Computer programs which are data comprising a series of instructions, rules, routines or statements which allow or cause a computer to execute an operation or series of operations; and

(2) Data comprising source code listings, design details algorithms, processes, flow charts, formulae, and related material that would enable the computer program to be produced, created, or compiled.

Data, as used in this subpart, means recorded information, regardless of form, the media on which it may be recorded, or the method of recording. The term includes, but is not limited to, technical data and computer software and computer data bases. The term does not include data incidental to the administration of a contract, such as financial, administrative, cost and pricing, or management information.

Data base, as used in this subpart, means a collection of data recorded in a form capable of, and for the purpose of, being stored in, processed, and operated on by a computer. The term does not include computer software.

Detailed design, manufacturing, or process data, as used in this subpart, means technical data of sufficient detail to enable the essentially identical reproduction, or manufacture, of an item, component, or the performance of process, to which the data pertains.

Developed, as used in this subpart, means that the item, component, process, or computer software exists and is workable. To exist the item or component must have been constructed or the process or computer program practiced. To be workable the item, component, process, or computer program has been analyzed or tested sufficiently to demonstrate to reasonable people skilled in the applicable art that there is a high probability that it will operate as intended. Whether, how much, and what type of analysis or testing is required to establish workability depends on the nature of the item, component, process, or computer software, and the state of the art. To be considered "developed" the item, component, process, or computer software need not be at the stage where it could be offered for sale or sold on the commercial market, nor must the item, component, process, or computer software be actually reduced to practice within the meaning of title 35 of the United States Code.

Developed exclusively with Government (Federal) funds, as used in this subpart, means, in connection with an item, component, process, or computer software, that the cost of development was paid for in whole by the Government. Independent research and development and bid and proposal costs, as defined in 31.205-18 (whether or not included in a formal independent research and development program), and costs allocated to overhead accounts in accordance with the Cost Accounting Standards (CAS) for those contracts covered by CAS, or in accordance with generally accepted accounting principles for those contracts not covered by CAS, are not considered to be costs of "development" with Federal funds for purposes of this definition.

Developed exclusively at private expense, as used in this subpart, means, in connection with an item, component, process, or computer software that no part of the cost of development was charged to the Government, with the express understanding that independent research and development and bid and proposal costs, as defined in 31.205-18 (whether or not included in a formal independent research and development program), and costs allocated to overhead accounts in accordance with the Cost Accounting Standards (CAS) for those contracts covered by CAS, or in accordance not covered by CAS, are not to be considered development costs charged to the Government for purposes of this definition.

Form, fit, and function data, as used in this supbpart, means data relating to items, components, or processes or computer programs that are sufficient to enable physical and functional interchangeability, as well as data identifying source(s), size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements.

Government purpose rights, as used in this subpart, means the rights of the Government to use, duplicate, and disclose detailed design, manufacturing, and process data and computer software by or on behalf of the Government, including disclosure outside the Government for any Government purpose. Data that may be subject to Government purpose rights will be specifically identified in the contract under which such rights are acquired, and the Governments's rights to use, duplicate, and disclose such data are as set forth in the Government Purpose Rights Notice of Alternate II, if included in the Data Rights clause of the contract as discussed in 27.404-4(a).

Limited rights data, as used in this subpart, means data pertaining to items, components, and processes developed exclusively at private expense, except as may be provided otherwise in 27.404-1, provided that such data has not been disclosed, furnished, or released to the Government or to others without restriction on further disclosure and use or is otherwise publicly available. The Government's rights to use, duplicate, and disclose limited rights data are as set forth in the Limited Rights Notice of the data rights clause of the contract, as discussed in 27.404-2(b).

Manuals and instructional materials, as used in this subpart, means data necessary for the installation, operation, maintenance and repair, or training with respect to any item, component, process, or computer software.

Mixed funding, as used in this subpart, means, with respect to Government Purpose rights, that both Government funds and private funds were used for the development of an

item, component, process, or computer software and the respective contributions of the Government and the contractor are not readily segregable. The items, components, processes, or computer software to which mixed funding applies must be by agreement of the parties and identified in the contract. Mixed funding cannot be created by application of normal or incidental contract overhead accounts, or by application of contractor funds arising from required contract performance, such as cost overruns, and claims for out of scope work.

Restricted rights computer software, as used in this subpart, means computer software developed exclusively at private expense, except as may be provided otherwise in 27.404–1, provided that such computer software has not been disclosed, furnished, or released to the Government or to others without restrictions on further disclosure and use, or is not publicly available. The Government's rights to use, duplicate, or disclose restricted computer software are as set forth in the Restricted Rights Notice of the data rights clause of the contract, as discussed in 27.404–3(b).

Technical data, as used in this subpart, means data which are of a scientific or technical nature. Technical data does not include computer software, but does include manuals and instructional materials and technical data formatted as a computer data base.

Unlimited rights, as used in this subpart, means the rights of the Government in data to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so.

27.402 Policy.

Data and the rights pertaining thereto acquired under contract by the Government require a balancing of diverse interests.

(a) *The Government's interest.* The Government has extensive needs for many kinds of data to carry out its many missions and programs. Agencies require data to obtain competition from suppliers, to fulfill responsibilities for dissemination and publication of the results of their activities, and to ensure appropriate utilization of the results of research, development, and demonstration activities, including the dissemination of information to foster technological innovation. Some agencies, such as the Department of Defense, have important additional needs for data since they must maintain an extensive logistical network capable of the repair and operation of its equipment and competitive replenishment of its inventories.

(b) *The contractor's interest.* Commercial and nonprofit organizations have many property rights in intellectual property such as rights in technical data and computer software. Improper disclosure of such information can result in loss of their property rights and their competitive advantages and can cause serious economic harm. Protection of computer software as restricted rights computer software and other data as limited rights data is necessary to encourage contractors to participate in Government programs and to develop and apply innovative concepts to such programs.

(c) *Balancing of the interests.* (1) The Government shall balance these interests by only obtaining the minimum rights in technical data and computer software consistent with its needs, and by assuring protection for a contractor's legitimate intellectual property rights. Efforts should be made to segregate items, components, processes, and computer software developed exclusively with Government funds from those developed exclusively at private expense at the lowest practical identifiable level to minimize the necessity of negotiating mixed funding situations.

(2) The contracting officer will consider the needs of the Government and the interest of the contractor. To this end, the contracting officer will consider whether the item, component, process, or computer software will be competitively acquired, whether repair and overhaul work will be needed, whether the repair or replacement parts will be commercial parts, whether the item may be procured by form, fit, and function data, performance specification or detailed design data, and similar considerations. The contracting officer should use the least intrusive procedure to fill the Government's needs in order to protect the contractor's legitimate economic interests. In no event shall a contractor be required to sell its rights to data to the Government as a condition for obtaining the award of a Government contract.

(3) Acquiring, maintaining, storing, retrieving, protecting, and distributing data are costly and burdensome to the Government. Therefore, it is necessary to carefully review data needs to avoid acquisition of unnecessary data.

27.403 Rights in Data—General.

(a) All contracts that require data to be produced, furnished, acquired, or specifically used in meeting contract requirements, must contain terms that delineate the respective rights of the Government and the contractor regarding the use, duplication, and disclosure of such data, except for certain categories of contracts, such as supply contracts resulting from sealed bidding, which in accordance with agency procedures, require only existing data, other than limited rights data and restricted rights computer software, to be delivered, and reproduction rights are not needed for such data. In general, the Rights in Data clause at 52.227–14, with appropriate Alternatives, is to be used for that purpose. This clause sets forth the conditions under which the Government acquires unlimited rights, limited rights, restricted rights, Government purpose rights, or a copyright license, as well as the scope of, and limitations and restrictions on the exercise of such rights, discussed in detail at 27.404. However, in certain contracts either the subject matter of the contract, or the intended use of the data, may require the use of another data rights clause, or may not require the use of any data rights clause, as described in 27.405.

(b) In selecting a data rights clause, it is important to note that any such clause does not specify the data (in terms of type, quantity, or quality) that is to be delivered, but only the respective rights of the Government and the contractor to use, disclose, or reproduce such data. Accordingly, the contract should also include appropriate schedule provisions to specify the data to be delivered (i.e., the acquisition of data). The basic policies and procedures for the acquisition of data are set forth in 27.408, and may be implemented in more detail in agency supplements or agency directives on data requirements consistent with such policies and procedures, as needed to meet specific agency needs.

27.404 Rights in data.

27.404–1 Unlimited rights data.

(a)(1) Under the basic rights in data clause at 52.227–14 the Government acquires unlimited rights in the following data, unless provided otherwise for copyrighted data, as discussed in 27.404–5, or unless such data are agreed to be subject to Government purpose rights, as discussed in 27.404–4—

(i) Data first produced in the performance of a Government contract, including but not limited to—

(A) Technical data pertaining to items, components, processes, or computer software developed exclusively at Government expense; and

(B) Technical data and computer software resulting directly from the performance of experimental, developmental, or research work specified as an element of performance under a Government contract; or data produced during and necessary for the performance of a Government contract.

(ii) Form, fit, and function data delivered or furnished for use in the performance of a Government contract;

(iii) Manuals and instructional materials furnished or required to be furnished for the installation, operation, maintenance and repair, or training with respect to any item, component, process, or for the installation, maintenance, operation, and training with respect to any computer software, that are required to be, or in fact, delivered or furnished for use in the performance of this contract;

(iv) All data which was in fact delivered or furnished for use in the performance of this contract which constitutes a correction or change to data furnished to the contractor by the Government; and

(v) All other data required to be or in fact delivered or furnished for use in the performance of this contract unless provided otherwise for limited rights data or restricted rights computer software.

(2) Data which has been released, furnished, or disclosed to the Government, or to others, without restrictions on further use or disclosure, or is otherwise publicly available, are unlimited rights data, unless published under copyright. If any of the foregoing data are published copyrighted data with the notice of 17 U.S.C. 401 and 402, the Government acquires such data under a copyright license rather than with unlimited rights. See 27.404–5.

(3) If any of the foregoing data have been identified in the contract as being subject to Government purpose rights, then the Government shall obtain a license for Government purposes only, for an agreed-to period, after which the data will become unlimited rights data or copyrighted data, as applicable. See 27.404–4.

(b) When the Government has unlimited rights in data, including computer software in the possession of the contractor, no payment will be made for rights of use of such data in performance of Government contracts or for the later delivery to the Government of such data. The contractor shall be entitled to compensation for converting computer software or other data into the prescribed form, if necessary, for reproduction and delivery to the Government.

(c) The application of the clause also results in the Government's obtaining unlimited rights to data bases consisting of the data described in paragraph (a) of this subsection; however, a data base may also contain data subject to limitations, as discussed in 27.404–2.

27.404–2 Limited rights data.

(a) The clause at 52.227–14 enables the contractor to protect data that qualifies as limited rights data (as that term is defined) and such data is not data to which the Government obtains unlimited rights by the terms of subparagraph (b)(1) of the basic clause at 52.227–14. This protection may be achieved by either marking such data with a prescribed Limited Rights Notice when delivered to the Government; or, if the clause is used with Alternate I, by withholding the qualifying data from delivery and furnishing form, fit, and function data (with unlimited rights) in lieu thereof. In order to determine whether limited rights data are to be acquired or are to be withheld by use of the clause with Alternate I, see the procedures at 27.405.

(b)(1) The limited rights acquired by the Government are set forth in the Limited Rights Notice of subparagraph (b)(2) of the clause at 52.227–14. Data subject to the Notice will not, without permission of the contractor, be used by the Government for purposes of manufacture and will not be disclosed outside the Government except for the specific purposes set forth in the Notice, and then only if the Government makes the disclosure subject to prohibition against further use and disclosure by the recipient.

(2) The specific purposes set forth in the Notice are—

(i) Emergency repair and overhaul; and

(ii) Release or disclosure of technical data (other than detailed design, manufacturing, or process data) to, or use of such data by, a foreign government or agency thereof, as the interests of the United States Government may require, for evaluation and informational purposes.

(3) Agencies may adapt and add the following additional specific purposes to the Limited Rights Notice:

(i) Use (except for manufacture) by a contractor under a service contract (of the type defined in 37.101).

(ii) Evaluation by non-Governmental evaluators.

(iii) Use (except for manufacture) by other contractors participating in the Government's program of which the specific contract is part, for information and use in connection with the work to be performed under each contract.

(4) Agencies subject to 10 U.S.C. 2302 must notify the contractor of the release of limited rights data outside of the Government.

(5) If pursuant to negotiations under 27.405, limited rights are to expire at a certain time, then the Notice must be modified to indicate the expiration date of the limited rights, and expressly state the rights that apply thereafter.

(c)(1) Rather than requiring the delivery of limited rights data with the Limited Rights Notice, the contracting officer may, by the use of Alternate I, permit the contractor to identify and withhold such data from delivery and require the delivery of only form, fit and function data (with unlimited rights) in lieu thereof. However, if the Government has a need to obtain specific items of limited rights data, the contracting officer may, notwithstanding the use of Alternate I, either specify the delivery of such data items in the contract, or by written request during contract performance, obtain the delivery of data that has been withheld or identified as withholdable. Any such data so delivered will be treated as limited rights data in accordance with paragraph (b) of this subsection. In addition, if agreed during negotiations, the contract may specifically identify limited rights data that are not to be delivered.

(2) Alternate I also provides that the contracting officer, or his representatives, at all reasonable times up to 3 years after delivery of the data, or final payment under this contract, whichever is later, may inspect at the contractor's facility or other appropriate site, any data (and records relating to such data) withheld as limited rights data or restricted rights computer software pursuant to subparagraph (c)(1) of this subsection for purposes of evaluating performance under this contract or verifying that such data was properly withheld.

(d) Data stored in a data base and data resulting from the manipulation thereof are not computer software, as defined in 27.401, but are technical data or other data and must be treated accordingly. If such data qualifies as limited rights data, it must be marked, and must be protected from disclosure. A data base could also contain Government purpose rights data, and copyrighted data. If a data base is not marked with appropriate legends or copyright notices, it will be assumed to be data subject to unlimited rights.

27.404-3 Restricted rights computer software.

(a) The clause at 52.227-14 enables the contractor to protect qualifying restricted rights computer software provided that such software is not data to which the Government obtains unlimited rights by the terms of subparagraph (b)(1) of the Rights in Data clause at 52.227-14. This protection may be achieved by either marking such computer software with a prescribed Restricted Rights Notice when delivered to the Government; or, if the clause is used with Alternate I, by withholding the qualifying computer software from delivery and furnishing form, fit and function data (with unlimited rights) in lieu thereof. In order to determine whether restricted computer software is to be acquired by the use of Alternate I, or are to be made subject to specific agreement in the contract, see the procedures of 27.405.

(b)(1) The restricted rights normally acquired by the Government are set forth in the Restricted Rights Notice of subparagraph (b)(3) of the clause at 52.227-14, and are to be the standard restricted rights unless modified pursuant to subparagraph (b)(2) of this subsection. Under the standard rights, restricted rights computer software will not be used or reproduced by the Government, nor disclosed outside the Government, except for—

(i) Use, or copying for use, in or with the computer or computers for which it was acquired, including use at any Government installation to which such computer or computers may be transferred;

(ii) Use, or copy for use, in or with a backup or replacement computer if any computer for which it was acquired becomes inoperative;

(iii) Reproduction for safekeeping (archives) or backup purposes;

(iv) Modification, adaptation, or combination with other computer software, provided that only the portions of the derivative software consisting of the restricted rights computer software are to be made subject to the same restricted rights; and

(v) Disclosure to and reproduction for use by contractors under a service contract (of the type defined in 37.101) subject to the same restrictions under which the Government acquired the restricted rights computer software.

(2) If pursuant to negotiations under 27.405-3, the restricted rights are to expire after a time certain, then the Notice must be modified to indicate the expiration date of the restricted rights and expressly state the rights that apply thereafter.

(3) Alternate I also provides that the contracting officer, or his representative, at all reasonable times up to 3 years after delivery of the data, or final payment under this contract, whichever is later, may inspect at the contractor's facility or other appropriate site, any data (and records relating to such data) withheld as limited rights data or restricted rights computer software pursuant to subparagraph (a) of this subsection for purposes of evaluating performance under this contract or verifying that such data was properly withheld.

(4) When the Government has unlimited rights in data, including computer software in the possession of the contractor, no payment will be made for rights of use of such software in performance of Government contracts or for the later delivery to the Government of such computer software. The contractor shall be entitled to compensation for converting the software into the prescribed form, if necessary, for reproduction and delivery to the Government. Agencies may prescribe a clause, or use the provision at 52.227-15, which requires the contractor to represent that the computer software has not previously been delivered to the Government with unlimited rights.

(5) The restricted rights notice set forth in the clause at 52.227-14 are the minimum rights the Government normally obtains with restricted computer software, and will automatically apply. Greater rights and variations may be negotiated, see 27.405, consistent with the purposes of the contract. For example, consideration should be given to networking, remote accessing, and multiple use needs. Any variation or modification to the rights in the restricted rights notice must be stated in the contract as a schedule or attachment or the restricted rights notice appropriately modified.

(6) If restricted rights computer software is delivered with the copyright notice of 17 U.S.C. 401, it will be presumed to be published copyrighted computer software licensed to the Government with rights of the same scope of subparagraph (b)(1) of this subsection but without disclosure prohibitions unless the contractor includes the following statement with such copyright notice: "Unpublished—rights reserved under the copyright laws of the United States."

(c) Additional marking instructions. (1) Where it is impractical to include the full Restricted Rights Notice on restricted rights computer software, the following short form notice may be used in lieu thereof:

Restricted Rights Notice—Short Form

Use, reproduction, or disclosure is subject to restrictions set forth in the Long Form Notice of

Contract No. _____ with (contractor name) (and subcontractor and subcontractor No., if appropriate.)

(End of notice)

(2) If the software is embedded, or it is commercially impractical to mark it with human readable text, then the symbol R and the clause date (of the contract) in brackets or a box, as [R-6/90] may be used. This shall be read to mean that the restricted rights computer software is subject to the rights of the Government in the Long Form Notice, in effect at the date indicated next to the symbol. The symbol shall not be used to mark human readable material. In the event the contract contains any variation or modification to the rights of the Government set forth in the Long Form Notice, then the contract number must also be cited.

(3)(i) If non-standard rights are negotiated, then the Long Form Legend must be modified accordingly, and the heading "Notice of Non-Standard Rights" is to be included immediately below the main heading of "Restricted Rights Notice—Long Form".

(ii) If it is impractical to include the Long Form Notice, then the "Restricted Rights Notice—Short Form" may be used, modified to include the heading "Notice of Non-Standard Rights" immediately below the main heading of the notice.

(d) Existing commercial computer software. Existing commercial computer software (i.e., privately developed computer software normally vended commercially under a license or lease agreement restricting use, disclosure, or reproduction) may be acquired under the procedures set forth in 27.405(c). This includes furnishing such software as part of a system, separately priced, under a contract containing the clause at 52.227-14. In this case, the clause at 52.227-19, Commercial Computer Software, may also be included in the contract [see 27.405(c)(6)].

27.404-4 Government purpose rights.

(a) Government purpose rights enable a contractor to retain limited exclusive commercial rights to certain technical data pertaining to items, components, or processes, or to computer software, the development of which is funded in whole or in part by the Government. The Government obtains a license of sufficient scope to allow the technical data, or computer software, to be used, duplicated, and disclosed (including disclosure outside the Government) by

or on behalf of the Government for Governmental purposes. Any disclosure of such data outside the Government will be made subject to prohibitions against any further use, duplication, or disclosure by the recipient so as to preserve the contractor's limited exclusive commercial rights in the technical data or computer software.

(b) Government purpose rights, which require the use of Alternate II to the clause at 52.227–14 to be applicable, may be used to either—

(1) Provide an incentive for the contractor to achieve commercial use of items, components, processes, or computer software developed in the performance of the contract;

(2) Provide a balancing of interests for any item, component, process, or computer software developed as the result of mixed funded research or developmental efforts, such that the respective contributions of the Government and the contractor are not readily segregable; or

(3) Where the Government and contractor otherwise may mutually agree upon such rights.

(c) The request for Government purpose rights should be made in the contractor's proposal, to the extent practicable. Where it is not possible to anticipate the data involved at contract award, such request should be made as soon as possible after award, but no later than the date for delivery of the data. Procedures for notification and negotiation of Government purpose rights are at 27.405–2.

(d) Efforts should be made to segregate items, components, processes, and computer software at the lowest practical identifiable level so that Government purpose rights will not be applied unnecessarily to data pertaining to items, components, processes or computer software developed exclusively at private expense or exclusively at Government expense.

(e) Government purpose rights are to be made subject to time limitations pursuant to negotiations with the contractor. After expiration of the agreed time period the data will be subject to unlimited rights or copyright, as discussed at 27.405–2(a).

(f) Any data delivered under the contract that is subject to Government purpose rights shall not be disclosed outside the Government, or disclosed beyond the approved uses permitted by the Notice, unless the data is made subject to prohibitions against further use, duplication, or disclosure for other than Government purposes. To this end, subparagraph (d)(2) of the Rights in Data clause at 52.227–14, obligates contractors receiving restrictively marked data from the Government to abide by such prohibitions. Thus, data subject to Government purpose rights may be released to any contractor with a contract containing such a clause for use for Government purposes without a separate nondisclosure agreement. Any other release, including a release for reprocurement, requires a nondisclosure statement. For agencies with numerous contractors on their bidding lists, a blanket nondisclosure statement may be signed by contractors on the bidding list, obviating the need for individual agreements for each procurement. If a contractor has signed a previous nondisclosure agreement, the earlier agreement may be provided. Agencies may develop their own nondisclosure agreements, or may use the nondisclosure agreement at 52.227–26, which they may modify to suit the circumstances of the procurement.

(g) Contractors who intend to commercialize the items, components, or processes, or computer software, may elect to copyright the data pertaining thereto. In this case, if the contracting officer consents to copyright, then copyright should be used in lieu of Government purpose rights as the vehicle for commercialization for published material, and the Government will obtain a copyright license as detailed in 27.404–5.

27.404–5 Copyrighted data.

(a) In general, copyright law gives the copyright owner exclusive rights to—

(1) Reproduce the copyrighted work;

(2) Prepare derivative works;

(3) Distribute copies to the public;

(4) Perform the copyrighted work publicly; and

(5) Display the copyrighted work publicly.

(b) The recipient of a work with notice of copyright, even if published, available for sale, or otherwise distributed, is precluded from carrying out the acts set forth in paragraph (a) of this subsection without a license or authorization from the copyright owner. This applies to all data delivered to the Government with copyright notice, and to any further distribution the Government may make of the data, whether such data was first produced in the performance of the contract or not. The Government's policies in permitting a contractor to establish claim to copyright subsisting in data first produced under the contract, the notice requirements for all data delivered to the Government, and the scope of the license rights acquired by the Government for all delivered data, are set forth in paragraph (c) of this subsection.

(c) Data first produced in the performance of contract. (1) The basic Rights in Data clause at 52.227–14, provides that the contractor may establish claim to copyright, without prior approval from the contracting officer, any scientific and technical articles based on or containing data first produced in the performance of a contract, and published in academic, technical or professional journals, symposia proceedings, or similar works. The prior express written permission of the contracting officer is required to establish claim to copyright for all other data first produced in the performance of the contract. In general, permission to establish claim to copyright, if given, may enhance appropriate transfer or dissemination of such data and the commercialization of items, components, processes or computer software to which it pertains. Permission to copyright should be granted in all software procurement under a GSA Delegation of Procurement Authority (DPA). The request should be in writing and may be made either prior to award, or during contract performance. It should identify the data involved or furnish copies of the data for which permission is requested, as well as a statement as to the intended publication or dissemination media, or other purpose for which copyright is requested. The request will normally be granted unless—

(i) The data consist of a report (and its supporting information) that represents the official views of the agency, or the agency is required by statute or regulation to prepare such a report;

(ii) The data are intended primarily for internal use by the Government;

(iii) The data are of the type that the agency distributes to the public under an agency program to disseminate such information;

(iv) The contracting officer determines that limitations on distribution of the data are in the national interest;

(v) The contracting officer determines that the data should be disseminated without restriction, or

(vi) The data falls into the categories of a special situation or existing work, in which case consult 27.405–1.

(2) Agencies may also grant blanket permission for contractors to establish claim to copyright subsisting in all data first produced in the performance of the contract without further request being made by the contractor by use of the clause at 52.227–14 with Alternate IV. Normally, Alternate IV should be used in contracts for basic or applied research to be performed solely by colleges or universities, unless the

purpose of the contract is to develop data, such as computer software, intended for distribution to the public, or use in solicitations, by the Government. It may also be used in other contracts on a case by case basis or for certain categories as provided in agency supplements. In any contract where Alternate IV is used, the contract may exclude any data or categories of data from the blanket permission to copyright, in accordance with agency procedures, either by express provisions in the contract or the addition of an appropriate subparagraph to Alternate IV, as below:

(c)(3) Notwithstanding the permission to copyright in this paragraph (c) the Contractor may not establish claim to copyright subsisting in the following data or categories of data first produced in the performance of this contract:

(i) _____ and (ii) _____ [The agency shall insert appropriate data or categories of data].

(3) Whenever a Contractor establishes claim to copyright subsisting in data first produced under a contract, the Government obtains the following licenses for Government use. For data other than computer software, the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license for all such data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by and on behalf of the Government. For computer software, the Contractor grants to the Government and others acting on its behalf, a paid-up nonexclusive, irrevocable worldwide license in all such copyrighted computer software to reproduce, prepare derivative works, and perform publicly and display publicly, by and on behalf of the Government. This license for computer software does not include the right to distribute copies to the public.

(4) When claim to copyright is made, and the Contractor has published or intends to publish under copyright, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office.

(5) Agencies may, on a case by case basis, or by a class basis, obtain a license of different scope than set forth in subparagraph (c)(3) of this subsection, if the agency determines that such different license will enhance the transfer or dissemination of any data first produced under the contract, and will not interfere with the Government's proposed use of the data, or any international agreements. If a different license is obtained, the scope of the license must be stated in a conspicuous place on the medium on which the data is recorded, and the license must be included in the contract. Lessor rights in copyright may not be negotiated except in accordance with agency procedures.

(d) Data not first produced in the performance of this contract. The contractor shall not, without prior written permission of the contracting officer, incorporate into data delivered under this contract, any data not first produced in the performance of this contract and which contains the copyright notice of 17 U.S.C. 401 or 402, unless the contractor identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of the clause at 52.227–14, provided, however, that if such data are restricted rights computer software the Government shall acquire a copyright license of the scope set forth in the Long Form Restricted Rights Notice, in the clause at 52.227–14, if the clause is included in the contract, or as may otherwise be agreed in a collateral agreement incorporated into the contract.

(e) Removal of copyright notices. (1) The Government agrees not to remove any copyright notices placed on data pursuant to paragraph (c) of the clause at 52.227–14, and to include such notices on all reproductions by the Government of the data.

(2) If the contracting officer believes data is improperly marked with a copyright notice, the contracting officer may request, in writing, a copy of the permission to establish a claim to copyright, or if such permission was automatic, under Alternate IV, the contracting officer may request justification that the data did not fall within an exception to automatic copyright. The contractor should be provided 60 days to furnish such evidence; if the copyright cannot be justified then the copyright notice may be removed, provided that the data has not been publicly distributed or sold, in which case, the contractor should be required to assign the copyright to the United States.

27.404–6 Release, publications, and use of data.

(a) In paragraph (d) of the clause at 52.227–14, Rights in Data, subparagraph (d)(1) recognizes the fact that normally the contractor has the right to use, release to others, reproduce, distribute, or publish data first produced in the performance of a contract, except to the extent such data may be subject to export control or national security laws and regulations. In addition, to the extent the contractor receives or is given access to data that is necessary for the performance of the contract from or by the Government or others acting on behalf of the Government, and the data are limited rights data, restricted rights computer software or Government purpose rights data, or contains other restrictive markings applied by or approved by the Government, subparagraph (d)(2) of the clause at 52.227–14 provides an agreement with the contractor to treat the data in accordance with the markings, unless otherwise specifically authorized by the contracting officer. Such agreement is deemed to satisfy the requirements regarding use, disclosure, or reproduction prohibitions of the Limited Rights, Restricted Rights, or Government Purpose Rights Notices of the clause at 52.227–14.

(b) Agencies may (except as provided in subparagraph (a)(4) of this subsection), on a contract-by-contract basis if approved by the head of the contracting activity or if specifically authorized in their FAR Supplement, place limitations or restrictions on the contractor's right to use, release to others, reproduce, distribute, or publish any data first produced in the performance of the contract, including a requirement to assign copyright to the Government or another party, either by adding a subparagraph (d)(3) to the Rights in Data clause at 52.227–14, or by express limitations or restrictions in the contract, for any of the following purposes:

(1) The furtherance of established programs or statutory requirements of the agency such that the release to others, distribution, publication, or exercise of copyright by the contractor would be inconsistent with such established programs or statutory requirements;

(2) Avoidance of release to others, distribution, publication, or exercise of copyright by the contractor, that would be contrary to statutory or regulatory (other than under this subpart) requirements regarding the data; or

(3) Prevention of the unauthorized or inadvertent release or dissemination of the data contrary to agency statutory requirements or national policy regarding the disclosure of technical information, even if unclassified.

(c) If the purpose of subdivision (a)(2)(iii) of this subsection exists, and the data in question is of the type that the agency would otherwise afford the contractor Government purpose rights, agencies should consider affording such rights limited to disclosure and use within the United States (see 27.405-2(b)) rather than prohibiting release to others, distribution or publication by the contractor. Such limitations may also be coupled with a direction to the contractor to distribute the data to other designated persons or entities for use in the United States, subject to prohibition against further disclosure and use. However, any such limitations are to be applied to the disclosure and use of specifically identified data, not on the basis of the nationality, place of incorporation, or place of business of the contractor. In addition, any such limitations to be imposed on any disclosure and use of the data for Governmental purposes must not restrict competition for the acquisition of goods and services by or on behalf of the Government.

(d) No restrictions pursuant to subparagraph (a)(2) of this subsection are to be placed on the release, distribution, or publication of the results of basic or applied research under contracts with universities and colleges. (For the purpose of this prohibition, restriction on the release, distribution, or publication of computer software that has been, readily can be, or is intended to be, developed to the point of practical application are not considered restrictions on the release, distribution, or publication of the results of basic or applied research). In addition, no restrictions pursuant to subparagraph (a)(2) of this subsection are to be imposed on the right of any contractor to use the data itself, internal to the organizational element of the contractor developing the data, for the contractor's own purposes.

27.404-7 Contractor licensing.

(a) To the extent that the Government obtains rights to use the data, no payment will be made to either the developer or the third party for use of the data within the rights already granted the Government.

(b) A contractor or subcontractor may not be prohibited from receiving from a third party a fee or royalty for the use of technical data pertaining to an item, component, or process developed exclusively at private expense by the contractor or subcontractor, except as otherwise specifically provided by law.

27.405 Notification and negotiation procedures.

27.405-1 Notification.

(a) Notification requirements. Offerors are required by the provision at 52.227-15 to notify the Government of any asserted restrictions on the Government's right to use or disclose technical data or computer software. This notification advises the contracting officer of the contractor's or any subcontractor's intended use of items, components, processes, to which the data pertains or any computer software that—

(1) Have been developed exclusively at private expense and the contractor asserts either limited rights or restricted rights;

(2) Have been developed in part at private expense and further development will be with Government funds under the contract; or

(3) Will be developed exclusively with Government funds for which the contractor or subcontractor requests Government purpose rights for commercialization.

(b) Items, components, processes, or computer software do not need to be identified if no data is required to be delivered, or if the required data will be delivered with unlimited rights.

(c) The notification must be signed by an authorized official of the offeror that represents that the listing is complete, accurate, and current.

(d) Notification contents. To be complete the notification must:

(1) Specifically identify the items, components, processes, or computer software to which the data pertains.

(2) Identify the limitations on the Government's right to use the data (limited rights, restricted rights or Government purpose license rights) including identification of the earliest expiration date for each limitation.

(e)(1) The contracting officer should rely on the representation provided with the contractor's notification. Detailed supporting information normally should not be requested unless circumstances exist to question the validity of the assertion. While the contractor or subcontractor is obligated to justify the assertions, the contracting officer should only obtain enough information to determine if the assertion is reasonable and to evaluate its likely impact on the Government.

(2) However, after receipt of the offerors' proposals, the Government may verify that the offerors submitted the information required by the provision at 52.227-15, and request additional supporting information to satisfy the contracting officer that the offeror has a reasonable basis for asserting or requesting other than unlimited rights in data pertaining to the items, components, processes, or computer software in question. Failure to submit the notification with the offer should be treated as a correctable minor irregularity (see 15.607). However, if an offeror refuses to submit the notification, refuses to furnish reasonable supporting information, or refuses to sign a representation that it is accurate, complete, and current, then the offer may be deemed to be unacceptable.

(3) The information provided by the offeror may also be used in the source selection process (e.g., life cycle cost analyses). However, in no event may an offer be found unacceptable for purposes of contract award solely because the offeror refuses to sell or otherwise relinquish to the Government rights in technical data to which the offeror is otherwise entitled under applicable law or regulation.

(f)(1) Based on the review of the information provided by the offeror, and any additional information developed, the contracting officer may determine:

(i) To use the clause at 52.227-14 with Alternate I, which permits the contractor to withhold qualifying limited rights and restricted rights data from delivery, subject to a subsequent request for delivery (see 27.404-2 and 27.404-3) with a Limited Rights Notice or a Restricted Rights Notice, respectively. Such Notice may also be challenged in accordance with the procedures at 27.407. Data withheld is subject to inspection as provided in Alternate I.

(ii) To use the clause at 52.227-14, without Alternate I, in which case the data that qualifies as limited rights and restricted rights data will be delivered with the Limited Rights Notice or the Restricted Rights Computer Software Notice. Such notices are subject to challenge in accordance with the procedures at 27.407.

(2) After the contracting officer has made the determination in subparagraph (f)(1) of this subsection, the contracting officer may develop appropriate provisions to be included in the contract to identify the data asserted to be limited rights data or restricted rights computer software or, if impractical to do so, may require continuing notification during contract performance of the data to be delivered with other than unlimited rights, by use of the clause with Alternate III (see 27.405-4). However, such identification or notification is not dispositive of any rights to the data.

27.405-2 Negotiation of Government purpose rights.

(a) If, in response to the notification requirements, or subsequent clarifications, the offeror identifies items, components, processes, or computer software, that have been or will be developed in part at private expense and in part with Government funds, and requests Government purpose rights, or identifies items, components, processes, or software, that will be developed exclusively at Government expense, and requests Government purpose rights with respect thereto for purposes of commercialization, then the procedures set forth in subparagraphs (a)(1) and (a)(2) of this subsection shall be followed—

(1) Efforts should be made to separate items, components, processes, or software to the lowest practical identifiable level, so that Government purpose rights will not be applied unnecessarily to data pertaining to items, components, processes, or computer software, developed exclusively at private expense, or exclusively at Government expense.

(2) Government purpose rights are effected by agreement of the contracting officer and by the inclusion of Alternate II in the clause at 52.227–14 and specifically identifying in the contract the items, components, processes, or computer software to which the data to be made subject to such rights pertains. The contractor must request Government purpose rights and present supporting documentation, as follows:

(i) In the event of a claim of mixed funding, the contractor must include with the request some evidence of either a significant prior investment, or some documentation regarding a cost sharing effort with the Government for the development of an item, component, process or computer software.

(ii) In the event of an intent to commercialize any item, component, process, or computer software, that will be or has been developed with Government funds in the performance of a contract, the contractor must request Government purpose rights, and support the request by making a positive statement of intent to commercialize the item, component prices, or computer software.

(3) If the contractor requests Government purpose rights and has presented documentation as required by subparagraph (a)(2) of this subsection, the request should be granted, except when—

(i) The contracting officer determines that there is a need to competitively seek reprocurement of any or all of the items, components, processes, or computer software involving a large number of potential competitors, as for items such as spare and repair parts or it would otherwise unduly impede any future related procurement, or

(ii) The data should be made available for dissemination, as to disclose the results of research and development efforts or studies, especially if the agency has established programs pursuant to statute, regulation, or policy to disseminate the data or promote commercialization of any or all of the items, components, processes, or computer software, and determines Government purpose rights to be inconsistent with such programs; or

(iii) It is otherwise inconsistent with law or agency regulation.

(4) In the event the contractor requests Government purpose rights after award, the contracting officer may include Alternate II to the clause at 52.227–14 and identify in the contract the items, components, processes, or computer software to which the data to be made subject to such rights pertains.

(5)(i) Where the item, component, process, or computer software will be, or has been, developed exclusively with Government funds, the period for Government purpose rights shall run for a date certain from the time the data have been reduced to tangible form, but in any event, not later than from when the data are released to third parties, or are delivered to the Government, whichever comes first. After the expiration of the period, the data will become subject to unlimited rights or to the appropriate copyright license. The period normally should not be less than 3 nor more than 5 years, unless a longer period is approved in accordance with agency procedures.

(ii) Where the item, component, process, or computer software will be or has been developed partially with Government funds and partially with private funds, the period for Government purpose rights shall be negotiated, with 5 years as a guideline for negotiations. Negotiation factors are discussed at 27.405–5. The agreed date shall then be included in all Government Purpose Rights Notices.

(6) Time limitations may be extended if other interested parties have not requested access to the data, there is no requirement to disclose to meet a specified Government need, and the contractor provides consideration for remarking the data with new legends.

(b)(1) In the event an agency desires to afford Government purpose rights for the purpose of commercializing data but concomitantly wishes to prevent unauthorized or inadvertent transfer of such data contrary to the agency's statutory requirements or policies, the contractor's rights under Government purpose rights may be limited to disclosure and use within the United States by suitable modifications to subparagraph (b)(4) of Alternate II of the clause at 52.227–14. (See also 27.404–6(a)(3)).

(2) In addition, if the data is of the type that an agency desires to disseminate within the United States or has established policies or programs for that purpose, the contractor may be directed to distribute the data to other entities designated by the agency for use in the United States, subject to prohibition against further disclosure and use.

27.405-3 Additional negotiations.

(a) If the offeror or the contractor asserts rights in data, either as part of the Notification process, or subsequently, the contracting officer shall normally proceed as indicated in 27.405–1 and 27.405–2. Under certain circumstances, however, it may be necessary to conduct additional negotiations. For example, it may be difficult to ascertain the respective funding for the development of the item, component, process, or computer software to which the data pertains; the Government may require greater rights to satisfy its requirements; negotiations may not be completed by contract award; or the contractor may offer contractual consideration for the Government to take Government Purpose rights instead of unlimited rights. This will require the procedures in this subsection to be followed.

(b)(1) If the Government needs greater than limited or restricted rights in data, such as to develop alternate sources, then the contracting officer may negotiate with the contractor, or the subcontractor asserting such rights, to acquire additional rights and technical assistance, where appropriate. Before acquiring additional rights, the contracting officer should consider alternatives, such as—

(i) Developing alternative items, components, processes, or computer software; or

(ii) Obtaining a commitment by the contractor or subcontractor to qualify additional sources. Greater rights may be obtained by negotiation of a lump sum fee, royalty, Government purpose rights, or other arrangement. Any greater rights shall be identified as a contract line item, and the standard Notice language should be modified accordingly if appropriate. The

contracting officer shall not acquire greater rights unless—

(A) There is a need for disclosure of the data outside the Government; and

(B) The specific rights are required for competitive procurement, and the anticipated savings from competition are likely to exceed the acquisition cost of the additional rights in data.

(2) To the extent such additional rights are acquired, the rights and the item, component, process, or computer software to which they pertain will be identified in the contract.

(3) In the event that the offeror is unable to identify all data subject to other than unlimited rights, or if the offeror and contracting officer are unable to conclude agreement on the identification of such data in the contract before award, then award may be made subject to Alternate III being added to the basic rights in Data clause at 52.227–14. This Alternate adds paragraph (j) to the clause which permits continued notification and negotiation after award.

(4) In this event, the assertions of the contractor must be identified in the contract as a schedule or attachment, in order to facilitate the review of contractors' assertions of data rights to provide a basis for acquisition planning, and subsequent negotiation. Since the contracting officer cannot undertake a complete review of all data to be delivered with other than unlimited rights, the contracting officer need only have a reasonable basis to add such data to the schedule or attachment. Any listing of such data should not be construed as an agreement by the Government of ultimate data rights. The Government reserves its rights to a complete validation, if it appears the data is mismarked.

(5) Whenever greater or lesser rights have been negotiated, the contract must reflect the results of the bargain. Therefore, contracting officers must develop appropriate language for contract inclusion, or may use the clause at 52.227–28 to identify the results of this agreement.

27.406–4 Postaward notification and negotiation.

(a) Notification of data to be delivered with other than unlimited rights and negotiations will be conducted to the maximum practicable extent prior to contract award. However, if there are numerous offerors or there are urgent circumstances, the contracting officer may determine that preaward negotiations are impracticable. This determination must be approved at a level higher than the contracting officer, or such other level as may be prescribed by agency procedures. The contracting officer will notify the contractor that preaward negotiations are impractical, and that the contractor may provide notification to the contracting officer after award of those items, components, processes, or computer software for which other than unlimited rights in the data pertaining thereto are to be asserted. The contracting officer shall add Alternate III to the clause at 52.227–14 to provide for such continuing notification and provide agreement to add the results of such identification in the contract of the data to be delivered with other than unlimited rights.

(b) In accordance with agency procedures, the contract shall include a time schedule for negotiation of data rights if agreement cannot be achieved.

(c) Once Alternate III is added, then the schedule or attachment may be updated through the life of the contract, but not later than the date of the delivery of the data, to address additional assertions by the contractor or subcontractors under the notification process, to incorporate the results of Government reviews and challenges, and to specifically identify or describe all data to be delivered with other than unlimited rights. Such changes are to be made by bilateral modifications to the contract.

27.406–5 Negotiation factors.

The contracting officer shall consider, as appropriate, the following factors when negotiating rights in data:

(a) The acquisition strategy for the item or system, including logistics support.

(b) Whether the item or system, or related logistics support, will be competed.

(c) Timing of such competitions.

(d) The economic life of the technology and whether it can be commercialized.

(e) Funding contributions of the respective parties.

(f) Development of alternative sources for industrial mobilization or other purposes.

(g) Other factors, such as unique contractor qualifications or expertise contributing to the configuration management or development of the item, component, process or computer software.

27.406 Other data rights provisions.

(a) Special data situations. (1) The clause at 52.227–17, Rights in Data—Special Situations, is to be used in contracts (or may be made applicable to portions thereof) that are primarily for the production or compilation of data (other than limited rights data or restricted rights computer software) for the Government's own use, or when there is a specific need to limit distribution and use of the data and/or to obtain indemnity for liabilities that may arise out of the content, performance, or disclosure of the data. Examples are contracts for—

(i) The production of audiovisual works, including motion pictures or television recordings with or without accompanying sound, or for the preparation of motion picture scripts, musical compositions, sound tracks, translation, adaptation, and the like;

(ii) Histories of the respective agencies, departments, services, or units;

(iii) Surveys of Government establishments;

(iv) Works pertaining to the instruction or guidance of Government officers and employees in the discharge of their official duties or works pertaining to recruiting, morale, training, or consular guidance;

(v) The compilation of reports, books, studies, surveys, or similar documents, that do not involve research, development, or experimental work;

(vi) The collection of data containing personally identifiable information such that disclosure would violate the right of privacy or publicity of an individual to whom the information relates;

(vii) Investigatory reports; and

(viii) The development, accumulation, or compilation of data, other than that resulting from research, development, or experimental work performed by a contractor, the early release of which could prejudice competitive acquisition activities, or agency enforcement or regulatory activities.

(2) The contract may specify the purposes and conditions (including time limitations) under which the data may be used, released, or reproduced other than for contract performance. Contracts for the production of audiovisual works, sound recordings, etc., may include limitations in connection with talent releases, music licenses, and the like that are consistent with the purposes for which the works are acquired.

(3) Subdivision (c)(1)(ii) of the clause at 52.227.17, Rights in Data, Special Situations, enables the Government to obtain assignments of copyright in any data first produced in the performance of the contract. It may be deleted if the contracting officer determines that such assignment is not needed to further the objectives of the contract.

(4) Paragraph (e) of the clause at 52.227–14, which requires the contractor to indemnify the Government against

any liability incurred as the result of any violation of trade secrets, copyrights, right of privacy or publicity, or any libelous or other unlawful matter arising out of or contained in any production or compilation of data that are subject to the clause. It may be deleted or limited in scope where the contracting officer determines that, because of the nature of the particular data involved, such liability will not arise.

(b) Acquisition of existing audiovisual and similar works. (1) The clause at 52.227–18, Rights in Data-Existing Works, is for use in contracts exclusively for the acquisition (without modification) of existing motion pictures; television recordings; dramatic and literary works, pantomimes and choreographic works; pictorial, graphic, and sculptural works; and works of a similar nature. The contract may set forth limitations consistent with purposes for which the works covered by the contract are being acquired. Examples of these limitations are—

(i) Means of exhibition or transmission;

(ii) Time;

(iii) Type of audience; and

(iv) Geographic location.

(2) If the contract requires that works of the type indicated in subparagraph (b)(1) of this subsection are to be modified through editing, translation, or addition of subject matter, etc., rather than purchasing in existing form, the clause at 52.227–17, Data Rights—Special Situations, is to be used in lieu of the clause at 52.227–18. (See 27.406(a).)

(c) Acquisition of existing commercial computer software. (1) When contracting from other than GSA's multiple award schedule for the acquisition of existing commercial computer software (i.e., privately developed software normally vended commercially under a license or lease agreement restricting use, disclosure, and reproduction), the contract or purchase order must specifically address the Government's rights to use, disclose or reproduce the software. These rights must be sufficient for the Government to fulfill the need for which the software is being acquired. This includes commercial software that is furnished as part of a system and is separately priced. The contracting officer may presume that the software is commercial if the software is used regularly for other than Government purposes and is sold, licensed or leased in significant quantities to the general public at established market or catalog prices.

(2) The requirements of subparagraph (c)(1) of this section may be accomplished by using the clause at 52.227–19 or such rights may be negotiated and set forth in the contract using the guidance for restricted rights set forth in 27.404–3.

(3) The purpose of the clause at 52.227–19 is to supersede any portions of the vendor's standard commercial license, lease, or purchase agreement that are inconsistent with the restricted rights acquired by the Government and any pertinent Federal laws, the Federal Acquisition Regulation, and agency supplements. The vendor should be made aware of the clause's purpose and effect, and, when used, it must be incorporated into and made a part of the purchase order or contract under which the commercial computer software is being acquired.

(4) The guidance concerning the rights set forth in 27.404–3, as well as those in paragraph (d) of the clause at 52.227–19, normally are the minimum rights the Government should accept. Any variation must be negotiated and set forth in the contract or purchase order. Examples of additional rights that may be acquired are those necessary for site licenses, networking purposes, or for use of software from remote terminals communicating with a host computer where the software is located, and similar interface needs. If the computer software is to be acquired with unlimited rights, the contract should so state.

(5) If the acquisition is by lease or license, the disposition of the software (by returning or destruction, for example) at the end of the lease or license period must be addressed. Paragraph (f) of the clause at 52.227–19 deals with this issue.

(6) If the clause at 52.227–19 is not used, caution must be exercised in accepting a vendor's terms and conditions, since they may be directed to commercial sales and may not be appropriate for a Government situation. The contract terms shall take precedence over the vendor's license, lease, or purchase agreement. If the clause at 52.227–19 is used, inconsistencies in the vendor's standard commercial agreement regarding the Government's right to use, disclose, or reproduce the computer software are reconciled by that clause.

(7) The clause at 52.227–19 also applies to manuals and instructional materials the vendor normally supplies with the commercial computer software. Such material is to be acquired with unlimited rights unless bearing a copyright license to use and reproduce such materials for Government purposes. If other data, such as noncommercial software, or technical data, is to be acquired, then the clause at 52.227–19 is not applicable to such additional data and the clause at 52.227–14 must be used.

(8) Where the contract also contains the clause at 52.227–14, the contract should either identify the computer software to which the clause at 52.227–19 is to apply or require the contracting officer's approval prior to acquisition of such software.

(9) If a prime contractor under a contract containing the clause at 52.227–14 acquires existing commercial computer software from a subcontractor (at any tier) for delivery to or for use on behalf of the Government, the contracting officer may either authorize the use of the clause at 52.227–19 for that purpose, or approve any variations to or limitations on the restricted rights set forth in the clause at 52.227–14 in a collateral agreement incorporated in and made part of the contract.

(d) Other existing data and works. (1) Except for existing audiovisual and similar works as discussed in paragraph (b) of this subsection, and existing computer software as discussed in paragraph (c) of this subsection, no clause contained in this subpart is required to be included in—

(i) Contracts solely for the acquisition of books, periodicals, and other printed items in the exact form in which such items are to be obtained unless reproduction rights are to be acquired, or

(ii) Other contracts (as contracts that result from sealed bidding) that require only existing data (other than limited rights data) to be delivered and such data are available without disclosure prohibitions, unless reproduction rights are to be obtained. If the reproduction rights are to be obtained in any contract of the type described in 27.406 (b) or (d), such rights must be specifically set forth in the contract. No clause in this subpart is required to be included in contracts substantially for on line data base services which are available to the general public without restriction.

(e) Contracts awarded under the Small Business Innovative Research Program are to use the clause at 52.227–20, Rights in Data-SBIR Program. The clause is to be used in all Phase I and Phase II contract awards. It is the only data rights clause to be used in Small Business Innovative Research Program contracts, and its use is limited to such contracts. For additional guidance, consult the Small Business Policy Directive 85–01–2, and agency implementation.

27.407 Omitted, nonconforming and unauthorized markings.

27.407-1 Omitted and nonconforming markings.

(a) Data delivered under a contract containing the clause at 52.227-14, Rights in Data, without appropriate legends, or without a copyright notice, will be presumed to have been delivered with unlimited rights, and the Government assumes no liability for the disclosure, use, or reproduction of such data. However, to the extent the data has not been disclosed, the contractor may within 6 months (or longer period in accordance with agency procedures), request permission of the contracting officer to have omitted notices placed on qualifying data, at the contractor's expense. The contracting officer may agree to so permit if the contractor—

(1) Identifies the data for which notice is to be added;

(2) Demonstrates that the omission was inadvertent;

(3) Establishes that the use of the notice is authorized; and

(4) Acknowledges that the Government has no liability with respect to any disclosure or use of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(b) If the data appears to be data that the contractor is authorized to mark, but the marking is nonconforming, then the Government shall use the data as if the marking were proper, and the contractor shall be required to correct the markings to conform to the contract. Nonconforming means markings which appear to assert rights in data, but do not conform to the prescribed notices authorized by the clause at 52.227-14, Rights in Data. If the contractor fails to correct the markings within 60 days after notice, the Government may correct the markings at the contractor's expense. Since interpretation of nonconforming markings is judgmental by the Government, the contractor should not assume that such markings are adequate to protect rights. If the notices appear to address only internal contractor distribution, or are unclear, and the contractor does not adequately clarify the issue, the contracting officer may decide that the nonconforming notices are not notices of data restrictions and may strike them or ignore them. The contracting officer may also, if the notice or legend is nonconforming, correct the notice unilaterally.

27.407-2 Unauthorized markings and validation.

(a) General. A contractor or subcontractor may be required to validate restrictive markings on data if the contracting officer has a reasonable basis to believe that the data does not qualify as limited rights data or restricted rights computer software (see 27.404-2 and 27.404-3). There are two types of requirements and procedures for the validation of (i.e., challenge to) restrictive markings on data. The statutory requirements of 10 U.S.C. 2321 and 41 U.S.C. 253d are implemented by the clause at 52.227-24, Validation of Technical Data Markings (Statutory). This clause establishes the procedures for technical data (but not computer software) for all contracts by agencies subject to title 10 of the United States Code as well as for technical data (but not computer software) for major systems contracts or for the support of major systems (as defined in 41 U.S.C. 403) by agencies subject to title III of the Federal Property and Administrative Services Act of 1949. The clause at 52.227-25, Validation of Computer Software and Data Markings (Nonstatutory), establishes the procedures for validation of computer software in all contracts for all agencies, as well as for all other data except for technical data in the aforementioned contracts.

(b) Request for information prior to validation. (1) The contracting officer may request the contractor or subcontractor to furnish a written explanation for any restriction asserted on the right of the Government or others acting on its behalf to use, duplicate, or disclose the data. The period provided for the contractor's response is to be a reasonable time (not to exceed 90 days) established by the contracting officer, taking into account the availability and volume of the information needed for a complete response. The request shall state it does not constitute a formal challenge.

(2) Paragraph (b) of the clauses at 52.227-24 and 52.227-25 requires the contractor or subcontractor to have procedures to ensure proper marking of data, and maintain records to justify such markings.

(c) If the contracting officer determines a formal challenge to the asserted restrictive markings is warranted, then the procedures therefor set in either the clause at 52.227-24 or 52.227-25, as applicable, are to be followed.

(d) In order to comply with the statutory requirements of 10 U.S.C. 2321, the following also applies to any challenges made pursuant to the clause at 52.227-24:

(1) The contracting officer, after consulting with the activity having an interest in the validity of the markings, must determine, after reviewing all available information, that there are reasonable grounds to question the validity of a restrictive marking, and that continued adherence to the restriction would make subsequent competition impracticable or the contractor or subcontractor fails to adequately respond to the prechallenge request within a reasonable period of time. The contracting officer must document this determination for the file.

(2) Data must be challenged no later than 3 years after delivery to the Government, or 3 years after final payment under the contract, whichever is later. The contracting officer may challenge a restriction at any time if the data—

(i) Are publicly available without disclosure restrictions;

(ii) Have been furnished to the Government without restriction; or

(iii) Have otherwise been made available without restriction.

(e) Even though there are no statutory limits on challenges under the clause at 52.227-25, efforts should be made to raise and resolve questions the contracting officer may have regarding asserted restrictions within a reasonable period of time after delivery of the data involved.

27.408 Acquisition of data—general procedures.

(a) *General.* (1) It is the Government's practice to determine, to the extent feasible, its data requirements in time for inclusion in solicitations. The data requirements may be subject to revision during contract negotiations. Since the cost of preparation, reformatting, maintenance and updating, cataloging, and storage of data represent an expense to both the Government and the contractor, efforts should be made to keep the contract data requirements to a minimum, consistent with the purposes of the contract.

(2) To the extent feasible, all known data requirements, including time and place for delivery and any limitations and restrictions to be imposed on the contractor in the handling of data, shall be specified in the contract. Whenever practicable, data requirements shall be set out as separate contract line items. In establishing the contract data requirements and in specifying data items to be delivered by a contractor, agencies may develop their own procedures for listing, specifying,

identifying source, assuring delivery, and handling any data required to be delivered, first produced, or specifically used in the performance of the contract.

(3) Data delivery requirements should not require that a contractor provide the Government, as a condition of the procurement, unlimited rights in data that qualify as limited rights data or restricted computer software. Rather, form, fit, and function data may be furnished, if the contracting officer elects to use the clause at 52.227–14, Rights in Data, with Alternate I, or qualifying data may be furnished with limited rights notices or restricted rights notices, as discussed in 27.404–2 and 27.404–3, and as provided for in subparagraphs (b)(2) and (b)(3) of the clause at 52.227–14. If additional rights are needed, as data for a reprocurement data package, then this need should be clearly set forth in the solicitation and the contractor fairly compensated for such greater rights.

(b) *Additional data ordering.* (1) Recognizing that in some contracting situations, such as experimental, developmental, research, or demonstration contracts, it may not be feasible to ascertain all the data requirements at the time of contracting, the clause 52.227–16, Additional Data Ordering, may be used to enable the subsequent ordering by the contracting officer of additional data first produced or specifically used in the performance of such contracts as the actual requirements become known. The clause shall normally be used in solicitations and contracts involving experimental, developmental, research, or demonstration work (other than basic or applied research to be performed under a contract solely by a university or college when the contract amount will be $500,000 or less) unless all the requirements for data are believed to be known at the time and specified in the contract. It may be used in other contracts, such as for production or supply, but the contractor must be informed of the categories of data to which it may apply. If the contract is for basic or applied research to be performed by a university or college, and the contracting officer believes the contract effort will in the future exceed $500,000, even though the initial award does not, the contracting officer may include the clause in the initial award.

(2) Data may be ordered under the clause at 52.227–16, Additional Data Ordering, at any time during contract performance or within 3 years after acceptance of all items to be delivered under the contract. The contractor is to be compensated for converting the data into prescribed form, for reproduction, and for delivery. In order to minimize storage costs for the retention of data, the contractor may be relieved of retention requirements for specified data items by the contracting officer at any time during the retention period required by the clause. The contracting officer may permit the contractor to identify and specify in the contract data not to be ordered for delivery under the Additional Data Ordering clause if such data are not necessary to meet the Government's requirements for data. Also, the contracting officer may alter the Additional Data Ordering clause by deleting the term "or specifically used" in paragraph (a) thereof if delivery of such data are not necessary to meet the Government's requirements for data. Any data that are ordered under this clause will be subject to the clause at 52.227–14, Rights in Data, and data authorized to be withheld under such clause will not be required to be delivered under the Additional Data Ordering clause, except by written order of the contracting officer.

(c) *Acceptance of data.* Acceptability of technical data delivered under a contract shall be in accordance with the appropriate contract clause as required by subpart 46.3 and the clause at 52.227–21, Technical Data Certification, Revision, and Withholding of Payment, when it is included in the contract.

(d) *Technical data certification, revision, and withholding of payment.* (1) In order to assure the technical data needed are delivered in a timely manner and are complete, accurate, and satisfy the requirements of the contract, the clause at 52.227–21, Technical Data Certification, Revision, and Withholding of Payment, is to be included in all contracts as prescribed by agency supplements. The clause requires the contractor, upon delivery of technical data to certify, that to the best of its knowledge and belief, such data are complete, accurate, and comply with contract requirements. It also provides for corrections of any deficiencies in the data. The contracting officer may request revisions of the data to reflect engineering design changes made during performance of the contract and affecting form, fit, and function of the items the data depict. Further included is the authority for the contracting officer to withhold payment under the contract to assure timely delivery of the technical data and/or assure correction of the technical data are not complete, accurate, and in compliance with contract requirements.

(2) The contracting officer should consider all remedies when data do not comply with the contract. Remedies may include reduction of progress payments, withholding final payment, contract termination and a reduction in contract price or fee. The clause permits withholding up to 10 percent of the contract price unless a lesser amount is specified in the contract or the Alternate paragraph (c) is specified by agency procedures. The contracting officer shall determine the amount to be withheld after considering the estimated value of the data to the Government. Payment shall not be withheld when nondelivery results from causes beyond the control and without the fault or negligence of the contractor.

(3) When the clause at 52.227–21 is used, the section of the contract specifying data delivery requirements shall expressly identify those line items of technical data to which the clause applies. Upon delivery of such technical data, the contracting officer or designee shall review the technical data in the contractor's relating certification to assure that the data are complete, accurate, and comply with contract requirements. If not, the contractor is to be requested to correct the deficiencies, and payment may be withheld until such is done. Final payment should not be made under the contract until it has been determined that the delivery requirements of those line items of data to which the clause applies have been satisfactorily met.

27.409 Rights to technical data in successful proposals.

(a) Contracting officers may, in consideration of contract award, desire to acquire unlimited rights in technical data (but not commercial or financial information) contained in a successful proposal upon which a contract award is based. However, before such unlimited rights are acquired, the prospective contractor must be afforded the opportunity either—

(1) To advise the contracting officer that the technical data, or portions thereof (to be identified by the prospective contractor) are covered by any restrictive notice regarding the disclosure and use of proposal information authorized by subpart 15.4 or 15.5 (or any agency supplement thereto), and request that such protection be maintained by excluding the data from the Government's rights; or

(2) To establish to the contracting officer's satisfaction that identified portions of the technical data do not relate directly to or will not be utilized in the work to be performed under the contract, and request that such portions

be excluded from the Government's rights.

(b) If unlimited rights to technical data in successful proposals, as set forth in paragraph (a) of this section, are to be acquired, it shall be by use of the clause at 52.227–23, Rights to Proposal Data. Any excluded technical data will be identified by inserting appropriate proposal page numbers in the clause. This clause enables identification of data to be excluded from the Government's rights, as discussed in paragraph (a) of this section. Such exclusion is not dispositive of the protective status of the data, but any excluded technical data, as well as any commercial and financial information contained in the proposal, will remain subject to the policies in subpart 15.4 or 15.5 (and agency supplements thereto) relating to proposal information (i.e., will be used for evaluation purposes only). If the clause at 52.227–23, Rights to Proposal Data, is included in a contract, the prospective contractor must be specifically afforded the opportunity to exclude technical data as set forth in paragraph (a) of this section, and the contract file must reflect that fact. If there is a need to have access to any of the excluded technical data during contract performance, consideration must be given to their acquisition as limited rights data, if they so qualify, in accordance with 27.404–2.

27.410 Solicitation provisions and contract clauses.

(a)(1) The contracting officer shall insert the clause at 52.227–14, Rights in Data, including its Alternates, as authorized, or other appropriate clauses, as prescribed in this section in solicitations and contracts if data will be developed, produced, furnished, or acquired under the contract, unless the contract is—

(i) For special situations, set forth in 27.408(a), but the clause at 52.227–14 shall be included in the contract and made applicable to data other than that produced or compiled for the special situations set forth in 27.408(a);

(ii) For the acquisition of existing works as set forth in 27.408(b);

(iii) To be performed outside the United States, its possessions, and Puerto Rico, in which case agencies may prescribe an alternate clause.

(iv) For architect service or construction work, in which case agencies may utilize the clause at 52.227–17, Rights in Data-Special Situations, or may prescribe different clauses;

(v) For contracts under the Small Business Innovation Research Program, see paragraph (l) of this section.

(vi) For the management, operation, design, or construction of a Government facility to perform research, development, or production work, in which cases agencies may prescribe different clauses see paragraph (p) of this section; or

(vii) Exclusively for existing commercial computer software as set forth in 27.408(c).

(2) In all contracts and solicitations containing the clause at 52.227–14, the contracting officer shall in accordance with 27.407–2—

(i) Insert the clause at 52.227–24, Validation of Technical Data Markings (Statutory), if the solicitation and contract are by an agency subject to title 10 of the United States Code or by an agency subject to title III of the Federal Property and Administrative Services Act of 1949 for major systems or the support thereof, unless in either instance only computer software is to be furnished for use by or on behalf of the Government; and

(ii) Insert the clause at 52.227–25, Validation of Computer Software and Data Markings (Nonstatutory)—

(A) Whenever computer software is to be delivered or furnished for use by or on behalf of the Government; or

(B) If the clause at 52.227–24 is not inserted whether or not computer software is to be delivered or furnished.

(b) In accordance with 27.405–1(f), if a contracting officer determines it is unnecessary to obtain the delivery of limited rights data, or restricted rights data, the clause shall be used with its Alternate I. (See also 27.404–2(a) and 27.404–3(a).)

(c) The clause at 52.227–14 is to be used with its Alternate II if in accordance with the procedures at 27.405–2, the contracting officer has determined Government purpose rights are appropriate. If a nondisclosure agreement is required, agencies may use the clause at 52.227–26 or prescribe their own.

(d) The clause at 52.227–14 is to be used with its Alternate III if negotiations are necessary in accordance with 27.405–4. Also, the clause at 52.227–28 may be used in situations in which post award negotiation of data rights may be necessary with regard to specific data deliverables.

(e) The clause at 52.227–14 shall be used with its Alternate IV in contracts for basic or applied research (other than those for the management or operation of Government facilities or where international agreements require otherwise), to be performed solely by universities and colleges.

(f) The clause at 52.227–14 may be used with its Alternate IV in other contracts if in accordance with 27.404–5(c)(2) an agency determines to grant blanket permission for the contractor to establish claim to copyright subsisting in all data first produced without further request being made by the contractor.

(g) The contracting officer shall insert the provision at 52.227–15, Notification of Data Deliverables With Other Than Unlimited Rights, in all solicitations containing the clause at 52.227–14. the offeror's response will aid the contracting officer in determining which, if any, of the Alternates are appropriate in accordance with 27.405.

(h) The contracting officer shall normally insert the clause at 52.227–16, Additional Data Ordering, in solicitations and contracts involving experimental, developmental, research, or demonstration work (other than basic or applied research to be performed solely by a university or college where the contract amount will be $500,000 or less) unless all the requirements for data are believed to be known at the time of contracting and specified in the contract. This clause may also be used in other contracts, such as supply or production when considered appropriate in accordance with 27.408(b).

(i) In accordance with 27.408(c), the contracting officers shall insert the clause at 52.227–17, Rights in Data—Special Situations, in solicitations and contracts primarily for the production or compilation of data (other than limited rights data or restricted rights computer software) for the Government's internal use, or when there is specific need to limit distribution and use of the data and/or to obtain indemnity for liabilities that may arise out of the content, performance, or disclosure of the data. Examples of such contracts are set forth in 27.408(a). The contract may specify the purposes and conditions (including time limitations) under which the data may be used, released, or reproduced by the contractor for other than contract performance. Contracts for the production of audiovisual works, sound recordings, etc., may include limitations in connection with talent releases, music licenses, and the like that are consistent with the purposes for which the data is required.

(j) The contracting officer shall insert the clause at 52.227–18, Rights in Data—Existing Works, in solicitations and contracts exclusively for the acquisition, without modification, of existing audiovisual and similar works of the type set forth in 27.408(b). The contract may set forth limitations consistent with the purposes for which work is being acquired. The clause at 52.227–17, Rights in Data—Special Situations, shall be

used if existing works are to be modified, as by editing, translation, addition of subject matter, etc.

(k)(1) In accordance with 27.406(c), when contracting (other than from GSA's Multiple Award Schedule contracts) for the acquisition of existing computer software, the clause at 52.227–19, Commercial Computer Software, may be used in the solicitation and contract. This clause may also be used in contracts containing the clause at 52.227–14, Rights in Data. In any event, the contracting officer shall assure that the contract contains terms to obtain sufficient rights for the Government to fulfill the need for which the software is being acquired and is otherwise consistent with 27.404–3(b)(1).

(2) The contracting officer may, in any solicitation and contract containing the clause at 52.227–19, insert the clause at 52.227–25, Validation of Computer Software and Data Markings (Nonstatutory), where the contracting officer desires the rights to challenge the restrictive markings on delivered computer software that is subject to the clause at 52.227–19.

(l) The clause at 52.227–20, Rights in Data—SBIR Program, shall be used in all Phase I and Phase II contracts awarded established pursuant to Public Law 97–219 (The Small Business Innovation Development Act of 1982).

(m) While no specific clause of this subpart is required to be included in contracts solely for the acquisition, without disclosure prohibitions, of books, publications, and similar items in the exact form in which such items exist prior to the request for purchase (i.e., the off-the-shelf purchase of such items), if reproduction rights are to be acquired the contract shall include terms addressing such rights. (See. 27.406(d).)

(n) [Reserved]

(o) Agencies may prescribe in their procedures the clause at 52.227–17, Rights in Data—Special Situations, or prescribe, as appropriate, clauses for architect-engineer services and construction work.

(p) Agencies may prescribe clauses in contracts for management, operation, design, or construction of Government-owned research, development, or production facilities, and in contracts and subcontracts in support of programs being conducted at such facilities.

(q) The contracting officer shall insert the clause at 52.227–21, Technical Data Certification, Revision, and Withholding of Payment, in all contracts, with the suitable alternative selected in contracts for major systems acquisitions or for support of major systems acquisitions.

(r) [Reserved]

(s) In accordance with 27.408, if a contracting officer desires to acquire unlimited rights in technical data contained in a successful proposal upon which a contract award is based, the contracting officer shall insert the clause at 52.227–23, Rights to Proposal Data. Rights to technical data in a proposal are not acquired by mere incorporation by reference of the proposal in the contract, and if a proposal is incorporated by reference, 27.408 must be followed to assure that such rights are appropriately addressed.

3. Subpart 27.7 is added to read as follows:

Subpart 27.7—Infringement of Patents and Copyrights

Sec.
27.700 Scope.
27.701 Policy.
27.702 Requirements of an administrative claim.
27.703 Processing administrative claims.

Subpart 27.7—Infringement of Patents and Copyrights

27.700 Scope.

This subpart prescribes policy and procedures for the processing of administrative claims asserted against an agency for infringement of patents and copyrights.

27.701 Policy.

A Government agency should take all necessary steps to settle administratively, to deny, or otherwise to dispose of claims of infringement of privately owned rights in patented inventions or copyrighted works prior to suit against the Government; and should prescribe policy, procedures, and instructions with respect to the processing of such claims.

27.702 Requirements of an administrative claim.

Under applicable statutes, including those tolling statutes of limitation (35 U.S.C. 286 for patents and 28 U.S.C. 1498(b) for copyright), a patent or copyright infringement claim for compensation must be actually communicated to and received by the Government agency. A claim must be in writing and include the following:

(a) An allegation of infringement.

(b) A request for compensation, either expressed or implied.

(c) A citation of the patents or copyrighted works alleged to be infringed.

(d) In the case of a patent infringement claim, a sufficient designation of the alleged infringing items or processes to permit identification, or, in the case of a copyright infringement claim, a sufficient designation of the alleged infringing works and/or practices to permit identification and investigation.

(e) A designation of at least one claim of each patent and copyright alleged to be infringed.

(f) As an alternative to paragraphs (d) and (e) of this section, a certification that the claimant has made a bona fide attempt to determine the items or processes which are alleged to infringe the patents, or the works or practices alleged to infringe the copyrights, but was unable to do so, giving reasons, and stating a reasonable basis for the claimant's belief that the patents or copyrighted works are being infringed.

27.703 Processing administrative claims.

(a) Correspondence received by an agency from an owner of a patent or copyright alleging infringement of such patent or copyright by the agency shall be promptly forwarded to the agency's designee for processing of claims alleging infringement of patents or copyrights.

(b) The contractors are required by the clause at 52.227–2, Notice and Assistance Regarding Patent and Copyright Infringement—

(1) To notify the contracting officer of all claims of infringement that come to the contractor's attention in connection with performing a Government contract; and

(2) When requested, to assist the Government with any evidence and information in its possession in connection with any claims against the Government made before suit has been instituted on account of any alleged patent or copyright arising out of or resulting from the contract performance (see 27.202–1).

(c) The contracting officer shall notify the Government agency's designee for processing infringement claims of all claims of infringement that come to the contracting officer's attention.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. Section 52.227–14 is revised to read as follows:

52.227–14 Rights in Data.

The contracting officer shall use this clause and Alternates in accordance with 27.410–1(a) through (f):

Rights in Data (XXX 1990)

(a) Definitions.

Computer software, as used in this clause, means—

(1) Computer programs which are data comprising a series of instructions, rules,

routines, or statements which allow or cause a computer to perform an operation or series of operations; and

(2) Data comprising source code listings, design details, algorithms, processes, flow charts, formulae, and related material that would enable the computer program to be produced, created, or compiled.

Data, as used in this clause, means recorded information, regardless of form, the media on which it may be recorded, or the method of recording. The term includes, but is not limited to, technical data and computer software, and computer data bases. The term does not include data incidental to the administration of this contract, such as financial, administrative, cost and pricing, or management information.

Data base, as used in this clause, means a collection of data recorded in a form capable of, and for the purpose of, being stored in, processed and operated on by a computer. The term does not include computer software.

Detailed design, manufacturing, or process data, as used in this clause, means technical data of sufficient detail to enable the essentially identical reproduction or manufacture of an item, component, or the performance of a process, to which the data pertains.

Developed, as used in this clause, means that the item, component, process, or computer software exists and is workable. To exist, the item or component must have been constructed or the process or computer program practiced. To be workable, the item, component, process, or computer program has been analyzed or tested sufficiently to demonstrate to reasonable people, skilled in the applicable art, that there is a high probability that it will operate as intended. Whether, how much, and what type of analysis or testing is required to establish workability depends on the nature of the item, component, process, or computer software, and the state of the art. To be considered "developed," the item, component, process, or computer software need not be at the stage where it could be offered for sale or sold on the commercial market, nor must the item, component, process, or computer software be actually reduced to practice within the meaning of Title 35 of the United States Code.

Developed exclusively with Government (Federal) funds, as used in this clause, means, in connection with an item, component, process, or computer software, that the cost of development was paid for in whole by the Government. Independent research and development and bid and proposal costs, as defined in 31.205–18, (whether or not included in a formal independent research and development program), and costs allocated to overhead accounts in accordance with the Cost Accounting Standards (CAS) for those contracts covered by CAS, or in accordance with generally accepted accounting principles for those contracts not covered by CAS, are not considered to be costs of "development" with Federal funds for purposes of this definition.

Developed exclusively at private expense, as used in this clause, means, in connection with an item, component, process, or computer software, that no part of the cost of development was charged to the Government, with the express understanding that independent research and development and bid and proposal costs, as defined in 31.205–18 (whether or not included in a formal independent research and development program), and costs allocated to overhead accounts in accordance with the Cost Accounting Standards (CAS) for those contractors covered by CAS, or in accordance with generally accepted accounting principles for those contracts not covered by CAS, are not to be considered development costs charged to the Government for purposes of this definition.

Form, fit, and function data, as used in this clause, means data relating to items, components, processes, or computer programs that are sufficient to enable physical and functional interchangeability as well as data identifying source(s), size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements.

Government purpose rights, as used in this clause, means the rights of the Government to use, duplicate, and disclose detailed design, manufacturing, and process data and computer software, by or on behalf of the Government, including disclosure outside the Government for any Government purpose. Data that may be subject to Government purpose rights will be specifically identified in this contract, and the Government's rights to use, duplicate, and disclose such data are as set forth in the Government Purpose Rights Notice of alternate II, if included in this clause.

Limited rights data, as used in this clause, means data pertaining to items, components, and processes developed exclusively at private expense, except as may be provided otherwise in subparagraph (b)(1) of this clause, provided that such data have not been disclosed, furnished, or released to the Government or to others without restriction on further disclosure and use or are otherwise publicly available. The Government's rights to use, duplicate, and disclose limited rights data are as set forth in the Limited Rights Notice of subparagraph (b)(2) of this clause.

Manuals and instructional materials, as used in this clause, means data necessary for the installation, operation, maintenance and repair, or training with respect to any item, component, process, or computer software.

Mixed funding, as used in this clause, means with respect to Government purpose rights that both Government funds and private funds were used for the development of an item, component, process, or computer software and the respective contributions of the Government and the contractor are not readily segregable. The items, components, processes, or computer software to which mixed funding applies must be by agreement of the parties and identified in the contract. It cannot be created by application of normal or incidental contract overhead accounts, or by application of contractor funds arising from required contract performance, such as cost overruns, and claims for out of scope work.

Restricted rights computer software, as used in this clause, means computer software developed exclusively at private expense, except as may be provided otherwise in subparagraph (b)(1) of this clause, provided that such computer software has not been disclosed, furnished, or released to the Government or to others without restrictions on further disclosure and use, or is not publicly available. The Government's rights to use, duplicate, or disclose restricted rights computer software are as set forth in the Restricted Rights Notice of subparagraph (b)(3) of this clause.

Technical data, as used in this clause, means data which are of a scientific or technical nature. Technical data does not include computer software, but does include manuals and instructional materials and technical data formatted as a computer data base.

Unlimited rights, as used in this clause, means the rights of the Government to data to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so.

(b) Rights acquired by the Government.

(1) *Unlimited rights.* Unless otherwise provided in paragraph (c) of this clause regarding copyright, or as provided in subparagraph (b)(4) of this clause for Government purpose rights if included in this clause, the Government shall have unlimited rights in—

(i) Data first produced in the performance of this contract, including but no limited to—

(A) Technical data pertaining to items, components, processes, or computer software developed exclusively at Government expense; or

(B) Technical data and computer software resulting directly from the performance of experimental, developmental, or research work specified as an element of performance under this contract; or that has been developed during and were necessary for the performance of this contract.

(ii) Form, fit, and function data delivered or furnished for use in the performance of this contract;

(iii) Manuals and instructional materials furnished or required to be furnished for the installation, operation, maintenance and repair, or training with respect to any item, component, process or for the installation, maintenance, operation, and training with respect to any computer program required to be, or in fact, delivered or furnished for use in the performance of this contract;

(iv) All data which was in fact delivered or furnished for use in the performance of this contract which constitutes a correction or change to data furnished to the contractor by the Government; and

(v) All other data required to be or in fact delivered or furnished for use in the performance of this contract unless provided otherwise for limited rights data or restricted rights computer software in accordance with subparagraphs (b) (2) and (3) of this clause.

(2) *Limited rights.* The Government shall have limited rights as set forth in the Notice below in any data required to be or in fact delivered or furnished for use in the performance of this contract, and such data

are limited rights data, *provided* the following "Limited Rights Notice" is affixed to the data:

Limited Rights Notice

(a) Contract (and subcontract, if applicable) No. Contractor (and subcontractor, if applicable):

(b) These data are subject to the following limited rights. These data may be reproduced and used by the Government with the limitation that these data will not, without the written permission of the Contractor or as expressly permitted in this contract, be used for purposes of manufacture or disclosed outside the Government; except that the Government may disclose these data outside the Government for the following purposes, provided the Government makes such disclosure subject to prohibition against further use and disclosure:

(1) Emergency repair and overhaul.

(2) Release or disclosure of technical data (other than detailed design, manufacturing, or process data) to, or use of such data by, a foreign government or agency thereof as the interests of the United States may require for evaluational or informational purposes.

(c) This notice shall be marked on any reproduction of these data, in whole or in part."

(End of notice)

(3) *Restricted rights.* (i) The Government shall have restricted rights as set forth in the Notice below, in any computer software required to be or in fact delivered or furnished for use in the performance of this contract, and such computer software is restricted rights computer software, *provided* the following "Restricted Rights Notice" is affixed to the computer software:

Restricted Rights Notice—Long Form

(a) This computer software is submitted with restricted rights under Government Contract No. _____ with _____ (and Subcontract No. _____ with _____, if appropriate). It may not be used, reproduced, or disclosed by the Government except as provided in paragraph (b) of this Notice.

(b) This computer software may be—

(1) Used, or copied for use, in or with the computer or computers for which it was acquired, including use at any Government installation to which such computer or computers may be transferred;

(2) Used, or copied for use, in a backup or replacement computer if any computer for which it was acquired is inoperative or is replaced;

(3) Reproduced for safekeeping (archives) or backup purposes;

(4) Modified, adapted, or combined with other computer software, provided that only the portions of the derivative software consisting of the restricted rights computer software are to be made subject to the same restricted rights; and

(5) Disclosed to and reproduced for use by Contractors under a service contract (of the type defined in 37.101) in accordance with subparagraphs (b)(1) through (b)(4) of this Notice provided the Government makes such disclosure or reproduction subject to these restricted rights.

(c) Notwithstanding the foregoing, if this computer software has been published under copyright, it is licensed to the Government, without disclosure prohibitions, with the rights set forth in the restricted rights notice above.

(d) This Notice shall be marked on any reproduction of this computer software, in whole or in part."

(End of notice)

(ii) Where it is impractical to include the Restricted Rights Notice—Long Form on restricted rights computer software, the following short form Notice may be used in lieu thereof.

Restricted Rights Notice—Short Form

Use, reproduction, or disclosure is subject to restrictions set forth in the Long Form Notice of Contract No. _____ with _____ (and Subcontract No. _____ with _____, if appropriate).

(End of notice)

(iii) If the software is embedded, or it is commercially impractical to mark it with human readable text, then the symbol R and the clause date (mo/yr) in brackets or a box, as [R-8/90], may be used. This will be read to mean restricted rights software, subject to the rights of the Government as described in the Long Form Notice, in effect as of the date indicated next to the symbol. The symbol shall not be used to mark human readable material. In the event the contract contains any variation to the rights in the Long Form Notice, then the contract number must also be cited.

(iv) If restricted rights computer software is delivered with the copyright notice of 17 U.S.C. 401, the software will be presumed to be published copyrighted computer software licensed to the Government without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause, unless the Contractor includes the following statement with such copyright notice: "Unpublished—rights reserved under the Copyright Laws of the United States."

(c) *Copyright*—(1) *Data first produced in the performance of the contract.* Unless provided otherwise in this contract, the Contractor may establish, without prior approval of the Contracting Officer, claim to copyright subsisting in scientific and technical articles based on or containing data first produced in the performance of this contract and published in academic, technical or professional journals, symposia proceedings, or similar works. The prior, express written consent of the Contracting Officer is required to establish claim to copyright subsisting in all other data first produced in the performance of this contract. When claim to copyright is made, and the Contractor has published or intends to publish under copyright, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For data other than computer software, the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license for all such data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by and on behalf of the Government. For computer software, the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license in such copyrighted computer software to reproduce, prepare derivative works, and perform publicly and display publicly, by and on behalf of the Government.

(2) *Data not first produced in the performance of this contract.* The Contractor shall not, without prior written permission of the Contracting Officer, incorporate into data delivered under this contract any data not first produced in the performance of this contract and which contains the copyright notice of 17 U.S.C. 401 or 402, unless the Contractor identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause; *provided*, however, that if such data are restricted rights computer software the Government shall acquire a copyright license of the scope set forth in the "Restricted Rights Notice" of subparagraph (b)(3) of this clause if included in this contract or as otherwise may be provided in a collateral agreement incorporated in or made part of this contract.

(3) *Removal of copyright notices.* The Government agrees not to remove any authorized copyright notices placed on data pursuant to this paragraph (c), and to include such notices on all Government reproductions of the data. Should data first produced under this contract be improperly copyrighted, the Government may remove such notices or, at its discretion, demand that the copyright be assigned to the United States. Upon such demand, the Contractor agrees to so assign the copyright.

(d) *Release, publication and use of data.* (1) The Contractor shall have the right to use, release to others, reproduce, distribute, or publish any data first produced or specifically used by the Contractor in the performance of this contract, except to the extent such data may be subject to Federal export control or national security laws or regulations, or unless otherwise provided in this paragraph (d) or expressly set forth in this contract.

(2) The Contractor agrees that to the extent it receives or is given access to any data necessary for the performance of this contract which are subject to a Limited Rights, Restricted Rights, or Government Purpose Rights Notice, or contain other restrictive markings, the Contractor shall treat the data in accordance with such Notices or markings unless otherwise specifically authorized in writing by the Contracting Officer.

(e) *Omitted or Incorrect markings.* (1) Data delivered to the Government without an authorized legend as required by paragraph (b) of this clause, or an authorized copyright notice required by paragraph (c) of this clause, shall be deemed to have been furnished with unlimited rights, and the Government assumes no liability for the

disclosure, use, or reproduction of such data. However, to the extent the data has not been disclosed without restriction outside the Government, the Contractor may request, within 6 months after delivery of such data, permission to have notices placed on qualifying data at the Contractor's expense, and the Contracting Officer may agree to do so if the Contractor—

(i) Identifies the data to which the omitted notice is to be applied;

(ii) Demonstrates that the omission of the notice was inadvertent;

(iii) Establishes that the use of the proposed notice is authorized; and

(iv) Acknowledges that the Government has no liability with respect to the disclosure, use, or reproduction of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(2) The Contracting Officer may also—

(i) Permit correction at the Contractor's expense of nonconforming notices if the Contractor identifies the data on which correction of the notice is to be made, and demonstrates that the correct notice is authorized; or

(ii) Correct any nonconforming notices.

(f) *Unauthorized marking of data.* Notwithstanding any other provisions of this contract concerning inspection or acceptance, if any data delivered under this contract are marked with the notices specified in paragraph (b) of this clause that are not justified by this clause or by any other terms of this contract, or if such data bears any other restrictive or limiting markings not authorized by this contract, the Contracting Officer may at any time either return the data to the Contractor, or challenge the alleged restrictions in accordance with the procedures set forth in the Validation clause of this contract.

(g) *Subcontracting.* (1) The Contractor has the responsibility to obtain from its subcontractors all data and rights necessary to fulfill the Contractor's obligations under this contract. To this end, the Contractor shall use this same clause, suitably altered to identify the parties, in all subcontracts. No other clause or agreement shall be used without express written consent of the Contracting Officer, obtained in accordance with agency procedures.

(2) Data other than unlimited rights data may be submitted by a subcontractor directly to the Government, rather than through any higher tier Contractor.

(3) The Contractor shall ensure that subcontractor rights are protected by including any subcontractor allegations of rights on appropriate notification procedures.

(4) In no event shall the Contractor offer its obligations to recognize and protect subcontractor rights in technical data as a defense for failing to satisfy its contractual obligations to the Government. The Contractor shall not obligate itself to provide rights in data to the Government unless such rights have previously been obtained from the subcontractors. The Contractor must satisfy its contractual obligations to the Government while ensuring that the rights afforded subcontractors under 10 U.S.C. 2320 and 2321 are protected.

(h) *Relationship to patents.* Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any licenses or other right otherwise granted to the Government.

(i) *Limitation on charges.* The Contractor recognizes that the Government is not obligated to pay or allow to be paid, any charges for data that the Government has a right to use and disclose to others without restriction, including payments by subcontractors and payments by foreign governments under either the Foreign Military Sale Program or the Military Assistance Program. The Contractor agrees to refund any such payments.

[End of clause]

Alternate I (XXX 1990). As prescribed by 27.410(b), the Contracting Officer may use *Alternate I* if it is determined that it is unnecessary to obtain delivery of limited rights or restricted rights data. Note: If Alternate II is not chosen, paragraph (b)(4) of the clause should be designated "Reserved."

(b)(5) When data other than that listed in subparagraph (b)(1) of this clause are specified to be delivered in the performance of this contract and such data are limited rights data, or restricted rights computer software, the Contractor shall, unless specifically directed otherwise in writing by the Contracting Officer, withhold such data and not furnish them to the Government. However, as a condition to withholding the data, the Contractor must identify the data and furnish form, fit, and function data in lieu thereof. Notwithstanding this provision, the Contracting Officer may, at any time by written request, identify and specify the delivery of such withheld data. If delivery of such data is required, the Contractor may protect his rights by use of the Notices in paragraph (b)(2) or (b)(3), as applicable, of this clause, or (b)(4), if this clause contains a subparagraph (b)(4). The Contracting Officer, or his representative, at all reasonable times up to 3 years after delivery of the data, or final payment under this contract, whichever is later, may inspect at the Contractor's facility or other appropriate site, any data (and records relating to such data) withheld as limited rights data or restricted rights data pursuant to the above paragraph for purposes of evaluating performance under this contract or verifying that such data was properly withheld.

Alternate II (XXX 1990). As prescribed by 27.410(c), the Contracting Officer may use *Alternate II* with the clause at 52.227–14 if Government purpose rights are to be granted.

(b)(4) *Government purpose rights.* (i) The Government shall have Government purpose rights, as set forth in the Notice below in detailed design manufacturing and process data pertaining to items, components, processes and computer software for which the parties have agreed to such rights and specifically identified in this contract, *provided* the following "Government Purpose Rights Notice" is affixed to such data or computer software—

Government Purpose Rights Notice

(a) Contract [and subcontract No., if applicable) No. _____ Contractor [and subcontractor, if applicable]: _____

(b) These technical data and computer software are subject to Government purpose rights. These technical data and computer software may be used, duplicated, and disclosed by or on behalf of the Government for any Government purpose, including disclosure outside the Government for such purposes.

(c) The disclosure prohibitions under these Government purposes rights shall be effective until _____ *[insert date certain]*, after which date the Government shall have unlimited rights in these technical data and computer software.

(d) This notice shall be marked on any reproduction of these data, in whole or in part.

Alternate III (XXX 1990). As prescribed by 27.410(d), *Alternate III* is to be used with the clause at 52.227–14 if postaward negotiations are necessary in accordance with 27.405–4.

(j) *Notice of Limitations on Government Rights and subsequent negotiation.* (1) The Offeror or Contractor shall notify and continue to notify the Contracting Officer of its or its potential subcontractor's use during performance of the contract, or any subcontract, of items, components, processes, and associated data, and computer software, which—

(i) Have been developed exclusively at private expense;

(ii) Have been developed in part at private expense; and

(iii) Embody technology that has been developed exclusively with Government funds which the offeror, Contractor, or subcontractor desires exclusive rights to commercialize.

(2) Such notification shall be added to any listing developed under the Notification provision (52.227–15), if any, and the listing shall subsequently be incorporated into this contract, and may be modified by mutual consent throughout the life of this contract, but no later than delivery of the data in question. The Contracting Officer may negotiate and continue to negotiate with the Contractor using the procedures of 27.405–2 regarding the listing. The listing is intended to facilitate review and acceptance of data by the Government and does not waive or modify the rights of the Government to challenge the data under the clause at 52.227–25.

(3) Notification is not required with respect to items, components, processes and computer software if no data are to be delivered with other than unlimited rights, or if the data are delivered with unlimited rights.

(4) Upon request, the Contractor or subcontractor will provide sufficient information to enable the Contracting Officer to identify and evaluate the Contractor's assertions.

(k) *Identification of restrictions on Government rights.* Data shall not be tendered to the Government with other than unlimited rights unless the data has been identified under the provision at 52.227–15, prior to award, or identified under the notification procedure of *Alternate III*, if after award.

(l) *Disputes.* In the case of an item, component, or process that is developed in part at private expense, if, after exhausting

all reasonable efforts, the parties fail to agree to apportionment of the rights in technical data furnished under this contract by the date established in the contract for agreement, or within any extension established by the Contracting Officer, then the Contracting Officer may establish the respective rights of the parties subject to Contractor appeal as provided in the disputes clause of this contract. In any event, the Contractor shall proceed with completion of the contract.
(End of clause)

Alternate I. (XXX 1990). As prescribed by 27.410 (e) and (f), substitute the following subparagraph (c)(1) in the clause if automatic copyright is desired.

(c) *Copyright.* (1) Data first produced in the performance of the contract. Except as otherwise specifically provided in this contract, the Contractor may establish claim to copyright subsisting in any data first produced in the performance of this contract. When claim to copyright is made, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For data other than computer software, the Contractor grants to the Government and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license for all such data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by and on behalf of the Government. For computer software, the Contractor grants to the Government and others acting on its behalf, a paid-up nonexclusive, irrevocable, or worldwide license in such copyrighted computer software to reproduce, prepare derivative works, and perform publicly and display publicly, by and on behalf of the Government.

5. Section 52.227–15 is revised to read as follows:

52.227.15 Notification of Data Deliverables With Other Than Unlimited Rights.

As prescribed in 27.410(g), the contracting officer shall insert this provision in all solicitations containing the clause at 52.227–14:

Notification of Data Deliverables With Other Than Unlimited Rights (XXX 1990)

(a) This solicitation sets forth the work to be performed, if a contract award results, and the Government's known requirements for data (as defined in 27.401.) Any resulting contract may also provide the Government with the option to order additional data under the Additional Data Ordering Clause at 52.227–16, if included in the contract. Rights in data delivered under any resultant contract will be subject to the Rights in Data Clause at 52.227–14 that is to be included in this contract.

(b) The offeror's proposal, or response, to this solicitation shall, to the extent feasible, complete the representation of this clause to either state that no data with other than unlimited rights data will be delivered, or identify all data to be delivered with other than unlimited rights. Any such identification is to be used for purposes of establishing a baseline for negotiation with the Contracting Officer, and not as an agreement by either party of the ultimate status of the rights.

(c) Representation concerning data rights. The Offeror has reviewed the data requirements of this solicitation and states—
(check the appropriate box)

(1) All of the data proposed for fulfilling the data requirements specified in *this* solicitation shall be delivered with unlimited rights.

(2) All of the data proposed for fulfilling the data requirements specified in *tis* solicitation, except as noted below, shall be delivered with unlimited rights.

(i) The following data pertaining to items, components, processes have been developed exclusively at private expense, and the offeror intends to deliver such data with limited rights:

(List data deliverable and lowest segregable item, component, or process to which it pertains.)

(ii) The following computer software has been developed at private expense, and the offeror intends to deliver such data with restricted rights:

(List data deliverable and computer software to which it pertains.)

(iii) The following data pertaining to items, components, processes, or computer software have been or are to be developed with mixed funding, and the Offeror requests that such data be made subject to Government purpose rights:

(List data deliverable and lowest segregable item, component, process, or computer software to which it pertains.)

(iv) The following data pertaining to items, components, processes, or computer software have been developed exclusively at Government expense, and the offeror requests that such data be made subject to Government purpose rights:

(List data deliverable and lowest segregable item, component, process, or computer software to which it pertains.)

(3) The offeror has not previously delivered or is not obligated to deliver under a Government contact the same or substantially the same data (as defined in 52.227–14) which may be required to be delivered under this contract except as indicated below.
(End of provision)

6. Section 52.227–16 is revised to read as follows:

52.227–17 Additional Data Ordering.

As prescribed in 27.410(h), the contracting officer shall insert the following clause:

Additional Data Ordering (XXX 1990)

(a) In addition to the data (as defined in the clause at 52.227–14, Rights in Data, or other equivalent clause included in this contract) specified elsewhere in this contract to be delivered, the Contracting Officer may, at any time during contract performance or within a period of 3 years after acceptance of all items to be delivered under this contract or the termination of this contract, order any data first produced or specifically used in the performance of this contract.

(b) The Rights in Data clause, or other equivalent clause included in this contract, is applicable to all data ordered under this Additional Data Ordering clause. Nothing contained in this clause shall require the Contractor to deliver any data, the withholding of which is authorized by the Rights in Data clause or other equivalent clause of this contract, or, data which are specifically identified in this contract as not subject to this clause.

(c) The obligation to deliver the data of a subcontractor, pertaining to an item obtained from the subcontractor, shall expire 3 years after the date the prime Contractor accepts the last delivery of that item from that subcontractor under this contract.

(d) When data are or are to be delivered under this clause, the Contractor will be paid the actual costs, if any, incurred in converting the data into the prescribed form, for reproduction and delivery.
(End of clause)

7. Section 52.227–17 is revised to read as follows:

52.227–17 Rights in Data—Special Situations.

As prescribed in 27.410(i), the contracting officer shall insert the following clause:

Rights in Data—Special Situations (XXX 1990)

(a) *Definitions.*

Data, as used in this clause, means recorded information, regardless of form, the media on which it may be recorded, or the method of recording. The term includes, but is not limited to, technical data and computer software. Data incidental to the administration of this contract, such as financial, administrative, cost and pricing, or management information are not subject to this clause.

Unlimited rights, as used in this clause, means the rights of the Government in data to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so.

(b) *Allocation of rights.*

(1) The government shall have—

(i) Unlimited rights in all data delivered under this contract, and in all data first produced in the performance of this contract, unless otherwise provided in paragraph (c) of this clause regarding copyrights.

(ii) The right to limit exercise of claim to copyright in data first produced in the performance of this contract, and to obtain assignment of copyright in such data in accordance with subparagraph (c)(1) of this clause.

(iii) The right to limit the release and use of certain data in accordance with paragraph (d) of this clause.

(2) The Contractor shall have, to the extent permission is granted in accordance with

BEST COPY AVAILABLE

subparagraph (c)(1) of this clause, the right to establish claim to copyright subsisting in data first produced in the performance of this contract.

(c) *Copyright.* (1) *Data first produced in the performance of this contract.* (i) The Contractor agrees not to assert, establish, or authorize others to assert or establish any claim to copyright subsisting in any data first produced in the performance of this contract without prior written permission of the Contracting Officer. When claim to copyright is made and the Contractor has published or intends to publish under copyright, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration of a published work in the U.S. Copyright Office. The Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license in such copyrighted data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government.

(ii) If the Government desires to obtain copyright in data first produced in the performance of this contract and permission has not been granted as set forth in subdivision (c)(1)(i) of this clause, the Contracting Officer may direct the Contractor to establish, or authorize the establishment of, claim to copyright in such data and to assign, or obtain the assignment of, such copyright to the Government or its designated assignee, and the Contractor agrees to assign as directed.

(2) *Data not first produced in the performance of this contract.* The Contractor shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this contract any data not first produced in the performance of this contract and which contain the copyright notice of 17 U.S.C. 401 or 402, unless the Contractor identifies such data and grants to the Government, or acquires on the Government's behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause.

(d) *Release and use restrictions.* Except as otherwise specifically provided for in this contract, the Contractor shall not use for purposes other than the performance of this contract, nor shall the Contractor release, reproduce, distribute, or publish any data first produced in the performance of this contract, nor authorize others to do so, without prior written permission of the Contracting Officer.

(e) *Indemnity.* The Contractor shall indemnify the Government and its officers, agents, and employees, acting for the Government, against any liability, including costs and expenses, incurred as a result of the violation of trade secrets, copyrights, or right of privacy or publicity, arising out of the creation, delivery, publication, or use of any data furnished under this contract; or any libelous or other unlawful matter contained in such data. The provisions of this paragraph do not apply unless the Government provides notice to the Contractor, as soon as practicable, of any claim or suit, affords the Contractor an opportunity under applicable laws, rules, or regulations to participate in the defense thereof, and obtains the Contractor's consent to the settlement of any suit or claim other than as required by final decree of a court of competent jurisdiction; nor do these provisions apply to material furnished to the Contractor by the Government and incorporated in data to which this clause applies.

(End of clause)

8. Section 52.227–18 is revised to read as follows:

52.227–18 Rights in Data—Existing Works.

The contracting officer shall use this clause in accordance with the instructions at 27.410(j):

Rights in Data—Existing Works (XXX 1990)

(a) The Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license to reproduce, prepare derivative works, and perform publicly and display publicly, by or on behalf of the Government, for all the material or subject matter called for under this contract, or for which this clause is specifically made applicable.

(b) The Contractor shall indemnify the Government and its officers, agents, and employees, acting for the Government, against any liability, including costs and expenses, incurred as the result of the violation of trade secrets, copyrights, or right of privacy or publicity, arising out of the creation, delivery, publication, or use of any data furnished under this contract, or any libelous or other unlawful matter contained in such data. The provisions of this paragraph do not apply unless the Government provides notice to the Contractor, as soon as practicable, of any claim or suit, affords the Contractor an opportunity under applicable laws, rules, or regulations to participate in the defense thereof, and obtains the Contractor's consent to the settlement of any suit or claim other than as required by final decree of a court of competent jurisdiction; nor do these provisions apply to material furnished to the Contractor by the Government and incorporated in data to which this clause applies.

(End of clause)

9. Section 52.227–19 is revised to read as follows:

52.227–19 Commercial Computer Software.

The contracting officer shall use this clause in accordance with the instructions as 27.410(k).

Commercial Computer Software (XXX 1990)

(a) Commercial computer software, as used in this clause, is privately developed and existing software normally vended in the commercial market under a license or lease agreement. Contracting Officers may presume that software which is regularly used for other than Governmental purposes and is sold in significant quantities to the general public at established catalog or market prices is commercial.

(b) Any commercial computer software delivered under this purchase order or contract that has been developed at private expense and claimed as restricted rights computer software shall be subject to the restricted rights in paragraph (d) of this clause. Where the Contractor proposes its commercial software license and without regard to when submitted—

(1) Only those portions consistent with Federal laws, the Federal Acquisition Regulation, and this clause, including paragraph (d) of this clause, are incorporated into and made a part of this contract;

(2) The signing of any agreement, license, or registration form or card, and its return to the Contractor by the Contracting Officer or user, is only for the purposes of receiving updates, correction notices, and similar activities, and shall not create any obligation or alter any of the terms and conditions of this contract; and

(3) If that license provides rights to licensees greater than those stated in subparagraph (d)(2) of this clause, then the Government shall receive those greater rights.

(c) By shipment or delivery to the Government of the specified computer software, the Contractor unconditionally accepts the terms and conditions of this clause and agrees that the clause, including the incorporated license, constitutes the entire agreement between the parties concerning rights in the computer software.

(d) The following restricted rights shall apply:

(1) The computer software may not be used, reproduced, or disclosed by the Government except as provided below or otherwise expressly stated in the purchase order or contract.

(2) The computer software may be—

(i) Used, copied for use, in or with any computer owned or leased by, or on behalf of, the Government; provided the software is not used, nor copied for use, in or with more than one computer simultaneously, unless otherwise permitted by the license incorporated under paragraph (b) of this clause;

(ii) Reproduced for safekeeping (archives) or backup purposes;

(iii) Modified, adapted, or combined with other computer software, provided that only the modified, adapted, or combined portions of the derivative software consisting of restricted software shall be subject to the same restricted rights; or

(iv) Disclosed and reproduced for use by the Government's Contractors or their subcontractors in accordance with the restricted rights in subdivisions (d)(1) (i), (ii), and (iii) of this clause, provided they have the Government's permission to use the computer software and agree to prevent unauthorized use and disclosure.

(3) Notwithstanding the foregoing, if the computer software has been published under copyright, it is license to the Government, without disclosure prohibitions, with the

rights in subparagraphs (b) and (c) of this clause.

(e) The computer software may be marked with any appropriate notice consistent with the rights in subparagraphs (b) through (d) of this clause.

(e) The Government and others acting on its behalf shall have the right to use, disclose, and reproduce, for any purpose whatsoever, any manuals and instructional material provided under this purchase order or contract, unless such manuals and instructional materials bear a copyright notice. In that case the Government and others acting on its behalf shall have a license under copyright to use and reproduce such manuals and instructional materials for Government purposes only, without disclosure prohibitions.

(f) Whenever operational use of any commercial computer software delivered under this purchase order or contract is no longer needed, or has been discontinued permanently by the Government or a Government Contractor, the Government or the Contractor shall, unless required to return the software to the vendor or Contractor under this purchase order or contract, have the right to dispose of the computer software by any destructive means sufficient to render its usability impractical by subsequent users. At the time of such destruction or disposal, the restrictive rights set forth in paragraph (d) of this clause and any incorporated license provisions in the vendor or Contractor's commercial software agreement shall terminate automatically.

(g) Disputes as to validation of data rights under this clause shall be subject to the procedures stated in the clause at 52.227–25, if included in this contract. All other disputes shall be subject to the Disputes clause of this contract.

(End of clause)

10. Section 52.227–20 is revised to read as follows:

52.227–20 Rights in data—SBIR program.

As prescribed by 27.410(1), the contracting officer shall insert this clause.

Rights in Data—SBIR Program

(a) *Definitions.*

Computer software, as used in this clause, means computer programs which are data comprising a series of instructions, rules, routines, or statements which allow or cause a computer to execute an operation or series of operations, and data comprising source code listings, design details, algorithms, processes, flow charts, formulas, and related material that would enable the program to be produced, created or compiled.

Data, as used in this clause, means recorded information, regardless of form, the media on which it may be recorded, or the method of recording. The term includes but is not limited to, technical data and computer software, and computer data bases. The term does not include data incidental to the administration of this contract, such as financial, administrative, cost or pricing, or management information.

Data base, as used in this clause, means a collection of data recorded in a form capable of, and for the purpose of, being stored in, and processed and operated on by a computer. The term does not include computer software.

Detailed design, manufacturing or process data, as used in this clause, means technical data of sufficient detail to enable the essentially identical reproduction or manufacture, of an item, component, or the performance of a process, to which the data pertains.

Form, fit, and function data, as used in this clause, means data relating to items, components, processes, or computer software that are sufficient to enable physical and functional interchangeability as well as data identifying source(s), size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements.

Limited rights data, as used in this clause, means data pertaining to items, components, and processes developed exclusively at private expense, except as may be provided otherwise in subparagraph (b)(1) of this clause, provided that such data have not been disclosed, furnished, or released to the Government or to others without restriction on further disclosure and use or are otherwise publicly available. The Government's rights to use, duplicate, and disclose limited rights data are as set forth in the Limited Rights Notice of paragraph (d) of this clause.

Manuals and instructional materials, as used in this clause, means data necessary for the installation, operation, maintenance and repair, or training with respect to any item, component, process, or computer software.

Restricted rights computer software, as used in this clause, means computer software developed exclusively at private expense, except as may be provided otherwise in subparagraph (b)(1) of this clause, provided that such computer software has not been disclosed, furnished, or released to the Government or to others without restriction on further disclosure and use, or is not publicly available. The Government's rights to use, duplicate or disclose restricted rights computer software are as set forth in the Restricted Rights Notice of paragraph (e) of this clause.

SBIR data, as used in this clause, means data first produced by the Contractor in performance of this small business innovation research contract issued under the authority of 15 U.S.C. 638 (Pub. L. 97–219, Small Business Innovation Development Act of 1982) which data are not generally known, and which data have not been made available to others without obligation as to its confidentiality by the Contractor, or are not otherwise available to the Government.

SBIR rights, as used in this clause, means the rights in SBIR data set forth in the SBIR Rights Notice of paragraph (c) of this clause.

Technical data, as used in this clause, means that data which are of a scientific or technical nature. Technical data does not include computer software, but does include manuals and instructional materials and technical data formatted as a computer data base.

Unlimited rights, as used in this clause, means the rights of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose and to have or permit others to do so.

(b) *Allocation of rights.* (1) The Government shall have unlimited rights in—

(i) Data specifically identified in this contract as data to be delivered without restriction;

(ii) Form, fit, and function data delivered or furnished for use in the performance of this contract;

(iii) Data delivered under this contract (except for restricted computer software) that constitute manuals and instructional and training materials furnished with respect to any item, component, process, or computer program required to be or, in fact, delivered or furnished for use in the performance of this contract;

(iv) All data which was in fact delivered or furnished which constitute a correction or change to data furnished by the United States; and

(v) All other data required to be or, in fact, delivered in the performance of this contract unless provided otherwise for SBIR data in accordance with paragraph (c) of this clause or for limited rights data or restricted rights computer software in accordance with paragraphs (d) and (e), respectively, of this clause.

(2) The Contractor shall have the right to—

(i) Protect SBIR rights in SBIR data delivered under this contract in the manner and to the extent provided in paragraph (c) of this clause;

(ii) Subject to paragraph (h) of this clause, withhold from delivery those data which are limited rights data or restricted rights computer software to the extent provided in paragraphs (d) and (e) of this clause, respectively;

(iii) Substantiate use of, add, or correct SBIR rights or copyrights notices and to take other appropriate action, in accordance with paragraph (g) of this clause; and

(iv) Establish claim to copyright subsisting in data first produced in the performance of this contract to the extent provided in subparagraph (f)(1) of this clause.

(c) *Rights to SBIR data.* (1) The Contractor is authorized to affix the following "SBIR rights Notice" to SBIR data delivered under this contract and the Government will thereafter treat the data, in accordance with such Notice:

SBIR Rights Notice (XXX 1990)

These SBIR data are furnished with SBIR rights under Contract No. _____ with_____ (and subcontract_____ with subcontractor_____, if appropriate.) For a period of 2 years after acceptance of all items to be delivered under this contract, the Government agrees to use these data for Government purposes only, and they shall not be disclosed outside the Government (including disclosure for procurement purposes) during such period without permission of the Contractor, except that, subject to the foregoing use and disclosure prohibitions, such data may be disclosed for use by support Contractors. After the

aforesaid 3-year period, the Government has a royalty-free license to use, and to authorize others to use on its behalf, these data for Government purposes, but is relieved of all disclosure prohibitions and assumes no liability for unauthorized use of these data by third parties. This Notice shall be affixed to any reproductions of these data, in whole or in part.

(End of notice)

(2) The Government's sole obligation with respect to any SBIR data shall be as set forth in this paragraph (c).

(d) *Limited rights.* The Government shall have limited rights in any data required to be or in fact delivered or furnished for use in the performance of this contract provided such data are limited rights data and the following 'Limited Rights Notice' is affixed to the data:

Limited Rights Notice

(a) Contract No. _____ and Contractor _____ (Subcontract No._____ and Subcontractor _____, if applicable.)

(b) These data are subject to limited rights. These data may be reproduced and used by the Government with the limitation that these data will not, without the written permission of the Contractor, be used for purposes of manufacture nor disclosed outside the Government except that the Government may disclose these data outside the Government for the following purposes, provided the Government makes such disclosure subject to prohibition against further use and disclosure and notifies the Contractor:

(1) Emergency repairs and overhaul.

(2) Release or disclosure of technical data (other than detailed manufacturing or process data) to, or use of such data by, a foreign government that is in the interests of the United States and is required for evaluation purposes.

(c) This Notice shall be marked on any complete or partial reproduction of these data.

(End of notice)

(e) *Restricted rights computer software.* The Government shall have only the restricted rights set forth in the Notice below in any computer software required to be or in fact delivered or furnished for use in the performance of this contract, provided such computer software is restricted rights computer software and the following "Restricted Rights Notice" is affixed to the computer software:

Restricted Rights Notice

(a) This computer software is submitted with restricted rights under Government Contract No. _____ with _____ (and Subcontract No. _____ with _____, if appropriate.) It may not be used, reproduced, or disclosed by the Government except as provided in paragraph (b) of this Notice.

(b) This computer software may be—

(1) Used or copied for use in or with the computer or computers for which it was acquired, including the use at any Government installation to which such computer or computers may be transferred;

(2) Used or copied for use in a backup or replacement computer if any computer for which it was acquired is inoperative or is replaced;

(3) Reproduced for safekeeping (archival) or backup purposes;

(4) Modified, adapted, or combined with other computer software, provided that only the portions of the derivative software consisting of the restricted rights computer software are made subject to the same restricted rights; or

(5) Disclosed to and reproduced for use by support service Contractors in accordance with subparagraphs (b) (1) through (4) of this Notice, provided the Government makes such disclosure or reproduction subject to these restricted rights.

(c) Notwithstanding the foregoing, if this computer software has been published under copyright, it is licensed to the Government, without disclosure prohibitions, with the rights set forth in this restricted rights notice.

(d) This Notice shall be marked on any complete or partial reproduction of this computer software.

(End of notice)

(f) *Copyright.* (1) *Data first produced in the performance of this contract.* Except as otherwise specifically provided in this contract, the Contractor may establish claim to copyright subsisting in any data first produced in the performance of this contract. If claim to copyright is made, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For data other than computer software the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government for all such data. For computer software the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, or worldwide license for all such computer software to reproduce, prepare derivative works, and perform publicly and display publicly, by or on behalf of the Government.

(2) *Data not first produced in the performance of this contract.* The Contractor shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this contract, any data that are not first produced in the performance of this contract and that contain the copyright notice of 17 U.S.C. 401 or 402, unless the Contractor identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (f)(1) of this clause.

(3) *Removal of copyright notices.* The Government agrees not to remove any copyright notices placed on data pursuant to this paragraph (f), and to include such notices on all reproductions of the data.

(g) *Omitted or incorrect markings.* (1) Data delivered to the Government without any notice authorized by paragraph (d) of this clause, and without a copyright notice, shall be deemed to have been furnished with unlimited rights, and the Government assumes no liability for the disclosure, use, or reproduction of such data. However, to the extent the data have not been disclosed without restriction outside the Government, the Contractor may request, within 6 months (or a longer time approved by the Contracting Officer for good cause shown) after discovery of such data, permission to have notices placed on qualifying data at the Contractor's expense. The Contracting Officer may agree to do so if the Contractor—

(i) Identifies the data to which the omitted notice is to be applied;

(ii) Demonstrates that the omission of the notice was inadvertent;

(iii) Establishment that the use of the proposed notice is authorized; and

(iv) Acknowledges that the Government has no liability with respect to the disclosure or use of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(2) The Contracting Officer may also—

(i) Permit correction, at the Contractor's expense, of incorrect notices if the Contractor identifies the data on which correction of the notice is to be made and demonstrates that the correct notice is authorized; or

(ii) Correct any incorrect notices.

(h) *Protection of limited rights data.* When data other than that listed in subparagraph (b)(1) of this clause are specified to be delivered under this contract, and such data qualify as either limited rights data or restricted rights computer software, the Contractor shall withhold such data and not furnish them to the Government under this contract. As a condition to this withholding, the Contractor shall identify the data being withheld and furnish form, fit, and function data in lieu thereof. However, the Contracting Office may, at any time by written request, identify and specify the delivery of such withheld data. If delivery of such data is required, the Contractor may protect his rights by use of the Notices in paragraphs (d) and (e) of this clause.

(i) *Subcontracting.* The Contractor has the responsibility to obtain from its subcontractors all data and rights therein necessary to fulfill the Contractor's obligation to the Government under this contract. If a subcontractor refuses to accept terms affording the Government such rights, the Contractor shall promptly bring such refusal to the attention of the Contracting Officer and not proceed with subcontract award without further authorization.

(j) *Relationship to patents.* Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government.

(End of clause)

11. Section 52.227–21 is revised to read as follows:

52.227-21 Technical data certification, revision, and withholding of payment.

As prescribed in 27.410(q), the contracting officer shall insert the following clause.

Technical Data Certification, Revision, and Withholding of payment (XXX 1990)

(a) This clause shall apply to all technical data that have been specified in this contract as being subject to this clause. It shall apply to all such data delivered, or required to be delivered, at any time during contract performance or within 3 years after acceptance of all items (other than technical data) delivered under this contract unless a different period is set forth herein. The Contracting Officer may release the Contractor from all or part of the requirements of this clause for specifically identified technical data items at any time during the period covered by this clause.

(b) Certification of technical data conformity.

(1) All data that are subject to this clause shall be accompanied by the following certification upon delivery:

Certification of data conformity

The Contractor, _____, hereby certifies that the data delivered under Government contract number _____ (and subcontract number _____, if appropriate,) are complete, accurate, and comply with all the requirements of the contract concerning such technical data. Date of Certification: _____ Name and Title of Certifying Official: _____.

(End of certification)

This written certification shall be dated and the certifying official (identified by name and title) shall be duly authorized to bind the Contractor by the certification.

(2) Data delivered under this contract may be subject to reviews by the Government during preparation and prior to acceptance. Data are also subject to review(s) by the Government subsequent to acceptance. Such review(s) may be conducted ancillary to other reviews, such as in-process reviews of configuration audit reviews.

(3) The Government shall rely on the certification set out in subparagraph (b)(1) of this clause in accepting delivery of the data, and, in consideration thereof, may request correction of any deficiencies at any time during the period covered by this clause. These corrections shall be made at the expense of the Contractor. Unauthorized markings on data shall not be considered a data deficiency, but will be treated in accordance with 27.407-1, Unauthorized Markings and Validation.

(4) *Data revision.* At the Contracting Officer's request, the Contractor agrees to revise data subject to this clause to reflect engineering design changes made during the performance of this contract and affecting the form, fit, and function of any deliverable item (other than technical data.) The Contractor may submit a request for an equitable adjustment to the terms of the contract for any revisions to data made pursuant to this paragraph.

(c) *Withholding of payment.* (1) If data specified to be delivered under this contract are not delivered within the time specified by this contract or are deficient upon delivery [including have restrictive markings not identified in the notification list described in the provision at 52.227-15 and in the contract,] the Contracting Officer may, until such data are accepted by the Government, withhold payment to the Contractor of 10 percent of the total contract price unless a lesser withholding amount is specified in the contract, OR, if in accordance with agency procedures this paragraph is superseded by paragraph (d) of this clause. Payments shall not be withheld nor any other action taken pursuant to this paragraph when the Contractor's failure to make timely delivery or to deliver such data without deficiencies arose out of causes beyond the control and without the fault of negligence of the Contractor.

(2) The withholding of any amount or subsequent payment to the Contractor shall not be construed as a waiver of any rights accruing to the Government under this contract.

Alternate I (XXX 1990). (c) *Withholding of payment.* At any time before final payment under this contract, the Contracting Officer may withhold payment until a reserve not exceeding $100,000 or 5 percent of the contract value, whichever is less, if the Contractor fails to—

(1) Make timely delivery of technical data required by this contract;

(2) Provide the certification required by subparagraph (b)(1) of this clause;

(3) Make the corrections required under subparagraph (b)(3) of this clause; or

(4) Make revisions requested under subparagraph (b)(4) of this clause.

(i) Such reserve or balance shall be withheld until the Contracting Officer has determined the Contractor has delivered the data and/or has made the required corrections or revisions. Withholdings shall not be made if the failure to make timely delivery, and/or the deficiencies relating to delivered data, arose out of causes beyond the control of the Contractor and without the fault or negligence of the Contractor.

(ii) The Contracting Officer may decrease or increase the sums withheld up to the sums authorized in subparagraph (d) of this clause. The withholding of any amount under this subparagraph, or the subsequent payment, shall not be construed as a waiver of any Government rights.

(End of Clause)

12. Section 52.227-23 is revised to read as follows:

52.227-23 Rights to proposal data.

As prescribed in 27.410(s), insert the following clause:

Rights to Proposal Data (XXX 1990)

Except for data contained on pages ____, it is agreed that as a condition of award of this contract, and notwithstanding the conditions of any notice appearing thereon the Government shall have unlimited rights (as defined in the Rights in Data—General clause contained in this contract) in and to the technical data contained in the proposal dated _____, upon which this contract is based.

(End of clause)

13. Section 52.227-24 is added to read as follows:

52.227-24 Validation of technical data markings (statutory).

As prescribed in 27.410(a)(2)(i) this clause is to be used for all challenges of technical data based on 10 U.S.C. 2321 or 41 U.S.C. 253d:

Validation of Technical Data Markings (Statutory) (XXX 1990)

(a) The terms used in this clause are defined in the clause at 52.227-14, Rights in Data.

(b) The Contractor and subcontractor at any tier shall maintain records sufficient to reasonably justify the validity of any markings that impose restrictions on the Government or others to use, duplicate, or disclose technical data delivered or required to be delivered under the contract or subcontract, and shall furnish to the Contracting Officer written justification for any such markings in response to a challenge under paragraph (d) of this clause.

(c) *Prechallenge request for information.* The Contracting Officer may request the Contractor or subcontractor to furnish a written explanation for any restriction asserted by the Contractor or subcontractor on the right of the United States or others to use, duplicate, or disclose technical data. The Contractor or subcontractor shall submit such data within the time period stated by the Contracting Officer, which period shall not exceed 90 days. If, upon review of the explanation submitted, and any other information available, the Contracting Officer may acquiesce in the restriction, or may challenge the restriction in accordance with the procedures for formal challenge.

(d) *Formal challenge.* Notwithstanding any provision in this contract concerning inspection and acceptance, if the Contracting Officer determines that a challenge to the restrictive markings is warranted, the Contracting Officer shall send a written challenge to the Contractor or subcontractor asserting such restriction, and such challenge shall—

(1) State the specific grounds for challenging the asserted restriction;

(2) Require a response within 60 days justifying and providing sufficient evidence as to the current validity of the asserted restriction;

(3) Request to be notified if the data has been validated within the past 3 years, or if another Contractor is challenging the data, or challenges the data during the process of this challenge; and

(4) State that failure to respond to the challenge notice may result in a final decision of the Contracting Officer. The Contracting Officer may extend the challenge period if the Contractor submits a written request for additional time for a period not to exceed 90 days.

(5) State that the Contractor's or subcontractor's written response shall be considered a claim within the meaning of the Contract Disputes Act (41 U.S.C. 601, et. seq)

and must be certified as prescribed in 53.227 regardless of dollar amount.

(e) *Final decision when the Contractor or subcontractor fails to respond.* Upon failure to respond within the time period of the challenge notice, the Contracting Officer will issue a final decision in accordance with the Disputes clause of this contract pertaining to the validity of the restriction. The Contracting Officer will proceed with section (g) before release or disclosure of the data outside the Government.

(f) *Final decision when the Contractor or subcontractor responds.* If the Contracting Officer determines that the response has justified the validity of the restrictive marking, the Contracting Officer will issue a final decision to that effect. If the Contracting Officer determines that the validity of the restrictive marking is not justified, the Contracting Officer shall issue a decision to that effect. Final decisions shall be made within 60 days of the Contractor's response, unless the Contracting Officer determines that additional time is required, in which case the Contracting Officer shall notify the Contractor or subcontractor of such an additional time period within 60 days of the receipt of the response to the challenge notice.

(g) After the issuance of a final decision under either paragraph (e) or (f) of this clause, the Government will continue to be bound by the asserted restriction for a period of 90 days from the date of the Contracting Officer's final decision in order to permit the Contractor to avail itself of administrative or judicial review. If the decision is not appealed to a Board of Contract Appeals, or if notice of intent to appeal to the Claims Court is not provided to the Contracting Officer within the 90 days, the Government may cancel or ignore the markings and the failure of the Contractor or subcontractor to pursue appropriate remedies shall constitute consent to that action.

(h) If the decision of the Contracting Officer is properly appealed, the Government will continue to be bound by the asserted restriction until the appeal or suit is decided. Notwithstanding the foregoing, if the Head of the Agency determines, on a nondelegable basis, following notice to the Contractor, that urgent and compelling circumstances exist that will not permit awaiting a decision of the Board or Claims Court, the Head of the Agency may authorize release, and the Contractor's remedy will be to pursue damages against the United States in the appropriate forum.

(End of clause)

14. Section 52.227–25 is added to read as follows:

52.227–25 Validation of computer software and data markings (nonstatutory).

As prescribed by 27.410(2)(ii), the Contracting Officer shall insert the following clause.

Validation of Computer Software and Data Markings (Nonstatutory) (XXX 1990)

(a) Terms used in this clause are defined in the clause at 52.227–14, Rights in Data. This clause applies to all computer software and data delivered under this contract or subcontract except technical data subject to the clause at 52.227–24 pursuant to the requirements of 10 U.S.C. 2321 and 41 U.S.C. 253d.

(b) The Contractor or subcontractor at any tier is responsible for maintaining records adequate to justify the validity of any markings that impose restrictions on the Government or others to use, disclose, or duplicate data (including computer software and technical data). The Contractor or subcontractor shall provide such justification when requested by the Contracting Officer. No restrictive markings shall be placed upon data except in accordance with the terms and conditions of this contract or any subcontract issued hereunder.

(c) *Request for information.* The Contracting Officer may request the Contractor or subcontractor to furnish a written explanation for any restriction asserted by the Contractor or subcontractor on the right of the Government or others acting on its behalf to use, duplicate, or disclose data delivered under this contract or any subcontract hereunder. The Contractor or subcontractor shall submit such explanation within the time period stated by the Contracting Officer, which period shall not exceed 90 days. Upon review of the explanation submitted, and any other information available, the Contracting Officer may acquiesce in the restriction, or may challenge the restriction in accordance with the procedures below.

(d) *Challenge.* Notwithstanding any provision in this contract or any subcontract hereunder concerning inspection and acceptance, if the Contracting Officer determines that a challenge to the restrictive markings is warranted, the Contracting Officer shall send a written challenge to the Contractor or subcontractor asserting such restriction, and such challenge shall—

(1) Identify the data for which the challenge is being made;

(2) State the specific grounds for challenging the asserted restriction;

(3) Require a response within 60 days justifying and providing sufficient evidence as to the current validity of the asserted restriction; and

(4) State that failure to respond to the challenge notice may result in a final decision of the Contracting Officer. The Contracting Officer may extend the challenge period if the Contractor or subcontractor submits a written request for additional time for a period not to exceed 90 days.

(e) *Final decision when the Contractor or subcontractor fails to respond.* Upon failure to respond within the time period of the challenge notice, the Contracting Officer will issue a final decision based on that fact and so notify the Contractor or subcontractor, and the Contractor or subcontractor agree that subject to an abeyance period of 15 days after such notification, the Government shall thereafter have the right to cancel or ignore the markings and the data will no longer be made subject to any disclosure prohibitions.

(f) Final decision when the Contractor or subcontractor responds—

(1) A final decision shall be made within 60 days of the Contractor's or subcontractor's response unless the Contracting Officer determines that additional time is required, in which case the Contracting Officer shall notify the Contractor or subcontractor of such an additional time period within 60 days of the receipt of the response to the challenge notice.

(2) If the Contracting Officer determines that the response has justified the validity of the restrictive marking, or the Contracting Officer has determined not to pursue the challenge further, the Contracting Officer shall notify the Contractor or subcontractor.

(3) If the Contracting Officer determines that the validity of the restrictive marking is not justified, the Contracting Officer shall issue a decision to that effect, which decision shall become the final agency decision and the Contractor or subcontractor will be so notified.

(4) In the event the Contracting Officer determines that the validity of the restrictive markings is not justified, the Government agrees to continue to abide by the restrictive markings for an abeyance period of 15 days from the date the Contractor or subcontractor receives notice of the Contracting Officer's final decision in order to permit the Contractor or subcontractor to avail itself of administrative or judicial review, and the Contractor or subcontractor agree that the Government shall thereafter have the right to cancel or ignore the markings and the data will no longer be subject to disclosure prohibitions if no action for administrative or judicial review is filed.

(g) Except to the extent the Government's action occurs as the result of the final disposition pursuant to administrative or judicial review, and any appeals thereof, nothing in this clause shall preclude a Contractor or subcontractor from bringing a claim for damages under the Contract Disputes Act, including pursuant to the Disputes clause of this contract, that may arise as the result of the Government's cancelling or ignoring restrictive markings on data, to the extent permitted by law.

(h) *Subcontracting.* This clause shall be included in all subcontracts of any tier that require the use of the clause at 52.227–14, or 52.227–23, as appropriate, unless all data to be delivered to the Government or a higher tier subcontractor is only technical data subject to the clause at 52.227–24.

(End of clause)

15. Section 52.227–26 is added to read as follows:

52.227–26 Standard non-disclosure agreement.

As prescribed in 27.410(c), the contracting officer shall insert the following clause:

Standard Non-Disclosure Agreement (XXX 1990)

The undersigned, (name), as the authorized representative of (company), (hereinafter, "the licensee") requests technical data subject to Government purpose rights for the purpose of Government procurement, i.e., to compete for, perform, or to prepare to

competes for, or perform, Government contracts. In consideration therefore—

1. Licensee agrees that the Government purpose rights data identified in this agreement shall be used only for Government purposes.

2. Licensee agrees to provide written notice and a copy of the nondisclosure agreement to the Contractor whose name appears in the Government purpose rights legend (hereinafter referred to as the "Contractor") whenever it receives Government purpose rights data. The notification shall identify the Government purpose rights data, the date and place of its receipt, and the source from which the data was received.

3. Licensee shall not, without prior written permission of the Contractor, provide or disclose any Government purpose rights data to any other company, person, or entity, except its subcontractors. The licensee agrees that disclosing Government purpose rights data to any subcontractors shall be accomplished only for the purpose of performing subcontracts under the Government contract and shall not occur until the subcontractor has executed the Standard Non-Disclosure Agreement.

4. Licensee agrees not to use Government purpose rights data for commercial purposes.

5. Licensee agrees to adopt operating procedures and physical security measures designed to protect the Government purpose rights data from inadvertent disclosure or release to unauthorized third parties.

6. Licensee agrees that any Government purpose rights data are provided "as is" without any representation as to suitability or warranty whatsoever, and without any obligation on the part of the Government to make any additions or alterations to Government purpose rights data. Any additions or alterations to the Government purpose rights data must be obtained directly from the Contractor whose name appears in the Government purpose rights legend or from other lawful sources.

7. Licensee agrees to indemnify the United States Government, its agents, and employees from every liability arising out of, or in any way related to, the misuse or unauthorized disclosure by the licensee, its employees, or agents of any Government purpose rights data it received. Licensee will hold the United States, its agent, and employees harmless against every such claim or liability, including attorney fees, costs, and expenses, arising out of the misuse of unauthorized disclosure of any Government purpose rights data supplied to the licensee hereunder.

8. Execution of this nondisclosure agreement by the licensee or any of its authorized subcontractors is for the benefit of the Contractor identified in the Government purpose rights legend on any data received. Any such Contractor is a third party beneficiary of the nondisclosure agreement who may have the rights of direct action against the licensee to enforce such agreement or to seek damages which may result from any breach of the agreement.

9. Licensee agrees that the Government may also seek any remedy available to enforce this agreement including, but not limited to, application for a court order prohibiting misuse or unauthorized disclosure of information in breach of the agreement. Licensee agrees to pay court costs and reasonable attorneys fees incurred by the Government in any such a suit in which the Government substantially prevails.

10. Nothing in this agreement prohibits the Contractor from entering into an agreement directly with the Contractor with respect to the use of the data. Such agreements may involve commercial uses of the data, the purchase of any additional data or alterations to the data, technical assistance reasonably needed to use the data, or other subjects as deemed appropriate by the licensee and the Contractor.

11. This agreement shall be effective only for so long as the data remains subject to Government purpose rights which period is until _____ or such longer period as that date may be extended.

_____

Title

(End of clause)

18. Section 52.227-23 is added to read as follows:

52.227-23 Listing and procedures for subsequent negotiation of rights in data.

As prescribed in 27.410(d), the contracting officer may insert this clause in contracts in which negotiation of rights in data will continue after contract award.

Listing and Procedures for Subsequent Negotiation of Rights in Data (XXX 1990)

1. Pursuant to the Notification provision of this contract, 52.227-15, the Contractor has identified those items that are intended to be delivered with other than unlimited rights.

2. At the time of award of this contract, and as a result of negotiations pursuant to 27.405, the parties have agreed on either lesser or greater rights in the following:

Data deliverable	Item, component, process, or computer program	Consideration	Rights	Time period

3. If the Contracting Officer has determined that preaward negotiation is impractical, then the Contractor and Contracting Officer agree to enter into negotiations pursuant to the following schedule: provided: however, that such agreement must be reached no later than the delivery of the data in question.

4. If the parties take no action, then it is agreed that the parties have decided not to undertake negotiation of the assertion, and that the asserted rights will be marked on the delivered data; subject however to the right of the Government to undertake formal validation in accordance with 27.407. Since the listing is to facilitate identification and review, it is expressly not a predetermination of rights in data.

(End of clause)

Title 3—

The President

Proclamation 6261 of October 11, 1990

Fire Prevention Week, 1990

By the President of the United States of America

A Proclamation

Each year, thousands of Americans are killed by fire. Tens of thousands more suffer from fire-related injuries. Tragically, the overwhelming majority of these fire deaths and injuries occur in places where people tend to feel most secure: their homes.

Although no one is immune to the threat of fire, our most vulnerable citizens—older Americans and children—are at greatest risk. Protecting the lives of these individuals and reducing the total number of deaths and injuries from fires in the United States require the sustained involvement and concern of all Americans and continued cooperation between the public and private sectors.

Throughout the year, numerous agencies and associations sponsor programs aimed at preventing fires that may cause death and injury. These local and national programs have conveyed the concerns of our Nation's fire service organizations to the public. They have helped people to recognize the destructive power of fire, and they have demonstrated what we can do, both individually and collectively, to protect ourselves from becoming victims of fire. All of these programs carry a vital message: each of us has the ability—and, indeed, a responsibility—to protect our families, our property, and our environment.

The National Fire Protection Association, which initiated Fire Prevention Week, has announced the theme of this year's observance: "Make Your Place Firesafe: Hunt for Home Hazards." This theme underscores the importance of recognizing dangers and taking measures to eliminate them. For example, every homeowner should install and maintain household smoke detectors; keep exits clear; avoid careless smoking; and store matches and lighters out of the reach of children. Homeowners should ensure that heating equipment is in good working order, and they should keep heating appliances at least 3 feet away from anything that can burn. Combustible or flammable liquids should be stored in proper containers, away from heat or flame, and electrical cords should be checked for cracks and frays. These and other simple steps can save lives.

Sharing the concerns of the National Fire Protection Association, the United States Fire Administration is coordinating public education campaigns designed to promote private-public partnerships for fire prevention.

Our Nation owes a debt of gratitude to these organizations and to all those individuals who are committed to preventing deaths and injuries from fire, including the members of the National Fire Academy; the International Association of Fire Chiefs; the International Association of Fire Fighters; the International Association of Black Professional Fire Fighters; the Fire Service Caucus Institute; the National Volunteer Fire Council; the International Society of Fire Service Instructors; the Fire Marshals Association of North America; the State Fire Marshals Association; and all other allied organizations.

Each year, the National Fallen Fire Fighters Memorial Service, held at the National Fire Academy in Emmitsburg, Maryland, honors those men and women who have answered their last alarm as volunteer or career fire fighters. On October 14, 1990, relatives and friends of fire fighters killed in the line of duty and representatives from the Nation's fire service organizations will gather to remember and pray for these heroic individuals. This week, as we make a special effort to identify and eliminate potential fire hazards in our homes and places of business, let us gratefully remember those fire fighters who have given their lives in the line of duty.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim the week beginning October 7, 1990, as Fire Prevention Week. I call upon the people of the United States to plan and participate in fire prevention activities not only this week, but throughout the year. I also ask all Americans to join me in honoring the memory of those fire fighters who have made the ultimate sacrifice to protect the lives and property of their neighbors.

IN WITNESS WHEREOF, I have hereunto set my hand this Eleventh day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

Proclamation 6282 of October 11, 1990

National Breast Cancer Awareness Month, 1990

By the President of the United States of America

A Proclamation

During 1990 alone, an estimated 150,000 American women will get breast cancer; some 44,000 of them are expected to die from it. Such dire projections, however, need not become a reality in the future. Today we know that deaths from breast cancer can be significantly reduced if the cancer is found in its early, more treatable stages of development. The United States Department of Health and Human Services reports that as much as a 30 percent drop in the breast cancer death rate is possible if women follow early detection guidelines.

Thirteen major public and private health organizations, including the National Cancer Institute and the American Cancer Society, have agreed upon the following screening guidelines for breast cancer: A woman between the ages of 40 and 49 should have a mammogram every 1 to 2 years, as well as an annual breast examination by her physician; after age 50, both the mammogram and the breast exam should be done annually. The National Cancer Institute and the American Cancer Society also recommend monthly breast self-exams.

Research has led to important advances in treatment for victims of breast cancer. Women whose breast cancer is detected in its early stages can be treated with much less extensive surgery than in the past. At early stages, lumpectomy plus radiation, rather than mastectomy or full removal of the breast, is an option, but lumpectomy is viable only for those women whose cancer has been detected early.

Health care professionals throughout the United States are working hard to encourage women to follow the breast cancer screening guidelines developed by the National Cancer Institute and other organizations. Many private voluntary associations and concerned individuals are also spreading the word about the importance of early detection and urging women who are age 40 and older to obtain regular screenings. Some businesses are offering screening to their employees. This month we reaffirm our determination to carry on such efforts and encourage other health care providers, employers, charitable organizations, and community groups to follow suit.

Today we have the knowledge and technology necessary to find and to treat breast cancer in its earliest stages. Let us put these resources to work to save the lives of American women.

To enhance public awareness of the importance of regular screenings for breast cancer, the Congress, by Senate Joint Resolution 301, has designated the month of October 1990 as "National Breast Cancer Awareness Month" and has authorized and requested the President to issue a proclamation in observance of this month.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the month of October 1990 as National Breast Cancer Awareness Month. I invite the Governors of the 50 States and the Commonwealth of Puerto Rico, as well as the appropriate officials of all other areas under the flag of the United States, to issue similar proclamations. I also ask all Americans—in particular, health care providers, insurance companies, employers, and members of charitable associations and community groups—to join in this special effort to promote awareness of breast cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

LIST OF PUBLIC LAWS

Last List October 11, 1990

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.J. Res. 683/Pub. L. 101-413

To designate October 6, 1990, as "German-American Day". (Oct. 11, 1990; 104 Stat. 898; 1 page) Price: $1.00

H.J. Res. 602/Pub. L. 101-414

To designate the month of October 1990 as "Country Music Month". (Oct. 11, 1990; 104 Stat. 899; 1 page) Price: $1.00

S.J. Res. 301/Pub. L. 101-415

Designating October 1990 as "National Breast Cancer Awareness Month". (Oct. 11, 1990; 104 Stat. 900; 2 pages) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

Title	Price	Revision Date
Individual copies	2.00	1990

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1989. The CFR volume issued January 1, 1987, should be retained.

[3] No amendments to this volume were promulgated during the period Apr. 1, 1989 to Mar. 31, 1990. The CFR volume issued April 1, 1989, should be retained.

[4] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1990. The CFR volume issued July 1, 1989, should be retained.

[5] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[6] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

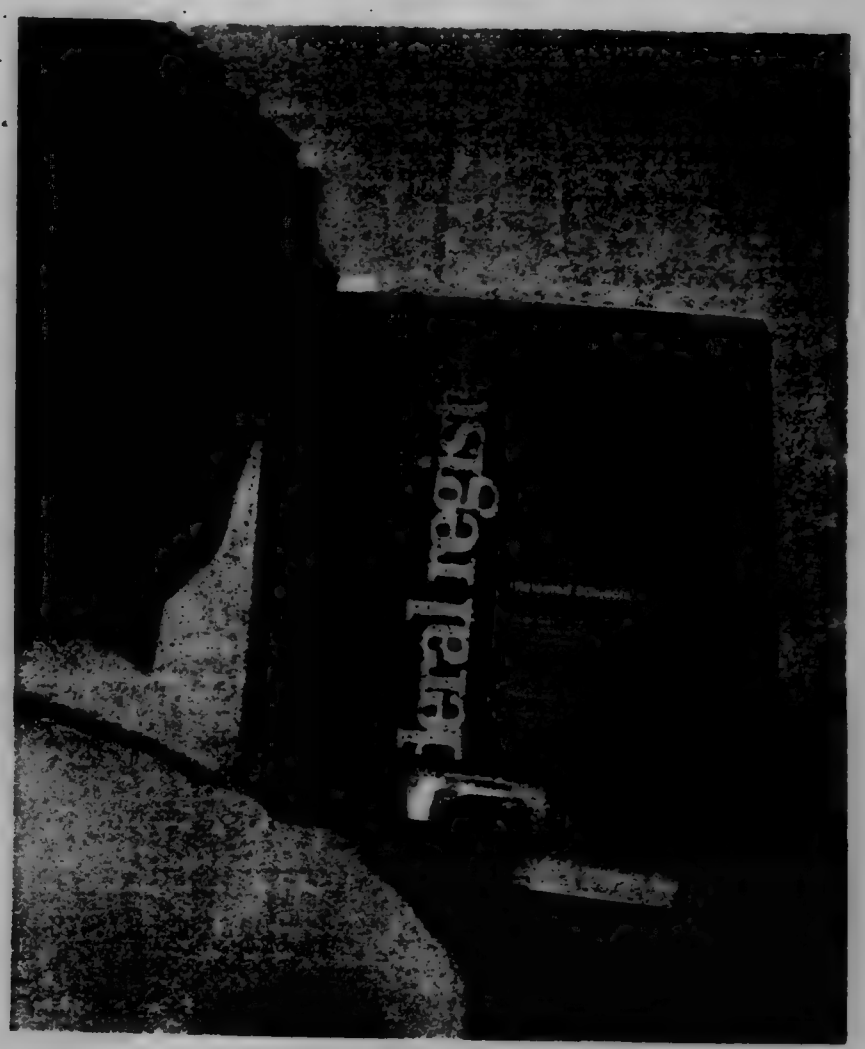
Microfiche Editions Available...

Federal Register

The Federal Register is published daily in 24x microfiche format and mailed to subscribers the following day via first class mail. As part of a microfiche Federal Register subscription, the LSA (List of CFR Sections Affected) and the Cumulative Federal Register Index are mailed monthly.

Code of Federal Regulations

The Code of Federal Regulations, comprising approximately 196 volumes and revised at least once a year on a quarterly basis, is published in 24x microfiche format and the current year's volumes are mailed to subscribers as issued.



Microfiche Subscription Prices:

Federal Register:

One year: $195
Six months: $97.50

Code of Federal Regulations:

Current year (as issued): $188

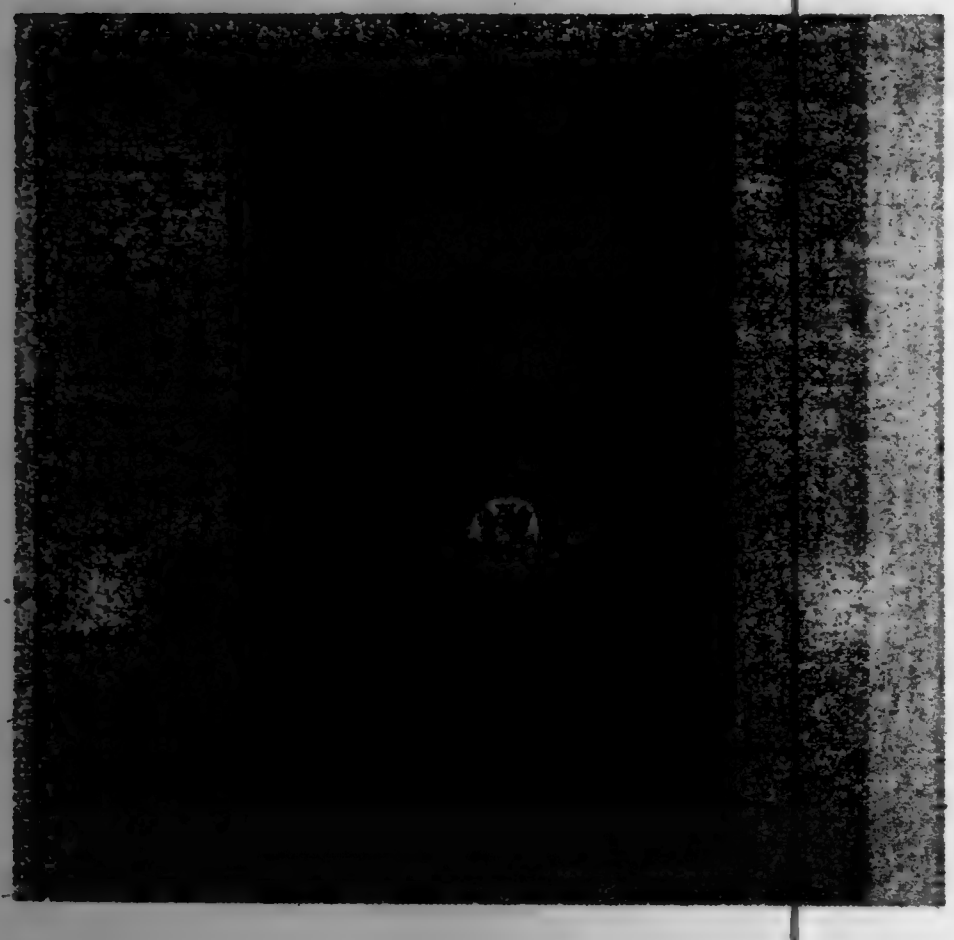
New edition .... Order now !



For those of you who must keep informed about Presidential Proclamations and Executive Orders, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Public Laws

are now available for the 101st Congress, 2nd Session, 1990

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 101st Congress, 2nd Session, 1990

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1990

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the Federal Register shall be judicially noticed.

The Federal Register will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

Agricultural Marketing Service

7 CFR Part 955

[Docket No. FV-90-199]

Vidalia Onions Grown in Georgia; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes an assessment rate under Marketing Order 955 for the 1990–91 fiscal period. Authorization of this budget will permit the Vidalia Onion Committee to incur expenses that are reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

EFFECTIVE DATE: September 16, 1990, through September 15, 1991.

FOR FURTHER INFORMATION CONTACT: Caroline C. Thorpe, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–447–2020.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 955 (7 CFR part 955), regulating the handling of Vidalia onions grown in Georgia. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 145 handlers and 250 producers of Vidalia onions in that portion of Georgia covered under this marketing order. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of Vidalia onion producers and handlers may be classified as small entities.

The budget of expenses for the 1990–91 fiscal year was prepared by the Vidalia Onion Committee (committee), the agency responsible for local administration of the marketing order, and submitted to the Department of Agriculture for approval. The members of the committee are handlers and producers of Vidalia onions. They are familiar with the committee's needs and with the costs for goods, services and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the committee was derived by dividing anticipated expenses by expected shipments of Vidalia onions. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses.

The committee met on August 16, 1990, and unanimously recommended a 1990–91 budget of $182,753. Last season's budget was $157,808. Major expense items include contract management fees in the amount of $40,000 (22 percent of the budget), $85,832 for marketing development, and $30,000 for production research. Expenditures for marketing development and production research projects are up a combined total of $46,245 over last year.

The committee also unanimously recommended an assessment rate of $0.10 per 50-pound bag, the same rate as last season's. This rate, when applied to shipments of 1.75 million 50-pound bags of onions, would yield $175,000 in assessment revenue. This amount, when added to $4,500 from miscellaneous income (*e.g.*, interest revenue) and $3,253 from the reserve fund, would be adequate to cover budgeted expenses.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposed rule was published in the Federal Register on September 18, 1990 (55 CFR 33337). That document contained a proposal to add § 955.203 to authorize expenses and establish an assessment rate for the committee. That rule provided that interested persons could file comments through September 28, 1990. No comments were received.

After consideration of all relevant material, including that set forth in the proposal, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

This action should be expedited because the committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis. The 1990–91 fiscal period for the program began on September 16, 1990, and the marketing order requires that the rate of assessment apply to all assessable Vidalia onions handled during the fiscal period. In addition, handlers are aware of this action which was recommended by the committee at a public meeting. Therefore, it is found and determined that good cause exists for not postponing the effective date of this rule until 30 days after publication in the Federal Register (5 U.S.C. 553) because the committee needs to have sufficient funds to pay its expenses

which are incurred on a continuous basis.

List of Subjects in 7 CFR Part 955

Marketing agreements, Onions, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 955 is amended as follows:

PART 955—VIDALIA ONIONS GROWN IN GEORGIA

1. The authority citation for 7 CFR part 955 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 955.209 is added to read as follows:

Note: This section will not be published in the Code of Federal Regulations.

§ 955.209 Expenses and assessment rate.

Expenses of $162,753 by the Vidalia Onion Committee are authorized and an assessment rate of $0.10 per 50-pound bag of Vidalia onions is established for the fiscal period ending September 15, 1991. Unexpended funds may be carried over as a reserve.

Dated: October 10, 1990.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[AMS-FV-90-115FR]

Almonds Grown in California; Changes to the Administrative Rules and Regulations Concerning Crediting for Marketing Promotion and Paid Advertising Expenditures

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule changes the administrative rules and regulations established under the Federal marketing order for California almonds. The changes provide handlers with additional opportunities to receive credit against their assessments for their own brand or generic advertising and promotion activities. The changes: (1) Allow handlers credit for in-store supermarket advertisements using light emitting diode (LED) signs; (2) relax restrictions under which handlers may receive credit for in-store supermarket advertisements using fixed position media; (3) require handlers wishing to receive credit for unreimbursed advertising expenditures in foreign markets pursuant to a contract with the Foreign Agriculture Service (FAS) or the California Department of Food and Agriculture (CDFA) to provide the Almond Board of California (Board) with a certification and supporting documentation that such handlers will not be reimbursed for such advertising by one of those organizations; (4) allow handlers credit for brand advertising in all foreign countries where California almonds are sold, when substantiated by applicable rate cards, rather than only in certain specified foreign countries as is currently authorized; and (5) increase the credit for certain mail order promotion costs from $25,000 to 25 percent of a handler's annual creditable obligation or $25,000, whichever is greater. This action is based on a recommendation of the Board, which is responsible for local administration of the order, and other available information.

EFFECTIVE DATE: October 16, 1990.

FOR FURTHER INFORMATION CONTACT: Allen Belden, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2525-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 475-3923.

SUPPLEMENTARY INFORMATION: This final rule is issued under marketing agreement and Order No. 981 (7 CFR Part 981), both as amended, hereinafter referred to as the order, regulating the handling of almonds grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 95 handlers of almonds who are subject to regulation under the almond marketing order and approximately 7,000 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual receipts of less than $500,000, and small agricultural service firms have been defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California almonds may be classified as small entities.

This action provides handlers of California almonds with several additional opportunities to receive credit against the creditable portion of their annual assessments under the order. This action: (1) Allows handlers credit for in-store supermarket advertisements using LED signs; (2) relaxes restrictions under which handlers may receive credit for in-store supermarket advertisements using fixed position media; (3) allows handlers credit for brand advertising in all foreign countries where California almonds are sold, when substantiated by applicable rate cards, rather than only in certain specified foreign countries as is currently authorized; and (4) increases the credit for certain mail order promotion costs from $25,000 to 25 percent of a handler's annual creditable assessment obligation or $25,000, whichever is greater. It is the view of AMS that these changes allow almond handlers greater flexibility in the advertising methods for which they may receive credit, while not imposing any additional costs on handlers.

This action also establishes a new provision concerning an existing regulation which prevents handlers from receiving credit for their foreign advertising expenditures which are reimbursed by the FAS or CDFA. This action requires handlers to certify on Board form "ABC Form 31" (also known as "Handler Claim for Advertising Credit") that expenditures pertaining to foreign advertising claims submitted to the Board for credit will not be reimbursed by the FAS or CDFA. This will be accomplished by adding additional language to a certification currently included on "ABC Form 31," whereby handlers certify that the information provided on that form and supporting documents are complete and correct. The action also requires handlers to submit to the Board copies of all claims for reimbursement filed with the FAS or CDFA so that Board staff could cross-check to ensure that credit is not granted under the order in

cases where reimbursement by the FAS or CDFA occurs. It is the view of the AMS that adding additional language to the certification on "ABC Form 31" will not impose any additional burden or costs on handlers as all handlers wishing to receive credit for their own marketing promotion and paid advertising activities under the order must currently sign this certification. It is also the view of the AMS that the cost to handlers of providing the and Board with copies of all claims for reimbursement filed with the FAS or CDFA will average approximately $3.00 per claim and that the estimated total number of claims which will be filed each year by all handlers is 100.

This action revises § 981.441 of Subpart—Administrative Rules and Regulations and is based on a unanimous recommendations of the Board and other available information.

Section 981.41(c) of the order provides that the Board, with the approval of the Secretary, may allow handlers to receive credit for their direct marketing promotion expenditures, including paid advertising, against that portion of such handlers' assessment obligations which is designated for marketing promotion, including paid advertising. That paragraph also provides that handlers shall not receive credit for allowable expeditures that would exceed the amount of such creditable assessments. Section 981.41(e) further provides that before crediting is undertaken, and after recommendations are received from the Board, the Secretary shall prescribe appropriate rules and regulations as are necessary to effectively administer the order provisions for crediting handler marketing promotion and paid advertising expenditures.

Section 981.441 currently prescribes rules and regulations to regulate crediting for marketing promotion, including paid advertising. This final rule revises § 981.441(c)(3), concerning crediting of payments to advertising media in domestic markets; § 981.441(c)(4), concerning crediting of payments to advertising media in foreign markets; and § 981.441(d)(1), concerning crediting for marketing promotion expenditures.

This final rule revises § 981.441(c)(3) by changing subparagraph (i)(E) in two ways. The first change allows handlers to receive credit against their creditable assessments for 100 percent of such handlers' payments for in-store supermarket generic or brand advertising using LED signs. This is a new form of in-store supermarket advertising now being offered by advertising firms, which the industry would like to utilize. Currently, handlers may only receive credit for in-store supermarket advertisement using fixed position or video media. Handlers wishing to receive credit for in-store supermarket advertisements using LED signs will be required to show such advertisements on an in-aisle LED screen running specific product messages on a rotating basis.

As with in-store supermarket advertising using fixed position or video media, handlers will have to conduct this type of LED advertising through an advertising firm. The advertising firm or company which specializes in the production of LED advertisements and the placement of those advertisements will pay the retail food store for displaying the advertisement. Therefore, the payment to the retail food store will not come directly from the handler. This procedure will allow the Board to differentiate payments for this type of creditable advertising from other types of payments often made by handlers to retail food stores, such as payments for shelf space, which are not creditable expenditures. This is necessary as both payments for advertising and for shelf space are customarily consolidated under the general heading "advertising" on invoices from retailers to handlers.

The second change to § 981.441 (c)(3)(i)(E) relaxes a restriction on credit for in-store supermarket advertisements using fixed position media. Section 981.441(c)(3)(i)(E) currently requires that fixed position advertisements for which handlers may receive credit must include two or more of the following: (1) Processed color displays enclosed in plastic frames and mounted on supermarket shopping carts, (2) overhead directories enclosed in frames placed at the end or middle of supermarket aisles, and (3) processed color advertisements enclosed in frames and mounted on a supermarket shelf. The change allows handlers to receive credit if only one of those three types of fixed position advertisements is conducted. When provisions for crediting fixed position advertisements were first added to the rules and regulations, the Board believed that two of the three types of advertising would be necessary to conduct an effective fixed position advertising campaign. Standard practice in the industry at that time required the use of at least two of the three types of advertising. The Board now reports that standard industry practice has changed, allowing handlers to purchase fixed position advertising utilizing only one of the three types. Handlers should be allowed to take advantage of this new opportunity.

There are two changes to § 981.441(c)(4). The first change revises paragraph (i) of that section. Section 981.441(c)(4)(i) currently allows credit for handler's unreimbursed media expenditures for advertising in any foreign market pursuant to a contract with FAS or CDFA provided that the advertisements meet certain conditions specified elsewhere in § 981.441. The change requires handlers to certify on "ABC Form 31" that they are not filing claims with the Board for expenditures which have been or will be reimbursed by the FAS or CDFA. The change also requires handlers to submit to the Board copies of all claims filed with the FAS or CDFA for reimbursement so that Board staff can cross-check those claims against claims filed with the Board to ensure that credit is not granted in cases where reimbursement by the FAS or CDFA occurs.

The second change to § 981.441(c)(4) changes paragraph (ii) to allow handlers who advertise in foreign countries without a contract with the FAS or CDFA to receive credit for media expenditures for brand advertising in all foreign countries where California almonds are sold and where payments for such expenditures can be compared to applicable rate cards. Currently, § 981.441(c)(4)(ii) allows handlers to receive credit for such expenditures in 22 specified foreign countries. In the past, the Board recommended additions to the list of the specified foreign countries where rate cards were available, so that Board staff could substantiate handler claims for credit as reasonable and appropriate. The Board has recommended that credit be made available in all foreign countries where applicable rate cards are available. Accordingly, the list of specified foreign countries is no longer necessary. It will be the responsibility of the individual handler to submit the applicable rate card to Board staff.

This final rule to revise § 981.441(d)(1) revises paragraph (iii)(B) to increase the credit for certain mail order promotion costs from $25,000 per handler per crop year to $25,000 or 25 percent of a handler's creditable assessment obligation per handler per crop year, whichever is greater. Mail order promotion costs for which credit is allowed under the order are expenditures for the purchase of mailing lists and for envelopes and postage to mail promotional materials The Board believes that the current $25,000 limit is too restrictive and, therefore, should be relaxed.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the new information collection provisions that are included in this final

rule have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35 and have been assigned OMB No. 0581-0071.

Based on the above, the Administrator of the AMS has determined that the issuance of this final rule will not have a significant economic impact on a substantial number of small entities.

Notice of this action was published in the Federal Register on March 14, 1990 (55 FR 9457), inviting written comments from interested persons through April 13, 1990. The comment period was extended to May 14, 1990, by a notice published in the Federal Register on April 26, 1990 [55 FR 17618]. One comment was received from Brian C. Leighton, an attorney representing an almond handler Cal-Almond, Inc. (Cal-Almond).

Cal-Almond indicated that the proposals to allow handlers credit for in-store supermarket advertisements using LED signs and to relax restrictions under which handlers may receive credit for in-store supermarket advertisements using fixed position media would benefit only those few handlers who have a retail brand name. Cal-Almond pointed out that only a small percentage of California almonds are sold domestically as branded consumer items, whereas the vast majority of California almonds are sold for export or as ingredient items to food manufacturers. Cal-Almond believes that the majority of the provisions currently comprising § 981.441 of the order's administrative rules and regulations benefit those handlers with a retail brand name. However, section 981.441 has been amended fifteen times since its inception in 1972, and many of those amendments have added provisions designed to provide opportunities for handlers who do not have a brand name to receive credit. Moreover, it is the AMS's view that all almond advertising and promotion activities benefits all handlers by increasing demand for all almonds.

Cal-Almond indicated that the proposed change to allow handlers credit against their assessments for brand advertising in all foreign countries where California almonds are sold would benefit the large handlers with a retail brand as much, if not more, than it would benefit handlers without a retail brand name. Concerning the proposed increase in the credit for certain mail order promotion costs, Cal-Almond indicated that handlers can not recoup the amount of money spent on mail order advertising in profits from mail order sales. Both of these proposed changes were based on recommendations made by Cal-Almond at the November 29, 1989, meeting of the Board's Public Relations and Advertising Committee (Committee). The recommendations were subsequently adopted by the Committee and the Board and recommended to the AMS. In the comment, Cal-Almond indicated that Cal-Almond is still generally in favor of two changes. As stated previously, it is the AMS's view that all almond advertising and promotion activities benefit all handlers by increasing demand for all almonds.

Cal-Almond made several other recommendations to change the rules and regulations contained in § 981.441 at the November 29 meeting which were not adopted by the Committee. In the comment, Cal-Almond asked the AMS to consider the recommendations which were not adopted by the Committee. Cal-Almond requested the AMS to either adopt those recommendations as part of this final rule or to issue a new proposed rule inviting comments from interested persons on the recommendations. However, the additional changes proposed by Cal-Almond were not contained in the proposed rule in this proceeding and, therefore, would be outside the scope of the proposed rule in this action. Thus, it would be inappropriate for Cal-Almond's proposals to be adopted herein. In connection with the request for issuance of a new proposed rule inviting comments from interested parties on the recommendations, that request will be responded to separately from this rulemaking.

In its comment, Cal-Almond argued that its rights under the First Amendment of the United States Constitution are violated as a result of the advertising and assessment provisions of part 981. We disagree. It has been and is AMS's position that all provisions of the order are authorized under the Act, and that the Act, order, and regulations in no way violate the First Amendment rights of Cal-Almond.

For the reasons stated above, Cal-Almond's comments are denied unless otherwise provided herein.

After consideration of all relevant matter presented, including the Board's recommendation, the comment received, and other available information, it is found that the changes hereinafter set forth will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register in that: (1) The regulation provides handlers with additional flexibility in crediting advertising and promotion expenditures, and handlers should have the opportunity to utilize this increased flexibility as soon as possible; (2) handlers are aware of this action and need no additional time to comply; and (3) no useful purpose would be served by delaying the effective date of this action.

List of Subjects in 7 CFR Part 981

Almonds, Marketing agreements, Nuts, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 981 is amended as follows:

PART 981—ALMONDS GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 981 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Subpart—Administrative Rules and Regulations

2. Section 981.441 is amended by revising paragraphs (c)(3)(i), (c)(4)(i), (c)(4)(ii), and (d)(1)(iii)(B) to read as follows:

§ 981.441 Crediting for marketing promotion including paid advertising.

* * * * *

(c) * * *

(3) * * *

(i) For 100 percent of a handler's payment to an advertising medium:

(A) For a generic advertisement of California almonds;

(B) For an advertisement of the handler's brand of almonds;

(C) When either of these advertisements includes reference to a complementary commodity or product;

(D) For a trade media advertisement that displays branded food products containing almonds, or announces a handler's future promotion activities, including joint promotions, and the entire expenditure is borne by the handler;

(E) For in-store supermarket advertisements using fixed position, video media, or light emitting diode (LED) signs, when such payments are made through an advertising firm or company which specializes in the production of LED advertisements and the placement of those advertisements: (*1*) Fixed position advertisements must include one or more of the following: (*i*) Processed color displays enclosed in plastic frames and mounted on supermarket shopping carts; (*ii*)

overhead directories enclosed in frames placed at the end or middle of supermarket aisles; or (*iii*) processed color advertisements enclosed in frames and mounted on a supermarket shelf; (*2*) Video advertisements must be shown on a fixed video monitor running television commercials or infomercials for specific products on a rotating basis; (*3*) LED advertisements must be shown on an in-aisle LED screen running specific product messages on a rotating basis; or

(F) For processed color displays enclosed in frames mounted on fixtures outside and in front of retail food stores when payments are made through an advertising firm.

* * * * *

(4) * * *

(i) For handlers' unreimbursed media expenditures for advertising in any foreign market pursuant to a contract with the Foreign Agricultural Service, U.S. Department of Agriculture, and/or the California Department of Food and Agriculture, provided the advertisements meet the requirements of paragraphs (c) (2) and (3) of this section and the limitations of paragraphs (c)(5) (i) and (ii) of this section. Such advertising in foreign markets shall not be creditable unless the handler certifies on ABC Form 31 that said handler was not and will not be reimbursed for such advertising by the Foreign Agricultural Service or the California Department of Food and Agriculture and submits to the Board copies of all claims for reimbursement filed with the Foreign Agriculture Service and/or the California Department of Food and Agriculture.

(ii) For a handler's media expenditures for brand advertising in any country where California almonds are sold, credit shall be allowed when claims are substantiated by applicable rate cards. The provisions of this section applicable to domestic advertising shall also apply to the crediting of advertising in these markets.

* * * * *

(d) * * *

(1) * * *

(iii) * * *

(B) Credit for mail order promotion shall be limited to a total of $25,000 or 25 percent of a handler's creditable assessment per crop year, whichever is greater.

Dated: October 10, 1990.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

7 CFR Part 1106

[DA-90-084]

Milk in the Southwest Plains Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends, for the months of September 1990 through January 1991, certain shipping standards for supply plants under the Southwest Plains order. The action was requested by Kraft, Inc., Associated Milk Producers, Inc., and Mid-America Dairymen, Inc. This action is necessary to eliminate costly and inefficient movements of milk from supply plants that would have to be made to assure the continued pricing and pooling of milk of producers who have historically supplied the market's fluid milk needs.

EFFECTIVE DATE: September 1, 1990.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued September 18, 1990; published September 24, 1990 (55 FR 39003).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This final rule has been reviewed by the Department in accordance with Departmental Regulation 1512-1 and the criterion in Executive Order 12291 and has been determined to be a "non-major" rule.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and of the order regulating the handling of milk in the Southwest Plains marketing area.

Notice of proposed rulemaking was published in the Federal Register on September 24, 1990 (55 FR 39003) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon. No views in opposition were received.

After consideration of all relevant material, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of September 1990 through January 1991 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1106.6, the words "during the month."

2. In § 1106.7(b)(1), the words," of February through August until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) or (e) of this section. A plant not meeting such 20 percent requirement in any month of such February-August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) or (e) of this section are not less than 50 percent of receipts or diversions, as previously specified."

Statement of Consideration

This action, for September 1990 through January 1991, suspends the shipping standards for supply plants that were previously associated with the market. The order defines a supply plant as a plant from which fluid milk products are transferred or diverted to distributing plants during the month. It further provides that in order to be pooled under the order during the months of September through January, 50 percent of a supply plant's receipts must be shipped to distributing plants each month. Also, a supply plant that was pooled during each of the immediately preceding months of September through January shall continue to be pooled during the following months of February through August if 20 percent of its receipts are shipped to distributing plants. This action will remove all shipping standards during the months of September 1990 through January 1991 for supply plants that were pooled under the order during the immediately preceding September through January period.

The suspension was requested by Kraft, Inc., a handler who operates a supply plant that is pooled under the

order. This action is also supported by Associated Milk Producers, Inc., and Mid-America Dairymen, Inc., cooperative associations that represent a substantial number of producers who supply the market. These organizations contend that there are ample supplies of direct-ship milk located near to distributing plants that are available to supply the fluid milk needs of such plants during the months of September 1990 through January 1991. Thus, these organizations contend that supplemental shipments from supply plants will not be needed during such months. In the absence of a suspension action, these organizations say, costly and inefficient movements of milk from supply plants would have to be made to assure the continued pooling of milk of dairy farmers who have historically supplied the market's fluid milk needs.

As a result of production increases, it is reasonable to conclude that supplemental shipments of milk from supply plants will not be necessary to meet the fluid needs of distributing plants during the months of September 1990 through January 1991. Therefore, this suspension will allow handlers to avoid making costly and inefficient shipments of milk from supply plants that would otherwise have to be made to assure the continued pooling of milk of dairy farmers who have historically supplied the market's fluid milk needs.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that the action will permit milk that has been historically associated with the market to continue to be priced under the order without costly and inefficient shipments of milk from supply plants;

(b) This suspension does not require of person affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. No comments were filed in opposition to this action.

Therefore, good cause exists for making this order effective less than 30 days from date of publication in the Federal Register.

List of Subjects in 7 CFR Part 1106

Milk marketing orders.

It is therefore ordered, That the following provisions in §§ 1106.6 and 1106.7 of the Southwest Plains order (7 CFR 1106.6 and 1107.7) are hereby suspended for September 1990 through January 1991.

PART 1106—MILK IN THE SOUTHWEST PLAINS MARKETING AREA

1. The authority citation for 7 CFR part 1106 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1106.6 [Suspended in part]

2. In § 1106.6, the words "during the month" are suspended from September 1, 1990, through January 31, 1991.

§ 1106.7 [Suspended in part]

3. In § 1106.7(b)(1), the words, "of February through August until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) or (e) of this section. A plant not meeting such 20 percent requirement in any month of such February–August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) or (e) of this section are not less than 50 percent of receipts or diversions, as previously specified" are suspended from September 1, 1990, through January 31, 1991.

Signed at Washington, DC, on October 5, 1990.

John E. Frydenlund,
Deputy Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Parts 1924, 1933 and 1944

Self-Help Technical Assistance Grants

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) is revising and redesignating its regulations for Self-Help Housing Technical Assistance Grants. This action is necessary to comply with OMB circulars and Departmental regulations. The intended effect is to encourage more communities to participate in the program by permitting an organization with fewer employees to participate. It also permits the use of a predevelopment agreement to test the feasibility of the program in a community before making a major commitment of resources. It requires that organizations have a board of local representation, change the method of accounting of tasks to be performed by family labor, and increases the amount of family labor in the building of homes. It incorporates, by reference or direct quote, Departmental regulations that significantly affect participating grantees.

EFFECTIVE DATE: November 15, 1990.

FOR FURTHER INFORMATION CONTACT: Matt Felber, Branch Chief, Single Family Housing, Processing Division, Farmers Home Administration, USDA, Room 5342, South Agriculture Building, Washington, DC 20250, Telephone (202) 382–1474.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined to be nonmajor, because there is no substantial change from practices under existing rules that would have an annual effect on the economy of $100 million or more. There is no major increase in cost or prices for consumers, individual industries, Federal, State, or local governmental agencies or geographic region; or significant adverse effects on completion, employments, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354), the Administrator of the Farmers Home Administration, has determined that this action will not have a significant economic impact on a substantial number of rural communities. It is estimated that less than 100 communities will be affected annually.

This program activity is listed in the Catalog of Federal Domestic Assistance under number 10.420. This program/activity is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities." (Available in any FmHA Office.)

This document has been reviewed in accordance with 7 CFR part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major

Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Public Law 91-190, an Environmental Impact Statement is not required.

Background

A proposed rule was published in the Federal Register (54 FR 17751), Tuesday, April 25, 1989. Written comments were solicited for 60 days. Comments were received from 36 respondents inside and outside the Agency. The respondents from outside the Agency were special interest organizations. Comments were received on 122 specific sections or paragraphs which involved 20 different areas within the proposed regulation.

Discussion

All respondents commenting on § 1944.401 expressed their support of the Agency's effort to emphasize the serving of very low-income households. Several recommended that specific guidelines be incorporated in this section to clarify that grantees must serve 40 percent very low-income households in their program. We incorporated the language which states "Very low-income families must receive a priority for recruitment and participation may not comprise less than the percentage stated in subpart L of part 1940 of this chapter of those assisted in any grant period."

Two comments were received concerning grant purposes. One respondent favored authorizing one organization to assist other organizations to provide technical and supervisory assistance to eligible families. The other respondent expressed difficulty in determining how to monitor and evaluate grants made to one organization to assist another organization which provides technical and supervisory assistance to eligible families.

Currently, four regional technical and management assistance contractors provide the service authorized in § 1944.402(b). Section 1944.402 enables the Agency to either contract or award grants to organizations to assist other organizations to apply for a grant or to assist an existing grantee. Funding a variety of organizations via contracts or grants is authorized by the law governing the program (42 U.S.C. 1490c). Monitoring and/or evaluating of the organization would be performed based on specific terms of a contract or grant agreement. The purpose of this revision is to afford special needs applicants maximum technical assistance. The self-help grant program is complex and small in number of total grantees. These two factors result in scattered expertise. The revision would alleviate this problem.

An array of comments were received concerning § 1944.403. One respondent asked if the period of the grant is to be determined by the grantee or FmHA. Currently, over 90 percent of grantees are funded for a 24 month grant period. Approximately all of these grantees proposed 24 month grant periods and were approved by FmHA. That is why the general guideline of a 24 month maximum is adopted in § 1944.403(b). Since the grant period has to be flexible enough to meet different needs, the maximum period for an agreement will be based on sound evaluation by FmHA. It was not thought necessary to establish an absolute maximum term.

To eliminate the possibility of double counting of families who drop out of the self-help association, one respondent recommended that a new sentence be added to what is now § 1944.403(f) as follows: "The number of equivalent units for any group can never exceed the number of planned or completed houses for the group." That recommendation had merit and is adopted.

Another respondent asked whether site acquisition and development costs used in determining the equivalent value of modest housing is the typical or the actual self-help family site acquisition and development costs. Historically, program reviews and quarterly grantee evaluations data demonstrate that there is no significant cost difference for site acquisition and development costs between self-help and non self-help ventures. Therefore, § 1944.403(g) does not differentiate between self-help or non self-help site acquisition and development.

Two respondents requested consideration to changing the language in what is now § 1944.403(i) to permit less than four and greater than ten families to participate in a self-help association. We added the word "generally" to the paragraph to permit less than four and greater than ten families to participate.

Seven responses were offered concerning the definition of participating families in what is now § 1944.403(k). Five of the seven responses recommended that self-help families not be restricted to those utilizing section 502 loans. Several logical reasons for families utilization of other loan funds were offered. One particular group, Native Americans living on reservations, are not easily served by section 502 loans and are more readily served by non-section 502 loans. We agree and have changed the regulation to permit financing by other sources provided the families meet the Department of Housing and Urban Development income guidelines. Two respondents advocated that participants physically unable to perform required labor tasks should have the right to seek labor assistant friends and relatives with the groups concurrence. FmHA takes the position that only in a unique situation should labor substitution be permitted. It is the Agency's experience that substitute labor has often resulted in disruption of group dynamics resulting in participant quarrels and prolonged completion of the construction period. However, the State Director has the authority to permit substitute labor on a case-by-case basis.

Concerns were raised by two respondents concerning required labor tasks. In addition, we received overwhelming negative comments about Exhibit B-2, Breakdown of Construction Development for Determining Percentage Construction Completed, from grantees, Agency personnel and former self-help participants. Many of those comments had merit as they articulated different circumstances that could influence which tasks can be successfully completed by families. Circumstances such as climate, soil type, skill of construction supervisors and safety were cited. FmHA revised Exhibit B-2 by eliminating reference to required labor tasks and refining the list of labor tasks. Grantees are now afforded the convenience of selecting any labor tasks, at a minimum, that represent 65 percent of the total labor tasks presented in this exhibit. The language was changed in what is now § 1944.403(k) to conform with Exhibit B-2.

Several respondents desired to have those families involved in self-help rehabilitation, which is primarily the self-help method, and very low-income families included in the definition of participating family. Both of these requests were granted.

Eight respondents requested that counseling for past self-help participants and/or the assisting of County FmHA office personnel with borrower delinquency and inventoried property problems be included in what is now § 1944.403(n). These are amicable offers by grantee organizations, however, neither of these activities are authorized by the law.

In addition to changes made to § 1944.403 as a result of comments received, definitions of the terms "direct costs" and "indirect costs" were added because these terms help identify the authorized uses of grant funds.

Paragraph (d)(2) of § 1944.404, Eligibility which proposed to require grantees to have a broad-based membership to number at least 30 people was criticized by numerous individuals and interest groups. The Agency received documentation from some respondents that illustrated that some State laws and organizational charters, particularly Community Action Agencies, could not comply with it or could comply only with gross organizational restructuring to satisfy the proposed requirements. The evidence was compelling enough to result in the removal of that requirement. An expanded § 1944.404(d) replaced the entire proposed paragraph because other portions of the paragraph were changed upon the recommendations of several respondents as discussed below.

Two respondents questioned the Agency's objective of requiring grantees to list in its Articles of Incorporation, Purpose, "be a corporation organized for the primary purpose of assisting very low- and low-income families to obtain adequate housing." The Agency withdrew this language and added two new criteria under § 1944.405(d). The new criteria recognize that they may have other primary purposes. This modification was made in recognition that many organizations are created to address a variety of social issues.

One respondent requested that the proposed § 1944.404(d)(1) be eliminated because it represents a repeat of §§ 1944.404(a), 1944.404(b) (1) and (2), and 1944.404(c). We agree with the respondent's assessment and eliminated the proposed statement.

A discussion on the appropriate number of members of Board of Directors were offered by four respondents. All four respondents offered their opinion that the proposed statement on board membership did not offer needed flexibility. The proposed statement was totally consistent with the language existing in 7 CFR part 1933, subpart I. This provision has caused little, if any, impediments to applicant processing during the existence of the program. It is our opinion that a five member board is the minimum number that can adequately represent an organization. We elected not to change the minimum number of board members. However, we agree that there is no need to establish a maximum number of board members and have, therefore, deleted the requirement that the board generally not exceed nine members.

Two respondents pointed out to us that (d)(5) of § 1944.404 was an administrative rather than an eligibility criteria. There view was correct and that paragraph is deleted.

Many comments were received concerning authorized use of funds in § 1944.405. Most comments supported the various authorized usage while recommending better ways of stating language. One respondent did recommend that paragraphs (a), (b), (c), (f), (g) and (j) be excluded because all the listed authorized items are included in Office of Management and Budget (OMB) Circulars A–122 or A–110. We determined not to exclude any of the items as some were more specific than those promulgated in the aforementioned circulars. This specificity is needed to address some of the unique features of the Self-Help Technical Assistance Grant Program.

Several respondents commenting on the authorized use of grant funds to fund tax deferred pension plans either recommended that it not be allowable or that the Agency establish limits. It is the Agency's position that nonprofit organizations delivering services to the public which enhance our ability to meet our objectives should receive reasonable fringe benefits. FmHA believes that OMB Circulars and Departmental Regulations found in 7 CFR parts 3015 and 3016 adequately provide appropriate guidelines for determining the reasonability of grantee expenditures in their specific geographical area. Grantees are not given "Carte Blanche" as one respondent suggested. Tax deferred pension plans which were formally addressed in § 1944.405(f) of the proposed rule are now covered in § 1944.405(d). The limits on payments into such a plan were removed so that the grantee would be allowed to use the grant funds to pay whatever was reasonable in the area. A new § 1944.405(f) was added to permit the payment of grantee's general liability insurance and special audit costs associated with self-help activities.

Allowing boards of directors to authorize out of state travel by grantee personnel was favorably addressed by all respondents commenting on § 1944.405(g), except one, who recommended that the approval authority be retained by FmHA. It is our position that the grantee organization undertaking the grant should have the ability to properly manage the program so that the program objectives and goals are accomplished. The grantee organization is in better position to determine when an out of state trip is needed and who should make the trip. The authorization given to the grantee organizations is a reasonable display of the Agency's confidence in grantee organizations' competence.

One respondent recommended that payment of reasonable expenses incurred by board members not exceed those paid FmHA County Committee members. The nature of tasks performed by grantee board members and committee members are more dissimilar than similar. Typically, committee members only perform tasks at a convened committee meeting, while board members perform official organizational tasks on a more frequent basis.

We are aware of organizations that operate in large geographical areas that have board representation from throughout the area. Often it is not feasible for board members to return to his/her personal residence on the day of the meeting because of lateness of meetings and travel distances. For those members it is appropriate to authorize reimbursement for mileage and per diem.

The membership of the grantee organization is the primary component responsible to FmHA for grantee performance. Historically, salaried employees rather than the board have guided grantee organization. It is our policy that the board get more involved in the direction of the organization including supervision of salaried employees. Therefore authorizing expenses for board members to attend meetings significantly facilitates their ability to be actively involved in organizational matters and to interact with FmHA at all levels. All costs associated with board travel will not exceed established Federal Government regulations.

Regarding § 1944.405(d), several respondents recommended that the Agency be guided by OMB Circular A–122, Attachment B, Paragraph 46. This recommendation was accepted and § 1944.405(d) is changed accordingly.

Almost every comment received concerning the average TA cost per unit found in § 1944.407(a) suggested that 15 percent rather than 12 percent would be more accurate a measure. Examples of grantees that we have determined to be efficient were evaluated by us to determine which percentage is more plausible in representing cost per unit. The evaluation revealed that 15 percent better represents a cost that is both sufficiently flexible to the grantee organization and efficient to the Government.

An inadvertent error appeared in this proposed rule making pertaining to § 1944.407(b). It was our intent to state that an average TA cost per unit not

exceed the difference between the equivalent value of modest homes in the area and the average mortgage of the participating families minus $1,000—rather than plus $1,000 as stated in the proposed rule. Some respondents supported minus $1,000 and others advocated plus $1,000. We determined that our initial intent to require a minus $1,000 is appropriate. The objective of this requirement is to ensure that there is a minimum positive net savings to the Government.

After reviewing comments some changes were incorporated in § 1944.410, Processing preapplications, applications, and completing grant dockets. Several respondents suggested that to require an applicant to submit financial statements that are less than six months old was not practical. One respondent pointed out that the organization has annual audits and if it is undergoing an audit then the most current statement would be a year old. We changed the less than six months requirement to no more than 12 months.

Comments received on § 1944.410(a)(4) indicated opposition to the Agency requiring evidences of community support. One commentator stated that we were turning the program into a "local signoff" situation. We agree that requiring full endorsement of the program by a new community may be expecting too much. However, we believe that the success of the project is dependent on there being evidence of local support and such evidence is required in the final rule. We did add a sentence explaining what can constitute evidence of local support. We believe this sentence serves to clarify what was intended.

In commenting on § 1944.410(d), several respondents advocated expanding the availability of the predevelopment grant to existing grantees. The most typical reason given by respondents was that some existing grantees might desire to initiate additional grants in other geographical areas but because they are not authorized to do that they would be faced with the same dilemma as a new applicant. This is a good observation although it was not the intent to limit the predevelopment grant to only first time applicants. Language was added to provide for the inclusion of existing grantees and to make clear that the grant is available only once for a defined area.

With regard to the first paragraph of § 1944.417, one comment asked whether it is FmHA's responsibility to help the grantee to avoid cases of fraud and abuse. Without reservation, it is the Agency's belief that it is. It is always appropriate to identify conditions that make the Government vulnerable to fraud and abuse. For example, there are documented cases where grantees purchased certain equipment because it was less expensive, but had to constantly replace it, resulting in a higher cost. The guidance from FmHA to the grantee to purchase equipment of a durable quality on a sound cost basis and to properly maintain it would afford the prevention of abuse and/or waste. As FmHA and the grantee share the same objective of placing eligible households in safe, sound and sanitary housing it follows that we should attempt to aid in preventing or at least reducing the cases of fraud and abuse rather than reacting to the situations once they occur.

In commenting on § 1944.417, one respondent recommended clear instructions concerning the District Director's responsibility in processing an unacceptable request for funds by grantees. The following language was recommended "if the explanation is not acceptable, immediately notify the grantee and request the amount of funds that appear reasonable for the next 30 days on Form FmHA 440–57, so that delivery may be possible by the first of the next month." We believe that the recommended language better expresses our objective of complying with OMB Circular A–122 while maintaining our ability to expeditiously process requests for warranted funds. The recommendation is adopted in § 1944.417(a)(2)(ii).

Another respondent expressed the opinion that 15 days is not enough time for a grantee to prepare and submit Exhibit B. There is no such requirement in § 1944.417(b). It is expected that no grantee would wait to the end of an evaluation period to initiate the completion of its quarterly report. Rather, the grantee would update report data periodically during the reporting period, consequently reducing its task at quarter's end to making final adjustments. Quarterly reporting is required by FmHA and the grantee can certainly make more frequent internal evaluations if it wishes.

All comments received on § 1944.419, final grantee evaluation, were supportive of the proposed action. Several recommendations were made to improve the evaluation process. Two respondents recommended that the evaluation be conducted between the 18th and 20th month to provide for a more meaningful evaluation. In considering these comments, we changed the paragraph to recognize that the evaluation needs to occur near the end of the grant period without specifying the exact months in which it should occur. We also agree that it is not beneficial to evaluate a grantee during the last month of its grant, and the revision reflects this position.

Some respondents recommended various manipulations of the evaluation rating system found in § 1944.419(b). Some recommended increasing credit for those exceeding proposed agreement goals while others recommended that all criteria listed in § 1944.419(a) be met for an acceptable rating and that an outstanding rating be given if the grantee exceeds the goals by at least 20 percent for any one item. Other respondents expressed their concerns as to the treatment of external influences affecting the evaluation process. Most advocated the delineating of parameters of acceptable performance levels. One respondent asked "If the grantee falls short of the projected number by five or ten percent, does this mean that they have not met the goal and therefore cannot be evaluated positively? Likewise, if a grantee meets 90 percent of its goals for units completed, and spends 90 or 95 percent of the approved grant funds, does this mean that they have not met those two criteria?"

The answer to each of these concerns will be found in all the available factual information. The rating of each proposed goal will always be objective, that is, the grantee proposed to construct 30 units and it either did or did not. However, the consideration of external causes that might have prevented the attainment of goals will impact the final rating. Typical examples of external factors are prolonged unfavorable weather, lack of loan funds and a delay in the processing of loan applications. Exhibit B, Evaluation Report of Self-Help Technical Assistance Grants, completed in a thorough and accurate manner will go a long way to provide supporting documentation of external factors. The National Office will make a continuous concerted effort to enhance the utilization of this Exhibit by the grantee, and District and State FmHA Offices.

Under the new method of evaluation objectivity is enhanced while subjectivity is greatly reduced. The grantee has the ability to know at all times the status of its progress toward its proposed goals and the opportunity to revise those goals. No modifications are incorporated to address the respondents concerns on this issue. The regulations provide that even a grantee that receives an unacceptable rating may be awarded a new grant by a State Director if it is determined as stated in § 1944.421 that the reasons causing the

previous unacceptable rating have been removed or will be removed with the approval of the new grant.

In commenting on § 1944.421, several respondents suggested a better way of refunding existing grantees to work in an expanded geographical area and to afford existing grantees utilization of the predevelopment grant. The suggested wordage offered by one respondent was adopted to address the concerns.

Response to the proposed § 1942.422 concerning audit and other report requirements almost always centered on when an audit should be required. Several respondents recommended that consideration be given to using the grantee's fiscal year as an appropriate time to audit. Other respondents recommended that OMB Circular A–128, Audits of State and Local Governments, and the proposed OMB Circular A–133, Audits of Institutions of Higher Education and Other Nonprofit Organizations, be followed.

The Agency has no objection to permitting grantees to have their grants audited at the end of their fiscal year if it is more appropriate than at the end of the Government's fiscal year. The fiscal year provision is added in § 1944.422. OMB Circular A–133 is now referenced. Attachment F of OMB Circular A–110 parallels the audit requirement of OMB Circular A–128. Departmental regulation 7 CFR part 3015 at § 3015.77 directs the use of OMB Circular A–110 when auditing nonprofit organizations. It is the objective of 7 CFR parts 3015 and 3016 to uniformly require multiple funded grantees to undergo a single annual audit.

One respondent asked if requiring a grantee to supply the Agency with its audit no later than 90 days following the expiration of the agreement supersedes OMB requirements. Section 3015.120(b)(3) of 7 CFR part 3015 in part supersedes OMB requirements. Section 3015.120(b)(3) of 7 CFR part 3015 in part states "Within a maximum period of 90 days following the date of expiration or termination of a grant, all financial performance and related reports required by the terms of the agreement shall be submitted to the awarding agency". Thus, § 1944.422 complies fully with Departmental regulations.

The final comment received referencing audits deserves discussion. The respondent asked if a close out audit of the grant program was required or necessary. The respondent stated that the request for a close out audit is clearly not in the spirit of the Single Audit Act of 1984 and may not be allowable under it. The self-help grant program is governed by 7 CFR parts 3015 and 3016. Section 3015.120(c)(3) of part 3015 states that final audit procedures as outlined in Attachment L of OMB Circular A–102 and Attachment K of OMB Circular A–110 are not a required part of the grant or subgrant closeout procedures. However, it further states "If a USDA agency considers a final audit to be necessary, it shall contact the Office of Inspector General (OIG) Region within which the recipient or subrecipient is located and inform OIG of the situation." OIG is responsible for final audits. FmHA will comply with this procedure and will make the decision to request a final audit by OIG when it is determined by FmHA to be appropriate.

In regards to § 1944.422, two respondents questioned whether grantees have the authority to request audits of borrower accounts. One of these respondents stated that requiring the grantee to have these accounts audited raises questions of legal liability and that auditing the accounts should be FmHA's responsibility.

There are two areas of grantee activity involving the handling of Section 502 loan funds for the participating families. The first is in the area of financial supervision as outlined in § 1944.403(o)(8) of proposed regulation. The second is when the grantee acts in the capacity of a construction manager and, if determined qualified by the District Director, in accordance with § 1924.6(c) of 7 CFR part 1924, subpart A may receive direct payments for materials and necessary contract work.

It is these two areas that, based on past investigations and audits, are most vulnerable to unauthorized use of funds and/or fraud. Therefore, we are stressing that these areas of grantee responsibility be specifically addressed in any required audit. The State Director will determine the extent to which the audit will include the grantee's handling of Section 502 loan funds, based on the degree to which the grantee is involved and what is necessary to identify any abuse. The audit coverage may range from a random sampling accounting to a complete audit of every account.

Many responses to § 1944.423 loan packaging were submitted and all opposed the statement, "A grantee should never place itself in a position where it appears to disagree with the eligibility decision of FmHA." One respondent did offer a recommendation that better expresses FmHA original intent. The questioned sentence is removed and replaced by the respondent's recommended statement which stresses that a grantee must work cooperatively with FmHA and within program regulations and must recognize that FmHA has the ultimate loan approval authority.

One alert respondent rightly pointed out that § 1944.426(b)(1) appeared to contradict § 1944.417(b)(2) which said the State Director cannot take termination action without prior approval of the National Office. No such written authorization is required by § 1944.426(b)(1). It was the intent of § 1944.417(b)(2) to limit the written authorization requirement to suspensions. The terms closeout and termination are deleted from § 1944.417(b)(2).

Comments received concerning § 1944.427, Grantee self-evaluation, were totally favorable. However, some recommended that the organization be given the flexibility to modify Exhibit E or to develop and utilize their own evaluation. FmHA will require all grantees to utilize Exhibit E but has no objections to grantees supplementing their internal evaluation with other criteria.

Some respondents requested that a section to give exception authority be added. While we see the value of such a paragraph, so many of the requirements in the regulation are based on OMB Circulars and Departmental regulations, that it would be very difficult to consider requests for exceptions.

Several candid comments were rendered by respondents referencing paragraph (e)(3)(i)(J) of Exhibit A. One comment suggested modifying the paragraph to promote mutual accountability.

It remains FmHA policy to continue to emphasize the serving of very low-income households by self-help grantees. The two unique and vital features of the self-help grant program are family labor contribution and the serving of those households that have no other means of obtaining homeownership save self-help. Therefore, FmHA requires self-help grantees to serve a minimum established percentage of very low-income and feels justified to terminate a grantee who does not accomplish this minimum requirement. However, as stated in § 1944.417, FmHA has a responsibility to help the grantee be successful. The tools of evaluation will be utilized by FmHA to promote and facilitate that responsibility. Inclusive evaluation of the grantee's performance by FmHA is a must.

Exhibit B, Mutual Self-Help Housing Guidelines has always been incorporated in 7 CFR part 1944, subpart A as Exhibit B. The decision was made to move the exhibit from subpart A to subpart I, because it is more related to

the latter regulation. FmHA now believes that this exhibit is more appropriate as a guide and would assist aspiring grantees if its contents were part of a handbook. Therefore, FmHA will undertake the task of providing a Self-Help Housing Handbook and remove the exhibit from subpart A, and appropriate updates and place it in the proposed handbook. The removal of the exhibit from subpart I was supported by several respondents. With the deletion of Exhibit B, proposed Exhibits C, D, E, F and G becomes Exhibits B, C, D, E and F, respectively.

A significant number of respondents questioned why no financial information is requested on what is now Exhibit B, Evaluation Report of Self-Help Technical Assistance Grants. Form SF–270, Request for Advance or Reimbursement, is the only authorized instrument to be used in reporting financial information concerning the grant. Therefore, the use of Form SF–270 in conjunction with Exhibit B accomplishes what respondents want.

Perhaps the most demonstrative comments were received on what is now Exhibit B–3, Breakdown of Construction Completed. Comments on this exhibit were received primarily from grantee organizations but a significant number of former self-help borrowers also submitted comments. All respondents in both groups advocated the elimination of required labor tasks. All recommended a required percentage of total labor tasks selected by participants and/or FmHA field personnel.

For five years, senior Agency officials have conducted on site evaluations of self-help housing construction in more than ten States. The evaluators were alarmed at what they observed and what they learned from Agency field personnel, grantees, and self-help families. Substantial subcontracting was the rule and family contributed labor was found to be the exception.

The mutual self-help program not only provides eligible rural households with homeownership but also affords them the opportunity to learn construction skills and to develop a spirit of teamwork. Significantly eliminating the practice of "sweat equity" does not achieve the major objectives of mutual self-help.

Agency representatives participated in four conferences sponsored by four Regional Technical and Management Assistance Contractors. Over ninety percent of all active grantees, aspiring grantees and field FmHA personnel also attended and participated in the conferences. The conferences facilitated unabridged dialogue and were held after the proposed rule was published in the Federal Register.

From discussions and documented evidence, it became clear to FmHA that to require families to adhere to uniformed mandated labor tasks was not feasible. Factors such as local and state building code, climate, skill levels of families, type of house and skill levels of construction personnel had to be considered. FmHA adopted the recommendations of the vast majority of respondents and removed the mandated list of labor tasks and gave flexibility to grantees by permitting them to select a minimum of 65 percent of labor tasks listed in Exhibit B–2. Also the list of the tasks contained in this exhibit were changed to provide clarity by explaining what each term meant.

Several respondents wanted the proposed split between construction and preconstruction credit to remain at 70/30 respectively. It is not FmHA intention to minimize the importance of preconstruction activities, although greater emphasis is given to construction activities. The timely construction of houses with maximum family labor is of utmost importance. Changing the construction/preconstruction ratio from 70/30 to 80/20 is a well thought out decision and will better serve to maintain program creditability because actual labor is emphasized even more than non-labor tasks were in the past.

Two respondents questioned why the total of all labor tasks equals 100 percent rather than 80 percent. The 100 percent total of labor tasks has no relationship to the 80/20 split. Likewise, a grantee successfully completing all preconstruction tasks would be credited with a total of 100 percent.

Additional minor changes were also made to the regulation of a clarifying nature or to delete extraneous material.

List of Subjects

7 CFR Part 1924

Agriculture, Construction, Management, Construction and repair, Energy Conservation, Housing, Loan programs—Agriculture, Low and moderate income housing.

7 CFR Parts 1933 and 1944

Grant Program—Housing and Community development; Indians; Low and moderate income housing; Non-profit organization; Rural housing; and Reporting requirements.

Therefore, FmHA amends chapter XVIII, title 7, Code of Federal Regulations as follows:

PART 1924—GENERAL

1. The authority citation for part 1924 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; sec. 10 Pub L. 99–357, 88 Stat. 292; 7 CFR 2.23; 7 CFR 2.70

Subpart A—Planning and Performing Construction and Other Development

2. Section 1924.8 is amended by revising the last sentence in paragraph (c) to read as follows:

§ 1924.8 Mutual self-help method.

* * * * *

(c) * * * In the case of RH loans to families being assisted by Self-Help Technical Assistance (TA) grants in accordance with subpart I of part 1944 of this chapter, the County Supervisor may countersign checks for materials and necessary contract work made payable directly to the TA grantee, provided the District Director determines that:

Subpart I—Self-Help Technical Assistance Grants

§ 1944.401 Objective.

This subpart sets forth the policies and procedures and delegates authority for providing Technical Assistance (TA) funds to eligible applicants to finance programs of technical and supervisory assistance for self-help housing, as authorized under section 523 of the Housing Act of 1949. This financial assistance may pay part or all of the cost of developing, administering, or coordinating programs of technical and supervisory assistance to aid needy very low- and low-income families in carrying out self-help housing efforts in rural areas. Very low-income families must receive a priority for recruitment and participation and may not comprise less than the percentage stated in subpart L of part 1940 of this chapter of those assisted in any grant. The primary purpose is to fund organizations that are willing to locate and work with families that otherwise do not qualify as homeowners. Generally, these are families below 50 percent of median incomes, living in substandard housing, and/or lacking the skills to be good homeowners. Grantees will comply with the nondiscrimination regulation subpart E of part 1901 of this chapter which states that no person in the United States shall, on the grounds of race, color, national origin, sex, religion, marital status, mental or physical handicap, or age, be excluded from participating in, be denied the benefits of, or be subject to discrimination in connection with the use of grant funds and all provisions of the Fair Housing Act of 1968.

§ 1944.402 Grant purposes.

Farmers Home Administration (FmHA) may contract or make a grant to an organization to:

(a) Give technical and supervisory assistance to eligible very low- and low-income families as defined in Exhibit C of subpart A of this part, in carrying out self-help housing efforts.

(b) Assist other organizations to provide technical and supervisory assistance to eligible families.

(c) Develop a final application, recruit families and related activities necessary to participate under paragraph (a) of this section.

§ 1944.403 Definitions.

(a) *Agreement.* The Self-Help Technical Assistance Agreement, which is a document signed by FmHA and the grantee, sets forth the terms and conditions under which TA funds will be made available. (Exhibit A of this subpart).

(b) *Agreement period (or grant period).* The period of time for which an agreement is in force. Generally, the period will not exceed 24 months.

(c) *Date of completion.* The date when all work under a grant is completed or the date in the TA grant agreement, or any supplement or amendment to it, when Federal assistance ends.

(d) *Direct costs.* Those costs that are specifically identified with a particular project or activity. Grantees receiving funds from a single grant source would consider all costs as direct costs.

(e) *Disallowed costs.* Those charges to a grant which FmHA determines cannot be authorized.

(f) *Equivalent units.* Equivalent units represent the "theoretical number of units" arrived at by adding the equivalent percentage of completion figure for each family in the self-help program (pre-construction and actual construction) together at any given date during program operations. The sum of the percentage of completion figures for all participant families represent the total number of "theoretical units" completed at any point in time. Equivalent units are useful in measuring progress during the period of the grant and are not a measurement of actual accomplishments. The number of equivalent units for any group can never exceed the number of planned or completed houses for that group.

(g) *Equivalent value of a modest house.* The equivalent value of a modest house is the typical cost of a recent contractor-built FmHA financed home in the area plus the actual or projected costs of an acceptable site and site development. If FmHA has not financed a contractor-built house during the last twelve months, the value will be established by use of the Marshall and Swift cost handbook or a similar type of handbook. Equivalent value of a modest house is established by FmHA.

(h) *Indirect costs.* Those costs that are incurred for common or joint objectives and therefore, cannot be readily and specifically identified with a particular project or activity, e.g., self-help.

(i) *Mutual self-help.* The construction method by which participating families organized in groups generally of 4 to 10 families utilize their own labor to reduce the total construction cost of their homes. Participating families complete construction work on their homes by an exchange of labor with one another. The mutual self-help method must be used for new construction.

(j) *Organization.* (1) A State, political subdivision, or public nonprofit corporation (including Indian tribes or Tribal corporations); or

(2) A private nonprofit corporation that is owned and controlled by private persons or interests and is organized and operated for purposes other than making gains or profits for the corporation and is legally precluded from distributing any gains or profits to its members.

(k) *Participating family.* Individuals and/or their families who agree to build homes by the mutual self-help method and rehabilitate homes by the self-help method. Participants are families with very low- or low-incomes who have the ability to furnish their share of the required labor input regardless of the handicap, age, race, color, national origin, religion, family status, or sex of the head of household. The participating family must be approved for a Section 502 RH loan or similar loans from other Federal, state, and private lenders that uses income guidelines substantially similar to the Department of Housing and Urban Development before the start of construction, have sufficient time available to assist in building their own homes, and show a desire to work with other families. Each family in the group must contribute labor on each other's

homes to accomplish the 65 percent of the total 100 percent of tasks listed in Exhibit B-2 of this subpart. A participating family may use a substitute to perform the labor with prior approval of the Grantee and the FmHA State Director. A substitute is only permitted when the participating family is incapacitated.

(l) *Self-help.* The construction method by which an individual family utilizes their labor to reduce the construction cost of their home without an exchange of labor between participating families. Unless otherwise authorized by the District Director, this method is only funded for repair and rehabilitation type construction.

(m) *Sponsor.* An existing entity that is willing and able to assist an applicant, with or without charge, in applying for a grant and in carrying out responsibilities under the agreement. Examples of sponsors are local rural electric cooperatives, institutions of higher education, community action agencies and other self-help grantees. Also, when available, regional technical and management assistance contractors may qualify to serve as a sponsor at no charge.

(n) *Technical assistance.* The organizing and supervising of groups of families in the construction of their own homes including:

(1) Recruiting families who are interested in sharing labor in the construction of each other's homes and assisting such families in obtaining housing loans.

(2) Conducting meetings of the families to explain the self-help program and subjects related to home ownership, such as loan payments, taxes, insurance, maintenance, and upkeep of the property.

(3) Helping families in planning and developing activities that lead to the acquisition and development of suitable building sites.

(4) Assisting families in selecting or developing house plans for homes which will meet their needs and which they can afford.

(5) Assisting families in obtaining cost estimates for construction materials and any contracting that may be required.

(6) Providing assistance in the preparation of loan applications.

(7) Providing construction supervision and training for families while they construct their homes.

(8) Providing financial supervision to individual families with section 502 Rural Housing (RH) loans which will minimize the time and effort required by FmHA in processing borrower expenditures for materials and contract services.

(9) Assisting families in solving other housing problems.

(o) *Termination of a grant.* The cancellation of Federal assistance, in whole or in part, at any time before the date of completion.

§ 1944.404 Eligibility.

To receive a grant, the applicant must:

(a) Be an organization as defined in § 1944.403(j) of this subpart.

(b) Have the financial, legal, administrative, and actual capacity to assume and carry out the responsibilities imposed by the Agreement. To meet the requirement of actual capacity it must either:

(1) Have necessary background and experience with proven ability to perform responsibly in the field of mutual self-help or other business management or administrative ventures which indicate an ability to perform responsibility in the field of mutual self-help; or

(2) Be sponsored by an organization with background experience, and ability, which agrees in writing to help the applicant to carry out its responsibilities.

(c) Legally obligate itself to administer TA funds, provide adequate accounting of the expenditure of such funds, and comply with the Agreement and FmHA regulations.

(d) If the organization is a private nonprofit corporation, be a corporation that:

(1) Is organized under State and local laws.

(2) Is qualified under section 501(c)(3) of the Internal Revenue Code of 1950.

(3) Has as one of its purposes the production of affordable housing.

(4) Has a Board of Directors which consist of not less than five.

§ 1944.405 Authorized use of grant funds.

(a) Payment of salaries of personnel as authorized in the Agreement.

(b) Payment of necessary and reasonable office expenses such as office rental, office utilities, and office equipment rental. The purchase of office equipment is permissible when the grantee determines it to be more economical than renting. As a general rule, these types of expenses would be classified as indirect costs in multiple funded organizations.

(c) Purchase of office supplies such as paper, pens, pencils, and trade magazines.

(d) Payment of necessary employee benefit costs including but not limited to items such as Worker's Compensation, employer's share of social security, health benefits, and a reasonable tax deferred pension plan for permanent employees.

(e) Purchase, lease, or maintenance of power or specialty tools such as a power saw, electric drill, sabre saw, ladders, and scaffolds, which are needed by the participating families. The participating families, however, are expected to provide their own hand tools such as hammers and handsaws.

(f) Payment of liability insurance and special purpose audit costs associated with self-help activites. These would be considered direct costs, even though the grantee's general liability insurance cost and the cost of audits for the organization are generally indirect costs.

(g) Payment of reasonable fees for training of grantee personnel including board members. This may include the cost of travel and per diem to attend in or out-of-State training as authorized by the board of directors and, when necessary, for the employee to do the current job. These costs are generally direct costs.

(h) Payment of services rendered by a sponsor or other organization after the grant is closed and when it is determined the sponsor can provide the necessary services which will result in an overall reduction in the cost of assistance. Typically, this will be limited to new grantees and an existing grantee for the period of time that its size or activity does not justify a full staff. A full staff is a full or part-time director, project worker, secretary-bookkeeper, and a construction supervisor. This type of cost is generally direct.

(i) Payment of certain consulting and legal costs required in the administration of the grant if such service is not available without cost. This does not include legal expenses for claims against the Federal Government. (Legal costs that may be incurred by the organization for the benefit of the participating families may be paid with prior approval of the State Director).

(j) Payments of the cost of an accountant to set up an accounting system and perform audits that may be required. Generally, these costs are indirect.

(k) Payments of reasonable expenses of board members for attending regular or special board meetings. These costs are indirect.

§ 1944.406 Prohibited use of grant funds.

(a) Hiring personnel specifically for the purpose of performing any of the construction work for participating families in the self-help projects.

(b) Buying real estate or building materials or other property of any kind for participating families.

(c) Paying any debts, expenses, or costs which should be the responsibility of the participating families in the self-help projects.

(d) Paying for training of an employee as authorized by Attachment B of OMB Circular A-122.

(e) Paying costs other than approved indirect (including salaries) that are not directly related to helping very low- and low-income families obtain housing consistent with the objectives of this program.

§ 1944.407 Limitations.

The amount of the TA grant depends on the experience and capability of the applicant and must be justified based on the number of families to be assisted. As a guide, the maximum grant amounts for any grant period will be limited to:

(a) An average TA cost equivalent per unit of no more than 15 percent of the cost of equivalent value of modest homes built in the area. (Upon request, the County Supervisor will provide the grantee the average cost of modest homes for the area); or

(b) An average TA cost per equivalent unit that does not exceed the difference between the equivalent value of modest homes in the area and the average mortgage of the participating families minus $1,000; or

(c) A TA per equivalent unit cost that does not exceed an amount established by the State Director. The State Director may authorize a greater TA cost than paragraph (a) or (b) of this section when needed to accomplish a particular objective, such as requiring the grantee to serve very low-income families, remote areas, or similar situations; or

(d) A negotiated amount for repair and rehabilitation type proposals. At a minimum, applicants applying for repair and rehabilitation grants must include information on the proximity of the houses in a project, the typical needed repairs, and the cost savings between self-help and contractor rehabilitation and repair.

§ 1944.408 [Reserved]

§ 1944.409 Executive Order 12372.

The self-help program is subject to the provision of Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under subpart J of part 1940 of this chapter (available in any FmHA office), new applicants for the self-help program must submit their Statement of Activities to the State single point of contact prior to submitting their preapplication to FmHA. The name of the point of contact is available from the FmHA State Office.

§ 1944.410 Processing preapplications, applications, and completing grant dockets.

(a) *Form SF-424, "Application for Federal Assistance."* Form SF-424 in an original and one copy must be submitted by the applicant to the District Director. It will be used to establish communication between the applicant and FmHA, determine the applicant's eligibility, determine how well the project can compete with similar applications from other organizations and eliminate any proposals which have little or no chance for Federal funding before applicants incur significant expenditures for preparing an application. In addition, the following information will be attached to and become a part of the preapplication:

(1) Complete information about the applicant's previous experience and capacity to carry out the objective of the agreement.

(2) If the applicant organization is already formed, a copy of or an accurate reference to the specific provisions of State law under which the applicant is organized; a certified copy of the applicant's Articles of Incorporation and Bylaws or other evidence of corporate existence; certificate of incorporation for other than public bodies; evidence of good standing from the State when the corporation has been in existence 1 year or more; the names and addresses of the applicant's members, directors, and officers; and, if another organization is a member of the applicant-organization, its name, address, and principal business. If the applicant is not already formed, attach copies of the proposed organizational documents demonstrating compliance with § 1944.404(d) of this subpart.

(3) A current (no more than 12 months old) dated and signed financial statement showing the amounts and specific nature of assets and liabilities together with information on the repayment schedule and status of any debt owed by the applicant. If the applicant is being sponsored by another organization, the same type of financial statement also must be provided by the applicant's sponsor.

(4) A narrative statement which includes information about the amount of the grant funds being requested, area(s) to be served, need for self-help housing in the area(s), the number of self-help units proposed to be built, rehabilitated or repaired during the agreement period, housing conditions of low-income families in the area and reasons why families need self-help assistance. Evidence should be provided that the communities support the activity and that there are low-income families willing to contribute their labor in order to obtain adequate housing. Evidence of community support may be letters of support from local officials, individuals and community organizations. The pre-application may contain information such as census materials, local planning studies, surveys, or other readily available information which indicates a need in the area for housing of the type and cost to be provided by the proposed self-help TA program.

(5) A plan of how the organization proposes to reach very low-income families living in houses that are deteriorated, dilapidated, overcrowded, and/or lacking plumbing facilities.

(6) A proposed budget which will be prepared on SF-424A, "Budget Information (Non-Construction Programs)" will be completed to address applicable assurances as outlined in § 3015.205 of 7 CFR part 3015. State and local Government will include an assurance that the grantee shall comply with all applicable Federal statutes and regulations in effect with respect to the periods for which it receives grant funding. The State and local governments shall also comply with 7 CFR part 3016.

(7) A preliminary survey as to the availability of lots and projected cost of the sites.

(8) A list of other activities the applicant is engaged in and expects to continue, and a statement as to other sources of funding and whether it will have sufficient funds to assure continued operation of the other activities for at least the period of the agreement. If multi-funded, its cost allocation plan or indirect cost rate must be part of the pre-application.

(9) Whether assistance under paragraph (d) of this section is requested and a brief narrative identifying the need, amount of funds needed, and projected time period.

(10) If a project is planned for five or more housing lots or units, an Affirmative Fair Marketing Plan is required. The plan will be in effect until the completion of the project.

(b) *Preapplication review.* (1) The District Director, within 30 days of receipt of the preapplication, Form SF-424, and all other required information and material will complete a thorough review for completeness, accuracy, and conformance to program policy and regulations. Incomplete preapplications will be returned to the applicant for completion. The applicant should be given the name of the regional technical assistance contractor. The County Supervisor in the prospective county will be contacted as to the need for the

program in the proposed area and if the necessary resources are available to the grantee. This will include a discussion of the number of 502 and 504 units that will need to be committed to the grantee and the potential work impact on the office during the grant period. If it is determined that the County Office lacks the resources (either personnel or funds) to process all loan requests in a timely manner, the District Director must communicate this need to the State Director along with a recommended solution. (Lack of resources at the county level are not grounds to deny a request). After the District Director has determined that the preapplication is complete and accurate, the District Director will assemble the material in an applicant case file and forward it to the State Director. The case file, as a minimum, must contain the following:

(i) Form SF–424,

(ii) Original and one copy of Form FmHA 1940–20, "Request for Environmental Information,"

(iii) Eligibility recommendations, and

(iv) HUD Form 935.2 "Affirmative Fair Housing Marketing Plan", if applicable.

(2) The State Director may, if needed, submit the organizational documents with any comments or questions to the Office of General Counsel (OGC) for a preliminary opinion as to whether the applicant is or will be a legal organization of the type required by these regulations and for advice on any other aspects of the preapplication.

(3) The State Director, if unable to determine eligibility or qualifications with the advice of the OGC, may submit the preapplication to the National Office for review. The preapplication will contain all memoranda from OGC giving the results of its review. The State Director will identify in the transmittal memorandum to the National Office the specific problem and will recommend possible solutions and any information about the applicant which would be helpful to the National Office in reaching a decision.

(4) After an eligibility determination has been made, which should be completed within 30 days unless OGC is involved, the State Director will:

(i) If the applicant is eligible, contact the National Office as to the availability of funds or submit the proposal to the National Office for authorization if the requested amount exceeds the State Director's approval authority. If funds are available, the final review officer, either the State Director or the Assistant Administrator, Housing will issue a letter of conditions that the applicant must meet and direct the District Director to issue Form AD–622, "Notice of Preapplication Review Action."

(ii) If the applicant is determined not eligible, the State Director will direct the District Director to issue Form AD–622.

(c) *Form AD–622, "Notice of Preapplication Review Action."* (1) If the applicant is eligible and after the State Director has returned the preapplication information and the executed original Form FmHA 1940–20 to the District Office, the District Director will, within 10 days, prepare and issue Form AD–622. The original Form AD–622 will be signed and delivered to the applicant along with the letter of conditions, a copy to the applicant's case file, a copy to the County Supervisor, and a copy to the State Director.

(2) If the applicant is not eligible and after the State Director has returned the preapplication information, the District Director will within 5 days notify the applicant on Form AD–622. The notification will inform the applicant that an appeal of the decision may be made to the National Appeals Staff under subpart B of part 1900 of this chapter.

(3) If the applicant is eligible and no grant or loan funds are available, the State Director will return the preapplication information to the District Director who will, within 10 days, notify the applicant on Form AD–622. The notification will explain the facts concerning the lack of funding and that FmHA will notify them when funding will be available. This is not an appealable decision.

(d) *Self-help technical assistance grant predevelopment agreement.* If the grantee requested predevelopment assistance and the State Director determines that the applicant lacks the financial resources to meet the conditions of grant approval, a grant of up to $10,000 and for up to six months will be made in order for the applicant to provide what is required by paragraph (e) of this section. Exhibit D of this subpart will be used for this purpose. Existing grantees proposing to operate in an area different from the area that they are currently funded to operate are eligible for this grant. However, this grant is available only once for a defined area. This grant is available only after the letter of conditions has been issued. Denial of this assistance is an appealable decision under subpart B of part 1900 of this chapter.

(e) *Form SF–424, "Application for Federal Assistance."* The applicant will submit Form SF–424 in an original and one copy to the District Director. The application should provide a detailed proposal of its goals including:

(1) Names, addresses, number in household, and total annual household income of families who have been contacted by the applicant and are interested in participating in a self-help housing project. Community organizations including minority organizations may be used as a source of names of people interested in self-help housing.

(2) Proof that the first group of prospective participating self-help families have qualified for financial assistance.

(3) Evidence that lots are optioned by the prospective participating self-help families for the first group. Evidence that lots are available for the remaining groups.

(4) Detailed cost estimates of houses to be built by the mutual self-help method. Plans and specifications should be submitted with the cost estimates.

(5) Proposed staffing need, including qualifications, experience, proposed hiring schedule, and availability of any prospective employees.

(6) Name, address, and official position of the applicant's representative or representatives authorized to act for the applicant and work with FmHA.

(7) Budget information including a detailed budget for the Agreement period based upon the needs outlined in the proposal. SF 424A will be completed to furnish the budget information.

(8) Indirect or direct cost policy and proposed indirect cost rate developed in accordance with 7 CFR part 3015 and part 3016.

(9) Personnel procedures and practices that will be established or are in existence. Forms to be used should be submitted with the application.

(10) A proposed monthly activities schedule showing the proposed dates for starting and completing the recruitment, loan processing and construction phases for each group of participant families.

§ 1944.411 Conditions for approving a grant.

A grant may be approved for an eligible applicant when the conditions in the letter of conditions are met and the following conditions are present:

(a) The applicant has or can hire, or contract directly or indirectly with, qualified people to carry out its responsibilities in administering the grant.

(b) The applicant has met all of the conditions listed in § 1944.410(e) of this subpart.

(c) The grantee furnishes a signed statement that it complies with the requirements of the Departmental Regulations found in 7 CFR part 3015 and part 3016.

BEST COPY AVAILABLE

(d) A resolution has been adopted by the board of directors which authorizes the appropriate officer to execute Exhibit A of this subpart and Form FmHA 400–1, "Equal Opportunity Agreement."

(e) The grantee has fidelity bonding as covered in 7 CFR part 3015 if a nonprofit organization or, if a State or local government, to the extent required in 7 CFR part 3016.

(f) The grantee has agreed by completing SF–424E, "Assurances-Non Constitutional Programs," that it will establish a recordkeeping system that is certifiable by a certified public accountant that it adequately meets the Agreement.

(g) The grantee has established an interest bearing checking account on which at least two bonded officials will sign all checks issued and understands that interest earned in excess of $250.00 annually must be submitted to FmHA quarterly. (The use of minority depository institutions is encouraged.)

(h) The grantee has developed an agreement to be executed by the grantee and the self-help participants which clearly sets forth what is expected of each and has incorporated Exhibit B–2 of this subpart which clearly shows what work is expected of the participating family.

§ 1944.412 Docket preparation.

When the application and all items required for the complete docket have been received, the District Director will thoroughly examine it to insure the application has been properly and accurately prepared and that it includes the required dates and signatures. The docket items will be assembled and distributed by the District Director in the following order:

Form No.	Name of form or document	Total No. of copies	Signed by applicant	No. for agreement docket	Copy for applicant
SF–424	Application for Federal Assistance	3	1	1-O and 1C	1-C
AD–622	Notice of Preapplication Review Action	2		1-C	
FmHA 1940–1	Request for Obligation of Funds	4	2	1-O and 2C	1-C
FmHA 400–4	Assurance Agreement	2	1	1-O	1-C
	HUD Form 935.2, Affirmative Fair Housing Marketing Plan	3	1	1-O and 1C	1-C
	Certified Copy Authorizing Resolution	1	1	1-O	
	Self-Help Technical Assistance Grant Agreement (Exhibit A)	2	1	1-O	1-C
	Any Personnel Forms to be used	2		1-O	1-C

O=Original.
C=Copy.

§ 1944.413 Grant approval.

(a) *Approval of grant.* Within 30 days of the grantee meeting the conditions of § 1944.411 of this subpart or, if applicable, signing Exhibit D, the approving official will:

(1) Execute and distribute Form FmHA 1940–1 in accordance with the Forms Manual Insert (FMI).

(2) After the Finance Office acknowledges that funds are obligated, request an initial advance of funds on Form FmHA 440–57, "Acknowledgment of Obligated Funds/Check Request," in accordance with the FMI. The amount of this request should cover the applicant's needs for the remainder of the month in which the grant is closed plus the next month. Subsequent advances will cover only a one-month period.

(b) *Cancellation of an approved grant.* An approved grant may be canceled before closing if the applicant is no longer eligible, the proposal is no longer feasible, or the applicant requests cancellation. Cancellation will be accomplished as follows:

(1) The District Director will prepare Form FmHA 1940–10, "Cancellation of U.S. Treasury Check and/or Obligation," according to the FMI and send it to the State Director with the reasons for cancellation. If the State Director approves the request, Form FmHA 1940–10 will be returned to the District Office for processing in accordance with the FMI.

(2) The District Director will notify the applicant of the cancellation and the right to appeal under subpart B of part 1900 of this chapter. If the applicant requested the cancellation, no appeal rights are provided, but the applicant will still be notified of the cancellation.

(c) *Disapproval of grant.* If a grant is disapproved after the docket has been developed, the approving official will state the reason on the original Form FmHA 1940–1, or in a memorandum to the District Director. The District Director will notify the applicant in writing of the disapproval and the reason for disapproval. Also, the notification will inform the applicant of its appeal rights under subpart B of part 1900 of this chapter.

§ 1944.414 [Reserved]

§ 1944.415 Grant approval and other approving authorities.

(a) The State Director is authorized to approve or disapprove TA grants under this subpart. For a grant in excess of $300,000, or in the case of a grant amendment when the amount of the grant plus any unexpended funds from a previous grant will exceed $400,000, prior written consent of the National Office is required. In such cases, the docket, along with the State Director's recommendations, must be submitted to the National Office for review.

(b) The State Director may approve a grant not to exceed $10,000 to an eligible organization under § 1944.410(d) of this subpart. The grant must be limited to 6 months and funds must be used for the development of the final application, family recruitment, and related activities as explained in § 1944.410(e) of this subpart. The amount of this grant will not be included in figuring TA cost per units.

(c) The authority to contract for services is limited to the Administrator of FmHA.

(d) Monthly expenditures of the grantee will normally be approved by the District Director unless:

(1) The grantee operates in only one county, in which case the authority may be delegated to the County Supervisor.

(2) The grantee operates in more than one FmHA District, in which case the State Director will designate the approving official.

(3) The grantee operates in more than one State Director's jurisdiction, in which case the Administrator will designate the approving official.

(4) The expenditure is under contract authority, in which case the Contracting Official Representative will approve the monthly expenditure.

§ 1944.416 Grant closing.

The grant is closed on the date the Agreement is executed as defined in § 1944.403(a) by the applicant and the Government. Funds may not be advanced prior to the signing of the

BEST COPY AVAILABLE

Agreement. The District Director or Assistant District Director are authorized to execute the Agreement for FmHA. Person(s) authorized by resolution may sign for the applicant.

§ 1944.417 Servicing actions after grant closing.

FmHA has a responsibility to help the grantee be successful and help the grantee avoid cases of fraud and abuse. Servicing actions also include correlating activities between the grantee and FmHA to the benefit of the participating families. The amount of servicing actions needed will vary in accordance with the experience of the grantee, but as minimum the following actions are required:

(a) Monthly, the grantee will provide the District Director with a request for additional funds on Form SF–270, "Request for Advance or Reimbursement." This request need only show the amount of funds used during the previous month, amount of unspent funds, projected need for the next 30 days, and written justification if the request exceeds the projected need for the next 30 days. This request must be in the District Director's office fifteen days prior to the beginning of the month. Upon receipt of the grantee's request, the District Director will:

(1) If the request appears to be in order, process Form FmHA 440–57 so that delivery of the check will be possible on the first of the next month.

(2) If the request does not appear to be in order, immediately contact the grantee to resolve the problem. After the contact:

(i) If the explanation is acceptable, process Form FmHA 440–57 so delivery may be possible by the first of the next month, or

(ii) If the explanation is not acceptable, immediately notify the grantee and request the amount of funds that appear reasonable for the next 30 days on Form FmHA 440–57, so that delivery may be possible by the first of the next month. Unapproved funds that are later approved will be added to the next month's request.

(b) Quarterly, the grantee will submit Exhibit B of this subpart in an original and three copies to the County Supervisor on or before January 15, April 15, July 15, and October 15 which will verify its progress toward meeting the objectives stated in the Agreement and the application. The County Supervisor will immediately complete the County Office review part and forward the report to the District Office. After Exhibit C is received in the District Office, a meeting should be scheduled between the grantee, District Director, and the County supervisor since this is an opportune time for both the grantee and FmHA to review progress to date and make necessary adjustments for the future. This meeting is required if the grantee was previously identified as a problem grantee or will be identified as a problem grantee at this time. Regardless of whether a meeting will be held, the following will be done:

(1) Exhibit B and other information will be evaluated to determine progress made to date. The District Director will comment on Exhibit B as to whether the grantee is ahead or behind schedule in each of the following areas:

(i) *Assisting the projected number of families.*

(ii) *Serving very low-income applicants.* Is the grantee reaching a minimum of very low-income families as required in Exhibit A, Attachment 2 to subpart L of part 1940 of this chapter (available in any FmHA office).

(iii) *Equivalent units (EUs).* Is the number of EUs completed representative of lapse in time of the grant? For example, if 25 percent of the grant period has elapsed, are 25 percent of the number of EUs completed?

(iv) *Labor contributions by the family.* Are the families working together and are they completing the labor tasks as established on Exhibit B–2?

(2) The District Director will submit Exhibit B to the State Director who will evaluate the quarterly report along with the District Director's comments. If the State Director determines the grantee is progressing satisfactorily, the State Director will sign and forward Exhibit B to the National Office. However, if the State Director determines the grantee is not performing as expected, the State Director will notify the grantee that it has been classified a "High Risk" grantee. The notice will specify the deficiencies and inform the grantee of proposed remedies for noncompliance. The notice will advise the grantee that FmHA is available to assist and provide the name and address of an organization that is under contract with FmHA to assist them. The State Director will forward a copy of Exhibit B, District Directors comments, and the reasons for classifying them as "High Risk" to the National Office, Single Family Housing, Special Programs Branch. When the period of time provided for corrective action has expired, an assessment will be made of the progress by the grantee toward correcting the situation. If the State Director determines:

(i) The situation has been corrected or reasonable progress has been made toward correcting the situation, the "High Risk" status will be lifted and the grantee so notified.

(ii) The situation has not been corrected but it is correctable if additional time is granted, an extension will be issued.

(iii) The situation has not been corrected and it is unlikely to be corrected if given additional time, the grant will be terminated under § 1944.428(b)(1) of this subpart.

§ 1944.418 [Reserved]

§ 1944.419 Final grantee evaluation.

Near the end of the grant period but prior to the last month, an evaluation of the grantee will be conducted by FmHA. The State Director may use FmHA employees or an organization under contract to FmHA to provide the evaluation. The evaluation is to determine how successful the grantee was in meeting goals and objectives as defined in the agreement, application, this regulation, and any amendments.

(a) This is a quantitative evaluation of the grantee to determine if it met its goals in:

(1) Assisting the project number of families in obtaining adequate housing.

(2) Meeting the goal of assisting very low-income families.

(3) Meeting the family labor requirement in § 1944.411(h) and Exhibit B–2 of this subpart.

(4) Keeping costs within the guides set in § 1944.407.

(5) Meeting order objectives in the Agreement.

(b) The evaluation is a narrative addressed to the State Director with a copy of the National Office, Single Family Housing Processing Division. It will be in 3 parts, namely; findings, recommendations, and an overall rating. The rating will be either unacceptable, acceptable, or outstanding, as follows:

(1) Outstanding if the grantee met or exceeded all of the goals in paragraph (a) of this section.

(2) Acceptable if the grantee met or exceeded all of the goals as defined in paragraph (a) except two.

(3) Unacceptable if the grantee failed to obtain an acceptable rating.

(c) After the State Director has reviewed the evaluation, a copy will be mailed to the grantee. The grantee may request a review of the evaluation with the District Director. This review is for clarification of the material and to dispute the findings if they are known to be wrong. The rating is not open for discussion except to the extent it can be proven that the findings do not support the rating. If this is the case, the District

Director will file an amendment to the State Director.

§ 1944.420 Extension or revision of the grant agreement.

The State Director may authorize the District Director to execute on behalf of the Government, Exhibit C of this subpart, at any time during the grant period provided:

(a) The extension period is for no more than one year from the final date of the existing Agreement.

(b) The need for the extension is clearly justified.

(c) If additional funds are needed, a revised budget is submitted with complete justification, and

(d) The grantee is within the guidelines in § 1944.407 of this subpart or the State Director determines that the best interest of the Government will be served by the extension.

§ 1944.421 Refunding of an existing grantee.

Grantees wishing to continue with self-help efforts after the end of the current grant plus any extensions should file Form SF–424, in accordance with § 1944.410(e). It is recommended that it be filed at least 6 months before the end of the current grant period. Funds from the existing grant may be used to meet the conditions of a new grant to serve the same or redefined geographic area. If the grantee is targeting a different geographic area, a new preapplication must be submitted in accordance with § 1944.410 and the grantee may apply for a predevelopment grant in accordance with § 1944.410(d). In addition to meeting the conditions of an applicant as defined in § 1944.411 of this subpart, the grantee must also have received or will receive an acceptable rating on its current grant unless an exception is granted by the State Director. The State Director may grant an exception to the rating if it is determined that the reasons causing the previous unacceptable rating have been removed or will be removed with the approval of this grant.

§ 1944.422 Audit and other report requirements.

The grantee must submit an audit to the appropriate FmHA District Office annually (or biannually if a State or local government with authority to do a less frequent audit requests it) and within 90 days of the end of the grantee's fiscal year, grant period, or termination of the grant. The audit, conducted by the grantee's auditors, is to be performed in accordance with Generally Accepted Government Auditing Standards (GAGAS), using the publication "Standards for Audit of Governmental Organizations, Programs, Activities and Functions" developed by the Comptroller General of the United States in 1981, and any subsequent revisions. In addition, the audits are also to be performed in accordance with 7 CFR parts 3015 and 3016 and FmHA requirements as specified in this subpart. Audits of borrower loan funds will be required. The number of borrower accounts audited will be determined by the auditor. In incidences where it is difficult to determine the appropriate number of accounts to be audited, auditors should be authorized by the State Director to audit the lesser of 10 loans or 10 percent of total loans.

(a) *Nonprofit organizations and others.* If determined necessary these organizations are to be audited in accordance with FmHA requirements OMB Circular A–110, A–133, and 7 CFR part 3015. These requirements also apply to public hospitals, public colleges, and universities if they are excluded from the audit requirements of paragraph (b) of this section.

(1) An audit conducted by the grantee's auditor shall be supplied to the FmHA District Director as soon as possible but in no case later than ninety (90) days following the period covered by the grant agreement.

(2) Auditors shall promptly notify United States Department of Agriculture's Office of the Inspector General Regional Inspector General and the FmHA District Office, in writing, of any indication of fraud, abuse, or illegal acts in grantees use of grant funds or in the handling of borrowers accounts.

(3) Nonprofit organizations that receive less than $25,000 a year in Federal financial assistance need not be audited.

(b) *State and local governments and Indian tribes.* These organizations are to be audited in accordance with this subpart and 7 CFR part 3016. The grantee will forward completed audits to the appropriate Federal cognizant agency and a copy to the FmHA District Director. "Cognizant agency" means the Federal agency assigned by OMB Circular A–128. Within USDA, and OIG shall fulfill cognizant agency responsibilities. Smaller grantees not assigned a cognizant agency by OMB should contact the Federal agency that provided the most funds. When USDA is designated as the cognizant agency or when it has been determined by the borrower that FmHA provided the major portion of Federal financial assistance, the State Director will contact the appropriate USDA OIG Regional Inspector General. FmHA and the borrower shall coordinate all proposed audit plans with the appropriate USDA OIG.

(1) State and local governments and Indian tribes that receive $25,000 or more a year in Federal financial assistance shall have an audit made in accordance with 7 CFR part 3016.

(2) State and local and Indian tribes that receive less than $25,000 a year in Federal financial assistance shall be exempt from 7 CFR part 3016.

(3) Public hospitals and public colleges and universities may be excluded by the State Director from OMB Circular A–128 audit requirements. If such entities are excluded, audits shall be made in accordance with paragraph (a) of this section.

§ 1944.423 Loan packaging and 502 RH application submittal.

A grantee is required to assist 502 RH applicants in submitting their application for a RH loan. Loan packaging will be performed in accordance with Exhibit A of subpart A of part 1944 of this chapter; therefore, it is important that the grantee be trained at an early date in the packaging of RH loans. Typically, this training should take place before the first applications are submitted to the County Office and before the grant is closed. A grantee should become very knowledgeable of FmHA's eligibility requirements but must understand that only FmHA can approve or deny an applicant assistance. Grantee must work cooperatively with FmHA in the 502 loan approval process and must work within the regulations for the 502 program and recognize FmHA's ultimate decision making authority to approve or deny loans. However, the grantee may ask for clarification that may be helpful in working with future applicants. Grant funds may not be used to pay any expense in connection with an appeal that the applicant may file or pursue.

§ 1944.424 Dwelling construction and standards.

All construction will be performed in accordance with subpart A of part 1924 of this chapter. The planned work must meet the building requirements of subpart A of part 1944 of this chapter and meet the Development Standards as defined in subpart A of part 1924 of this chapter and in any local codes. Sites and site developments must conform to the requirements of subpart C of part 1924 of this chapter.

§ 1944.425 Handling and accounting for borrower loan funds.

Grantees will be required to administer borrower loan funds during the construction phases. The extent of their involvement will depend on the experience of the grantee and the

amount of authority delegated to them by the District Director in accordance with § 1924.6(c) of subpart A of part 1924 of this chapter. Training should include FmHA's non-discrimination policies in receiving applications.

§ 1944.426 Grant closeout.

(a) *Grant purposes completed.* Promptly after the date of completion, grant closeout actions will be taken to allow the orderly discontinuance of grantee activity.

(1) The grantee will immediately refund to FmHA any balance of grant funds advanced that are not committed for the payment of authorized expenses as prescribed in § 1951.58(j) of FmHA Instruction 1951–B (available in any FmHA office).

(2) The grantee will furnish Form SF–269A, "Financial Status Report (short form)" to FmHA within 90 days after the date of completion of the grant. All other financial, performance, and other reports required as a condition of the grant also will be completed.

(3) After the grant closeout, FmHA retains the right to recover any disallowed costs which are discovered as a result of the final audit. Subpart M of part 1951 of this chapter will be used by FmHA to recover any unauthorized expenditures.

(4) The grantee will provide FmHA an audit conforming to those requirements established in this part, including audits of self-help borrower accounts.

(5) Upon request from the recipient, any allowable reimbursable cost not covered by previous payments shall be promptly paid by FmHA.

(b) *Grant purposes not completed*—(1) *Notification of termination.* The State Director will promptly notify the grantee and the National Office in writing of the termination action including the specific reasons for the decision and the effective date of the termination. The notification to the grantee will specify that if the grantee believes the reason for the proposed termination can be resolved, the grantee should, within 15 calendar days of the date of this notification, contact the State Director in writing requesting a meeting for further consideration. The meeting will be an informal proceeding at which the grantee will be given the opportunity to provide whatever additional information it believes should be considered in reaching a decision concerning the case. The grantee may have an attorney or any other person present at the meeting if desired. Within 7 calendar days of the meeting, the State Director will determine what action to take.

(i) If the State Director determines that termination is not necessary, the grantee will be informed by letter along with the District Director.

(ii) If the State Director determines that termination of the grant is appropriate, he/she will promptly inform the grantee by the use of Exhibit B–3 of subpart B of part 1900 of this chapter.

(2) *National Office review.* (i) Upon receipt of a request from a grantee that the decision of the State Director be reconsidered, the National Office will make a preliminary decision concerning the continued funding of the grantee during the appeal period. Written notification of the decision will be given to the State Director and grantee.

(ii) The National Office will then obtain a comprehensive report on the matter from the State Office. This information will be considered together with any additional information that may be provided by the grantee.

(c) *Grant suspension.* When the grantee has failed to comply with the terms of the agreement, the District Director will promptly report the facts to the State Director. The State Director will consider termination or suspension of the grant usually only after a Grantee has been classified as "high risk" in accordance with § 1944.417(b)(2) of this subpart. When the State Director determines that the grantee has a reasonable potential to correct deficiencies the grant may be suspended. The State Director will request written authorization from the National Office to suspend a grantee. The suspension will adhere to 7 CFR parts 3015 and 3016. The grantee will be notified of the grant suspension in writing by the State Director. The State Director will also promptly inform the grantee of its rights to appeal the decision by use of Exhibit B–3 of subpart B of part 1900 of this chapter.

(d) *Grant termination.* The State Director may terminate the grant agreement whenever FmHA determines that the grantee has failed to comply with terms of the Agreement. The reasons for termination may include, but are not limited to, such problems as listed in paragraph (e)(3)(i) of Exhibit A of this subpart. The State Director may also withhold further disbursement of grant funds and prohibit the grantee from incurring additional obligations of grant funds with written approval of the National Office. FmHA will allow all necessary and proper costs which grantee could not reasonably avoid.

(i) *Termination for cause.* The grant agreement may be terminated in whole, or in part, at any time before date of completion, whenever FmHA determines that the grantee has failed to comply with terms of the Agreement. The State Director will notify the grantee in writing giving the reasons for the action and inform the grantee of its rights of appeal by use of Exhibit B–3 of subpart B of part 1900 of this chapter.

(ii) *Termination for convenience.* FmHA or the grantee may terminate the grant in whole, or in part, when both parties agree that the continuation of the grant would not produce beneficial results. The two parties will agree in writing to the termination conditions including the effective date. No notice of rights of appeal will be issued by FmHA.

§ 1944.427 Grantee self-evaluation.

Annually or more often, the board of directors will evaluate their own self-help program. Exhibit E of this subpart is provided for that purpose. It is also recommended that they review their personnel policy, any audits that may have been conducted and other reports to determine if they need to make adjustments in order to prevent fraud and abuse, and meet the goals in the current grant agreement.

§§ 1944.429–1944.449 [Reserved]

§ 1944.450 OMB control number.

The reporting and recordkeeping requirements contained in this regulation have ben approved by the Office of Management and Budget and have been assigned OMB control number 0575–0043. Public reporting burden for this collection of information is estimated to vary from 10 minutes to 18 hours per response, with an average of 1.17 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404–W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB# 0575–0043), Washington, DC 20503.

Exhibits to Subpart I

Exhibit A—Self-Help Technical Assistance Grant Agreement

THIS GRANT AGREEMENT dated _____, 19____, is between _____

_____

a nonprofit corporation ("Grantee"), organized and operating under

_____

(authorizing State statute)

and the United States of America acting through the Farmers Home Administration, Department of Agriculture ("FmHA").

In consideration of financial assistance in the amount of $_____ (called "Grant Funds") to be made available by FmHA to Grantee under section 523(b)(1)(A) of the Housing Act of 1949 to be used in (specify area to be served) _____ for the purpose of providing a program of technical and supervisory assistance which will aid low-income families in carrying out mutual self-help housing efforts. Grantee will provide such a program in accordance with the terms of this Agreement and FmHA regulations.

Definitions:

Date of Completion means the date when all work under a grant is completed or the date in the TA Grant Agreement, or any supplement or amendment thereto, on which Federal assistance ends.

Disallowed costs are those charges to a grant which the FmHA determines cannot be authorized.

Grant Closeout is the process by which the grant operation is concluded at the expiration of the grant period or following a decision to terminate the grant.

Termination of a grant means the cancellation of Federal assistance, in whole of in part, under a grant at any time prior to the date of completion.

Terms of agreement:

(a) This Agreement shall terminate _____ years from this date unless extended or sooner terminated under paragraphs (e) and (f) of this Agreement.

(b) Grantee shall carry out the self-help housing activity described in the application docket which is attached to and made a part of this Agreement. Grantee will be bound by the conditions set forth in the docket, 7 CFR part 1944, subpart I, and the further conditions set forth in this Agreement. If any of the conditions in the docket are inconsistent with those in the Agreement or subpart I of part 1944, the latter will govern. A waiver of any condition must be in writing and must be signed by an authorized representative of FmHA.

(c) Grantee shall use grant funds only for the purposes and activities specified in FmHA regulations and in the application docket approved by FmHA including the approved budget. Any uses not provided for in the approved budget must be approved in writing by FmHA in advance.

(d) If Grantee is a private nonprofit corporation, expenses charged for travel or per diem will not exceed the rates paid FmHA employees for similar expenses. If Grantee is a public body, the rates will be those that are allowable under the customary practice in the government of which Grantee is a part; if none are customary, the FmHA rates will be the maximum allowed.

(e) Grant closeout and termination procedures will be as follows:

(1) Promptly after the date of completion or a decision to terminate a grant, grant closeout actions are to be taken to allow the orderly discontinuation of Grantee activity.

(i) Grantee shall immediately refund to FmHA any uncommitted balance of grant funds.

(ii) Grantee will furnish to FmHA within 90 days after the date of completion of the grant a "Financial Status Report", Form SF–269A. All financial, performance, and other reports required as a condition of the grant will also be completed.

(iii) Grantee shall account for any property acquired with technical assistance (TA) grant funds, or otherwise received from FmHA.

(iv) After the grant closeout, FmHA retains the right to recover any disallowed costs which may be discovered as a result of any audit.

(2) When there is reasonable evidence that Grantee has failed to comply with the terms of this Agreement, the State Director may determine Grantee as "high risk". A "high risk" Grantee will be supervised to the extent necessary to protect the Government's interest and to help Grantee overcome the deficiencies.

(3) Grant termination will be based on the following:

(i) *Termination for cause.* This grant may be terminated in whole, or in part, 90 days after a Grantee has been classified as "high risk" if the State Director determines that Grantee has failed to correct previous deficiencies and is unlikely to correct such items if additional time is allowed. The reasons for termination may include, but are not limited to, such problems as:

(A) Actual TA costs significantly exceeding the amount stipulated in the proposal.

(B) The number of homes being built is significantly less than proposed construction or is not on schedule.

(C) The cost of housing not being appropriate for the self-help program.

(D) Failure of Grantee to only use grant funds for authorized purposes.

(E) Failure of Grantee to submit adequate and timely reports of its operation.

(F) Failure of Grantee to require families to work together in groups by the mutual self-help method in the case of new construction.

(G) Serious or repetitive violation of any of the provisions of any laws administered by FmHA or any regulation issued under those laws.

(H) Violation of any nondiscrimination or equal opportunity requirement administered by FmHA in connection with any FmHA programs.

(I) Failure to establish an accounting system acceptable to FmHA.

(J) Failure to serve very low-income families.

(K) Failure to recruit families from substandard housing.

(ii) *Termination for convenience.* FmHA or Grantee may terminate the grant in whole, or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in case of partial termination, the portion to be terminated.

(4) To terminate a grant for cause, FmHA shall promptly notify Grantee in writing of the determination and the reasons for and the effective date of the whole or partial termination. Grantee will be advised of its appeal rights under 7 CFR part 1900, subpart B.

(f) An extension of this grant agreement may be approved by FmHA provided, in its opinion, the extension is justified and there is a likelihood that the Grantee can accomplish the goals set out and approved in the application docket during the period of the extension.

(g) Grant funds may not be used to pay obligations incurred before the date of this Agreement. Grantee will not obligate grant funds after the grant termination or completion date.

(h) As requested and in the manner specified by FmHA, the Grantee must make quarterly reports, Exhibit C of this subpart (on 1/15, 4/15, 7/15 and 10/15 of each year), and a financial status report at the end of the grant period, and permit on-site inspections of program progress by FmHA representatives. FmHA may require progress reports more frequently if it deems necessary. Grantee must also comply with the audit requirements found in § 1944.422 of subpart I of 7 CFR part 1944, if applicable. Grantee will maintain records and accounts, including property, personnel and financial records, to assure a proper accounting of all grant funds. These records will be made available to FmHA for auditing purposes and will be retained by Grantee for three years after the termination or completion of this grant.

(i) Acquisition and disposal of personal equipment and supplies should comply with subpart R of 7 CFR part 3015 and subpart C of 7 CFR part 3016.

(j) Results of the program assisted by grant funds may be published by Grantee without prior review by FmHA, provided that such publications acknowledge the support provided by funds pursuant to the provisions of Title V of the Housing Act of 1949, 42 U.S.C. 1471, *et seq.*, and that five copies of each such publication are furnished to the local representative of FmHA.

(k) Grantee certifies that no person or organization has been employed or retained to solicit or secure this grant for a commission, percentage, brokerage, or contingent fee.

(l) Grantee shall comply with all civil rights laws and the FmHA regulations implementing these laws.

(m) In all hiring or employment made possible by or resulting from this grant, Grantee: (1) Will not discriminate against any employee or applicant for employment because of race, religion, color, sex, marital status, national origin, age, or mental or physical handicap, and (2) will take affirmative action to insure that applicants are employed, and that employees are treated during employment without regard to their race, religion, color, sex, marital status, national origin, or mental or physical handicap. This requirement shall apply to, but not be limited to, the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. In the event Grantee signs a contract which would be covered by any Executive Order, law, or regulation prohibiting discrimination, Grantee shall

include in the contract the "Equal Employment Clause" as specified by FmHA.

(n) It is understood and agreed by Grantee that any assistance granted under this Agreement will be administered subject to the limitations of Title V of the Housing Act of 1949 as amended, 42 U.S.C. 1471 *et seq.*, and related regulations, and that rights granted to FmHA in this Agreement or elsewhere may be exercised by it in its sole discretion to carry out the purposes of the assistance, and protect FmHA's financial interest.

(o) Grantee will maintain a code or standards of conduct which will govern the performance of its officers, employees, or agents. Grantee's officers, employees, or agents will neither solicit nor accept gratuities, favors, or anything of monetary value from suppliers, contractors, or others doing business with the grantee. To the extent permissible by State or local law, rules, or regulations such standards will provide for penalties, sanctions, or other disciplinary actions to be taken for violations of such standards.

(p) Grantee shall not hire or permit to be hired any person in a staff position or as a participant if that person or a member of that person's immediate household is employed in an administrative capacity by the organization, unless waived by the State Director. (For the purpose of this section, the term "household" means all persons sharing the same dwelling, whether related or not).

(q) Grantee's board members or employees shall not directly or indirectly participate, for financial gain, in any transactions involving the organization or the participating families. This includes activities such as selling real estate, building material, supplies, and services.

(r) Grantee will retain all financial records, supporting documents, statistical records, and other records pertinent to this agreement for 3 years, and affirms that it is fully aware of the provisions of the Administrative Remedies for False Claims and Statements Act, 31 U.S.C. 3801, *et seq.*

Exhibit B—Evaluation Report of Self-Help Technical Assistance (TA) Grants

Evaluation for Quarter Ending: (1) _____, 19____

1. a. Name of Grantee: (2) _____
   b. Address: (3) _____
   c. Area the grant serves: (4) _____
2. Date of Agreement: (5) _____ Time Extended (6) _____
3. a. Equivalent unit increase during quarter:
(7) _____
First Month
(8) _____
Second Month
(9) _____
Third Month
   b. Cumulative total number of Equivalent Units since beginning of grant:
(10) _____
Total to Date
4. a. Method of Construction:
   Stick built _____%, Panelized _____%, Combined _____%
   b. Number of bedrooms per house built this grant period:
2BR, _____
3BR, _____
   c. Household size this Quarter:
1 person _____,
2 persons _____,
3 persons _____,
4 persons _____,
5 persons _____
   d. Number of houses under construction this grant period, but started during previous grant period: _____
5. a. Number of houses proposed under this grant:
(11) _____
   b. Number of houses completed under this grant:
(12) _____
   c. Number of houses currently under construction:
(13) _____
   d. Number of families in pre construction:
(14) _____
   e. Number of Construction Supervisors:
(15) _____
   f. Number of TA employees:
(16) _____
6. a. Average time needed to construct a single house:
(17) _____
   b. Number of months between submission of self-help borrower's docket and approval/rejection:
(18) _____
   c. Number and percentage of loan docket rejections during reporting period: _____
(19) _____
7. a. Did any of the following adversely affect the Grantee's ability to accomplish program objectives?

	YES	NO
TA Staff Turnover	_____	_____
FmHA Staff Turnover	_____	_____
Bad Weather	_____	_____
Loan Processing Delays	_____	_____
Site Acquisition and Development	_____	_____
Unavailable Loan/Grant Funds	_____	_____
Lack of Participants	_____	_____
Communication between FmHA/Grantee	_____	_____

8. Attach information concerning number of families contacted, number who have indicated a willingness to be a participating family, number of mutual self-help groups organized, progress on any construction started, and any problems relating to the operation of this grant.

I certify that the statements made above are true to the best of my knowledge and belief.

Exhibit B-1—Instructions for Preparation of Evaluation Report of Self-Help Technical Assistance Grants

Exhibit B will be used by all Technical Assistance (TA) Grantees obtaining self-help TA grants. This attachment provides the grantee and FmHA a uniform method of reporting the performance progress of self-help projects. The TA Grantee will prepare an original and 4 copies of the attachment. The TA Grantee will sign the original and 3 copies and forward it to the local FmHA County Office. The TA Grantee will keep the unsigned copy for its records.

The evaluation report will be completed in accordance with the following:

1. Enter the date the quarter ends either March 31, June 30, September 30, or December 31 and the year.
2. Enter the full name of the TA Grantee organization.
3. Enter the complete mailing address of the TA Grantee organization.
4. Enter the area served by the grant.
5. Enter the date of the initial self-help TA grant agreement.
6. Enter the time of any extension self-help TA grant agreement(s).
7. Insert the number of equivalent units (EU) completed the first/second/third month of the quarter using steps 1, 2, and 3 of Exhibit B-2.
8. Insert the number of EU's completed the second month of the quarter by using steps 1, 2, and 3 of Exhibit B-2.
9. Insert the number of EU's completed the third month of the quarter by using steps 1, 2, and 3 of Exhibit B-2.

10. Add items (7), (8), and (9) to the total from the previous quarterly report to obtain the cumulative total number of EU's. This total is the cumulative total number of EU's for the project.

11. Enter the number of houses planned in the TA Grantee proposal(s).

12. Enter the number of houses completed and occupied since the beginning of the grant.

13. Enter the number of houses that are under construction at the end of this quarter.

14. Enter the number of families in the pre-construction phase.

15. Enter the total number of construction supervisor(s) paid with TA grant funds.

16. Enter the number of employees paid with TA grant funds including those listed in item 15.

17. Insert the average elapsed time needed per house from excavation to final inspection by FmHA to complete construction of a house. If no self-help homes have been completed by this grantee, use other projects or your best estimate as a guide.

18. Enter the number of months it takes on average to approve or reject a borrower's docket once it's submitted.

19. Enter number and percent of dockets submitted and rejected this quarter.

20. Enter date of Exhibit submittal.

21. Insert title of the Grantee or authorized representative.

22. Signature of Grantee or authorized representative.

23. County Supervisor must answer questions concerning market value and loan amount and also should insert comments concerning progress of construction, success of the project and any problems that the organization may have.

24. Insert date of County Supervisor's review.

25. Signature of County Supervisor.

26. District Director representative should insert his/her comments concerning items listed in § 1944.417(b)(1) of 1944-I.

27. Insert date of District Director review.

28. Signature of District Director or representative.

29. Insert State Office comments.

30. Insert date of State Office review.

31. Signature of State Office representative.

Exhibit B-2—Breakdown of Construction Development for Determining Percentage Construction Completed

	In percent—		
	With slab on grade	With crawl space	With basement
1. Excavation	3	5	6
The removal of earth to allow the construction of a foundation or basement.			
2. Footing, Foundations, columns	8	8	11
Footing: Construction of the spreading course or courses at the base or bottom of a foundation wall, pier, or column. Foundation: Construction of the supporting portion of a structure below the first floor construction, or below grade, including footing.			
3. Floor slab or framing	5	4	4
The floor slab consist of concrete, usually reinforced, poured over gravel and a vapor barrier with perimeter insulation to prevent heat loss.			
4. Subflooring	0	1	1
The installation of materials used for flooring that is laid directly on the joist and serving the purpose of a floor during construction prior installation of the finish floor.			
5. Wall framing sheathing	7	7	6
The construction process of putting together and erecting the skeleton parts of a building's walls (the rough lumber work) and, for the exterior walls, covering with sheathing (plywood, waferboard, oriented strand board or lumber) and insulating board to close up the side walls prior to the installation of finish materials on the surface.			
6. Roof and ceiling framing, sheathing	6	6	5
The process, or method, of putting the parts of a roof, such as truss, rafters, ridge and plates in position. Ceiling joist support the overhead interior lining of a room. Roof sheathing is any sheet material, such as plywood or particleboard, connected to the roof rafters or truss to act as a base for sheathing felt, shingles or other roof covers.			
7. Roofing	5	5	4
The installation of a material that acts as a roof covering, making it impervious to the weather, such as shingles over sheathing felt, tile, or slate.			
8. Siding, exterior trim, porches	7	7	6
The installation of lumber, panel products or other materials intended for use as the exterior wall covering including all trim.			
9. Windows and exterior doors	9	9	8
The installation of all exterior windows and doors. This includes securely fastening windows and doors plumb and level, square and true and adjusting sash, screens and hardware for smooth and proper operation.			
10. Plumbing—roughed in	3	2	3
Subject to local codes and regulations the installation of all parts of the plumbing system which must be completed prior to the installation of plumbing fixtures or appliances. This includes drain, waste, and vent piping, water supply, and the necessary built-in fixture supports.			
11. Sewage disposal	1	1	1
Subject to local codes and regulations the construction and installation of a wastewater disposal system consisting of a house sewer, a pretreatment unit (*e.g.*, septic tank, individual package treatment plant), an acceptable absorption system (subsurface absorption field, seepage pit, or subsurface absorption bed). The system shall be designed to receive all sanitary sewage (bathroom, kitchen and laundry) from the dwelling, but not footing or roof drainage. It shall be designed so that gases generated anywhere in the system can easily flow back to the building sewer stack.			
12. Heating—roughed in	1	1	1
Subject to local codes and regulations the installation of ducts and/or piping and the necessary supports to minimize the cutting of walls and joist. This rough in is done before finish wall and floor installed.			
13. Electrical—roughed in	2	2	2

	In percent—		
	With slab on grade	With crawl space	With basement
Subject to local codes and regulations the installation of conduit or cable and the location of switch, light, and outlet boxes with wires ready to connect. This roughing-in work is done before the dry wall finish is applied, and before the insulation is placed in the walls and ceiling.			
14. Insulation	2	2	2
The installation of any material used in walls, floors, and ceilings to prevent heat transmission as required by FmHA Instruction 1924–A, Exhibit D of 7 CFR of part 1924, subpart A.			
15. Dry wall	8	8	7
Dry walling is covering the interior walls using sheets of gypsum board and taped joints.			
16. Basement or porch floor, steps	1	1	6
The construction of basement or porch floors and steps whether wood or concrete.			
17. Heating—finished	3	3	3
Subject to local codes and regulations the installation of registers, grilles and thermostats.			
18. Flooring covering	6	6	5
The installation of the "finish flooring" (the material used as the final wearing surface that is applied to a floor). Floor covering include numerous flooring materials such as wood materials, vinyl, linoleum, cork, plastic, carpet and other materials in tile or sheet form.			
19. Interior carpentry, trim, doors	6	6	5
Installing visible interior finish work (molding and/or trim), including covering joints around window and door openings. The installation of an interior door including frames and trim.			
20. Cabinets and counter tops	1	1	1
Securing cabinets and counter tops (usually requiring only fastening to the wall or floor) that are plumb and level, square and true.			
21. Interior painting	4	4	3
Cleaning and preparation of all interior surfaces and applying paint in strict accordance with the paint manufacturer's instructions.			
22. Exterior painting	1	1	1
Cleaning and preparation of all exterior surfaces and applying paint in strict accordance with the paint manufacturer's instructions.			
23. Plumbing—complete fixtures	4	4	3
Subject to local codes and regulations the installation of a receptor or device which requires both a water supply connection and a discharge to the drainage system, such as water closets, lavatories, bathtubs or sinks. Also, the installation of an energized household appliance with plumbing connections, such as a clothes washer, water heater, dishwasher or garbage grinder.			
24. Electrical—complete fixtures	1	1	1
Subject to local codes and regulations the installation of the fixtures, the switches, and switch plates. This is usually done after the dry wall finish is applied.			
25. Finish hardware	1	1	1
The installation of all the visible, functional hardware in a house that has a finish appearance, including such features as hinges, locks, catches, pulls, knobs, and clothes hooks.			
26. Gutters and downspouts	1	1	1
The installation of a shallow channel of wood, metal, or PVC (gutters) positioned just below and following along the eaves of the house for the purpose of collecting and diverting water from a roof to a vertical pipe (downspouts) used to carry rainwater from the roof to the ground by way of a splash block or into a drainage system.			
27. Grading, paving, landscaping	3	3	3
Landscaping includes final grading, planting of shrubs and trees, and seeding or sodding of lawn areas. Final grading includes the best available routing of runoff water to assure that house and adjacent homes will not be endangered by the path of water runoff. The minimum slope should be 6" in 10' or 5% from the foundation of the home. Paving includes both driveways and walks.			
Total	100	100	100

Exhibit B–3—Pre-Construction and Construction Phase Breakdown

I. *General.* This Exhibit will be used by Farmers Home Administration (FmHA) and the Grantee in determining Grantee performance as required in § 1944.417(b) of this subpart.

II. *Determining technical assistance (TA) cost per unit.*

A. Equivalent units are used to measure progress at any time during the period of the grant. It is necessary because self-help grantees have several groups of families in various stages of progress during the period of the grant. The following formula has been developed to provide a more accurate method of determining progress.

FORMULA

Phase breakdown	In percent—	
	Value of each phase	Cumulative
Pre-construction:		
Phase I	10	10
Phase II	10	10
Construction:		
Phase III	80	21–100

E. Using the Description of Phase Breakdown as a guide, the project staff selects the total percentage pertinent to the stage the self-help group is in and multiplies that percentage by the number of families (units) in the group. The result is the equivalent number of units completed. No credit may be given for Phase I, if the application is rejected. When this computation has been completed for each group that falls within Phases I–III, the total number of equivalent units is divided into the total grant funds expended to that date. The result is the TA cost per unit at that stage of the program's progress.

C. The definition of pre-construction and construction phases described are follows:

Pre-Construction

Phase I: Hold community meetings; conduct interviews; obtain house plans; prepare cost estimates; begin search for land; submit family applications to the lender; lender runs credit check; applications. Lender either approves or rejects.

Phase II: Organize an association of section 502 Rural Housing eligible families; association conducts weekly meetings at which required lender forms are discussed and completed; house plans and land sites are selected; outside speakers explain and discuss taxes, insurance, how to keep a checking account, how interest is computed, home maintenance, decorating, and landscaping; etc.; completed loan dockets for each family are submitted to the lender. Family loan dockets are reviewed and recommendations made as to the loan amounts requested; the lender reviews family loan dockets; preliminary title search of each proposed building site is begun; requests loan check from Finance Office; when check arrives, final title search is made, loan closed, checking accounts opened, and construction begun.

Construction: The grantee will utilize Exhibit B-2 which outlines 27 construction tasks to determine the percentage of completed construction activities.

D. The computation of equivalent units and TA costs will be computed as follows:

Exhibit C will be used for recording the following information and construction in this example which starts January 1.

Step 1

Both the grantee and FmHA review the FmHA loan application records to determine the percentage of completion for each family in the pre-construction phase of the program. These are Phases I–III. Total these percentages to find the number of "equivalent units" (EUs) completed at that date during pre-construction. For example, if there are eight families in Group #2 and all have completed the 20 percent phase of pre-construction, then there would be 1.6 EUs in the pre-construction phase of the program as of that date. Each phase must be completed before it is considered in the calculation.

Step 2

Refer to the records of construction progress for families in the construction Phase III. As of that date, the director totals the percentage of completion figures for each family as follows:

Askew	0.45
Whited	0.40
Martinez	0.40
Gonzalez	0.38
Sherry	0.34
Duran	0.33
Johnson	0.13
Harvey	0.31
EUs	2.92

Total production in the construction phase is therefore 2.92 EUs as of that date.

Step 3

Add the pre-construction and construction subtotals together:

Pre-construction	1.60
Construction	2.92
Total EUs	4.52

This provides the total EUs of production during the first three months of operation. Steps 1, 2, and 3 will be used to complete items 7, 8 and 9 of Exhibit B of this subpart.

III. *Preparation:*

Compile Exhibit B of this subpart in an original and four copies. The exhibit will be signed by the TA Grantee. Submit the original and three copies of the exhibit quarterly to FmHA County Office on or before January 15, April 15, July 15, and October 15, of each year for the quarters ending March 31, June 30, September 30, and December 31 of each year. The District Director will keep the original and forward two copies to the State Office. The State Office will forward one copy to the National Office. The State Office will prepare information concerning TA grants closed within 30 days of the end of a quarter on the next quarterly report.

Exhibit C—Amendment to Self-Help Technical Assistance Grant Agreement

This Agreement dated, _____ 19____ between _____

a nonprofit corporation ("Grantee"), organized and operating under

_____

(authorizing State Statute)

and the United States of America acting through the Farmers Home Administration, Department of Agriculture ("FmHA"), amends the "Self-Help Technical Assistance Grant Agreement" between the parties dated _____ 19____, ("Agreement").

The Agreement is amended by providing additional financial assistance in the amount of _____ to be made available by FmHA to Grantee pursuant to section 523 of Title V of the Housing Act of 1949 for the purpose of assisting in providing a program of technical and supervisory assistance which will aid low-income families in carrying out mutual self-help housing efforts; or

The Agreement is amended by changing the completion date specified in convenant 1 from _____ to _____ and by making the following attachments to this amendment: (List and identify proposal and any other documents pertinent to the grant.)

Agreed to this ____ day of ____ 19____.

_____

(Name of Grantee)

Exhibit D—Self-Help Technical Assistance Grant Predevelopment Agreement

This grant predevelopment agreement dated, ____ 19____, is between

_____

a nonprofit corporation ["Grantee"], organized and operating under

_____

[authorizing State statute]

and the United States of America acting through the Farmers Home Administration, Department of Agriculture ("FmHA").

In consideration of financial assistance in the amount of $____ ("Grant Funds") to be made available by FmHA to Grantee under section 523 (b)(1)(A) of the Housing Act of 1949 to be used in [specify area to be served) _____ for the purpose of developing a program of technical and supervisory assistance which will aid low-income families in carrying out mutual self-help housing efforts, Grantee will provide such a program in accordance with the terms of this Agreement and FmHA regulations.

Grant funds will be used for authorized purposes as contained in § 1944.410(d) of 7 CFR part 1944, subpart I, as necessary, to develop a complete program for a self-help TA grant. This will include recruitment, screening, loan packaging and related activities for prospective self-help participants.

Agreed to this ____ day of ____ 19____.

Exhibit E—Guidance for Recipients of Self-Help Technical Assistance Grants (Section 523 of Housing Act of 1949)

7 CFR part 1944, subpart I provides the specific details of this grant program. The following is a list of some functions of the grant recipients taken from this subpart. With the list are questions we request to be answered by the recipients to reduce the potential for fraud, waste, unauthorized use

or mismanagement of these grant funds. We suggest the Board of Directors answer these questions every six months by conducting their own review. Paid staff should not be permitted to complete this evaluation.

A. Family Labor Contribution

1. Does your organization maintain a list of each family and a running total of hours worked (when and on what activity)?..... Yes No
2. Are there records of discussions with participating families counselling them when the family contribution is falling behind?..... Yes No
3. Are there obstacles which prevent the family from performing the required tasks?..... Yes No

B. Use of Grant Funds

1. Were grant funds used to pay salaries or other expenses of personnel not directly associated with this grant?..... Yes No
2. Were grant funds used to pay for construction work for participating families?..... Yes No
3. Were all purchases or rentals (item and cost) of office equipment authorized?..... Yes No
4. Are all office expenses authorized by 7 CFR part 1944, subpart I?..... Yes No
5. Was a record of long distance telephone calls maintained and was that log and telephone checked?..... Yes No
6. Was all travel and mileage incurred for official business and properly authorized in advance?..... Yes No
7. Were mileage and per diem rates within authorized levels?..... Yes No
8. Were participating families charged for use of tools?..... Yes No
9. Were grant funds expended to train grant personnel?..... Yes No
10. Was training appropriate for the individual trainee?..... Yes No
11. Were any technical or consultant services obtained for participating families?..... Yes No
12. Were the provided technical or consultant services appropriate in type and cost?..... Yes No

C. Financial Responsibilities

1. Does each invoice paid by the grant recipient match the purchase order?..... Yes No
2. Does each invoice paid by the borrower and FmHA match the purchase order?..... Yes No
3. Were purchases made from the appropriate vendors?..... Yes No
4. Are the invoices and itemized statements totalled for materials purchased for individual families?..... Yes No
5. Is there a record of deposits and withdrawals to account for all loan funds?..... Yes No
6. Are checks from grant funds signed by the Board Treasurer and Executive Director?..... Yes No
7. Are grant funds deposited in an interest bearing account?..... Yes No
8. Are checks from loan funds prepared by the grant recipient for the borrower's and lender's signature?..... Yes No
9. Are checks from loan funds accompanied by accurate invoices?..... Yes No
10. Are any borrower loan funds including interests, deposited in grantee accounts?..... Yes No
11. Are checks from loan funds submitted to FmHA more often than once every 30 days?..... Yes No
12. Is the reconciliation of bank statements for both grant and loan funds completed on a monthly basis?..... Yes No
13. If the person who issues the checks also reconciles them, does the Executive Director review this activity?..... Yes No
14. Are materials purchased in bulk approved by the Executive Director?..... Yes No
15. Was the amount of materials determined by both the Executive Director and construction staff?..... Yes No
16. Were any participating families consulted about the purchase of materials?..... Yes No
17. Were savings accomplished by the bulk purchase method?.. Yes No
18. Did the Executive Director review the purchase order and the ultimate use of the materials?..... Yes No
19. Are materials covered by insurance when stored by grantee?..... Yes No

D. Reporting

1. Are "Requests for Advance or Reimbursement" made once monthly to the FmHA District Office?..... Yes No
2. Has the grant recipient engaged a certified public Accountant (CPA) or CPA firm to review their operations on a regular basis: (Annually is preferable but every two years and at the end or the grant period are requirements)?..... Yes No
3. Are the quarterly evaluation reports submitted on time to the County Supervisor?..... Yes No

What, if any, problems exist that need to be corrected for effective management of the grant project?

Date

President, Board of Directors

(Period covered by report _____)

Answer Key

The following answers should help your organization in assessing its vulnerability to fraud, waste, and abuse. You should take actions to correct practices that now generate an answer different from the key.

Exhibit F—Site Option Loan to Technical Assistance Grantees

I. *Objectives.* The objective of a Site Option (SO) loan under Section 523(b)(1)(B) of Title V of the Housing Act of 1949 is to enable technical assistance (TA) grantees to establish revolving fund accounts to obtain options on land needed to make sites available to families that will build their own homes by the self-help method. An SO loan will be considered only when sites cannot be made available by other means including a regular Rural Housing Site (RHS) loan.

II. *Eligibility requirements.* To be eligible for an SO loan, the applicant must be a TA grantee that is currently operating in a satisfactory manner under a TA grant agreement. If the SO loan applicant has applied for TA funds but is not already a TA grantee and it appears that the TA grant will be made, the SO loan may be approved but not closed until the TA grant is closed.

III. *Loan purposes.* Loans may be made only as necessary to enable eligible applicants to establish revolving accounts with which to obtain options on land that will be needed as building sites by self-help families participating in the TA self-help housing program. Loans will not be made to pay the full purchase price of land but only for the minimum amounts necessary to obtain an option from the seller. The option should be for as long as necessary but in no case should the option be for less than 90 days.

IV. *Limitations.*

(A) If the amount of an SO loan will exceed $10,000, the prior consent of the National Office shall be obtained before approval.

(B) The amount of the SO loan should not exceed 15 percent of the purchase price of the land expected to be under option at any one time, unless a higher percent is authorized by the State Director when other land is not available or the particular area requires more down payment than elsewhere or similar circumstances exist.

(C) Form FmHA 440–36, "Option to Purchase Real Property," will be used without modification in all cases for obtaining options under this subpart.

(D) The limitations of § 1822.269(b) (1) and (2) of subpart F of part 1822 of this chapter (FmHA Instruction 444.8, paragraphs VI B (1) and (2)) concerning land purchase will apply to options purchased under this subpart.

V. *Rates and terms.*

(A) *Interest.* Loans will be made at an interest rate of 5 percent.

(B) *Repayment period.* Each SO loan will be repaid in one installment which will include the entire principal balance and accrued interest. The maximum repayment period for each SO loan will be the applicant's remaining TA grant funding period.

(1) A shorter repayment period will be established if SO funds will not be needed for the entire TA grant funding period.

(2) If a regular RHS loan is to be processed, the SO loan should be scheduled for repayment when RHS loan funds will be available to purchase the land and repay the amount of SO funds advanced on the option, unless SO loan funds will still be needed to purchase other options. Under no circumstances, however, will the repayment period exceed the applicant's remaining TA grant funding period.

VI. *Processing application.*

(A) *Form of application:* The application for assistance will be in the form of a letter to the FmHA County Supervisor having jurisdiction over the area of the proposed site to be optioned. The letter will be signed by the applicant or its authorized representative and contain, as a minimum, the following information:

(1) A description of the proposed option that shows a legal description of the land, option price, purchase price, and terms of the option. If more than one site is to be purchased, a schedule of the proposed options should be included.

(2) Information to verify that a regular RHS loan cannot be processed in time to secure the option.

(3) Proposed method repayment of the SO loan.

(4) Resolution from the applicant's governing body authorizing the application for an SO loan from FmHA.

(B) *Responsibility of the County Supervisor.* Upon receipt of an SO loan application, the County Supervisor will:

(1) Determine whether the applicant is eligible. If the applicant is not eligible, or the loan cannot be made for other reasons, the application may be rejected by the County Supervisor with the concurrence of the District Director. The reasons for the rejection should be clearly stated and provided, in writing to the applicant. The applicant will have the right to have the decision reviewed following the procedure established in subpart B of part 1900 of this chapter.

(2) Review and verify the accuracy of the information provided.

(3) Make an inspection and a memorandum appraisal of each proposed site "as is." The appraisal will include a narrative statement as to whether the site has been recently sold, verify that the seller is the owner of the property, and indicate whether the purchase price is acceptable based on the selling price of similar properties in the area.

(4) Indicate whether or not it appears that, considering the location and cost of development, adequate building sites can be provided at reasonable costs.

(5) If the option is for a tract of land on which 5 or more sites are proposed, the County Supervisor will forward to the District Director with recommendations as defined in § 1924.119 of subpart C of part 1924 of this chapter.

(6) If approval is recommended, prepare and have the applicant execute Form FmHA 1940–1, "Request for Obligation of Funds," for the amount needed. Copies of the form will be distributed as provided in the Forms Manual Insert (FMI).

(7) Forward the SO loan application and the applicant's TA application or TA docket to the State Director. The submission will include the appraisal report and the County Supervisor's comments and recommendations.

VII. *Loan approval authority and State Office actions.*

The State Director is authorized to approve SO loans developed in accordance with this Exhibit. The approval or disapproval of the loan will be handled in the same manner as provided in § 1822.272 of subpart F of part 1822 of this chapter (FmHA Instruction 444.8, paragraph XII). SO loans will be established in Automated Multiple Housing Accounting System (AMAS) using Form FmHA 1944–51, "Multiple Family Housing Obligation Fund Analysis". The Issue Loan/Grant checks transaction will be used to request a check for SO loans.

VIII. *Loan closing.*

(A) *General.* Loan closing instructions will be provided by the Office of the General Counsel (OGC) to ensure that the Promissory Note is properly completed and executed. The County Supervisor may then close the loan.

(B) *Security for the loan.* The loan will be secured by a Promissory Note properly executed by the grantee using Form FmHA 1940–16, "Promissory Note." A lien on the optioned real estate will not be taken.

(1) The "kind of loan" block on the note will read "SO loan."

(2) The note will be modified to show that the only installment on the loan will be the final installment.

(C) *Loan is closed.* The loan will be considered closed when the note is executed and the loan check delivered to the grantee.

IX. *Establishment of SO loan revolving account.*

(A) Supervised bank accounts will not be used for SO loans.

(B) Grantee will deposit SO loan funds in a depository institution of its choice. The use of minority institutions is encouraged. Such funds will remain separate from any other account of the grantee and shall be established as an SO revolving account.

(C) Checks drawn on the revolving account will be for the sole purpose of purchasing land options and must be signed by at least two authorized officials of the grantee who have been properly bonded in accordance with § 1944.411 (e) and (g) of this subpart.

(D) Grantees will not expend funds for any options until the site and the option form have been reviewed and approved by the County Supervisor.

(1) SO funds will not be left unused in the revolving account in excess of 60 days.

(2) If the funds are not used for the intended purpose within the 60 days specified above, the unused portion will be refunded on the account.

(E) When funds become available for repayment of the SO loan, such funds will be deposited in the revolving account for the purchase of additional site options if needed. If such funds are not needed to purchase more options, they will be applied on the SO loan.

X. *Source of funds.*

SO loans will be funded from the self-help housing land development fund.

Subpart K—Technical and Supervisory Assistance Grants

§ 1944.550 [Removed and reserved]

6. Section 1944.550 is removed and reserved.

Dated: August 31, 1990.

La Verne Ausman,

Administrator, Farmers Home Administration.

[FR Doc. 90–24237 Filed 10–15–90; 8:45 am]

BILLING CODE 3410–07–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-83-AD; Amdt. 39-6774]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Model 757 series airplanes, which currently requires repetitive operational testing of fuel boost pump bypass valves. That action was prompted by a determination that small amounts of water on the valves may freeze and prevent valve operation. This condition, if not corrected, could result in the loss of both engines in the event all aircraft fuel boost pumps were lost (e.g., loss of electrical power to pumps). This amendment also requires specific terminating action for the repetitive operational tests.

EFFECTIVE DATE: November 21, 1990.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examine at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

FOR FURTHER INFORMATION CONTACT: Mr. G. Michael Collins, Seattle Aircraft Certification Office, Propulsion Branch, ANM-140S; telephone (206) 227-2660. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 88-08-04, Amendment 39-5895 (53 FR 12376, April 14, 1988), applicable to Boeing Model 757 series airplanes, to require repetitive operational testing of fuel boost pump bypass valves and also require specific terminating action for the repetitive operational testing, was published in the Federal Register on April 18, 1990 (55 FR 14428).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter requested that the compliance period for the modification be increased from the proposed 3,000 to 4,000 hours time-in-service. This was requested in order to allow accomplishment of the modification during scheduled main base visits. The FAA concurs. This AD requires repeated operational testing until the modification is accomplished. Because the operational testing requirement serves as an interim safety measure, the FAA has determined that the extension of the compliance time to 4,000 hours for the modification will not have an adverse impact on safety. The final rule has been revised accordingly.

Since issuance of the Notice, the FAA has reviewed and approved Boeing Alert Service Bulletin 757-28A0017, Revision 3, dated April 26, 1990, which revises the operational check of the bypass valve for proper operation following accomplishment of the modification. This revision to the service bulletin also updates the list of affected airplanes to reflect current ownership and also to include an optional bracket installation. The final rule has been revised to allow modification in accordance with this revision of the service bulletin.

Paragraph C. of the final rule has been revised to specify the current procedure for submitting request for approval of alternate means of compliance.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 204 Model 757 series airplanes of the affected design in the worldwide fleet. It is estimated that 123 airplanes of U.S. registry will be affected by this AD, that it will take approximately 40 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $196,800.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39--[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) [Revised Pub. L. 97-449, January 12, 1983]; and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by superseding Amendment 39-5895 (53 FR 12376, April 14, 1988), AD 88-08-04, with the following new airworthiness directive:

Boeing: Applies to Model 757 series airplanes, listed in Boeing Alert Service Bulletin 757-28A0017, Revision 2, dated January 4, 1990, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent engine flameout due to boost pump bypass valve freezing, accomplish the following:

A. Prior to the accumulation of 150 flight hours after May 4, 1988 (the effective date of Amendment 39-5895, AD 88-08-04), and thereafter at intervals not to exceed 300 flight hours, perform an operational test of the fuel boost pump bypass valves in accordance with Boeing Alert Service Bulletin 757-28A0017, dated February 11, 1988; or Part I of Revision 2, dated January 4, 1990; or Part I of Revision 3, dated April 26, 1990.

B. Within the next 4,000 hours time-in-service after the effective date of this amendment, modify the fuel boost pump bypass valves in accordance with Part II of Boeing Alert Service Bulletin 757-28A0017, Revision 2, dated January 4, 1990, or Revision 3, dated April 26, 1990. This constitutes terminating action for the repetitive tests required by paragraph A. of this AD.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be submitted directly to the Manager, Seattle ACO, and a copy sent to the cognizant FAA Principal Inspector (PI). The PI will then forward comments or concurrence to the Seattle ACO.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

This amendment supersedes Amendment 39–6825, AD 86–06–04.

This amendment becomes effective November 21, 1990.

Issued in Renton, Washington, on October 4, 1990.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 90-NM-123-AD; Amdt. 39-6776]

Airworthiness Directives; Boeing Model 767 Series Airplanes Equipped With BFGoodrich Escape Slides and Slide/Rafts

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes, which requires inspection and modification of certain escape slides and slide-rafts. This amendment is prompted by reports of failure of the escape slides and slide/rafts due to equipment malfunctions. This condition, if not corrected, could result in unusable escape slides and slide/rafts, and jeopardize successful emergency evacuation of the airplane.

EFFECTIVE DATE: November 21, 1990.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes Group, P.O. Box 3707, Seattle, Washington 98124; and BFGoodrich Company, Aircraft Evacuation Systems, 3414 South 5th Street, Phoenix, Arizona 85040. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Jayson B. Claar, Seattle Aircraft Certification Office, Airframe Branch, ANM–120S; telephone (206) 227–2784. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Boeing Model 767 series airplanes, which requires inspection and modification of certain escape slides and slide/rafts, was published in the Federal Register on July 7, 1990 (55 FR 28656).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

The Air Transport Association (ATA) of America commented on behalf of its member airlines:

Some member airlines stated that the FAA's justification for revising the compliance time from 40 to 20 months appears to be based on an attempt to require the accomplishment of the modification at the same time as the inspections required by AD 86–06–06. These commenters noted that the slides and slide/rafts installed on their fleets are not subject to the requirements of AD 86–06–06 and most are scheduled for inspections/overhaul at 36-month intervals. They requested that the proposed compliance time be changed back to 40 months. As justification for such a change, the commenters indicated that the service history and reliability of the slides and slide/rafts does not demonstrate a need for an early removal to accomplish the proposed modifications. Further, one commenter indicated that the slide manufacturer's service bulletin refers to the modifications as "product improvements" and, therefore, requested that the modifications be required to be accomplished at the "next regularly scheduled overhaul."

The FAA does not concur that an extension of the proposed compliance time is warranted. Although part of the reason for selecting the 20-month compliance time was to align the modification with the requirements of AD 86–06–06, it was by no means the only reason. In developing an appropriate compliance time, the FAA considered the safety implications, parts availability, and normal maintenance schedules for timely accomplishment of the modification. In consideration of these items, as well as the reports of numerous failures of the slides and slide/rafts in service, the FAA determined that 20 months represented the maximum interval of time allowable wherein the modifications could reasonably be accomplished and an acceptable level of safety could be maintained. The FAA does not concur with the suggestion that the modification be accomplished at "the next regularly scheduled overhaul;" since maintenance schedules may vary from operator to operator, there would be no assurance that the inspection will be accomplished within 20 months. The FAA has determined that, in requiring compliance within 20 months, only 30% of all slides and slide/rafts will be required to be removed from airplanes prior to their "regularly scheduled overhaul."

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 275 Model 767 series airplanes of the affected design in the worldwide fleet. It is estimated that 106 airplanes of U.S. registry will be affected by this AD, that it will take approximately 80 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. It is estimated that the required parts will cost $2,125 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $564,450.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 767 series airplanes, equipped with BFGoodrich escape slides and slide/rafts identified in BFGoodrich Service Bulletin 25-212, dated October 27, 1988, certificated in any category. Compliance required within the next 20 months after the effective date of this AD, unless previously accomplished.

To provide satisfactory reliability of the evacuation system, accomplish the following:

A. Modify the escape slides and slide/rafts in accordance with BFGoodrich Service Bulletin 25-212, dated October 27, 1988.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be submitted directly to the Manager, Seattle ACO, and a copy sent to the cognizant FAA Principal Inspector (PI). The PI will then forward comments or concurrence to the Seattle ACO.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes Group, P.O. Box 3707, Seattle, Washington 98124; and BFGoodrich Company, Aircraft Evacuation Systems, 3414 South 5th Street, Phoenix, Arizona 85040. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SE., Renton, Washington.

This amendment becomes effective November 21, 1990.

Issued in Renton, Washington, on October 4, 1990.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 90-24280 Filed 10-15-90; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 90-NM-69-AD; Amdt. 39-6769]

Airworthiness Directives; McDonnell Douglas Model DC-10-10, DC-10-15, DC-10-30 (Except KC-10A), and DC-10-40 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to McDonnell Douglas Model DC-10 series airplanes, which requires repetitive inspections and replacement of the fuel tank manifold drain/outboard fill valves. This amendment is prompted by reports of in-service failures of fuel tank manifold drain/outboard fill valves on the Model KC-10A airplane. This condition, if not corrected, could result in valve fuel leakage in the wing outboard leading edge area, and the possibility of localized in-flight or ground fire.

EFFECTIVE DATE: November 16, 1990.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: DC-10 Technical Publications, C1-HDR (54-60). This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington, or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond Vakili, Aerospace Engineer, Propulsion Branch, ANM-140L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; telephone (213) 988-5282.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to McDonnell Douglas Model DC-10-10, DC-10-15, DC-10-30 (except KC-10A), and DC-10-40 series airplanes, which requires repetitive inspections and replacement of the fuel tank manifold drain/outboard fill valves, was published in the Federal Register on June 1, 1990 (55 FR 22367).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter requested that the AD allow the option of placarding a defective valve inoperative in accordance with the provisions of the Minimum Equipment List (MEL). The commenter stated that this option might be necessary because of the limited time to complete the inspection and the possibility of depleting the inventory of serviceable spare valves. The FAA does not concur. The FAA has determined that the availability of parts is not a problem at this time. However, in the event the problem should arise, operators always have the option of submitting an alternate means of compliance request to the FAA, which provides an equivalent level of safety in accordance with the provision in paragraph C. of this AD.

The aircraft manufacturer and the valve manufacturer commented that only a limited number of valves, identified in the McDonnell Douglas DC-10 Service Bulletin A28-196, are covered by warranty and will be exchanged free of cost. The FAA concurs. The cost impact estimate of the final rule has been corrected accordingly.

The aircraft manufacturer commented that there has been no failure of the fuel tank manifold drain/outboard fill valve on any in-service McDonnell Douglas DC-10's, as stated in the preamble to the Notice. The FAA concurs; however, the valves on the Model DC-10 are similar to the valves utilized in the KC-10A aerial refueling boom manifold scavenge shutoff valve and, thus, the same potential for failure exists on the Model DC-10 series airplanes.

In addition, the manufacturer suggested that the Model KC-10A airplane be included in the applicability of the final rule. The FAA does not concur. The Model KC-10A airplanes were specifically excluded in the NPRM because maintenance actions have been in effect to inspect and remove suspect valves from United States Air Force operated Model KC-10A airplanes. However, the FAA is reviewing these actions and will determine if further rulemaking action is necessary.

Paragraph A. of the final rule has been revised to clarify the actions required in the event that a defective valve is found as a result of the required inspections. Although these actions are specified in

the referenced service bulletin, they were not iterated in the Notice.

Paragraph C. of the final rule has been revised to specify the current procedure for submitting requests for approval of alternate means of compliance.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed with the changes previously described. The FAA has determined that these changes will neither significantly increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 376 Model DC–10–10, DC–10–15, DC–10–30 (except KC–10A), and DC–10–40 series airplanes of the affected design in the worldwide fleet. It is estimated that 183 airplanes of U.S. registry will be affected by this AD, that it will take approximately 5 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. The cost of parts is $800 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is $183,000.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Applies to Model DC–10–10, DC–10–15, DC–10–30 (except KC–10A), and DC–10–40 series airplanes, as listed in McDonnell Douglas DC–10 Service Bulletin A28–196, dated March 30, 1990, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent valve fuel leakage into the wing outboard leading edge area and the possibility of localized in-flight or ground fire, accomplish the following:

A. Within 120 days after the effective date of this AD, and thereafter, at intervals not to exceed 12 months, inspect the manifold drain/outboard fill valves, Part Number AF18C–57, in accordance with the procedures described in McDonnell Douglas DC–10 Service Bulletin A28–196, dated March 30, 1990. If any valve has valve top displacement, prior to further flight, replace the valve with a new like or serviceable valve. Continue to perform the repetitive inspections required by this paragraph until the valves are replaced in accordance with the paragraph B. of this AD.

B. Within 24 months after the effective date of this AD, replace the manifold drain/outboard fill valves, Part Number AF18C–57, with new valves, Part Number AF18C–57A, in accordance with the procedures described in McDonnell Douglas DC–10 Service Bulletin A28–196, dated March 30, 1990. The replacement of Part Number AF18C–57 with Part Number AF18C–57A constitutes terminating action for this AD.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Inspector (PI), who will either concur or comment and then send it to the Manager, Los Angeles Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: DC–10 Technical Publications, C1–HDR (54–60). These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington, or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

This amendment becomes effective November 19, 1990.

Issued in Renton, Washington, on October 2, 1990.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 90–AGL–3]

Alteration of VOR Federal Airways V–158 and V–420

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the descriptions of VOR Federal Airways V–158 and V–420 located in the State of Illinois. The airway change to V–158 will provide an airway to join the V–128 bypass routing around Chicago O'Hare Air Traffic Control Tower (ATCT) airspace for aircraft arriving from the northwest. Also, this action removes that segment of the airway along V–420 between the Bradford very high frequency omnidirectional radio range and tactical air navigational aid (VORTAC) to the Malta intersection, which is not being used by Air Traffic Control (ATC).

EFFECTIVE DATE: 0901 u.t.c., December 13, 1990.

FOR FURTHER INFORMATION CONTACT: Jesse B. Bogan, Jr., Airspace and Obstruction Evaluation Branch (ATP–240) Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9253.

SUPPLEMENTARY INFORMATION:

History

On May 15, 1990, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the descriptions of VOR Federal Airways V–158 and V–420 located in the State of Illinois (55 FR 20167). This airway change will provide a bypass routing in the vicinity of Chicago, IL, and eliminate a segment of an airway which is not being used by ATC. Interested parties

were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6F dated January 2, 1990.

The Rule

This amendment to part 71 of the Federal Aviation Regulations alters the descriptions of VOR Federal Airways V–158 and V–420 located in the State of Illinois. The airway change to V–158 will provide an airway to join the V–128 bypass routing around Chicago O'Hare ATCT airspace for aircraft arriving from the northwest. The section of the airway between the Bradford VORTAC and the Malta intersection along V–420 is not being used by ATC. Therefore, we are removing that section of V–420 between the Bradford VORTAC and the Malta intersection.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR federal airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. § 71.123 is amended as follows:

V–158 [Amended]

By removing the words "Polo, IL." and substituting the words "Polo, IL; to the INT Polo 122° and Rockford, IL, 169° radials."

V–420 [Revised]

From Green Bay, WI; via Traverse City, MI; Gaylord, MI; to Alpena, MI.

Issued in Washington, DC, on September 27, 1990.

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

Establishment of Control Zone, Glynco Jetport, Brunswick, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes a part-time control zone at the Glynco Jetport, Brunswick, GA. This action will provide additional controlled airspace for protection of instrument flight rules (IFR) aeronautical operations. The hours of operation of the control zone initially will be established by Notice to Airmen (NOTAM). Thereafter, the date and time of operation will be published in the Airport/Facility Directory.

EFFECTIVE DATE: 0901 u.t.c., December 13, 1990.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On July 17, 1990, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish the Glynco Jetport Control Zone at Brunswick, GA (55) FR (29068). The proposed action would lower the base of controlled airspace from 700 feet above ground level to the surface in the vicinity of Glynco Jetport for protection of IFR aeronautical operations. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6F dated January 2, 1990.

The Rule

This amendment to part 71 of the Federal Aviation Regulations establishes a part-time control zone at the Glynco Jetport, Brunswick, GA. This action lowers the base of controlled airspace from 700 feet above ground level to the surface in vicinity of the airport for protection of IFR aircraft. Initially, the hours of operation of the control zone will be established by NOTAM. Thereafter, the date and time of operation will be published in the Airport/Facility Directory.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it

is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Public Law 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Brunswick Glynco Jetport, GA [New]

Within a 5-mile radius of Glynco Jetport (latitude 31°15'32" N., longitude 81°27'59" W.), excluding that airspace within the Brunswick Malcolm-McKinnon, GA, control zone. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

Issued in East Point, Georgia, on September 19, 1990.

Dan Cass,

Acting Manager, Air Traffic Division, Southern Region.

14 CFR Part 71

[Airspace Docket No. 90-AEA-14]

Alteration of Control Zone and Transition Area; Erie, PA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice modifies the Control Zone and 700 foot Transition Area established at the Erie International Airport, Erie, PA, due to the revision of air traffic control procedures in the area. This action reduces that amount of controlled airspace to that which is actually required by the FAA to contain aircraft operating under instrument flight rules.

EFFECTIVE DATE: 0901 u.t.c. December 13, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Airspace Specialist, System Management Branch, AEA-530, Federal Aviation Administration, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 917-0857.

SUPPLEMENTARY INFORMATION:

History

On June 21, 1990, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to amend the Control Zone and 700 foot Transition Area at Erie, PA, due to the reorganization of air traffic control procedures in the area (55 FR 29634). The proposed action would return that amount of controlled airspace not needed by the FAA to contain arriving and departing aircraft operating under instrument flight rules at the Erie International Airport, Erie, PA, back to the general public.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments on the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Sections 71.171 and 71.181 of part 71 of the Federal Aviation Regulations were republished in FAA Handbook 7400.8F, January 2, 1990.

The Rule

This amendment to part 71 of the Federal Aviation Regulations reduces the Control Zone and 700 foot Transition Area established at Erie, PA, due to the reorganization of air traffic control procedures in the area.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Erie, PA [Revised]

Within a 5-mile radius of the center of Erie International Airport, Erie, PA (lat. 42°04'54" N., long. 80°10'36" W.); extending NE of the 5-mile radius area from within 4.5 miles NW of the Erie VORTAC 054°(T) 068°(M) Radial to 4 miles SE of the Erie ILS localizer NE course then extending SW from a point located along the Erie ILS localizer NE course 10.5 miles NE of lat. 42°07'30" N., long. 80°05'27" W. to the 5-mile radius area.

§ 71.181 [Amended]

3. Section 71.181 is amended as follows:

Erie, PA [Revised]

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of the center of Erie International Airport, Erie, PA (lat. 42°04'54" N., long. 80°10'36" W.); extending NE of the 8.5-mile radius area from within 5 miles NW of the Erie VORTAC 054°(T) 060°(M) Radial to 5 miles SE of the Erie ILS localizer NE course then extending SW from a point located along the Erie ILS localizer NE course 11.5 miles NE of lat. 42°07'30" N., long. 80°05'37" W. to the 8.5-mile radius area.

Issued in Jamaica, New York, on September 13, 1990.

Gary W. Tucker,

Manager, Air Traffic Division.

14 CFR Part 71

[Airspace Docket No. 90-AEA-01]

Establishment of Transition Area; Milton, WV

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice establishes a new 700 foot Transition Area at Milton, WV, due to the establishment of a Standard Instrument Approach Procedure (SIAP) to the Ona Airpark, Milton, WV. This action establishes that amount of controlled airspace which is deemed necessary by the FAA to segregate aircraft operating under instrument flight rules from those operating under visual flight rules in controlled airspace. Additionally, the status of the airport is changed from VFR to IFR.

EFFECTIVE DATE: 0901 u.t.c. December 13, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Airspace Specialist, System Management Branch, AEA-530, Federal Aviation Administration, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 917-0857.

SUPPLEMENTARY INFORMATION:

History

On April 6, 1990, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish a new 700 foot Transition area at Milton, WV, for the Ona Airpark due to the establishment of a new SIAP for the airport (55 FR 17632). The proposed action would establish that amount of controlled airspace which is deemed necessary by the FAA to contain arriving and departing aircraft from the Ona Airpark, Milton, WV, operating under instrument flight rules.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. One comment was received on the proposal.

It was noted that a military training route (MTR), which is used by high-performance military aircraft, is established over the Ona Airpark. It was suggested that the FAA suspend implementation of the SIAP and Transition Area. This was due to concerns for potential conflicts between controlled aircraft executing the SIAP and uncontrolled aircraft operating along the MTR. The military training route in question has been realigned with an effective date prior to the implementation of the new SIAP and Transition Area. The FAA finds that further delay of the implementation of the SIAP and 700 foot Transition Area is not warranted. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6F, January 2, 1990.

The Rule

This amendment to part 71 of the Federal Aviation Regulations establishes a new 700 foot Transition Area at Milton, WV, to contain arriving and departing aircraft at the Ona Airpark due to the development of a new SIAP to this airport. This area will be depicted on appropriate aeronautical charts thereby enabling pilots to circumnavigate the area or otherwise comply with appropriate IFR procedures.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Milton, WV [New]

That airspace extending upward from 700 feet above the surface within a 8.5-mile radius of the center, lat. 38°26'26"N., long. 82°12'05"W., of Ona Airpark, Milton, WV; within 4 miles either side of the Charleston VORTAC 285°(T) 286°(M) radial extending from 11.5 miles northwest of the VORTAC to the 8.5-mile radius area.

Issued in Jamaica, New York, on September 13, 1990.

Gary W. Tucker,

Manager, Air Traffic Division.

Bureau of Land Management

43 CFR Public Land Order 6804

[AZ-930-4214-10; AZA-13396, AZA-13400, AZA-13401, AZA-13402, AZA-24743]

Revocation, Modification, and Transfer of Jurisdiction of Reclamation Withdrawals; Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes in part three Secretarial orders which withdrew lands in Yuma, Arizona, for the Colorado River Survey and the Yuma Project. Additionally, it modifies and transfers jurisdiction to a part of a fourth Secretarial order which withdrew the same land for the Colorado River Storage Project. This land totaling 26.794 acres is now excess to the needs of the Bureau of Reclamation and is needed by the Department of the Navy. The

Department of the Navy presently utilizes the facilities constructed on the parcel by the Bureau of Reclamation as an integral part of the Marine Corps Air Station operation in Yuma. The land has been and will remain closed to surface entry and mining.

EFFECTIVE DATE: October 16, 1990.

FOR FURTHER INFORMATION CONTACT: John Mezes, BLM, Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, 602-640-5509.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Orders dated July 2, 1902, January 31, 1903, and September 30, 1904, which withdrew lands for the Colorado River Survey and the Yuma Project are hereby revoked insofar as they affect the following described land:

Gila and Salt River Meridian

T. 9 S., R. 23 W.,
Sec. 11, Tract B.

The area described contains 26.794 acres in Yuma County.

2. The Secretarial Order dated March 14, 1929, which withdrew the following described land for the Colorado River Storage Project is hereby modified and jurisdiction transferred from the Bureau of Reclamation to the Department of the Navy, subject to valid existing rights, for use as an administrative site. The land will remain withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C., ch. 2).

Gila and Salt River Meridian

T. 9 S., R. 23 W.,
Sec. 11, Tract B.

The area described contains 26.794 acres in Yuma County.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to Section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

Dated: October 10, 1990.

Dave O'Neal,
Assistant Secretary of the Interior.

RIN 0648-AA48

United States Standards for Grades of Frozen Fish Blocks

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Interim final rule with request for comments.

SUMMARY: NOAA is revising the U.S. Standards for Grades of Frozen Fish Blocks used in NMFS's National Seafood Inspection Program. Participation in the program by industry members is voluntary. This will update the Standards for Grades to reflect such things as technical advances in fish processing equipment, increased industry size, a larger number of processed species, at-sea processing, and a Codex Alimentarius standard for Quick Frozen Blocks of Fish Fillet, Minced Fish Flesh and Mixtures of Fillets and Minced Fish Flesh (hereafter referred to as the CODEX Standard for Quick Frozen Blocks of Fish Fillets). The revised standards are issued as an interim rule to encourage comments from those using the standards before issuing a final rule.

DATES: Interim rule effective November 15, 1990. The incorporation by reference of the publication listed in the regulations is approved by the Director of the Federal Register as of November 15, 1990; comments must be received on or before October 16, 1991.

ADDRESSES: Comments should be sent to Thomas J. Moreau, Director, Technical Services Unit, Inspection Services Division, F/TS45, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, One Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Earl C. Johnston, Chief, Standards and Specification Branch, NMFS, 508-281-9219.

SUPPLEMENTARY INFORMATION:

Background

The U.S. Standards for Grades of Frozen Fish Blocks (50 CFR part 264, subpart A) provide a system for Federal and state inspectors to classify frozen fish blocks by quality into U.S. Grade Categories (*i.e.*, grades A, B, and Substandard) and allow identification of a product quality level for the benefit of the consumer and industry. The standards are used by inspectors in NMFS's National Seafood Inspection Program. Industry participation in the program is voluntary. The existing standards for frozen fish blocks were first issued by the Department of the Interior in 1964 and reissued by the Department of Commerce in 1977. Since then, numerous technological advances and changes have occurred in the fish processing industry. Among these are:

1. The use of factory ships capable of harvesting and processing fish into frozen fish blocks while at sea.

2. The increasing variety of species being processed into frozen fish blocks.

3. The continued growth of a large industry utilizing frozen fish blocks in their products.

4. The technological advancements made in the equipment used by the fish processing industry.

5. The adoption of a Codex Alimentarius Commission Standard for Quick Frozen Blocks of Fish Fillets (Alinorm 89/18 Appendix II).

These advances and changes prompted industry members to seek to have the standards revised. The revised Standards for Frozen Fish Fillet Blocks were developed during Technical Working Group meetings with participation from industry and user groups. The revised standards were applied to 661 samples and the results were examined and evaluated. The major changes to the current standards are:

1. Determination of Grade

The current Standards for Grades (§ 264.111(a)) have a maximum score of 100 and a minimum score of 0. The revised Standards for Grades (§ 264.104(f)) are based on a perfect score of 0 (no physical defects).

2. Sampling

a. Sample unit size. The revised Standards for Grades (§ 264.104(b)) use the whole block for thawed state evaluations. The current Standards for Grades (§§ 264.121(b)(1) and 264.121(b)(2)) use a 5-pound (2.27 kg) subsample unit for thawed state evaluations. This change allows a more thorough evaluation of the entire block.

b. Sampling plan. Due to the change in sample unit size, the revised Standards for Grades (§ 264.106) include a modified sampling plan with comparable statistical confidence that was developed to reflect the increase in sample unit size while reducing the cost involved in destructive sampling.

3. Frozen State Evaluations

a. Improper fill. The revised Standards for Grades (§ 284.104(e)(5)) incorporate a depth requirement for point assessment. (See § 284.121(a)(6) for current Standards for Grades definition of improper fill).

b. Color. The assessment for this defect appears in the frozen state evaluation (§ 284.121(a)(1)) in the current Standard for Grades. It has been moved to the thawed state evaluation section in the revised Standards for Grades (§ 284.104(e)(9)) to permit a more thorough examination of the product for this defect.

4. Thawed State Evaluations

a. Belly flaps (napes). This defect does not appear in the current Standards for Grades. Under the revised Standards for Grades (§ 284.104(e)(6)), points for this defect will be assessed if the allowable tolerance of 15 percent by declared weight is exceeded.

b. Bones. In response to concerns and comments expressed by consumers, this defect in the revised Standards for Grades (§ 284.104(e)(15)) has been redefined into measurable quantities. The measurements are based on those developed by the international Codex Alimentarius Commission's Standard for Quick Frozen Blocks of Fish Fillets (Alinorm 89/18 Appendix II). The current Standards for Grades (§ 284.121(b)(2)) are based on a subjective interpretation of the definition of a "potentially harmful" bone.

c. Parasites. This defect does not appear in the current Standards for Grades. In response to consumer concerns and comments, it has been incorporated into the revised Standards for Grades (§ 284.104(e)(17)) and covers metazoan parasites and parasitic copepods.

d. Viscera, roe and lace. These defects do not appear in the current Standards for Grades. These defects were incorporated into the revised Standards for Grades (§ 284.104(e)(10) because the flatfish species that exhibit these defects are being processed into blocks in greater quantities.

5. Thawed State Defect Points

The revised Standards for Grades express the defect points from the thawed state evaluations (excluding belly flaps) on a per pound (kilogram) basis (§ 284.104(f)). That is, points assessed from §§ 284.104(e)(7) through 284.104(e)(17) will be added together and the sum divided by the declared weight of the block.

Comments and Responses

A proposed rule with request for comments was published on September 21, 1989 (54 FR 38981). At the end of the 45-day comment period, few comments had been received. Several commenters requested an extension to the comment period to have sufficient time to study the proposed rule and submit comments. Notice of a 30-day extension of the comment period was published on December 29, 1989 (54 FR 53660).

Six letters were received during the comment period: Two from industry, two from Government, one from a private consultant, and one from a hotel corporation. All commenters concurred with the revision, with a few minor comments and questions.

One letter from the industry suggested increasing the defect points for bone to the same level as for parasites. Since all bones, including pin bones, are now being counted as defects, the revised standards are much tighter on bones than the current standards. Large or excessive bone is more severely penalized than parasites. The industry member also commented on the method of removing attached belly flaps (napes). NOAA feels this is adequately addressed in the revised Standards for Grades and will also elaborate on this in the Inspector's Instructions.

Another industry comment concerned the heading of the revised Standards for Grades, suggesting it be changed to include the word "fillets." NOAA concurs, feeling that this would eliminate any confusion between market styles of frozen fish blocks, and has made the change.

The consultant's comment letter questioned the need to cook three 4–6 ounce (113.4 to 170.1 g) portions per sample unit. NOAA disagrees because it believes this amount of cooked product is necessary to fully evaluate the flavor, odor and texture of the product; no change was made in the interim final rule.

One commenter wanted to know if the defects were based on declared or actual weight. NOAA agrees that this should be specified and has inserted the word "declared" in §§ 284.104(e)(6) and 284.104(f) in the interim final rule to clarify the revised Standards for Grades. The same individual also commented that the defect definitions were too general in nature, and needed to be expanded upon. NOAA feels that all defects are adequately defined in the Standards for Grades. However, defects will be elaborated upon in the Inspector's Instructions (See § 284.101 of the Standards for Grades).

One comment received from the hotel corporation objected to the short initial comment period. However, the comment period was extended for 30 days and no further comments were received from this commenter.

One commenter concurred with the revision without further comment.

Request for Comments

The revised standards should facilitate trade in frozen fish fillet blocks and will allow consumers to select and purchase a greater variety of fish products on the basis of identified quality. The revised standards are issued as an interim final rule to allow further input on their adequacy and application. Interested persons are invited to submit written comments and suggestions or objections to these revised Standards for Grades during the interim rule period (see "ADDRESSES"). The comments will be reviewed and adjustments, if necessary, will be made to the revised Standards for Grades before publication as a final rule.

Classification

This action is categorically excluded from the requirement to prepare an environmental assessment by NOAA Directive 02–10.

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is not a "major rule" requiring preparation of a regulatory impact analysis under E.O. 12291. This rule will not have an effect on the economy of $100 million or more; will not cause a major increase in costs or prices; and will not have a significant adverse effect on competition, employment, investment, productivity or innovation.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities. This rule is expected to facilitate grading and trade in fish fillet block while not imposing any new costs on industry. As a result, a regulatory flexibility analysis was not prepared.

This rule does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

Samuel W. McKeen,

Program Management Officer for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR part 264 is amended as follows:

PART 264—UNITED STATES STANDARDS FOR GRADES OF FROZEN FISH BLOCKS

1. The authority citation for part 264 is revised to read as follows:

Authority: 7 U.S.C. 1621–1630; Reorganization Plan No. 4 of 1970 (84 Stat. 2090).

2. Part 264, subpart A is revised to read as follows:

Subpart A—United States Standards for Grades of Frozen Fish Fillet Blocks

Sec.

264.101 Scope and product description.
264.102 [Reserved]
264.103 Grades.
264.104 Grade determination.
264.105 Tolerances for lot certification.
264.106 Hygiene.
264.107 Methods of analysis.
264.108 Sampling plan for fish blocks.

Subpart A—United States Standards for Grades of Frozen Fish Fillet Blocks

§ 264.101 Scope and product description.

(a) These U.S. Standards for Grades apply to frozen fish blocks which are rectangularly shaped masses made from a single species of fish flesh. They are made from fillets or fillet pieces that are either skin-on and scaled or skinless. Blocks processed from skin-on fish flesh shall be so labeled. The blocks shall not contain minced or comminuted fish flesh. The blocks shall not be made by restructuring (reworking) pieces of fish blocks into the shape of a fish block.

(b) These Standards for Grades are implemented in accordance with guidance set forth in part II of NOAA Handbook 25, "Inspector's Instructions for Grading Frozen Fish Blocks."

§ 264.102 [Reserved]

§ 264.103 Grades.

(a) U.S. Grade A fish blocks shall:

(1) Possess good flavor and odor in accordance with § 264.104; and

(2) Comply with the limits for physical defects for U.S. Grade A quality in accordance with § 264.104.

(b) U.S. Grade B fish blocks shall:

(1) Possess reasonably good flavor and odor in accordance with § 264.104; and

(2) Comply with the limits for physical defects for U.S. Grade B quality in accordance with § 264.104.

(c) U.S. Grade C fish blocks shall:

(1) Possess reasonably good flavor and odor in accordance with § 264.104; and

(2) Comply with the limits for physical defects for U.S. Grade C quality in accordance with § 264.104.

(d) Substandard fish blocks shall fail to meet one or more of the requirements given in paragraphs (a), (b), and (c) of this section for U.S. Grades A, B, and C.

§ 264.104 Grade determination.

(a) *Procedures for grade determination.* The grade shall be determined by evaluating a product in the frozen, thawed and cooked states according to paragraphs of this section—namely, sampling; flavor and odor; physical defects; listing defect points; and grade assignment.

(b) *Sampling.* Sampling shall be done in accordance with the sampling plan given in § 264.108.

(1) For examination in the frozen state and the thawed state, a sample unit is one fish block.

(2) For examination in the cooked state, a sample unit is at least three 4- to 6-ounce (113.4 to 170.1 g) samples which are taken from a thawed sample unit.

(c) *Evaluation of flavor and odor.* (1) *Good* flavor and odor (essential quality requirements for a U.S. Grade A product) mean that the raw product has the odor and the cooked product has the flavor and odor characteristics of the indicated species of fish and are free from off-flavors and off-odors of any kind.

(2) *Reasonably good* flavor and odor (minimum requirements of a U.S. Grade B and a U.S. Grade C product) mean that the raw product or the cooked product is lacking in good odor (for the raw product) or good flavor and odor (for the cooked product) which is characteristic of the indicated species. Both the raw and the cooked products are free from objectionable off-flavors and off-odors of any kind.

(d) *Examination for physical defects.* Each sample unit shall be examined for physical defects using the list of definitions of defects given in paragraph (e) of this section.

(e) *Definitions of physical defects*—(1) *Dehydration.* This defect refers to loss of moisture from the surface of a fish block during frozen storage. Affected areas have a whitish appearance.

(i) *Moderate dehydration* masks the surface color of the product and affects more than 5 percent up to and including 15 percent of the surface area. If more than 15 percent of the surface area is affected, each additional 15 percent of surface area affected is another instance. Moderate dehydration can be readily removed by scraping with a blunt instrument.

(ii) *Excessive dehydration* masks the normal flesh color and penetrates the product. It affects more than 5 percent up to and including 10 percent of the surface area. If more than 10 percent of the surface area is affected, each additional 10 percent of surface area affected is another instance. Excessive dehydration requires a knife or other sharp instrument to remove.

(2) *Uniformity of block size.* This defect refers to the degree of conformity to the declared size. It includes deviations from the standard length, width or thickness. Only one deviation for each dimension shall be counted.

(i) *Moderate.* A deviation of length and width of ⅛ inch (0.32 cm) or more up to and including ¼ inch (0.64 cm). A deviation of thickness of 1/16 inch (0.16 cm) or more up to and including ⅛ inch (0.32 cm).

(ii) *Excessive.* If over ¼ inch (0.64 cm), each additional ⅛ inch (0.32 cm) of length and width is another instance. If over ⅛ (0.32 cm), each additional 1/16 inch (0.16 cm) of thickness is another instance.

(3) *Underweight* refers to underweight deviations from the stated weight.

(i) *Slight.* From 0.1 ounce (2.84 g) up to and including 1.0 ounce (28.35 g).

(ii) *Moderate.* Over 1.0 ounce (28.35 g) up to and including 4.0 ounces (113.4 g).

(iii) *Excessive.* If over 4.0 ounces (113.4 g), each additional 1.0 ounce (28.35 g) is another instance.

(4) *Angles.* An acceptable edge angle is an angle formed by two adjoining surfaces whose apex (deviation from 90 degrees) is within ⅜ inch (0.95 cm) off a carpenter's square placed along its surfaces. An acceptable corner angle is an angle formed by three adjoining surfaces whose apex is within ⅜ inch (0.95 cm) of a carpenter's square.

(5) *Improper fill.* This defect refers to voids, air pockets, ice pockets, ragged edges, bumps, depressions, damage, and imbedded packaging material, each of which is greater than ⅛ inch (0.32 cm) in depth, and which would result in product loss after cutting. It is estimated by determining the minimum number of 1-ounce (28.35 g) model units that could be affected adversely. For the purpose of estimating product loss, the 1-ounce (28.35 g) model unit shall have the dimensions 4×1×⅝ inch (10.16×2.54×1.59 cm). The total number of model units that would be affected adversely is the number of instances.

(6) *Belly flaps (Napes)* may be either loose or attached to a fillet or part of a fillet. The maximum amount of belly flaps should not exceed 15 percent by

declared weight of the block. If this amount does exceed 15 percent, each additional 5 percent by declared weight is another instance.

(7) *Blood spots.* Each lump or mass of clotted blood greater than 3/16 inch (0.48 cm) up to and including 3/8 inch (0.95 cm) in any dimension is an instance. If a blood spot is larger than 3/8 inch (0.95 cm), each additional 3/16 inch (0.48 cm) is another instance.

(8) *Bruises* include distinct, unnatural, dark, reddish, grayish, or brownish off-colors due to diffused blood. Each instance is each bruise larger than 0.5 square inch (3.32 cm^2) and less than 1.5 square inch (9.68 cm^2). For each bruise 1.5 square inch (9.68 cm^2) or larger, each additional complete 1.0 square inch (6.45 cm^2) is another instance.

(9) *Discoloration* refers to deviations from reasonably uniform color characteristics of the species used, such as melanin deposits, yellowing, rusting or other kinds of discoloration of the fish flesh.

(i) *Moderate.* A noticeable but moderate degree which is greater than 0.5 square inch (3.23 cm^2) up to and including 1.5 square inch (9.68 cm^2) is one instance. If the discoloration is greater than 1.5 square inch (9.68 cm^2), each additional complete 1.0 square inch (6.45 cm^2) is another instance.

(ii) *Excessive.* An excessive degree of discoloration which is greater than 0.5 square inch (3.23 cm^2) up to and including 1.5 square inch (9.68 cm^2) is one instance. If the discoloration is greater than 1.5 square inch (9.68 cm^2) each additional complete 1.0 square inch (6.45 cm^2) is another instance.

(10) *Viscera, roe and lace.* Viscera and roe refer to any portion of the internal organs. Each occurrence of viscera and roe is an instance. Lace (frill) is a piece of tissue adhering to the edge of a flatfish (Order *Pleuronectiformes*) fillet. For each lace, each 1/2 inch (1.27 cm) is each instance.

(11) *Skin.* In skinless fish blocks, each piece of skin larger than 0.5 square inch (3.23 cm^2) up to and including 1.0 square inch (6.45 cm^2) is an instance. For each piece of skin that is larger than 1.0 square inch (6.45 cm^2), each additional complete 0.5 square inch (3.23 cm^2) in area is another instance. For pieces of skin smaller than 0.5 square inch (3.23 cm^2), the number of 0.5-square-inch (3.23 cm^2) squares fully or partially occupied after collecting these pieces on a grid is the number of instances.

(12) *Membrane (black belly lining).* Each piece of membrane (black belly lining) larger than 0.5 square inch (3.23 cm^2) up to and including 1.5 square inch (9.68 cm^2) is an instance. For pieces of membrane (black belly lining) that are larger than 1.5 square inch (9.68 cm^2), each additional complete 0.5 square inch (3.23 cm^2) in area is another instance.

(13) *Scales*—(i) *For skin-on fillets that have been scaled,* an instance is an area of scales over 0.5 square inch (3.23 cm^2) up to and including 1.5 square inch (9.68 cm^2). If the area is greater than 1.5 square inch (9.68 cm^2), each additional complete 1.0 square inch (6.45 cm^2) is another instance. Loose scales are counted and instances are deducted in the same manner as for skinless fillets.

(ii) *For skinless fillets,* the first five to ten loose scales is an instance. If there are more than ten loose scales, each additional complete count of five loose scales is another instance.

(14) *Foreign material.* Any harmless material not derived from fish, such as packaging material. Each occurrence is an instance.

(15) *Bones (including pin bone and fin bone).*

(i) Each bone defect is a bone or part of a bone whose maximum profile is 3/16 inch (0.48 cm) or more in length, or at least 1/32 inch (0.08 cm) in shaft diameter or width, or, for bone chips, a longest dimension of at least 3/16 inch (0.48 cm).

(ii) An excessive degree of bone defect is each bone whose maximum profile can not be fitted into a rectangle, drawn on a flat, solid surface, that has a length of 1 3/16 inch (3.02 cm) and a width of 3/8 inch (0.95 cm).

(16) *Fins or part fins.* This defect refers to two or more bones connected by membrane, including internal or external bones, or both, in a cluster.

(i) *Moderate.* Connected by membrane in a cluster, no internal bone.

(ii) *Excessive.* Connected by membrane in a cluster with internal bone.

(17) *Parasites.*—(i) *Metazoan parasites.* Each such parasite or fragment of such a parasite that is detected is an instance.

(ii) *Parasitic copepods.* Each such parasite or a fragment of such a parasite that is detected is an instance.

(18) *Texture* means that the cooked product has the textural characteristics of the indicated species of fish. It does not include any abnormal textural characteristics such as mushy, soft, gelatinous, tough, dry or rubbery.

(i) *Moderate.* Moderately abnormal textural characteristics.

(ii) *Excessive.* Excessively abnormal textural characteristics.

(f) *Listing defect points.* When a sample unit is examined for physical defects using the list of defect definitions given in paragraph (e) of this section, defects are noted and numerical values are assigned in accordance with Table 1. The numbers assigned to defects in Table 1 are points. For examination in the frozen state and for belly flaps and texture, the defect points are added together. For examination of defects number 7 through 17 in the thawed state, the defect points are added together and this sum is divided by the declared weight of the sample unit in pounds. Express the result to the nearest whole number. Then add the sum of defects points for the frozen state and for belly flaps and texture to the sum of defect points for the thawed state expressed on a per pound basis. This result is used to determine the sample unit grade. The scoring system is based on a perfect score of zero (no physical defects).

(g) *Grade assignment.* Each sample unit will be assigned its grade in accordance with the limits for defects summarized as follows:

Grade assignment	Flavor and odor	Maximum number of defect points
U.S. Grade A	Good	15
U.S. Grade B	Reasonably good	30
U.S. Grade C	Reasonably good	60

If a sample unit has been assigned a grade for flavor and odor that is different from the grade indicated by the number of defect points, the sample unit grade will be the lower grade.

TABLE 1—DEFECT TABLE FOR A FISH FILLET BLOCK SAMPLE UNIT

[Size of a sample unit is given in § 284.104(b).]

Defect description	Degree	Point value
1. Dehydration		
Moderate (easily scraped)		
Affecting 5 to 15% of surface area	Each instance	3
Each additional 15% of surface area affected	Each additional instance	7

TABLE 1—DEFECT TABLE FOR A FISH FILLET BLOCK SAMPLE UNIT—Continued

[Size of a sample unit is given in § 264.104(b).]

Defect description	Degree	Point value
Excessive (difficult to scrape)		
Affecting 5 to 10% of surface area	Each instance	7
Each additional 10% of surface area affected	Each additional instance	16
2. Uniformity of block size		
Deviation from each dimension		
Moderate		
Length, width; ⅛ inch to ¼ inch (0.32 to 0.64 cm)	Each instance	3
Thickness; 1/16 inch to ⅛ inch (0.16 to 0.32 cm)	Each instance	3
Excessive		
Length, width; each additional ⅛ inch (0.32 cm)	Each additional instance	8
Thickness; each additional 1/16 inch (0.16 cm)	Each additional instance	6
3. Underweight		
Slight		
0.1 ounce to 1.0 ounce (2.84 to 28.35 g)	Each instance	3
Over 1.0 to 4.0 ounce (28.35 to 113.40 g)	Each instance	11
Excessive		
Over 4.0 ounce (113.40 g), each additional 1.0 ounce (28.35 g)	Each additional instance	16
4. Angles		
Edge angle—apex should be within ⅜ inch (0.95 cm)	Each unacceptable edge	1
Corner angle—apex should be within ⅜ inch (0.95 cm)	Each unacceptable corner	1
5. Improper fill		
If over ⅛ inch (0.32 cm) deep, minimum number of 1-ounce (28.35 g) units affected	Each instance	1
Thawed State		
6. Belly flaps (Napes)		
If over 18%, each additional 5%	Each instance	16
7. Blood spots		
Each spot greater than 3/16 inch to ⅜ inch (0.48 to 0.95 cm)	Each instance	2
If spot over ⅜ inch (0.95 cm), each additional 3/16 inch (0.48 cm)	Each additional instance	4
8. Bruises		
Each bruise 0.5 square inch (3.23 cm^2) to 1.5 square inch (9.68 cm^2)	Each instance	2
If bruise 1.5 square inch (9.68 cm^2) or larger, each additional 1.0 square inch (6.45 cm^2)	Each additional instance	2
9. Discoloration		
Moderate degree, over 0.5 square inch (3.23 cm^2) to 1.5 square inch (9.68 cm^2)	Each instance	4
Moderate degree, over 1.5 square inch (9.68 cm^2), each additional 1.0 square inch (6.45 cm^2).	Each additional instance	4
Excessive degree, over 0.5 square inch (3.23 cm^2) to 1.5 square inch (9.68 cm^2)	Each instance	16
Excessive degree, over 1.5 square inch (9.68 cm^2), each additional 1.0 square inch (6.45 cm^2).	Each additional instance	16
10. Viscera, roe and lace		
Viscera, roe; each occurrence	Each instance	8
Lace (frills), each ⅛ inch (1.27 cm)	Each instance	8
11. Skin (applies to skinless fish blocks)		
Each piece over 0.5 square inch (3.23 cm^2) to 1.0 square inch (6.45 cm^2)	Each instance	2
If pieces over 1.0 square inch (6.45 cm^2), each additional 0.5 square inch (3.23 cm^2)	Each additional instance	10
If pieces under 0.5 square inch (3.23 cm^2), number of 0.5 square inch (3.23 cm^2) squares occupied.	Each instance	6
12. Membrane (black belly lining)		
Each piece over 0.5 square inch (3.23 cm^2) to 1.5 square inch (9.68 cm^2)	Each instance	4
Over 1.5 square inch (9.68 cm^2), each additional 0.5 square inch (3.23 cm^2)	Each additional instance	10
13A. Scales		
For skin-on fillets that have been scaled, an area over 0.5 square inch (3.23 cm^2) to 1.5 square inch (9.68 cm^2).	Each instance	2
If area over 1.5 square inch (9.68 cm^2), each additional 1.0 square inch (6.45 cm^2)	Each additional instance	2
13B. Scales		
For skinless fillets, the first 9 to 10 loose scales	Each instance	2
If over 10 loose scales, each additional 5 loose scales	Each additional instance	2
14. Foreign Material		
Harmless material	Each instance	16
15. Bones		
Each bone defect as defined	Each instance	16
Each excessive degree of bone defect as defined	Each instance	48
16. Fins or part fins		
Moderate (no internal bone)	Each instance	16
Excessive (with internal bone)	Each instance	48
17 Parasites		
Each metazoan parasite or fragment of it as defined	Each instance	36
Each parasitic copepod or fragment of it as defined	Each instance	36

TABLE 1—DEFECT TABLE FOR A FISH FILLET BLOCK SAMPLE UNIT—Continued

[Size of a sample unit is given in § 264.104(b).]

Defect description	Degree	Point value
Cooked State		
18 Texture		
Moderate degree	Moderate	8
Excessive Degree as defined	Excessive	31

§ 264.105 Tolerances for lot certification.

(a) The grade assigned to a lot is the grade indicated by the average of the total scores, provided that the number of sample units in the next lower grade for both physical defects and flavor and odor does exceed the acceptance number as indicated in the sampling plans contained in § 264.106 and the provisions of 50 CFR 260.21. In 50 CFR 260.21, the four score points are additive, not substractive.

(b) The grade assigned to a lot is one grade below the majority of all the sample unit grades if either:

(1) The number of sample units in the next lower grade does exceed the acceptance number as given in the sampling plans contained in § 264.106; or

(2) The grade of any one of the sample units is more than one grade below the majority of all the sample unit grades.

§ 264.106 Hygiene.

All lots to be assigned a grade shall be processed and maintained in accordance with §§ 260.98 through 260.104 of this subchapter and of the good manufacturing practice regulations contained in 21 CFR part 110.

§ 264.107 Methods of analysis.

Product samples will be analyzed in accordance with the "Official Methods of Analysis"of the Association of Official Analytical Chemists (AOAC), Fourteenth Edition (1984), § 18.004 (page 331) plus § 32.059 and 32.060 (page 613) of the Thirteenth Edition (1980), § 18.003 (page 285) plus §§ 32.050 and 32.051 (page 543) which are incorporated by reference. Copies of the AOAC methods may be obtained from AOAC, 2200 Wilson Blvd., Suite 400, Arlington, VA 22201. These methods are incorporated as they exist on the date of approval. A notice of any change in the sections of the AOAC methods cited herein will be published in the Federal Register.

§ 264.108 Sampling plan for fish blocks.

Lot size (No. of blocks)	Sampling size (No. of blocks to be tested) (n)	Acceptance No.[1] (c)
15 or less	2	0
16-50	3	0
51-150	5	1
151-500	8	1
501-3200	13	2
3201-35000	20	3
Over 35000	32	5

Proposed Rules

Federal Register
Vol. 55, No. 200
Tuesday, October 16, 1990

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Chapter I

[Summary Notice No. PR-90-29]

Petition for Rulemaking—Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rulemaking received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for rulemaking (14 CFR part 11), this notice contains a summary of certain petitions requesting the initiation of rulemaking procedures for the amendment of specified provisions of the Federal Aviation Regulations and of denials or withdrawals of certain petitions previously received. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before December 17, 1990.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

This notice is published pursuant to paragraphs (b) and (f) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on October 9, 1990.

Denise Donohue Hall,

Manager, Program Management Staff, Office of the Chief Counsel.

Petitions for Rulemaking

Docket No.: 26333

Petitioner: United States Parachute Association

Regulations Affected: 14 CFR section 105.43(b) (2) and (3)

Description of Petition: To change the requirement for an assist device to be used for the static line direct deployment of ram-air main canopies.

Petitioner's Reason for the Request: The petitioner believes the change would be in the public interest as it would allow skydiving schools to use static line direct deployment for ram-air canopies without an assist device. The petitioner believes this will result in the improved reliability of equipment used by skydiving students and will result in less wear and tear on this equipment, thereby extending its service life and reducing operating expenses.

[FR Doc. 90-24279 Filed 10-15-90; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 90-CE-37-AD]

Airworthiness Directives; Glasflugel Models H301 Libelle, H301B Libelle, Standard Libelle, Standard Libelle 201, Standard Libelle 201B, Standard Libelle 203, Kestrel 604, and BS-1 Gliders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD), applicable to certain Glasflugel Libelle, Kestrel, and BS-1 Series gliders, which would supersede AD 71-16-06 and AD 88-07-05. Operational experience has shown that replacement of the MIL-W-83420D or MIL-W-1511A cables every 500 hours time-in-service (TIS), as currently required by these ADs, should not be mandatory. The proposed AD would require replacement of the hemp core rudder cables with MIL-W-83420D or MIL-W-1511A cables, plus repetitive inspections of these cables every 100 hours TIS, and the elimination of the current 500-hour TIS replacement intervals.

DATES: Comments must be received on or before December 4, 1990.

ADDRESSES: Technical Note (TN) No. 201-26, 301-33, 401-20, and 501-4, all dated March 15, 1987, applicable to this AD, may be obtained from Hansjorg Streifeneder, Glasflaser Flugzeug Service GmbH, Hofener Weg, 7431 Grabenstetten, Federal Republic of Germany (FRG). This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90-CE-37-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Heinz Hellebrand, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, 15 Rue de la Loi B-1040 Brussels, Belgium, Telephone 513.38.30, extension 2710; or Herman Belderok, Small Airplane Directorate, Aircraft Certification Service, FAA, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report, summarizing each FAA-public contact concerned with the subetance of this proposal, will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90-CE-37-AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

AD 88-07-05, Amendment 39-5865 (53 FR 9434, March 23, 1988), required inspection and replacement at 500-hour time-in-service (TIS) intervals of the original hemp core rudder control cables installed in certain Glasflugel Libelle, Kestrel, and BS-1 Series gliders. The actions of this AD eliminated the necessity of AD 71-16-06, Amendment 39-1253, but AD 71-16-06 was inadvertently left on the books.

Subsequently, the Federal Republic of Germany (FRG) Civil Airworthiness Authority (LBA), which has responsibility and authority to maintain the continued airworthiness of these gliders in the FRG, has determined that based upon general operational experience, the replacement of MIL-W-83420D or MIL-W-1511A cables every 500 hours TIS is unduly conservative and not justified.

The FAA relies upon the certification of the LBA, combined with FAA review of pertinent documentation, in finding compliance of the design of these gliders with the applicable United States airworthiness requirements, and the airworthiness and conformity of products of this design, certificated for operation in the United States. The FAA has examined the available information related to the issuance of Hansjorg Streifeneder TN No. 201-26, 301-33, 401-20, and 501-4, and the LBA finding that, based upon general operational experience, the repetitive replacement of the MIL-W-83420D or MIL-W-1511A cables is not justified.

Based on the foregoing, the FAA has determined that the condition addressed by Hansjorg Streifeneder TN No. 201-26, 301-33, 401-20, and 501-4 is one that may exist on other products of the same type design, certificated for operation in the United States, and that the repetitive replacement of the MIL-W-83420D or MIL-W-1511A rudder control cables every 500 hours TIS is not justified.

Consequently, the proposed AD would require replacement of the hemp core rudder cables with MIL-W-83420D or MIL-W-1511A cables, plus repetitive inspection of these cables every 100 hours TIS, and the elimination of the current 500-hour TIS replacement intervals. The proposed AD would supersede AD 88-07-05, Amendment 39-5865 and AD 71-16-06, Amendment 39-1253, which should have been superseded by AD 88-07-05.

The FAA has determined there are approximately 179 gliders affected by the proposed AD. There is no cost in eliminating the repetitive replacement of the rudder control cables per the proposed AD. Therefore, since there is no cost of compliance with the proposed AD, there will not be a financial impact on any small business entities operating these gliders.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small business entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES".

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by superseding AD 71-16-06, Amendment 39-1253, and AD 88-07-05, Amendment 39-5865, with the following new AD:

Glasflugel: Applies to Models H301 Libelle, H301B Libelle, Standard Libelle, Standard Libelle 201, Standard Libelle 201B, Standard Libelle 203, Kestrel 604, and BS-1 (all serial numbers) gliders, certificated in any category.

Compliance: Required as indicated after the effective date of this AD, unless already accomplished.

To prevent failures in the rudder control system, accomplish the following:

(a) Within the next 25 hours time-in-service (TIS) after the effective date of this AD, unless already accomplished per AD 71-16-06, Amendment No. 39-1253, or AD 88-07-05, Amendment 39-5865, replace all DIN specification 655, 6 x 7 rudder cables with a diameter of 2.5mm (0.098 in.) having a hemp core, with a 7 x 7, 5/32 inch cable, manufactured in accordance with MIL-W-83420D or MIL-W-1511A, with cable connections constructed in accordance with Actions 2 of Hansjorg Streifeneder Technical Note No. 201-26, 301-33, 401-20, 501-4, all dated March 15, 1987.

(b) Within the next 100 hours TIS after the replacement of the cables required in paragraph (a) of this AD, and thereafter at intervals not to exceed 100 hours TIS, visually inspect the rudder cables for wear, fraying, corrosion, twisting or other damage. If damaged cables are found, prior to further flight replace the damaged cables with cables and connections as specified in paragraph (a) of this AD.

(c) An alternate method of compliance or adjustment of the initial or repetitive compliance times, which provides an equivalent level of safety, may be approved by the Manager, Brussels Aircraft Certification Office, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 15 Rue de la Loi B-1000 Brussels, Belgium.

Note: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to Hansjorg Streifeneder, Glasfaser Flugzeug Service, GmbH, Hofener Weg, D-7431 Grabenstetten, Federal Republic of Germany; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel,

Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

This AD supersedes AD 71-16-06, Amendment 39-1253, and AD 68-07-05, Amendment 39-6886.

Issued in Kansas City, Missouri, on September 28, 1990.

Don C. Jacobsen,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 904

Arkansas Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing on proposed amendment.

SUMMARY: OSM is announcing the receipt of a proposed amendment to the Arkansas permanent regulatory program (hereinafter referred to as the Arkansas program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of revisions to the Arkansas rules pertaining to applicability, definitions, coal exploration, probable hydrologic consequences (PHC) determinations, transportation and support facilities, bonding, impoundments, coal mine waste, revegetation, and roads. The amendment is intended to revise the State program to be consistent with corresponding Federal standards.

This notice sets forth the times and locations that the Arkansas program and proposed amendment to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received by 4 p.m., c.s.t. November 15, 1990. If requested, a public hearing of the proposed amendment will be held on November 13, 1990. Request to present oral testimony at the hearing must be received by 4 p.m., c.d.t. on October 31, 1990.

ADDRESSES: Written comments should be mailed or hand delivered to James H. Moncrief at the address listed below.

Copies of the Arkansas program, the proposed amendment, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Tulsa Field Office.

James H. Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 East Skelly Drive, suite 550, Tulsa, OK 74135, Telephone: (918) 581-6430.

Arkansas Department of Pollution Control and Ecology, Mining Reclamation Division, 8001 National Drive, Little Rock, AR 72209, Telephone: (501) 570-2170.

FOR FURTHER INFORMATION CONTACT: James H. Moncrief, Director, Tulsa Field Office, on telephone number (918) 581-6430.

SUPPLEMENTARY INFORMATION:

I. Background on the Arkansas Program

On November 21, 1980, the Secretary of the Interior conditionally approved the Arkansas program. General background information on the Arkansas program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the Arkansas program, were published in the November 21, 1980, Federal Register (45 FR 77003). Subsequent actions concerning the Arkansas program and program amendments are at 30 CFR 904.12, 904.15, and 904.16.

II. Proposed Amendment

By letter dated September 27, 1990 (administrative record No. AR-413), Arkansas submitted a proposed amendment to its program pursuant to SMCRA. Arkansas submitted the proposed amendment in response to a November 8, 1989, letter that OSM sent to Arkansas in accordance with 30 CFR 732.17(c). Arkansas proposes to amend its program by revising existing rules or adding new rules concerning applicability, definitions, coal exploration, PHC determinations, transportation and support facilities, bonding, impoundments, coal mine waste, revegetation, and roads. Specifically, Arkansas proposes to amend Arkansas Surface Coal Mining and Reclamation Code sections: 700.10, applicability 701.5, definitions; 776.11, general requirement for coal exploration of less than 250 tons; 780.21, PHC determinations; 780.37, transportation facilities; 780.38 and 784.27, support facilities; 800.11, incremental bonding; 815.15, performance standards for coal exploration; 815.17, requirements for a coal exploration permit; 816.49, impoundments; 816.84, coal mine waste impounding structures; 816.116 and 816.17, success standards for revegetation; and 816.150 and 816.151, roads.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Arkansas program.

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Tulsa Field Office will not necessarily be considered in the final rulemaking or included in the administrative record.

Public Hearing

Persons wishing to testify at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by 4 p.m., c.d.t. on October 31, 1990. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests a hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to testify have been heard. Persons in the audience who have not been scheduled to testify, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to testify have been heard.

Public Meeting

If only one person requests an opportunity to testify at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to

discuss the proposed amendment may request a meeting by contacting the person listed under "FOR FURTHER INFORMATION CONTACT." All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under "ADDRESSES." A written summary of each meeting will be made a part of the administrative record.

BILLING CODE 4310-05-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 57

RIN 0905-AD01

Educational Assistance to Individuals from Disadvantaged Backgrounds

AGENCY: Public Health Service, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed regulation would revise the regulations governing the program for Educational Assistance to Individuals from Disadvantaged Backgrounds authorized by section 787 of the Public Health Service Act (the Act), to implement amendments made by the Health Professions Reauthorization Act of 1988, by adding: (1) A definition for "community-based program"; (2) a requirement for certain schools, during a 3-year period, to increase their first-year enrollments of disadvantaged individuals by at least 20 percent over the base year of 1987; (3) a statutory priority in the award of grants, beginning in Fiscal Year 1992, to schools that attain specified increases in their enrollments of disadvantaged individuals; (4) a 10 percent funding set-aside obligation for community-based programs; and (5) a change in the amount of grant funds obligated to institutions of higher education from 80 percent to 70 percent. In addition, this notice also proposes changes to conform the existing regulations with amendments made by the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1990, the Drug-Free Workplace Act of 1988, the Health Professions Training Assistance Act of 1985, the Compact of Free Association Act of 1985, the Omnibus Budget Reconciliation Act of 1981, and other changes which are ministerial and clarifying in nature. The Department believes that these proposed amendments will provide eligible schools and entities a stronger base to carry out programs to continue to identify, recruit, and assist individuals from disadvantaged backgrounds that are underrepresented in the health professions to enter and graduate from health and allied health professions schools.

DATES: As discussed below, comments are invited. To be considered, comments must be received by December 17, 1990.

ADDRESSES: Written comments should be addressed to Fitzhugh Mullan, M.D., Director, Bureau of Health Professions (BHPr), Health Resources and Services Administration, room 8-05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. All comments received will be available for public inspection and copying at the Office of Program Development, BHPr, room 8A-55, Parklawn Building, at the above address weekdays (Federal holidays excepted) between the hours of 8:30 am. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Clay E. Simpson, Jr., Ph.D., Director, Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8A-09, 5600 Fishers Lane, Rockville, Maryland 20857; telephone number: 301 443-2100.

SUPPLEMENTARY INFORMATION: Section 787 of the Act, as amended by the Health Professions Reauthorization Act of 1988, Title VI of Pub L. 100-607, authorizes the Secretary to make grants to schools of medicine, osteopathic medicine, public health, dentistry, veterinary medicine, optometry, pharmacy, allied health, chiropractic and podiatric medicine, and public and private nonprofit schools which offer graduate programs in clinical psychology, and other public or private nonprofit health or educational entities to carry out programs which assist individuals from disadvantaged backgrounds to enter and graduate from health professions and allied health professions schools. Regulations governing the Grants for Educational Assistance to Individuals from Disadvantaged Backgrounds are codified at 42 CFR part 57, subpart S.

The proposed provisions are described below, according to the sections of the regulations they affect.

Section 57.1802 "Definitions"

The Department is proposing to add the following definition to this section:

Community-based program means a program whose organizational headquarters is located in and which primarily serves: A Metropolitan Statistical Area, as designated by the Office of Management and Budget; a Bureau of Economic Analysis, U.S. Department of Commerce designated nonmetropolitan economic area; a county; or Indian tribe(s) as defined in 42 CFR 36.102(c), i.e., an Indian tribe, band, nation, rancheria, Pueblo, colony or community, including an Alaska Native Village or regional or village corporation.

This definition is necessary to incorporate the statutory requirement that 10 percent of the amount of funds appropriated during any fiscal year be set aside for community-based programs. The Secretary believes that any institution offering such a program, headquartered in a defined locality and serving predominantly that local population, is community based. The Department is proposing to use the areas specified because: (1) Metropolitan Statistical Areas and nonmetropolitan economic areas, as defined by the U.S. Department of Commerce, are recognized distinct geographic localities, (2) counties are clearly delineated local areas, and (3) Indian tribe areas, not delineated above, are defined under 42 CFR part 36 governing Indian Health Programs (§ 36.102(c)). Each of these areas is viewed as constituting a community.

Section 57.1804 "Who is Eligible for Educational Assistance?"

The Department is proposing to amend § 57.1804, by adding a new eligibility requirement that an individual must "have completed at least the junior year of high school (or its equivalent)", in order to receive educational assistance.

This requirement is necessary to target resources, in the earliest phase of the educational pathway toward a health or allied health career, to an educational level of students who have made tentative decisions and demonstrated interest in acquiring some of the knowledge and skills needed to seriously consider pursuing a health career.

Section 57.1805 "Program Requirements"

The Department is proposing to amend § 57.1805 by making a separate paragraph (c) from the existing requirement under paragraph (a)(5) of this section that the grantee must carry out at least two of the five purposes,

even if grant funds are requested or awarded for only one of them.

In addition, Public Law 100–607 added a requirement that schools of medicine, osteopathic medicine, public health, dentistry, veterinary medicine, optometry, pharmacy, allied health, chiropractic, podiatric medicine, and public and private nonprofit schools that offer graduate programs in clinical psychology that receive a grant under the program must, during a period of 3 years, commencing on the date of the award of the grant, increase their first-year enrollments of individuals from disadvantaged backgrounds by at least 20 percent over enrollments in the base year of 1987.

This requirement is applicable only to those schools that have a proportionate enrollment of individuals from disadvantaged backgrounds that is less than 200 percent of the national average percentage of such individuals in all schools of each health professions discipline. The effect of this requirement will not be seen until Fiscal Year 1992, when schools which have achieved this increase will be given a funding priority.

Accordingly, the Department is further proposing to amend § 57.1805 by adding a new paragraph (d) to require that schools subject to this provision submit an assurance to the Secretary that they will meet the specified increases.

Section 57.1806 "How Will Applications Be Evaluated?"

The Department is proposing to add statutory language under a new paragraph (b) which specifies that of the amounts appropriated under this section for any fiscal year—

1. 10 percent shall be obligated for community-based programs,

2. 70 percent shall be obligated for grants to institutions of higher education, and

3. Not more than 5 percent of such funds may be obligated for grants having the primary purpose of informing individuals about the existence and general nature of health careers.

The NPRM also proposes to incorporate statutory funding priorities under a new paragraph (c), which requires the Secretary to give priority in funding to the following schools, beginning in Fiscal Year 1992:

1. A school which previously received a grant under this subpart and increased its first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over that enrollment in the base year 1987 by the end of 3 years from the date of the award of the Health Career Opportunity Program Grant; and

2. A school which had not previously received a grant under this subpart that increased its first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over that enrollment in base year 1987, over any period of time.

Further, a provision is added in paragraph (c) to state that the Secretary will also consider other special factors relating to national needs as the Secretary may from time to time announce in the Federal Register. This action is necessary to provide flexibility in program management by enabling this training grant program to be more responsive to the emerging and changing public health care needs of the Nation.

For example, in Fiscal Year 1990, a priority is being given to applicants from health professions schools and allied health training centers for baccalaureate or higher level programs in specified disciplines that have a disadvantaged student enrollment of 35 percent or more, or can document over the past 3-year period a 10 percent increase in the number of first-year enrollees who are disadvantaged, or can document a 90 percent retention rate of disadvantaged students of the most recent graduating class.

Section 57.1808 "For What Purposes May Grant Funds Be Spent?"

The Department is proposing to add "associate degree", in paragraph (c)(2), as another level of a student's educational development at which grant funds could be offered to provide the student with expenses to cover one round trip from his or her residence and the training site if the student is not receiving educational assistance during that period of training.

The NPRM also proposes to amend § 57.1808, paragraph (d), by incorporating the statutory authority for "stipend" support, which allows for payments to be made to an individual under a fellowship or training grant in accordance with preestablished levels to provide for the individuals living expenses during the period of training. Consequently, paragraph (d)(1) is further revised to remove the requirement that a student establish a temporary new residence if the training site is beyond a reasonable commuting distance as a condition for receiving stipend support.

In addition to the changes proposed above, a number of technical and clarifying changes are included to conform the existing regulations with amendments made by Public Law 100–607; Public Law 101–121, the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1990; Public Law 100–690, the Drug-Free Workplace Act of 1988; Public Law 99–129, the Health Professions Training Assistance Act of 1985; Public Law 99–239, the Compact of Free Association Act of 1985; and Public Law 97–35, the Omnibus Budget Reconciliation Act of 1981, and current departmental grants policy language. These revisions are summarized below according to the section number and headings of the regulations:

1. Revise § 57.1802, entitled "*Definitions.*", to change the following terms:

(a) The definition of "health professions"—

(1) By revising the disciplines of "osteopathy" and "podiatry" to read "osteopathic medicine" and "podiatric medicine", in accordance with Public Law 100–607;

(2) By adding the disciplines of "health administration" in accordance with Public Law 97–35, "chiropractic" in accordance with Public Law 99–129, and "clinical psychology", in accordance with Public Law 100–607.

(b) The definition of "health professions schools"—

(1) By revising the reference to schools of "osteopathy" and "podiatry" to read "osteopathic medicine" and "podiatric medicine", in accordance with Public Law 100–607;

(2) By adding schools of "chiropractic" in accordance with Public Law 99–129, "graduate programs in health administration", in accordance with Public Law 97–35, and "graduate programs in clinical psychology", in accordance with Public Law 100–607.

(c) The definition of "nonprofit" to reflect the change in the statutory language made by Public Law 97–35.

(d) The definition of "school of allied health" by adding the phrase "or hospital-based educational entity", in accordance with Public Law 100–607.

(e) The definition of "Secretary" to reflect current departmental policy language.

(f) The definition of "State" to update those entities which, for purposes of this grant program, are viewed as a State, by inserting after the "Trust Territory of the Pacific Islands" the following: "(the Republic of Palau), the Republic of the Marshall Islands, and the Federated States of Micronesia", in accordance with Public Law 99–239.

2. Revise § 57.1803, entitled "Who is eligible to apply for a grant?", under paragraph (a), to provide current departmental grants policy language and to add a sentence to reflect that eligible institutions may submit an application as the Secretary may prescribe, and to add a footnote which provides the address for obtaining application forms and instructions. The application

number and the Office of Management and Budget approval number are also provided in the footnote.

3. Revise § 57.1804, entitled "Who is eligible for educational assistance?", to incorporate in paragraph (a) concerning an eligible individual's citizenship status, the Immigration and Naturalization Service policy as it relates to the admission into the United States, its territories and possessions, of citizens of the Republic of the Marshall Islands and the Federated States of Micronesia (formerly entities of the Trust Territory of the Pacific Islands), in accordance with Public Law 99–239;

4. Revise § 57.1807, entitled "How long does grant support last?", to:

(a) Remove the second sentence in paragraph (b) regarding the submission of a separate application to receive consideration for continued support and relocate a modified sentence regarding continuation support at the end of paragraph (c) to reflect current departmental grants policy language.

(b) Remove in paragraph (c) the phrase "commits or obligates the Federal Government" and reinsert in its place "shall commit or obligate the United States" to reflect current departmental grants policy language, and

(c) Remove paragraph (d), concerning federally-obligated grant funds, and relocate it in § 57.1808, entitled "For what purposes may grant funds be spent?";

5. Revise § 57.1808, entitled "For what purposes may grant funds be spent?", by:

(a) Removing paragraph (b) concerning expenditures that cannot be spent with grant funds and adding this information into paragraph (e), and

(b) Adding a new paragraph (b) on the expenditure of any balance of federally-obligated grant funds in order to reflect current departmental grants policy language.

6. Revise § 57.1809, entitled "What additional Department regulations apply to grantees?", by:

(a) Changing the citation number "45 CFR part 50, subpart D" to read "42 CFR part 50, subpart D,"

(b) Changing the footnote number and the footnote reference in the text cited after "45 CFR part 83" from "1" to "2", and

(c) Adding new Code of Federal Regulations citations to the regulations to bring this grant program into compliance with governmentwide requirements established for this Department under—

(1) 45 CFR part 76, in accordance with Public Law 100–690, title V, subtitle D, the Drug-Free Workplace Act of 1988, enacted on November 18, 1988, and a Notice and Interim-Final Rules, published in the Federal Register on January 31, 1989 (54 FR 4946), and

(2) 45 CFR part 93, in accordance with Public Law 101–121, section 319, the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1990, enacted on October 23, 1989, and an Interim-Final Rule, published in the Federal Register on February 26, 1990 (55 FR 6736).

Regulatory Flexibility Act and Executive Order 12291

These regulations govern a financial assistance program in which participation is voluntary. The rule will not exceed the threshold level of $100 million established in section (b) of Executive Order 12291. For these reasons, the Secretary has determined that this rule is not a major rule under Executive Order 12291 and a regulatory impact analysis is not required. Further, because the rule does not have a significant economic impact on a substantial number of small entities, a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980 is not required.

Paperwork Reduction Act of 1980

This proposed rule contains information collections which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980. The title, description, and respondent description of the information collections are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: Grants for Educational Assistance to Individuals from Disadvantaged Backgrounds.

Description: Each grantee must meet the requirements of section 705 of the Act concerning audit and inspection.

Description of Respondents: State and local governments, nonprofit institutions.

Estimated Annual Reporting and Recordkeeping Burden:

Section number	Annual No. of respondents	Annual frequency	Average burden per response	Annual burden hours
57.1803	(This section contains a reporting burden which has already been cleared under OMB Nos. 0915-0060 and 0915-0061.)			
57.1810 [1]	160	1	4	640

[1] Grantee institutions must submit an audit report, every 2 years as required by section 705 of the PHS Act. It has been estimated that the audit requires approximately 8 hours. This burden has been prorated over 2 years, producing an annual burden of 4 hours per grantee.

We have submitted a copy of this proposed rule to OMB for its review of these information collections. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, Washington, DC 20503.

List of Subjects in 42 CFR Part 57

Dental health, Education of the disadvantaged, Educational facilities, Educational study programs, Grant programs-education, Grant programs-health, Health facilities, Health professions, Loan programs-health, Medical and dental schools, Student aid.

Accordingly, 42 CFR part 57, subpart S is proposed to be amended as set forth below:

Dated: June 20, 1990.

James O. Mason,

Assistant Secretary for Health.

Approved: September 27, 1990

Louis W. Sullivan,

Secretary.

(*Catalog of Federal Domestic Assistance*, No. 13.822, Health Careers Opportunity Program)

PART 57—GRANTS FOR CONSTRUCTION OF TEACHING FACILITIES, EDUCATIONAL IMPROVEMENTS, SCHOLARSHIPS AND STUDENT LOANS

Subpart S—Educational Assistance to Individuals from Disadvantaged Backgrounds

1. The authority citation for subpart S is revised to read as follows:

Authority: Sec. 215, Public Health Service Act, 58 Stat. 690, as amended by 63 Stat. 35 (42 U.S.C. 216); Sec. 787, Public Health Service Act, 90 Stat. 2317, as amended by 95 Stat. 623, 99 Stat. 941, and 102 Stat. 3131–3132 (42 U.S.C. 295g–7).

2. Section 57.1802 is amended by adding the definition of "community-based program" and by revising the definitions of "health professions", "health professions schools", "nonprofit", "school of allied health", "Secretary", and "State" to read as follows:

§ 57.1802 Definitions.

* * * * *

Community-based program means a program whose organizational headquarters is located in and which primarily serves: A Metropolitan Statistical Area, as designated by the Office of Management and Budget; a Bureau of Economic Analysis, U.S. Department of Commerce designated nonmetropolitan economic area; a county; or Indian tribe(s) as defined in 42 CFR 36.102(c), i.e., an Indian tribe, band, nation, rancheria, Pueblo, colony or community, including an Alaska Native Village or regional or village corporation.

Health professions means the professions of medicine, dentistry, osteopathic medicine, pharmacy, optometry, podiatric medicine, veterinary medicine, public health, chiropractic, health administration, and clinical psychology.

Health professions schools means schools of medicine, dentistry, osteopathic medicine, pharmacy, optometry, podiatric medicine, veterinary medicine, public health, chiropractic, graduate programs in health administration, or graduate programs in clinical psychology, as defined in section 701(4) of the Act and as accredited in section 701(5) of the Act.

* * * * *

Nonprofit refers to the status of an entity owned and operated by one or more corporations or associations, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

School of allied health means a public or private nonprofit college, junior college, university or hospital-based educational entity which provides or is accredited to provide a degree program in an allied health discipline and which meets all the criteria in section 701(10) of the Act.

Secretary means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom the authority involved has been delegated.

State includes, in addition to the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands (the Republic of Palau), the Republic of the Marshall Islands, and the Federated States of Micronesia.

3. Section 57.1803 is amended by revising paragraph (a) to read as follows:

§ 57.1803 Who is eligible to apply for a grant?

(a) Health professions schools, schools of allied health, and public or private nonprofit health or educational entities which are located in a State and provide health or educational programs as one of their major functions may apply for a grant under this subpart. Each eligible applicant desiring a grant under this subpart shall submit an application in the form and at such time as the Secretary may prescribe.[1]

* * * * *

4. Section 57.1804 is amended by revising paragraph (a), by redesignating paragraph (b) as (c), and by adding a new paragraph (b) to read as follows:

§ 57.1804 Who is eligible for educational assistance?

* * * * *

(a) Be a resident of the United States and either a citizen or national of the United States, an alien lawfully admitted for permanent residence in the United States, a citizen of the Commonwealth of the Northern Mariana Islands, a citizen of the Trust Territory of the Pacific Islands (TTPI) (consisting of the Republic of Palau), or a citizen of the Republic of the Marshall Islands or the Federated States of Micronesia (both formerly part of the TTPI);

(b) Have completed at least the junior year of high school (or its equivalent); and

* * * * *

5. Section 57.1805 is amended by removing the last sentence in paragraph (a)(5); by redesignating paragraph (b) as (c); and by adding new paragraphs (b) and (d) to read as follows:

§ 57.1805 Program requirements.

* * * * *

(b) The grantee must carry out at least two of the five purposes, even if grant funds are requested or awarded for only one of them.

* * * * *

(d) Grantees which: (1) Are schools of medicine, osteopathic medicine, public health, dentistry, veterinary medicine, optometry, pharmacy, allied health, chiropractic, podiatric medicine, and public and private nonprofit schools that offer graduate programs in clinical psychology; and

(2) Have a proportionate enrollment of individuals from disadvantaged backgrounds that is less than 200 percent of the national average percentage of such individuals in all schools of each health professions discipline must assure the Secretary that during a period of 3 years, commencing on the date of the award of the grant, they will increase their first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over enrollments in the base year of 1987.

6. Section 57.1806 is amended by redesignating paragraphs (a) through (f) as paragraphs (1) through (6) and designating the introductory text as paragraph (a); by designating the concluding text of the section as paragraph (b) and revising it; and by adding a new paragraph (c) to read as follows:

§ 57.1806 How will applications be evaluated?

* * * * *

(b) Within the limits of funds available, the Secretary will award grants to approved applicants with projects that will best promote the purposes of section 787 of the Act. Of the amounts appropriated under this section for any fiscal year, 10 percent shall be obligated for community-based programs and 70 percent shall be obligated for grants to institutions of higher education and not more than 5 percent of such funds may be obligated for grants having the primary purpose of informing individuals about the existence and general nature of health careers. Section 787(a)(2)(G) authorizes

[1] Applications and instructions (Form PHS 6025–1, OMB #0915–0060) may be obtained from the Grants Management Officer, Bureau of Health Professions, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

the payment of such stipends as the Secretary may approve for participants in a project for any period of education at any school eligible for a grant under this subpart.

(c) *Funding priority.* (1) In determining the funding of applications approved under paragraph (a) of this section, the Secretary shall give priority to schools described in § 57.1805(d), beginning in Fiscal Year 1992—

(i) Which previously received a grant under this subpart and increased its first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over that enrollment in the base year 1987 by the end of 3 years from the date of the award of the HCOP grant; and

(ii) Which had not previously received a grant under this subpart that increased its first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over that enrollment in the base year 1987, over any period of time.

(2) In addition, should specific needs warrant, the Secretary will also consider other special factors relating to national needs as the Secretary may from time to time announce in the Federal Register.

7. Section 57.1807 is amended by removing the second sentence in paragraph (b), by removing paragraph (d), and by revising paragraph (c) to read as follows:

§ 57.1807 How long does grant support last?

* * * * *

(c) Neither the approval of any application nor the award of any grant shall commit or obligate the United States in any way to make any additional, supplemental, continuation or other award with respect to any approved application or portion of an approved application. For continuation support, grantees must make separate application at such times and in such a form as the Secretary may prescribe.

8. Section 57.1808 is amended by revising paragraph (b), the introductory text to paragraph (c), paragraph (c)(2), the introductory text to paragraph (d), paragraph (d)(1), and paragraph (e) to read as follows:

§ 57.1808 For what purpose may grant funds be spent?

* * * * *

(b) Any balance of federally-obligated grant funds remaining unobligated by the grantee at the end of a budget period may be carried forward provided specific approval is granted by the Secretary. If at any time during the budget period it becomes apparent to the Secretary that the amount of Federal funds provided and made available to the grantee for that period, including any unobligated balance carried forward from prior periods, exceeds the grantee's needs for the period, the Secretary may adjust the amounts provided by withdrawing the excess. A budget period is an interval of time (usually 12 months) into which the project period is divided for funding and reporting purposes.

(c) The grantee may spend grant funds to provide one round trip for each individual in the program between his or her residence and the training site if:

* * * * *

(2) The educational assistance is not offered at a time when the individual would be at the training site as a student in a regular course of education leading to a high school diploma, associate degree, undergraduate degree, or degree in the health or allied health professions.

(d) The grantee may spend grant funds to pay individuals in the program a stipend when the grantee determines that:

(1) The condition in paragraph (c)(2) of this section exists;

* * * * *

(e) The grantee may not spend grant funds to pay tuition or fees, train program staff, retrain health professionals, or for sectarian instruction, or for any religious purpose.

9. Section 57.1809 is amended by revising the number in the citation of "45 CFR part 50, subpart D" to read "42 CFR part 50, subpart D;" by revising the footnote number and the footnote reference in the text cited after "45 CFR part 83" from "1" to "2"; and by adding in numerical order the following new CFR citations to read as follows:

§ 57.1809 What additional Department regulations apply to grantees?

* * * * *

45 CFR Part 76—Governmentwide Debarment and Suspension (non-procurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)

DEPARTMENT OF AGRICULTURE

Office of the Secretary

National Commission on Wildfire Disasters; Nominations

AGENCY: Forest Service, USDA.

ACTION: Notice; extension of nomination period.

SUMMARY: In a notice published Thursday, September 6, 1990, (55 FR 36673), the Department of Agriculture invited nominations of agencies, organizations, and interested persons to serve as members of the National Commission on Wildfire Disasters. This Commission is authorized by the Wildfire Disaster Recovery Act of 1989. Due to a delay in sending the direct notices by mail, the date for receiving nominations is extended to November 2, 1990.

DATES: Nominations must be received in writing by Friday, November 2, 1990.

ADDRESSES: Send written nominations to Chief (5100), Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090.

FOR FURTHER INFORMATION CONTACT: Dennis W. Pendleton, Fire and Aviation Management Staff, Forest Service (202) 453-8511.

Dated: October 10, 1990.

Allen J. West,

Deputy Chief, State and Private Forestry.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

International Trade Administration

[A-479-801]

Antidumping Duty Order; Industrial Nitrocellulose From Yugoslavia

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: In its investigation, the U.S. Department of Commerce determined that industrial nitrocellulose from Yugoslavia was being sold in the United States at less than fair value. In a separate investigation, the U.S. International Trade Commission (ITC) determined that a U.S. industry is being materially injured by reason of imports of industrial nitrocellulose from Yugoslavia.

Therefore, based on these findings, all unliquidated entries or warehouse withdrawals of industrial nitrocellulose for consumption from Yugoslavia made on or after April 24, 1990, the date on which the Department published its "Preliminary Determination" notice in the Federal Register, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the Federal Register.

EFFECTIVE DATE: October 16, 1990.

FOR FURTHER INFORMATION CONTACT: Karmi Leiman or Bradford Ward, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-3498 or 377-5288, respectively.

SUPPLEMENTARY INFORMATION: The product covered by this order is industrial nitrocellulose, currently classifiable under HTS subheading 3912.20.00. The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive as to the scope of the product coverage.

Industrial nitrocellulose is a dry, white, amorphous synthetic chemical with a nitrogen content between 10.8 and 12.2 percent, and is produced from the reaction of cellulose with nitric acid. Industrial nitrocellulose is used as a film-former in coatings, lacquers, furniture finishes, and printing inks. The scope of this order does not include explosive grade nitrocellulose, which has a nitrogen content of greater than 12.2 percent.

In accordance with section 735(a) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)), on August 21, 1990, the Department made its final determination that industrial nitrocellulose from Yugoslavia is being sold at less than fair value (55 FR 34046, August 27, 1990). On June 28, 1990, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such imports materially injure a U.S. industry.

Therefore, in accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department will direct U.S. Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of industrial nitrocellulose from Yugoslavia. These antidumping duties will be assessed on all unliquidated entries of industrial nitrocellulose from Yugoslavia entered, or withdrawn from warehouse, for consumption on or after April 24, 1990, the date on which the Department published its "Preliminary Determination" notice in the Federal Register (55 FR 7763).

On or after the date of publication of this notice in the Federal Register, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below:

Manufacturers/producers/exporters	Margin percentage
Milan Blagojevic	10.81
All others	10.81

This notice constitutes an antidumping duty order with respect to industrial nitrocellulose from Yugoslavia, pursuant to section 736(a) of the Act (19 U.S.C. 1673e(a)). Interested parties may contact the Central Records Unit, Room B-099 of the Main Commerce Building, for copies of an updated list of antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Act (19 U.S.C. 1673e(a)) and 19 CFR 353.21.

Dated: October 11, 1990.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration

[FR Doc. 90-24481 Filed 10-15-90; 8:45 am]

BILLING CODE 3510-DS-M

ACTION: Notice of application for an amendment to an Export Trade Certificate of Review.

Export Trade Certificate of Review

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an amendment to an Export Trade Certificate of Review. This notice summarizes the amendment and requests comments relevant to whether the amended Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the Federal Register identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether the Certificate should be amended. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, room 1800H, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 90-A0005."

OETCA has received the following application for an amendment to Export Trade Certificate of Review No. 90-00005, which was issued on August 10, 1990 (55 FR 33740, August 17, 1990). The applicant has requested expedited review of the application.

Summary of the Application

Applicant: California Kiwifruit Commission ("CKC"), 1540 River Park Drive, suite 110, Sacramento, California 95815.
Contact: Jennifer K. Wirick, Esquire.
Telephone: (202) 347-9300.
Application No.: 90-A0005.
Date Deemed Submitted: October 5, 1990.
Request for Amended "Members":

CKC seeks to amend its Certificate to add California Kiwifruit Exporters Association as a "Member" within the meaning of § 325.2(1) of the Regulations (15 CFR 325.2 (1)).

Dated: October 11, 1990.

George Muller,

Director, Office of Export Trading Company Affairs.

Export Trade Certificate of Review

ACTION: Notice of application for an amendment to an Export Trade Certificate of Review.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an amendment to an Export Trade Certificate of Review. This notice summarizes the amendment and requests comments relevant to whether the amended Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the Federal Register identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether the Certificate should be amended. An original and five (5) copies should be submitted not later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, room 1800H, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 88-00017, which was issued on May 26, 1989 (54 FR 24932, June 12, 1989). The Certificate has been previously amended (see 55 FR 14100, April 16, 1990).

Summary of the Application

Applicant: Construction Industry Manufacturers, Association ("CIMA"), 111 East Wisconsin Avenue, suite 940, Milwaukee, Wisconsin 53202.
Contact: J. William Peterson, Director of Government Affairs.
Telephone: 202/479-2866.
Application No.: 88-3A017.
Date Deemed Submitted: October 5, 1990.
Request For Amended "Members":

CIMA seeks to amend its Certificate to:

1. Add the following companies as "Members" within the meaning of § 325.2(1) of the Regulations (15 CFR 325.2(1)): LaBounty Manufacturing, Inc., Two Harbors, Minnesota, and Gehl Company, West Bend, Wisconsin;
2. Delete Caterpillar Inc. and J.I. Case Company as "Members" of the Certificate; and
3. Delete paragraph 7 of the "Export Trade Activities and Methods of Operation" from the Certificate. Paragraph 7 limits the discussion and exchange of price information when designated Members engage in the

certified export trade activities and methods of operation with respect to particular products.

Dated: October 11, 1990.

George Muller,

Director, Office of Export Trading Company Affairs.

DEPARTMENT OF DEFENSE

Department of the Army

Armed Forces Institute of Pathology, Scientific Advisory Board; Open Meeting

In order to comply with section 10(a)(2) of the Federal Advisory Committee Act (Pub. Law 92-463), notice is hereby given of a meeting of the Armed Forces Institute of Pathology's Scientific Advisory Board, November 7 and 8, 1990, at 0830 hours in the Director's Conference room, Armed Forces Institute of Pathology, Washington, DC 20306-6000. This meeting will be open to the public.

The proposed agenda will include professional discussion of the mission of the Armed Forces Institute of Pathology relating to consultation, education and research. The Executive Secretary from whom substantive program information may be obtained is Colonel John S. Jewell, Executive Officer, Armed Forces Institute of Pathology, Washington, DC 20306-6000, telephone: (202) 576-2900.

Kenneth L. Denton,

Alternate Army Federal Register Liaison Officer.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 10221-001, Utah]

Beaver City Corp.; Availability of Environmental Assessment

October 9, 1990.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for minor license for the proposed Beaver City Canyon Upper Project located on Beaver Creek in Beaver County near Beaver City, Utah, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigation measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3308, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 90-24275 Filed 10-15-90; 8:45 am]

BILLING CODE 6717-01-M

Application Filed with the Commission

October 9, 1990.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of filing:* Transfer of License.

b. *Project No.:* 2233-021.

c. *Date filed:* September 27, 1990.

d. *Applicant:* James River II, Inc., Portland General Electric Co., and Smurfit Newsprint Corporation (Transferors) and Simpson Paper (Oregon) Company, Portland General Electric Co., and Smurfit Newsprint Corporation (Transferees).

e. *Name of project:* Williamette Falls.

f. *Location:* On the Williamette River in Clakamas County, Oregon.

g. *Filed pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant contact:* Priscilla W. Derick, Perkins Coie, 411-108th Avenue NE., Suite 1800, Bellevue, WA 98004, (206) 453-7311.

i. *Commission contact:* Mr. James Hunter, (202) 357-0883.

j. *Comment date:* November 12, 1990.

k. *Description of proposed action:* On June 21, 1960, a major license was issued for the construction, operation, and maintenance of the Williamette Falls Project. James River II, Inc. proposes to transfer its interests and obligations under the license to Simpson Paper (Oregon) Company. The proposed transfer will not change the operation of the project or the use of project power. The Transferors certify that they have fully complied with the terms and conditions of the license. The Transferees accept all the terms and conditions of the license and agree to be bound thereby to the same extent as though they were the original licensee.

1. This notice also consists of the following standard paragraphs: B and C.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 1027-UPC, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Energy Research

Basic Energy Sciences Advisory Committee; Renewal

Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act, and § 101-6.1015 of the Final Rule on Federal Advisory Committee Management (41 CFR 101-6.1015), and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Basic Energy Sciences Advisory Committee has been

renewed for a 2-year period. The Committee will continue to provide advice to the Director, Office of Energy Research, on the Basic Energy Sciences (BES) program.

The renewal of the Basic Energy Sciences Advisory Committee charter has been determined to be essential the conduct of the Department's business and to be in the public interest in connection with the performance of duties imposed upon the Department of Energy by law. The Committee will operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), the Department of Energy Organization Act (Pub. L. 95-91), and regulations and directives implementing those statutes.

The Committee will continue to be balanced with representatives of national laboratories, industry, and universities involved in basic energy sciences. Particular attention will continue to be paid to obtaining a balance of disciplines, interests, experiences, points of view, and geography.

Further information regarding this advisory committee can be obtained from Elinor Donnelly (202-586-3448).

Issued in Washington, DC, on October 11, 1990.

J. Robert Franklin,

Deputy Advisory Committee, Management Officer.

[FR Doc. 90-24337 Filed 10-15-90; 8:45 am]

BILLING CODE 6450-01-M

Office of Fossil Energy

[FE Docket No. 90-74-NG]

Goetz Energy Corp.; Application To Export Natural Gas to and Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for authorization to export natural gas to and import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on August 24, 1990, of an application filed by Goetz Energy Corporation (Goetz) for authorization to export to Canada at St. Clair, Michigan, up to 25,000 Mcf per day of natural gas plus such additional gas as may be required for fuel use, and to import from Canada at Grand Island, New York, up to 25,000 Mcf per day of natural gas over a fifteen year period. The application was amended by a letter that was received by DOE/FE on September 28, 1990. Goetz anticipates purchasing the natural gas from southwestern U.S. producers under long-term contracts lasting five to fifteen years. It intends to utilize firm transportation service on the proposed Empire State Pipeline, whose applications for construction currently are pending before the New York State Public Service Commission and the Federal Energy Regulatory Commission (FERC). Goetz also has entered into or is negotiating agreements for firm transportation with ANR Pipeline Company (ANR), Great Lakes Transmission Company (Great Lakes), TransCanada Pipelines, and Union Gas Limited (Union).

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., e.s.t., November 15, 1990.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Linda Silverman, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F-094, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-7249

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: Goetz is a New York corporation whose principal place of business is in Buffalo, New York. The company is a marketer of natural gas and petroleum products to customers in a territory that includes Buffalo, Rochester, and Syracuse, New York.

Goetz currently relies on CNG Transmission Corporation (CNG) to provide interruptible transportation for its customers behind interconnecting local distribution companies encompassing Rochester Gas and Electric Corporation, Niagara Mohawk Power Corporation, and specific areas of New York State Electric and Gas Corporation. The company also is dependent upon National Fuel Supply Corporation (NFSC) to provide interruptible transportation for its customers behind National Fuel Distribution Corporation (NFDC). Goetz is attempting to secure firm natural gas supplies and transportation in order to reduce its dependence upon CNG and NFSC and to obtain alternative natural gas supplies and firm transportation at competitive prices and on favorable terms. The company maintains that this will result in a total delivered cost of natural gas that, during the term of the arrangements, is competitive with existing and other sources of natural gas.

According to the application, the same gas would be exported and imported solely as part of a transportation arrangement, and would not be sold or stored in Canada; consequently, DOE does not believe that it is necessary to consider in its evaluation domestic need for the gas with respect to the proposed export, nor competitiveness, need for the gas, or security of supply with respect to the proposed import. DOE will consider the impact of the transportation arrangement on the availability of gas in markets served by the proposed Empire State Pipeline and by the pipeline systems of Great Lakes, ANR, and United.

The applicant asserts that delivery of the subject natural gas will not deprive the United States or any region of the country of needed natural gas and will further the goal of providing additional volumes of natural gas to the northeastern United States. Parties opposing the arrangement bear the burden of overcoming these assertions.

All parties should be aware that if the requested export/import arrangement is approved, the authorization would be conditioned on the filing of quarterly reports indicating the volume of natural gas exported and imported.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.*, requires the DOE to give appropriate consideration to the environmental effects of its proposed actions. FERC currently is performing an environmental review of the impacts of constructing and operating the proposed facilities related to the Empire State Pipeline project in FERC Docket Nos. CP 90-316 and CP 90-317. The DOE will independently review the results of the FERC environmental evaluation of this project in the course of making its own environmental determination. No final decision will be issued in this proceeding until the DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Goetz' application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, October 11, 1990.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 90-24338 Filed 10-15-90; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3852-7]

Science Advisory Board, Meetings of Standing Committees, Open Meeting—October 25-26, 1990

Pursuant to the Federal Advisory Committee Act, Pub. L. 92-463, notice is hereby given that five of the permanent, Standing Committees of the U.S. EPA's Science Advisory Board (SAB) will hold public meetings on October 25-26, 1990 in the Washington, DC. metropolitan area. Information concerning each Committee and its meeting is given below. For further information concerning a particular committee, please contact the SAB Staff member(s) listed for that committee.

Environmental Engineering Committee: The Environmental Engineering Committee (EEC) will meet at U.S. Environmental Protection Agency Headquarters, Waterside Mall Conference Center, Room 2-South, 401 M Street, SW., Washington, DC, 20460. This meeting will start at 9:00 a.m. on Thursday, October 25th and 8:30 a.m. on Friday, October 26th and will adjourn no later than 3:00 p.m. on October 26th.

The main purpose of this meeting will be to plan EEC review activities for Fiscal Year (FY) 1991 and to receive briefings on additional possible review topics for FY 1991 and beyond. The FY 1991 topics to be discussed include, but are not limited to the following: review of treatability studies applicable to Superfund sites, a follow-up study to examine the Agency's pollution prevention strategy, review of the Office of Research and Development's (ORD's) global climate mitigation plans, a planned consultation/review of ORD's constructed wetlands program for treatment of wastewater streams, ORD's research plans for bioremediation technology development, follow-up review with the Office of Solid Waste (OSW) on the EEC's self-initiated study on leachability. Other possible review topics will be discussed as they are made available to the EEC prior to the meeting and as time permits. It is anticipated that two reports (Municipal Solid Waste Review and the Leachability Report) which are being finalized by Subcommittees of the EEC will have some discussion and closure comments at this meeting. SAB contacts are: Dr. K. Jack Kooyoomjian, Designated Federal Official, and Mrs. Marcy Jolly, Staff Secretary.

Ecological Processes and Effects Committee: The Ecological Processes and Effects Committee (EPEC) will meet on October 25-26, 1990 at the Holiday Inn, 550 C Street, SW., Washington, DC, 20024. This meeting will start at 9:00 a.m. on October 25th and will adjourn no later than 1:00 p.m. on October 26th.

The main purpose of this meeting will be to plan EPEC review activities for FY 1991 nd to receive briefings on current regulatory activities. The SAB contacts are: Dr. Edward Bender, Designated Federal Official, and Mrs. Frances Dolby, Staff Secretary.

Drinking Water Committee: The Drinking Water Committee will meet on October 25-26, 1990 at the Holiday Inn, 550 C Street, SW., Washington, DC 20024. This meeting will start at 8:30 a.m. on October 25th and will adjourn no later than 1:00 p.m. October 26th.

The main purpose of this meeting will be to review the criteria document for trihalomethanes and receive briefings on current regulatory activities. Documentation for this meeting is available from Ms. Jennifer Orme, Office of Drinking Water, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, telephone (202) 382-7586. SAB contacts are: Dr. C. Richard Cothern, Designated Federal Official, and Ms. Darlene Sewell, Staff Secretary.

Radiation Advisory Committee: The Radiation Advisory Committee (RAC) will meet on October 25-26, 1990 at the U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. On October 25th, the Committee will meet in the Administrator's Conference Room (Room 1101/1103 West Tower), and on October 26th, the Committee will meet in Room 9-North, Waterside Mall Conference Center. The meeting will begin at 9:00 a.m. on October 25th and adjourn no later than 2:00 p.m. on October 26th.

The Committee will consider its priorities and schedules for FY91, be briefed on EPA radiation related activities (including the Idaho Radionuclide Exposure Study report), and consider reports now in preparation

including such issues as: Radionuclides in drinking water, the national survey for radon in schools, and the correlation of short-term and long-term tests for radon. SAB contacts are: Mrs. Kathleen Conway, Designated Federal Official, and Mrs. Dorothy Clark, Staff Secretary.

Environmental Health Committee: The Environmental Health Committee will meet on October 25–26, 1990 in the Howard Johnson Hotel, 2650 Jefferson Davis Highway, Arlington, Virginia 22202. The hotel telephone number is (703)–684–7200. The meeting will start at 9:00 a.m. on October 25th, and will adjourn no later than 5:00 p.m. on October 26th.

The main purpose of this meeting is to consult with the EPA's Office of Toxic Substances (OTS) on issues related to formaldehyde exposure, to review a proposed methodology for the calculation of Inhalation Reference Concentrations (RfCs—the estimate of a daily inhalation exposure (of a given agent) to the human population that is likely to be without an appreciable risk of deleterious non-cancer effects during a lifetime), to receive a briefing from the EPA Risk Assessment Forum on current risk assessment issues, and to discuss the Committee's plans for reviews during Fiscal 1991.

Anyone desiring additional information on the formaldehyde topic should contact Dr. Vanessa Vu, Office of Toxic Substances, (TS–796), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, telephone (202)–382–4356. For information on the RfC topic, contact Dr. Chon Shoaf, Environmental Criteria and Assessment Office, (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711, telephone (919)–541–4144. The SAB contacts are: Mr. Samuel Rondberg, Designated Federal Official and Ms. Mary Winston, Staff Secretary.

SUPPLEMENTARY INFORMATION: All meetings are open to the public. Any member of the public wishing further information on any meeting, or those who wish to submit written or oral comments concerning any issue given above, should contact the appropriate Designated Federal Official. Agendas and Committee rosters are available from the appropriate Staff Secretary. SAB Staff may be reached at: Science Advisory Board (A101F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, telephone (202) 382–2552, or FAX (202) 475–9693. Requests to provide oral comments at any of the meetings should be made to the appropriate DFO no later than October 12, 1990. The SAB expects that the public statements presented at its meetings will not be repetitive of previously submitted oral or written statements. In general, each individual or group making an oral presentation will be limited to a total of ten minutes. Speakers are asked to provide 20 copies of their written remarks to the SAB Staff no later than the day of the meeting. Seating at all meetings will be on a first come basis.

Dated: October 1, 1990.

Donald G. Barnes,

Director, Science Advisory Board.

BILLING CODE 6560–50–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Port Authority of New York and New Jersey/Maher Terminals, Inc.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC., Office of the Federal Maritime Commission, 1100 L Street, NW., room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–010694–004.

Title: Port Authority of New York and New Jersey/Maher Terminals, Inc. Terminal Agreement.

Parties: Port Authority of New York and New Jersey/Maher Terminals, Inc.

Synopsis: The Agreement amends the parties' basic agreement to provide for extending the term of the agreement. The Agreement's term will expire on the earlier of: October 31, 1990; or, the day preceding the date of commencement of the term of a new lease proposed to be entered into by the parties.

By Order of the Federal Maritime Commission.

Dated: October 10, 1990.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of August 21, 1990

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on August 21, 1990.[1] The directive was issued to the Federal Reserve Bank of New York as follows:

The information reviewed at this meeting suggests that economic activity is continuing to expand at a relatively slow pace. After a sizable rise in May and June, total nonfarm payroll employment registered a large decline in July, much but not all of which reflected layoffs of temporary census workers. The civilian unemployment rate rose to 5.5 percent in July, just above the narrow range that had prevailed for an extended period. Industrial production was unchanged in July after rising appreciably in the second quarter. Retail sales rose considerably on balance over June and July after declines in earlier months. Available indicators point to a sluggish trend in business capital spending. Residential construction weakened further in July. The nominal

[1] Copies of the Record of policy actions of the Committee for the meeting of August 21, 1990, are available upon request to The Board of Governors of the Federal Reserve System, Washington, DC 20551.

U.S. merchandise trade deficit narrowed sharply in June; for the second quarter, the trade deficit was substantially reduced from its first-quarter rate. Consumer prices rose appreciably further in June and July, while producer prices were about unchanged over the two months. The latest data on labor costs suggest no improvement in underlying trends. Crude oil prices have risen sharply over the last several weeks.

Short-term interest rates have fallen somewhat since the Committee meeting on July 2–3, while rates in bond markets have risen appreciably, as oil prices have increased. The trade-weighted foreign exchange value of the dollar in terms of the other G–10 currencies declined considerably over the intermeeting period.

M2 grew slowly in June and July, while M3 was little changed; available data for August suggest a partial rebound in both aggregates. Growth of M2 and especially of M3 has been damped by the continuing contraction of deposits at thrift institutions resulting from the restructuring of the thrift industry. Through July, expansion of both M2 and M3 was estimated to be in the lower portions of their respective ranges for 1990. Expansion of total domestic nonfinancial debt appears to have been near the midpoint of its monitoring range.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability, promote growth in output on sustainable basis, and contribute to an improved pattern of international transactions. In furtherance of these objectives, the Committee at its meeting in July reaffirmed the range it had established in February for M2 growth of 3 to 7 percent, measured from the fourth quarter of 1989 to the fourth quarter of 1990. The Committee in July also retained the monitoring range of 5 to 9 percent for the year that it had set for growth of total domestic nonfinancial debt. With regard to M3, the Committee recognized that the ongoing restructuring of thrift depository institutions had depressed its growth relative to spending and total credit more than anticipated. Taking account of the unexpectedly strong M3 velocity, the Committee decided in July to reduce the 1990 range to 1 to 5 percent. For 1991, the Committee agreed on provisional ranges for monetary growth, measured from the fourth quarter of 1990 to the fourth quarter of 1991, of 2½ to 6½ percent for M2 and 1 to 5 percent for M3. The Committee tentatively set the associated monitoring range for growth of total domestic non-financial debt at 4½ to 8½ percent for 1991. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. Taking account of progress toward price stability, the strength of the business expansion, the behavior of the monetary aggregates, and developments in foreign exchange and domestic financial markets, slightly greater reserve restraint might or somewhat lesser reserve restraint would be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with growth of M2 and M3 over the period from June through September at annual rates of about 4 and 2½ percent respectively. The Chairman may call for Committee consultation if it appears to the Manager for Domestic Operations that reserve conditions during the period before the next meeting are likely to be associated with a federal funds rate persistently outside a range of 6 to 10 percent.

By order of the Federal Open Market Committee, October 10, 1990.

Normand Bernard,

Assistant Secretary Federal Open Market Committee.

BILLING CODE 6210-01-M

Robert L. and Claudia A. Beauprez; Change in Bank Control Notice; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for the notice or to the offices of the Board of Governors. Comments must be received not later than October 31, 1990.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Robert L. and Claudia A. Beauprez, Lafayette, Colorado; to acquire an additional 38.03 percent of the voting shares of Front Range Capital Corporation, Lafayette, Colorado, and thereby indirectly acquire Bank VII, Lafayette, Colorado.

Board of Governors of the Federal Reserve System, October 10, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

First Union Corporation, et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated

or the offices of the Board of Governors not later than November 6, 1990.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President), 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Union Corporation*, Charlotte, North Carolina; to engage *de novo* through its subsidiary, First Union Securities, Inc., Charlotte, North Carolina, in buying and selling loans and others extensions of credit and loan servicing for its own account or the account of other pursuant to § 225.25(b)(1); and including personal or real property leases which serve as the functional equivalent of extensions of credit to the leases of the property pursuant to § 225.25(b)(5) of the Board's Regulation Y.

B. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Assistant Vice President), 101 Market Street, San Francisco, California 94105:

1. *West Coast Bancorp*, Newport, Oregon; to engage *de novo* in making, acquiring, servicing and brokering loans pursuant to § 225.25(b)(1); and leasing personal and real property pursuant to § 225.25(b)(5) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 10, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Paloma Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than November 6, 1990.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Paloma Bancshares, Inc., Paloma, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Paloma Exchange Bank, Paloma, Illinois.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Decatur Investment, Inc., Oberlin, Kansas; to merge with Western Kansas Investment, Inc., Winona, Kansas, and thereby indirectly acquire The Bank, Oakley, Kansas.

Board of Governors of the Federal Reserve System, October 10, 1990.

Peotone Bancorp, Inc., Peotone, IL; Applications To Engage de Novo in Permissible Nonbanking Activities; Correction

This notice corrects a previous Federal Register Notice (FR Doc. 90-22752) published at page 39323 of the issue for Wednesday, September 26, 1990.

Under the Federal Reserve Bank of Chicago, the entry for Peotone Bancorp, Inc. is amended to read as follows:

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Peotone Bancorp, Inc., Peotone, Illinois; to engage *de novo* through its subsidiary, Rock River Bancorporation, Inc., Oregon, Illinois, in providing general insurance agency services including life insurance, health insurance, property and casualty insurance, and fixed rate annuities in a town with a population of less than 5,000, pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in Oregon, Illinois. Applicant also will engage in credit life insurance as agent for insurance that is directly related to an extension of credit by Rock River Bancorporation or any of its subsidiaries and limited to assuring the repayment of the outstanding balance due on the extension of credit in the event of death, disability, or involuntary unemployment of the debtor, pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y.

In addition, the heading should have read as set forth above.

Comments on this application must be received by October 31, 1990.

Board of Governors of the Federal Reserve System, October 10, 1990.

Jennifer J. Johnson,

Associate Secretary of the Board.

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

BILLING CODE 6750-01-M

[File No. 892-3178]

Guild Mortgage Co.; Proposed Consent Agreement With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a San Diego, Ca., corporation to accurately calculate and disclose the annual percentage rate, finance charge, payment schedule and other information required by Regulation Z; to make adjustments to the accounts of consumers listed; and for adjustments resulting from mortgage insurance errors, to pay consumer redress totalling approximately $500,000 over a five-year-period.

DATES: Comments must be received on or before December 17, 1990.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Carole Reynolds or Stephen Cohen, FTC/S-4429, Washington, DC 20580. (202) 326-3230 or 326-3222.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order To Cease and Desist

In the Matter of Guild Mortgage Co., a corporation.

The agreement herein, by and between Guild Mortgage Company (hereinafter sometimes referred to as "proposed respondent") by its duly authorized officer and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's Rule governing consent order procedures. In accordance therewith the parties hereby agree that:

1. Guild Mortgage Company is a corporation organized, existing, and doing business under and by virtue of the laws of the state of California, with its principal office and place of business located at 4180 Ruffin Road, San Diego, California 92123. Proposed respondent admits all the jurisdictional facts set

forth in the draft complaint here attached.

2. Proposed respondent waives:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

c. All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

d. All claims under the Equal Access to Justice Act.

3. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of the complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

4. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of the complaint here attached.

5. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to the proposed respondent, (a) Issue its complaint corresponding in form and substance with the draft of the complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (b) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

6. Proposed respondent has read the proposed complaint and order contemplated hereby. Proposed respondent understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definitions

For purposes of this Order, the following definitions apply:

1. *Composite APR* means a blend of interest rates as described in § 226.17(c)(1)–10 of the Federal Reserve Board's Official Staff Commentary to Regulation Z;

2. *First adjustment date* is the date on which the consumer's monthly payment of principal and interest is first changed, in accordance with the terms set forth in the consumer's note or adjustable rate rider;

3. *Original TIL disclosure* is the last TIL disclosure given to a consumer by respondent before consummation of the loan.

I.

It is ordered that respondent Guild Mortgage Company, a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or any other device, in connection with any extension of consumer credit in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Failing to disclose accurately in its discounted adjustable rate mortgages a composite annual percentage rate and, thereby, failing to disclose accurately the annual percentage rate and the finance charge, as required by sections 106, 107 and 128 of the Truth in Lending Act, 15 U.S.C. 1605, 1606 and 1638, and §§ 226.4, 226.22, and 226.18 (d) and (e) of Regulation Z, 12 CFR 226.4, 226.22 and 226.18 (d) and (e) and § 226.17(c)(1) of Regulation Z, 12 CFR 226.17(c)(1), as more fully set out in § 226.17(c)(1)–10 of the Federal Reserve Board's Official Staff Commentary to Regulation Z, 12 CFR 226.17(c)(1)–10.

2. Failing to disclose accurately the annual percentage rate and finance charge, as required by sections 106, 107 and 128 of the Truth in Lending Act, 15 U.S.C. 1605, 1606 and 1638, and §§ 226.4, 226.22 and 226.18 (d) and (e) of Regulation Z, 12 CFR 226.4, 226.22 and 226.18 (d) and (e).

3. Failing to include the premiums for mortgage insurance when computing the annual percentage rate, finance charge, and number, amount and timing of payments scheduled to repay the obligation, as required by sections 106, 107 and 128 of the Truth in Lending Act, 15 U.S.C. 1605, 1606 and 1638, and §§ 226.4, 226.22 and 226.18 (d), (e) and (g) of Regulation Z, 12 CFR 226.4, 226.22 and 226.18 (d), (e) and (g).

4. Failing to disclose accurately the number, amount, and timing of payments scheduled to repay the obligation, as required by section 128 of the Truth in Lending Act, 15 U.S.C. 1638, and § 226.18(g) of Regulation Z, 12 CFR 226.18(g).

5. Failing to make all disclosures determined in accordance with sections 106 and 107 of the Truth in Lending Act, 15 U.S.C. 1605 and 1606, and §§ 226.4 and 226.22, in the manner, form and amount required by §§ 226.17, 226.18, 226.19 and 226.20 of Regulation Z, 12 CFR 226.17, 226.18, 226.19 and 226.20.

II.

It is further ordered that:

A. In accordance with section 108(e) of the TILA, 15 U.S.C. 1607, and as shown on the attached Exhibits 1 (adjustable rate mortgage list), 2 (mortgage insurance premium list), and 3 (adjustable rate mortgage and mortgage insurance premium list), respondent shall make adjustments to the current and past accounts of each consumer listed who was extended credit by respondent; except, any adjustment relating solely to respondent's failure to use a composite annual percentage rate shall be limited to the time period up to the first adjustment date;

B. For those adjustments resulting from mortgage insurance premium errors, respondent shall refund the mortgage insurance premium collected to date as shown on Exhibits 2 and 3;

C. Not later than thirty (30) days following the date of service of this order, for those consumers listed on Exhibits 2 and 3, respondent shall have either cancelled the remaining mortgage insurance or taken whatever action is necessary so that the applicable consumer is not charged for any additional mortgage insurance premiums for the life of the loan;

D. Respondent shall have a five-year period in which to complete the adjustments described in paragraphs A and B; except, where the amount of the adjustment is $200 or less, the adjustment shall be completed by the end of the first year. Each consumer listed on Exhibits 1, 2, and 3 shall receive payment from respondent for at least one fifth of the applicable adjustment for that consumer no later than the last day of each calendar year beginning with the current year.

III.

It is further ordered that all payment adjustments required by this order shall be made by mailing the consumer a check by first class mail, certified, return receipt requested, to the current or last known address of each such consumer.

IV.

It is further ordered that by not later than thirty (30) days from the date of service of this order, respondent shall send a letter by first class mail to all consumers listed on Exhibits 2 and 3, eliminating the consumer's liability for future mortgage insurance premiums.

V.

It is further ordered that respondent shall maintain for at least six (6) years from the date of service of this order and, upon request, make available to the Federal Trade Commission for inspection and copying, all records and documents necessary to demonstrate fully its compliance with this order.

VI.

It is further ordered that respondent, its successors and assigns, shall distribute a copy of this order to any present or future officers, agents, representatives, and employees having responsibility with respect to the subject matter of this order and that respondent, its successors and assigns, shall secure from each such person a signed statement acknowledging receipt of said order.

VII.

It is further ordered that respondent shall promptly notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the order.

VIII.

It is further ordered that respondent shall, within one hundred and twenty (120) days of the date of service of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order. Within thirty (30) days of the end of each year for five years, starting with the current year, respondent shall forward a copy of all checks mailed to consumers in that year to the Federal Trade Commission, Enforcement Division, Washington, DC 20580.

IX.

It is further ordered that respondent shall have the right to request modification of this order.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from respondent Guild Mortgage Company.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that respondent has failed to disclose accurately a composite annual percentage rate and has underdisclosed the annual percentage rate and finance charge in its discounted adjustable rate mortgages, in violation of §§ 226.4, 226.22 and 226.18 (d) and (e) of Regulation Z, and § 226.17(c)(1) of Regulation Z, as more fully set out in §§ 226.17(c)(1)–8 and 226.17(c)(1)–10 of the Federal Reserve Board's Official Staff Commentary to Regulation Z. The complaint also alleges that respondent has failed to include premiums for mortgage insurance in the annual percentage rate, finance charge and payment schedule, in violation of §§ 226.4, 226.22, and 226.18 (d), (e) and (g) of Regulation Z.

The proposed order requires respondent to accurately calculate and disclose the annual percentage rate, finance charge, payment schedule and other information required by Regulation Z, in connection with respondent's extensions of consumer credit.

The proposed order also requires respondent, in accordance with section 108(e) of the Truth in Lending Act, 15 U.S.C. 1607, to make adjustments to the accounts of consumers as shown on three attached lists. Exhibit 1 contains the adjustments for adjustable rate mortgage errors; Exhibit 2 contains the adjustments for mortgage insurance errors; and Exhibit 3 contains the adjustments for loans involving both adjustable rate mortgage and mortgage insurance errors. Those adjustments relating to respondent's failure to use a composite annual percentage rate are limited to the time period up to the first date at which the interest rate is adjusted on the loan.

For adjustments resulting from mortgage insurance errors, respondent is required to refund to consumers the premiums collected to date, as shown on Exhibits 2 and 3. Additionally, not later than 30 days after service of the order, respondent must either cancel the remaining mortgage insurance on these loans or take other action to ensure that the consumer is not charged for mortgage insurance for the remainder of the loan. Respondents must also notify consumers with mortgage insurance errors that their obligation has decreased accordingly.

Respondent has five years to complete the adjustments, except that where the adjustment is $200 or less respondent must provide it by the end of the first year. For adjustments greater than $200, respondent is required to provide at least one fifth of the amount each year to the consumer, starting with the current year. The adjustments must be made by providing a check to applicable consumers.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Donald S. Clark,
Secretary.

Dissenting Statement of Commissioner Andrew J. Strenio, Jr. Guild Mortgage Co.

I have voted against this proposed consent agreement because good law and sound policy considerations support requiring respondent Guild Mortgage Company to fully redress consumers for its alleged violations of the Truth-in-Lending Act ("TILA"). In my view, the company should not have been allowed a 0.25% "tolerance" deduction.

With respect to the law, it is at the very least a colorable argument that section 108(e)(1)(B)(i) of the TILA (15 U.S.C. 1607(e)(1)(B)(i))—which provides that in determining whether an APR disclosure error has occurred, and in

calculating any adjustment, a tolerance not to exceed 0.25% will be granted—specifies a tolerance only for the purpose of determining whether a case is worth pursuing and that full sanctions apply for all cases over this threshold figure.

As to policy, the goals of restitution and deterrence are clearly furthered by insisting upon full redress. Restitution is incomplete when injured consumers—who have suffered financial loss through no fault of their own—have to swallow a 0.25% "penalty" payment that is allowed to remain in the pockets of an alleged law violator. Deterrence is weakened when financial institutions are allowed to benefit from sloppiness or worse to the tune of 0.25%. To analogize to traffic enforcement, it may be appropriate for a number of reasons not to prosecute drivers going 5 or fewer miles per hour over the speed limit. However, individuals caught going 10 miles over the limit must pay fines based upon an excess of 10—not 5—miles per hour. The same type of approach makes sense here.

Accordingly, I respectfully dissent from the majority's decision to provisionally accept the consent for public comment.

IVF Australia, Ltd., et al., and NME Hospitals, Inc.; Proposed Consent Agreements With Analyses To Aid Public Comment; Corrections

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreements; corrections.

SUMMARY: This document concerns the Federal Register Notices containing these consent agreements, which were published on Friday, September 14, 1990 (55 FR 37960, 37962). The Notices indicated that comments on the agreements must be received on or before November 13, 1990. Because the proposed consent agreements were actually placed on the public record on September 27, 1990, the public comment period will actually expire on—and comments on the agreement therefore must instead be received on or before—November 26, 1990.

DATES: Comments must be received on or before November 26, 1990.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th Street and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Michael McCarey, FTC/H-374, Washington, DC 20580, (202) 326-2966.

Donald S. Clark,
Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[ATSDR-29]

Availability of Draft Toxicological Profiles

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR); Public Health Service (PHS); Department of Health and Human Services (DHHS).

ACTION: Notice.

SUMMARY: This notice announces the expected availability of the fourth set of 30 draft toxicological documents profiling 36 hazardous substances prepared by ATSDR for review and comment.

The Superfund Amendments and Reauthorization Act (SARA) (Pub. L. 99-499) amends the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) (42 U.S.C. 9601 *et seq.*) by establishing certain requirements for the ATSDR and the Environmental Protection Agency (EPA) with regard to hazardous substances which are most commonly found at facilities on the CERCLA National Priorities List (NPL). Among these statutory requirements is a mandate for the Administrator of ATSDR to prepare toxicological profiles for each substance included on the priority lists of hazardous substances. These lists identified the 200 hazardous substances which both Agencies determined pose the most significant potential threat to human health. The first list was published in the Federal Register on April 17, 1987, (52 FR 12866). The second list was published on October 20, 1988, (53 FR 41280).

These profiles were prepared according to guidelines developed to meet the requirements of CERCLA (42 U.S.C. 9604 (i)(3)). Although we are confident that the key studies for each of the substances were considered during the profile development process, this Federal Register notice solicits any additional studies, particularly unpublished data and ongoing studies, which will be evaluated for possible addition to the profile now or in the future.

Availability

The following draft toxicological profiles are expected to be publicly available on or about October 17, 1990.

Document	Hazardous substance	CAS Number
1	Aluminum	7429-90-5
2	Antimony	7440-36-0
3	Barium	7440-39-3
4	2,3-Benzofuran	271-89-6
5	Boron	7440-42-8
6	Bromomethane	74-83-9
7	1,3-Butadiene	106-99-0
8	2-Butanone	78-93-3
9	Carbon Disulfide	75-15-0
10	Cobalt	7440-48-4
11	Cresols	1319-77-3
	o-Cresol	108-39-4
	m-Cresol	108-44-5
	p-Cresol	95-48-7
12	Dibromochloropropane.	109-64-8
	1,2-Dibromo-3-chloropropane.	96-12-8
13	1,2-Dibromoethane	106-93-4
14	2,4-Dichlorophenol	120-83-2
15	cis-1,3-Dichloropropene.	10061-01-5
	trans-1,3-Dichloropropene.	10061-02-6
16	Endosulfan	115-29-7
	Endosulfan Alpha	959-98-8
	Endosulfan Beta	33213-65-9
	Endosulfan Sulfate	1031-07-8
17[1]	Fluorides	16984-48-8
	Hydrogen Fluoride	7664-39-3
	Fluorine (F)	7782-41-4
18	2-Hexanone	591-78-6
19	Manganese	7439-96-5
20	Methyl Mercaptan	74-93-1
21	Methyl Parathion	298-00-0
22	Mustard "Gas"	505-60-2
23	Nickel	7440-02-0
	2-Nitrophenol	88-75-5
	4-Nitrophenol	100-02-7
24	Pyridine	110-86-1
25	Styrene	100-42-5
26	Thallium	7440-28-0
27	Tin	7440-31-5
28	1,2,3-Trichloropropane.	96-18-4
29	Vanadium	7440-62-2
30	Vinyl acetate	108-05-4

[1] The Toxicological Profile for Fluorides will be available for public comment at a later date. The availability of the Toxicological Profile For Public Comment will be announced in the Federal Register when it becomes available.

The public comment period for each document will end on February 15, 1991. The close of the comment period will also be indicated on the front of each document. In order to assure consideration by ATSDR, comments must be received by the Division of Toxicology, Agency for Toxic Substances and Disease Registry, Mailstop E-29, 1600 Clifton Rd., Atlanta, GA 30333 on or before the close of the public comment period. Comments received after the close of the public comment period will be considered at

the discretion of ATSDR based upon what is deemed to be in the best interest of the general public.

Requests for draft toxicological profiles must be in writing and should be sent to the Division of Toxicology, Agency for Toxic Substances and Disease Registry, Mailstop E-29, 1600 Clifton Rd., Atlanta, GA 30333.

Please specify the profiled hazardous substances you wish to receive. ATSDR reserves the right to provide only one copy of each profile requested free of charge. In the case of extended distribution delays, requestors will be notified.

Written comments and other data submitted in response to this notice and the draft toxicological profiles should bear the docket control number ATSDR-29. Send one copy of all comments and five copies of all supporting documents to the Division of Toxicology at the above address by the end of the comment period. All written comments and draft profiles will be available for public inspection at the ATSDR, Building 33, Executive Park Drive, Atlanta, Georgia, from 8 a.m. until 4:30 p.m., Monday through Friday, except for legal holidays. Because all public comments regarding ATSDR toxicological profiles are available for public inspection, no confidential business information should be submitted in response to this notice.

SUPPLEMENTARY INFORMATION:

Background

CERCLA, as amended by SARA, requires ATSDR to prepare (1) Lists of hazardous substances in order of priority, (2) toxicological profiles of those substances, and (3) a research program to fill data gaps associated with the substances.

In compliance with section 104(i)(2)(A) of CERCLA, ATSDR and EPA published on April 17, 1987 (52 FR 12866), the first priority list of 100 hazardous substances. On October 20, 1988, the second priority list of 100 hazardous substances was published in the Federal Register (53 FR 41280). Both priority lists were further divided into groups of 25 chemicals.

Section 104(i)(3) of CERCLA as amended, outlines the content of these profiles. Each profile is required to include an examination, summary and interpretation of available toxicological information and epidemiologic evaluations. This information and data are to be used to ascertain the levels of significant human exposure for the substance and the associated health effects. The profiles must also include a determination of whether adequate information on the health effects of each substance is available or in the process of development. When adequate information is not available, ATSDR, in cooperation with the National Toxicology Program (NTP), is required to assure the initiation of a program of research designed to determine these health effects.

These profiles issued as "Drafts for Public Comment" represent the agency's best efforts to provide important toxicological information on priority hazardous substances in compliance with the substantive and procedural requirements of section 104(i)(3). As in the past, we are seeking, before February 15, 1991, public comments and additional information which may be used to supplement these profiles. The agency will continue to conduct the profile development process in the same open manner as was done with the first three sets of documents. ATSDR remains committed to providing a public comment period for these documents as a means to best serve public health and our constituency.

This fourth set of toxicological profiles will be provided by ATSDR to the States and made available to the public. Profiles issued after the public comment period will be provided to the States and generally distributed through the National Technical Information Service.

This notice announces the projected availability of the fourth set of 30 documents profiling 36 hazardous substances. The documents have undergone extensive internal review and have been subjected to scientific and technical peer review by outside experts.

Dated: October 10, 1990.

William L. Roper,

Administrator, Agency for Toxic Substances and Disease Registry.

BILLING CODE 4160-70-M

Food and Drug Administration

[Docket No. 90N-0449]

Drug Export; AUSAB® rDNA EIA

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Abbott Laboratories, Inc., has filed an application requesting approval for the export of the biological product AUSAB® rDNA EIA to Japan.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Carl J. Chancey, Center for Biologics Evaluation and Research (HFB-124), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8191.

SUPPLEMENTARY INFORMATION: The drug export provisions in section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382) provide that FDA may approve applications for the export of biological products that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet the requirement, the agency is providing notice that Abbott Laboratories, Diagnostics Division, Abbott Park, IL 60064, has filed an application requesting approval for the export of the biological product AUSAB® rDNA EIA to Japan. AUSAB® rDNA EIA is a solid phase enzyme immunoassay for the qualitative detection of antibody to Hepatitis B Surface Antigen (anti-HBs) in serum or plasma. The application was received and filed in the Center for Biologics Evaluation and Research on September 24, 1990, which shall be considered the filing date for purposes of the act.

Interested persons may submit information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by October 26, 1990, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate

consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 352 (21 U.S.C. 352)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated under 21 CFR 5.44.

Dated: September 28, 1990.

Thomas S. Benze,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

BILLING CODE 4160-01-M

Advisory Committee; Amendment of Notice

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending a public advisory committee meeting notice of the Gastroenterology-Urology Devices Panel to be held on October 18, 1990. The amendment reflects a revision in the Open committee discussion section that published in the Federal Register of September 25, 1990 (55 FR 39212).

FOR FURTHER INFORMATION CONTACT: Ruth W. Hubbard, Center for Devices and Radiological Health (HFZ-20), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1220.

SUPPLEMENTARY INFORMATION: In FR Doc. 90-22657, appearing at page 39212 in the Federal Register of September 25, 1990, the following correction is made under the heading "Gastroenterology-Urology Devices Panel": On the same page, 3d column, the Open committee discussion paragraph is revised to read as follows:

Open committee discussion. The committee will discuss a premarket approval application for a device to treat urinary incontinence.

Dated: October 10, 1990.

Alan L. Hoeting,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Filing of Annual Report of Federal Advisory Committee

Notice is hereby given that pursuant to section 13 of Public Law 92-463, the Annual Report for the following Health Resources and Service Administration's Federal Advisory Committee has been filed with the Library of Congress:

Commission on the National Nursing Shortage

Copies are available to the public for inspection at the Library of Congress Newspaper and Current Periodical Reading Room, Room 1026, Thomas Jefferson Building, Second Street and Independence Avenue, SE., Washington, DC, or weekdays between 8 a.m. and 4:30 p.m. at the Department of Health and Human Services, Department Law Library, HHS North Building, Room G-619, 330 Independence Avenue, SW., Washington, DC, telephone (202) 245-6791. Copies may be obtained from: Dr. Caroline Burnett, Senior Consultant, Commission on the National Nursing Shortage, Room 14A-40, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-0577.

Dated: October 11, 1990.

Jackie E. Bowen,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

Advisory Council Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of November 1990:

NAME: HRSA Aids Advisory Committee.

TIME: November 1-2, 1990, 9 a.m.

PLACE: Ramada Inn Bethesda, 8400 Wisconsin Avenue, Bethesda, MD 20814.

The meeting is open to the public.

PURPOSE: The Committee advises the Secretary with respect to health professional education, patient care/health care delivery to HIV-infected individuals, and research relating to transmission, prevention and treatment of HIV infection.

AGENDA: The meeting will tentatively include welcome and opening remarks; update on programmatic, legislative and budgetary issues of the Health Resources and Services Administration's HIV/AIDS programs; discussion of Ryan White comprehensive AIDS Resources Emergency (CARE) Act of 1990; and health personnel training issues.

Anyone requiring information regarding the subject Committee should contact Dr. Samuel C. Mathews, Executive Secretary, HRSA AIDS Advisory Committee, Health Resources and Services Administration, room 14A-11, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-4566.

Agenda items are subject to change as priorities dictate.

Dated: October 11, 1990.

Jackie E. Bowen,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-90-3160]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comment on the subject proposals.

ADDRESS: Interested persons are invited to submit comment regarding these proposals. Comments should refer to the proposal by name and should be sent to: Scott Jacobs, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708-0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collections of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information

submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 44 U.S.C. 3535(d).

Dated: October 1, 1990.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Procedures for Appealing Section 8 Rent Adjustment.

Office: Housing.

Description of the need for the information and its proposed use: Owners in certain cooperative, subsidized, and 202 projects were rent increases were denied may appeal by letter to the Department through the Field Office and then the Regional Office.

Form number: None.

Respondents: Businesses or Other For-Profit, Federal Agencies or Employees, and Non-Profit Institutions.

Frequency of submission: At time of an appeal.

Reporting burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Appeal Letter	1,250		1		2		2,500

Total estimated burden hours: 2,500.

Status: New.

Contact: Michelle McLaurin, HUD, (202) 708–3944; Scott Jacobs, OMB, (202) 395–6880.

Date: October 1, 1990.

Proposal: 1. Monthly Digest of Current Housing Situation; 2. Quarterly Supplement.

Office: Housing.

Description of the need for the information and its proposed use: The survey will provide a timely series of comprehensive information detailing interest rates and the availability of financing for FHA-insured and conventional first mortgage home loans as well as trends in the home construction market, as required by the 1983 Housing Act pertaining to Section 235 loans.

Form number: HUD-2499, 2499–A.

Respondents: Businesses or Other For-Profit.

Frequency of submission: Monthly and Quarterly.

Reporting burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Forms HUD–2499 and 2499–A	300		16		.167		800

Total estimated burden hours: 800.

Status: Extension.

Contact: Jim Schneider, HUD, (202) 708–1271; Scott Jacobs, MOB, (202) 395–6880.

Date: October 1, 1990.

[FR Doc. 90-24282 Filed 10-15-90; 8:45 am]

BILLING CODE 4210-01-M

Office of Housing

[Docket No. N-90-3159]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to:

Scott Jacobs, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th. Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35). It is also requested that OMB complete its review within three weeks.

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and, (9) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; sec. 7(d) of the Department of Housing and Urban Development Act 42 U.S.C. 3535(d).

Dated: September 28, 1990.

Arthur J. Hill,

Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Proposal: Service Coordinators in section 202, 202/8 and 202/236 Housing: Project application to HUD, Annual report and recordkeeping requirements.

Office: Housing.

Description of the need for the information and its proposed use: HUD is implementing a new policy to allow Service Coordinators as an eligible expense in the section 202, 202/8 or 202/236 project operating budget. The Notice announcing the policy requires that each eligible project wanting to avail themselves of a Services Coordinator submit an application to HUD for approval. Additionally, the approved project must repost annually, by mail, to HUD with information related to implementation of the service coordination function. This information is necessary for HUD to determine the success of the function in operation, and to determine the extent to which, if any, the policy must be fine-tuned over time. Finally, each project must keep secured files on each case managed by the Service Coordinator. It is necessary to keep records on activities undertaken, and to keep them available for a year after case termination, in case medical or other reasons occur necessitating access.

Form Number: N/A.

Respondents: Section 202, 202/8 and 202/236 projects.

Frequency of Responses: Initial application, then annually.

Reporting Burden:

	No. of respondents	×	Frequency of record keeping	×	Hours per response	=	Burden hours
Application to HUD	600		1		2		1,200
Annual reports	600		1		1		600

Recordkeeping Requirements:

	No. of recordkeepers	×	Annual hrs/ per recordkeeper	×	Total recordkeeping hours
client/appli. files	600		5.66		3,396

Total Estimated Burden Hours: 5,196

Status: New

Contact: Jerold S. Nachison, HUD (202) 708–2866, Scott Jacobs, OMB (202) 395–6880.

Date: September 20, 1990.

Supporting Statement for:

HUD Notice: Service Coordinators in Section 202, 202/8 and Section 202/236 Housing

1. Justification

(a) Program Description

A Service Coordinator is a social services staff position which is hired by the project administrator/management company and is responsible for assuring that the residents of the project are linked to the supportive services they need to continue independent living in that project. Sections 202, 202/8 and Section 202/236 projects can immediately move to request approval to bring such staff on board.

This policy recognizes the aging-in-place phenomenon that is taking place among the residents of HUD housing. The initial populations have become significantly older, with anecdotal evidence appearing to show that the average age upon initial occupancy is in the late 70s. Recent data shows that between 1985–88, 63 percent of new admissions to section 202/8 projects were over 66 and 70 percent were over 70 years of age.

We have also learned that project managers in projects for the elderly, generally, do not have the training and skills necessary to deal both with an increasingly frail population and the non-elderly handicapped who need support services. Also, housing managers, generally, do not have the time available to function as "social services" staff on a regular ongoing basis.

The Service Coordinator is the person who works with the tenants in need of support, refers them for assessment, links them with service providers in the community and monitors provision of services. He/she is the missing and necessary link to improving the quality of life for frail and non-elderly handicapped residents of housing for the elderly, and is part of and a key support to the management team of a project.

He/she works closely with management to ensure that the tenant (and the family) are assisted in getting the service necessary to continue residence in the project, or, if necessary, to assist with the decision to move to a higher level of care. The Service Coordinator does not provide support services directly or do other administrative duties normally associated with project management.

(b) Authority.

Current HUD statutes and regulations on development and management of section 202, 202/8 and 202/236 projects are silent regarding the use of a Service Coordinator as a part of the management team, as described above. Until recently, HUD field offices generally considered such a function unnecessary. With aging in place becoming a more accepted phenomenon, however, some Field Offices have allowed the position to be established, and Region X developed a Regional position. This Notice sets a clear and uniform national standard. After Paperwork clearance, a Federal Register Notice will be published in addition to the HUD Notice.

Certainly, the citations noted below clearly infer the need for management to deal with the problem of residents receiving appropriate support services. These citations are:

Section 202(f) of the Housing Act of 1959 requires that Housing and related facilities assisted therein will be in appropriate support of, and supported by, applicable State and local plans * * * Providing an assured range of necessary services for individuals occupying such housing.

Section 209 of the Housing and Community Development Act of 1974 requires HUD to consult with the Secretary of HHS to insure that special projects for the elderly and handicapped shall meet acceptable standards of design and provide quality services and management consistent with the needs of the occupants.

Section 162(c) of the Housing and Community Development Act of 1987

requires supportive service plans in all section 202 housing, describing the served populations, range of necessary services, manner in which the services will be provided, and the extent of State and local funds available for services provision.

Section 101(a) of the Housing and Urban Development Reform Act of 1989 requires, in part, that section 202 projects be of sufficient size to accommodate facilities for supportive services appropriate to the needs of frail elderly residents.

2. Need for Information

The attached Notice has completed Departmental clearance, with the exception of the OMB Paperwork Review. The information collection stated in the HUD Notice is necessary for the following reasons:

(i) A budget amendment is needed to hire/contract for a Service Coordinator, projects must apply for, and get approval, for the activity, per the budgeted rent increase process stated in Handbook 4350.1, chapter 7 (OMB number 2502-0324).

(ii) Projects must collect intake information on each applicant and keep secured files containing information regarding people being served. And,

(iii) projects must report to HUD annually on the service coordinator function. This reporting is necessary for HUD to learn what the projects are actually doing, and to enable us to fine-tune Service Coordinator requirements, as appropriate.

Purpose and Use: Each information requirement is described below:

(a) Intake Information and Client Files (See Notice section IV.C(2), pps. 11-12)

Each resident who is assisted by the Service Coordinator must fill out a brief intake form. This intake form (developed by the project) is filed along with other information collected/arranged for by the Coordinator during the course of serving that individual over the years. Such will include a case management plan, a monitoring plan and follow-up with community agencies as appropriate, and follow-up, other information brought to the services coordinators's attention, notes of meeting with client/family and friends, and disposition of the case.

(b) Application to HUD for Service Coordinator Approval (see Notice, section IV.F, pps. 13-15). The application for a Service Coordinator is what section 202, 202/8 or 202/236 project submits to HUD for approval to modify its budget for the forthcoming project year. This requirement must conform to the procedures stated in Handbook 4350.1, chapter 7, "Processing Budgeted Rent Increase", and include the additional material requested in the Notice. This request is developed on a one-time basis, individually, by any project wanting to request approval to institute such a position.

(c) Project Reporting (see Notice section V.C. pg. 19) The annual project report is a brief narrative providing data and covering activities done by the Service Coordinator that year. This information will be used by the Loan Servicer to validate the function and to learn of problems which need attention from the field office, primarily in coordinating with other agencies. From time to time HUD Washington may request HUD field offices to prepare summations from this data for policy purposes or use in a possible study of the service coordination function in operation.

3. Use of Improved Information Technology

None—As HUD gains experience with this program, and we determine which information needs can be standardized, we may go to automated reporting, or delete the annual requirement.

4. Duplication

No other forms or reports will be used for the purposes specified above.

5. Availability of Similar Information

Similar information is not available from any other source.

6. Small Organizations

Projects wanting to receive approval for a Service Coordinator will submit the application to gain the approval. As a part of the application, the project certifies willingness to keep project files and submit the annual report.

7. Consequence of Less Frequent Data Collection

Having the projects mail in a brief report annually is the smallest requirement we could impose for monitoring necessary to start-up a new effort.

8. Special Circumstances Related to 5 CFR 1320.6

There are not any special circumstances required by this collection.

9. No Outside Consultation Is Required

10. Assurance of Confidentiality

See Notice, section IV.D(2), pg. 12. Each project is required to maintain the files in a secured location and maintain confidentiality of information related to any individual, per the Privacy Act of 1974.

11. Sensitive Questions

The information contained in the application to HUD for approval of a Service Coordinator and the annual report from the project to the field office are non-sensitive.

12. Estimate of the Cost to the Federal Government

The bulk of the work consists of reviewing and approving the initial, one-time request by field office staff. The review and case management of individual clients is done by the Service Coordinator and the files are not normally reviewed by HUD staff. Field Office staff may, on occasion, sample these files on-site reviews. The annual report from the projects will be reviewed by field office staff and may be utilized in an on-site review. Also, if problems are cited, the field office may become involved in problem resolution.

TOTAL ESTIMATED FEDERAL REVIEW TIME BY HOURS

	Reports	FO profess.	FO clerical	Elderly (HUD), hsg. profess. [3]	Elderly clerical
Application to HUD [1]	600	1,200	150	140	0
Client appli/Files [2]	20,000	[4] 350	0	0	0
Annual Report [2]	600	[4] 75	0	0	0
Total	21,000	1625	150	140	0

[1] We expect to review approximately 600 applications in FY 1991. The number may be slightly higher in FY 1992, and then decrease drastically in FY 1993, as those projects most in need of approval will be applied.

[2] We expect client files to go up by at least three-quarters in FY 1993 from FY 1992, based on new project approvals (and termination of some cases handled in FY 1991). After FY 1993, the total number of files will increase slowly, if at all, dependent on the approval of new projects for service coordinators and both turnover and increasing frailty among current residents. There will not be any HUD field reviews of Service Coordinators, hence no file reviews, prior to FY 1992.

[3] Annual reports will not be submitted by projects before FY 1992. In FY 1993 the number submitted should double, then increase slowly, annually, depending on the number of new approvals.
[4] We expect there will be lots of telephone contact between the field offices and headquarters regarding approval of Service Coordinators, particularly during FY 1991.
[5] See Note 2.
[6] See Note 3.

Total professional time @ $33/hour=1,745×$29.=$50,605.
Total clerical time @ $15/hr=150×$15.00=$2,250.
Estimate of costs to respondents:
Cost to respondents is estimated at $20/hr and includes overhead:
600 applications @ 2 hours preparation each=600×2×$20.=$24,000 (each year, FY 1991 and FY 1992].
600 annual reports @ 1 hour each=600×$20.=$12,000 (FY 1991, $24,000 in FY 1992).
20,000 files established @ .17 hrs each=3,400×$20.=$68,000 (each year, FY 1991 and FY 1992).

13. Tabulation of Reporting Burden

Info. collected	No. of respondents—17.1×	No. respondents per response—17.2=	Total an. responses—17.3×	Hrs/respon.—17.4	Total hrs.—17.5
Application to HUD	600	1	600	2	1,200
Annual reports	600	1	600	1	600

RECORDKEEPING REQUIREMENTS—CLIENT/APPLICATION FILES

No. of recordkeepers—18.1×	Annual hrs. per recordkeeper—18.2×	Total recordkeeping hours—18.3×
600	5.66	3,396
Total Burden		5,196

Subject:

Service Coordinators in Section 202, 202/8 and Section 202/236 housing.

The purpose of this notice is to allow the hiring of Service Coordinators in Section 202, 202/8 and Section 202/236 housing for the elderly as an eligible expense in the operating budget. This notice implements the Secretary's July 26, 1989 commitment for support of "case managers" in HUD housing to the Select Committee on Aging of the U.S. House of Representatives. This opportunity to hire a Service Coordinator as an eligible project expense may be extended to other HUD assisted programs later. The policy denoted herein supercedes current policy on Service Coordinators developed by Region X.

A Service Coordinator is a social services staff person who is hired by the project administrator/management company. The Coordinator is responsible for assuring that the residents of the project are linked to the supportive services they need to continue independent living in that project.

Field Office staff are responsible for notifying all owners/borrowers of eligible projects of this policy. The project application, file keeping and reporting process is approved per OMB Number

The policy stated wherein does not apply to group homes or independent living complexes designed solely for the non-elderly handicapped. These projects already are allowed staff which perform the functions described in this notice.

Depending on effectiveness of the start-up, and lessons learned through our experience, this policy may be extended to other projects in the HUD-insured and assisted inventory (*e.g.*, section 221(d), 221, 236 public housing, Section 8 project-based, *etc.*) in the next year or so. Please note that State Housing Finance Agency and Farmers Home Administration section 515/8 projects should contact their respective offices if they wish to hire a Service Coordinator. Also, HUD does not approve Service Coordinators for Section 8 non-insured projects. If the owners of such a project wishes to hire a Service Coordinator, they may do so without applying to HUD.

I. Background

Federally-assisted projects for the elderly have been experiencing aging in place among their residents. The initial populations have become significantly older and frail, and the average age of new tenants moving into projects has increased to the point that anecdotal information on the average age of residents at rent-up indicates that it may be in the early to late 70's. The 1988 National Survey of Section 202 indicated that for new residents admitted between 1985–1988 28 percent are over 85 years of age and 70 percent are over 70 years of age.

Additionally, there are growing numbers of non-elderly handicapped, such as the physically disabled and the chronically mentally ill (CMI), who are residing in projects for the elderly and also need effective supportive services in order to remain in an independent living environment. This increases in age and frailty and service needs of both long-time residents and new tenants puts increasing pressure on management to deal with the supportive service needs of those individuals to enable them to remain in their apartments as long as possible.

Project management has developed many methods to attempt to meet the resultant need for services. In some cases, HUD has allowed the hiring of a social services person to work with elderly residents. In others, cooperative agreements have been developed by the project with local service organizations to provide volunteer staff and/or services. In most cases, the question has not been formally addressed to, or formally acted upon by HUD, so the project manager has been the person to whom the residents turn for help with their supportive service needs.

What has become clear, however, is that housing managers in projects for the elderly, generally, do not have the training and skills necessary to deal both with an increasingly frail population and the non-elderly handicapped who need support services. While the training of managers in frailty, aging in place and the coordination of supportive services is necessary, and a critical component of a successful management team approach to dealing with the frail and the non-elderly handicapped in these buildings, housing managers do not generally have the time available to function as "social services" staff on a regular, ongoing basis.

Thus, the Service Coordinator (the individual who does case work with the frail elderly, or non-elderly handicapped, residents in need of support, refers them for assessment, links them with service providers in the community and monitors the provision of the services) is the missing and necessary link to improving the quality of life for both the frail and non-elderly handicapped residents of HUD-assisted

housing built for the elderly. This individual (or individuals) is a key support to, and part of, the management team of a project. He/she works closely with management to ensure that the individual (and the family) are assisted in getting the services necessary to continue residency in that project, or, if necessary, to assist with the decision to move to a higher level of care.

Additionally, there may be some cost savings to management and to other Federal programs through the use of Service Coordinators, which can indirectly offset some or all of the dollars invested in the Coordinator(s). These savings come primarily in two areas:

A. There will be some decrease in unit turnover. Projects currently utilizing Service Coordinators note a decrease in move-outs, due to the provision of supportive services, thus, reducing the time when the unit(s) is/are not producing income. Also, refurbishing costs of an apartment after a move-out have been reported up to $1,368/unit.

Related to unit turnover is that service coordination may prevent an individual from moving to a care facility for some period of time, *e.g.*, three months. In such cases, currently, there is both the cost of subsidy for the vacant unit (which is held for the individual) and the Medicaid or State costs of subsidizing the higher level of care.

Finally, at the point of move-out, there is some evidence of lessened refurbishing costs to the project in cases where there is help in the apartment with housekeeping and meal preparation. Thus, service coordination enables management to effectively keep individual apartments in better shape than they might be if the tenant declined in functional ability on their own.

B. There is a possibility of savings to Medicaid or State funds, if the Service Coordinator is effective in linking the individual to in-home services, rather than institutional forms of care. While studies of this phenomenon vary widely, the potential is for an effective saving of thousands of dollars annually, per individual. The savings accrue to Medicaid, the State share of Medicaid, and/or both.

II. Functions of a Service Coordinator

The major functions are:

A. Provides general case management, and referral services to all residents needing such assistance.

May provide formal case management (*i.e.*, evaluation of health, psychological and social needs and the development of a case plan for services) for a resident when such service is not available through the general community (this will be primarily in rural areas).

B. Establishes linkages with all agencies and service providers in the community; sets up a directory of providers for use by both project staff and residents.

C. Refers and links the residents of the project to service providers in the general community; these are: *e.g.*, formal assessment, personal assistance, homemaker, meals-on-wheels, transportation, counseling, occasional visiting nurse, preventive health screening/wellness, legal or other advocacy. Develops case plans in coordination with formal assessment services.

The service coordinator must not be assigned responsibilities as the recreational or activities director, providing support services directly, or assisting with other administrative work normally associated with the project(s).

D. Educates residents on service availability, application procedures, client rights, etc.

E. Monitors the ongoing provision of services from community agencies and keeps the case management and provider agency current with the progress of the individual.

F. Sets up volunteer support programs with service organizations in the community.

G. Helps the residents build informal support networks with other residents, family and friends.

H. Educates other staff on the management team on issues related to aging in place and services coordination, to help them to better work with and assist the residents.

III. Basic Qualifications of a Service Coordinator

A. A Bachelor of Social Work (BSW) or degree in Gerontology, Psychology or Counseling is preferable; a college degree is fully acceptable; a Master of Social Work (MSW) may be preferable in team situations in which a professional supervises a number of non-professional or paraprofessional "aides," (see "NOTE" under III(E), below).

Note: There may be cases in which a project can justify hiring a non-degreed individual. Such situations should be carefully considered and not rejected out of hand.

B. 2–3 years experience in social service delivery with senior citizens. Some supervisory or management experience is desirable.

C. Demonstrated working knowledge of supportive services and other resources for senior citizens in the jurisdiction in which the project is located.

D. Ability to advocate, problem-solve and provide results for the elderly served.

E. Strong writing and organizational skills.

Note: In situations where the management of a building(s) wants to create a services "team" in which a Service Coordinator supervises one or more "aides" (people usually without a qualifying degree), the Coordinator should have appropriate professional staff experience and prior supervisory or management experience.

It is desireable, but certainly not required for "aides" to have a college degree; they should, however, have appropriate experience in working with the elderly. Another option for management in structuring an "aide" situation would be to set up intern programs with local colleges and universities to assist in carrying out some of the functions noted under Section II above, or to provide planning guidance to staff or provide program evaluation/assessment functions.

IV. Considerations for HUD Approval of Service Coordinator(s)

A. General Factors

Any owner/manager must consider the following factors in: (a) determining whether a Services Coordinator is needed in a specific project or geographic grouping thereof; and, (b) determining the extent to which one or more Service Coordinators, and at what level, should be hired. These factors are only guidelines, not rigid rules.

Note: The Field Office should also consider whether or not the service coordination function is currently being provided in the project on a regular and ongoing basis by the owner/sponsor/borrower or a community agency.

1. Frailty levels of the tenants (the management of the building must have some knowledge of the needs of the tenants and should be able to so document) within the building, *e.g.*, 50 percent of the residents appear to have difficulty with one or more Activities of Daily Living (ADLs) and/or Instrumental Activities of Daily Living (IADLs).

Note: There will be non-elderly handicapped who meet this definition of frailty, as will some elderly under the age of 70. Thus, consideration of frailty levels may be more important than age of the residents (see number 2, below).

Support service programs typically include in their eligibility requirements some need for assistance in ADLs or IADLs. The ADLs include: Transfer; mobility, dressing; bathing; toileting; and eating. The IADLs include: Light and heavy housework, laundry, preparing meals, shopping for groceries; getting around outside, going places outside of walking distance; managing money; making telephone calls.

The minimum number of ADLs or IADLs required for eligibility will vary from state to state, and to some degree, among the jurisdictions within the states. There will also be variance among the jurisdictions regarding the strictness of the assessment used in determining the need for assistance.

Note: For comparison, HUD's Congregate Housing Services Program (CHSP), which funds supportive services directly for both the elderly and non-elderly handicapped, uses a condensed level of need, requiring that participants need assistance in THREE or more of the ADL/IADL categories (see Handbook 4640.1, chapter 1, pg. 1–11 "Minimum Requirements of ADL and IADL").

2. The median age of the tenants who are elderly (generally, the median age of the elderly tenants will be in their seventies or higher).

3. Age of the building (the need may be greater in those structures for the elderly in occupancy before 1980).

Note: HUD is not requiring project management to assess residents as a condition for receiving approval for hiring a service coordinator. Rather, the proposal to HUD (see Paragraph IV(F), following) should be able to show (through anecdotal information or other) the degree of need in the structures proposed for coverage.

B. Staffing Patterns

There are several possible staffing configurations for Service Coordinator positions. Conceptually, these relate to the numbers of persons served, size of the building(s) and degree of frailty of the persons served. The configurations are:

1. A part-time person serving one or more buildings.

2. A full-time person serving one or more buildings.

3. A full-time "director" and one or more full or part-time persons serving, usually, more than one building.

In all cases the project owner/borrower must determine to whom the Service Coordinator will report, establish that relationship in the position description and justify the placement in the request to HUD. This is especially critical in a third-party situation, in which the Coordinator may be outstationed from the project, or may be serving a number of projects.

There will be situations in which the owner/sponsor/management of one building is unable or unwilling to take on the burden of a full or part-time person for what may be seen initially as a minimal case load.

In addition to outright hiring, we encourage owners/borrowers of buildings in the same geographic locality (small or otherwise) to consider:

(1) Contracting directly with an area agency on aging or local providers for service coordination and/or case management on a fee-for-service-basis;

(2) Pooling (combining) resources so that full-time or part-time staff person(s), or a "team," can be shared or rotated among several structures, to the extent feasible; or,

(3) Donating commercial or other space to a provider agency(ies) in return for the agency's providing the service coordination.

Additionally, the HUD Field Offices and project management must consider the case in which a Section 202 or 202/8 project is physically connected to, *e.g.*, a Section 221(d) or a Section 236 project. In these cases, Field Offices may entertain proposals from the management of such combined projects, in which the Service Coordinator works for the management of and serves the residents of both projects.

C. Staffing Guidance

Generally, the greater the number of units in a building (or complex of buildings), the easier it is to justify a Service Coordinator, regardless of the level of frailty. Through listening to extensive anecdotal comments, and discussion with both Field Office staff and project managers in five Regions, we have learned that there appears to be a wide range in the caseloads of existing social service personnel in HUD projects. This leads us to conclude, therefore, that it is inopportune for HUD to set up rigid staffing standards at this time.

However, we believe some guidance is useful for both HUD Field Office staff and Project Administrators in establishing Service Coordinator positions, particularly when used in conjunction with paragraphs IV(A) and (B), prior.

Please note that the following is guidance—not hard and fixed requirements. It is important for HUD field offices to offer leeway so that we can learn what works best in these buildings, than be rigid about what constitutes an "appropriate" level of service coordinator in a project.

(1) Projects under 30 units. Such projects are only encouraged to use one of the options under paragraph IV(B), above, concerning contracting directly or pooling of resources.

In each of the following cases, contracting or pooling is encouraged.

(2) Projects of 30–50 units. This could normally support no more than about one one-quarter to half-time position.

(3) Projects of 51–100 units. This could normally support about one three-quarter time person.

(4) Projects of 101–150 units. This could normally support about one full-time person. There may be some need for additional assistance.

(5) Projects of 151–200 units. This could normally support one full time person with some part-time assistance, or two part-time persons.

(6) Projects over 200 units. This might normally support at least 1½ persons.

Each Field Office and project owner/borrower should consider discussing the proposed Service Coordinator level PRIOR to the actual request to HUD. We expect that each discussion will reflect a case-by-case approach, on merits, rather than use of the "guidelines" as a strict rule.

D. Other Requirements

1. Sustaining Occupancy

Each owner/borrower proposing to hire a Services Coordinator must have a project which has reached sustaining occupancy, that is, 95 percent occupied. Sustaining occupancy is necessary to assure that the project has a positive cash flow before another cost is added to management.

In cases where occupancy is less than 95 percent, however, consideration may be given to a Coordinator if the position can be clearly justified and explained as a marketing tool to increase occupancy in the project. Also, we do not intend that a Field Office automatically eliminate a Service Coordinator from a project's budget, if in a subsequent year, the occupancy level has fallen below 95 percent.

2. Client Files

Each owner/borrower proposing to provide a Service Coordinator as part of their operating budget must agree to keep certain files on the clients served by the Coordinator, derived from Handbook 4640.1, appendix 9, section IV.D.

These files must be kept in a secured location and accessible ONLY to the Service Coordinator, and the project manager/administrator to the extent necessary. The project must maintain confidentiality of information related to any individual, per the Privacy Act of 1974.

Projects which contract-out the Service Coordinator function must include in their third-party contract an agreement for that third-party to keep files as required by HUD, with reporting to project management on a basis consistent with that necessary for meeting HUD reporting requirements.

The files must contain:

1. Intake form, including information on referrals to community agencies.

2. Case management plan.

3. Quarterly monitoring plan and follow-up, as appropriate.

4. Information related to any reports, alleged or otherwise, of human or civil rights abuse, adult abuse of any type (*i.e.*, mental, physical, financial), violations of personal property or dignity, and follow-up, case resolution, or status, as appropriate.

5. Results of all monitoring and agency follow-up.

6. Notes on all meetings with client/family members.

7. Disposition/termination of case.

E. Cost

Projects must propose funding of Service Coordinators as a line item in the project's annual budget. If the project cannot pay for the Coordinator out of current income or residual receipts it may propose using a rent increase (Section 8 or directly on the tenants for the old Section 202 or 202/236 projects without Section 8), through the annual budgeted rent increase process.

Whether the Service Coordinator is proposed for funding out of (1) the current income stream, (2) residual receipts, or, (3) Section 8 or other rent increase, the proposal should only cover funds necessary for salary(ies) and related administrative expenses (which may include office equipment, supplies, car allowance, xeroxing, etc., and the cost of contracting out the service).

F. Submission Requirements from Projects

Any project owner/borrower wanting to request approval to hire (or contract-out for) a Service Coordinator(s) must make such request in writing to the Chief, Loan Management Branch, in the HUD Field Office under whose jurisdiction the project is located, with a copy to the Community Services Advisor (CSA), if applicable (project owners/borrower should check with their Loan servicer to determine if there is a CSA in that office, or someone assigned especially to work with supportive service issues).

Projects are strongly advised to submit the request for approval as far in advance of the next budget year as possible, so that it does not become an issue at the time of budget approval. When approved, the project may include the funds as part of its next year's budget submission.

The request must conform to the procedures stated in Handbook 4350.1, chapter 7, "Processing Budgeted Rent Increase" and must be clearly stated as a request to: (1) use either excess income or residual receipts, or (2) a Section 8 or other rent increase.

The following items must be covered in the submission:

1. An explanation of the need, with a request for approval. At a minimum, the request must address the items covered in paragraph V(A)(2)(b-e and h).

2. Explanation for the salary proposed for the Service Coordinator(s), and related administrative costs (or the costs of contracting-out, including the unit cost).

The owner/borrower must provide evidence that the proposed salary level(s) are consistent with similar jobs in the local employment market, and that it is consistant with current management team responsibilities and salaries.

If a Section 8 rent increase is requested, a justification is necessary which clearly

explains why the current income stream and/or residual receipts are insufficient.

3. Position description(s) for the position(s) involved. This description must include the functions of the position and clearly state the relationship between the Service Coordinator and the project manager/administrator and other members of the management team.

Owners/borrowers proposing to physically locate a Service Coordinator in-house must certify that there is sufficient office space available, including space for confidential meetings, and a location to secure files.

4. Certification agreeing to provide the information under paragraph V(C), following, annually by mail to the field office as a condition for continued approval of a Service Coordinator position.

5. For projects proposing to contract-out the service, a copy of the proposed contract with the third party provider must be included.

This contract should include, at a minimum: Beginning and end dates of contract, number of staff hired, explanation of duties, rate(s) of pay/units of service to be provided, location of office(s), storage and access to files, relationship with other members of the management team, responsibilities and relationship of both contractor and project(s), and the certification noted in paragraph IV(F)(4), above.

6. For projects proposing to swap commercial or other space in exchange for a Coordinator, a copy of the proposed agreement must be included. The contract must deal with the specifics of the swap, and cover the appropriate stipulations noted in paragraph IV(F)(5), above.

In cases where management proposes to utilize a swap for non-commercial space, the request must clearly show that the normal activities of the residents of the building will not be adversely affected by the utilization of this space.

7. For projects proposing to share one or more Service Coordinators/aides, the proposal must provide an explanation of how the arrangement will work, where ultimate responsibility lies for the hiring and firing of the Coordinator or aides, and a copy of the proposed agreement between/among the owners/borrowers to cover space sharing, salary(ies), expenses and the allocation of days and hours between/among the buildings.

C. Projects under the Congregate Housing Services Program (CHSP)

There are a number of Section 202 projects for the elderly which receive CHSP funds for project directors (which may serve as Service Coordinators) or Service Coordinators and supportive services. As the service coordination function is now an eligible project expense, the projects with CHSP must request approval of a Service Coordinator(s) under the operating budget, per paragraph IV(F), above, and partially discontinue the funding of the position under CHSP. The only functions which would normally remain within the CHSP budget are those necessary specifically to administer CHSP (*e.g.*, process reimbursement vouchers, write quarterly and annual reports, supervise directly hired service providers and meals staff, etc.).

The project director/Service Coordinator in such projects continues to serve the CHSP, but must also expand to serve the rest of the tenant body, if not now doing so. Thus, additional staff hours may be added to the position of the incumbent in place, OR an additional person(s) may be hired on some basis. Alternatively, the CHSP functions may become a more limited, administrative, role with the expansion of the Coordinator function throughout the building.

A current part-time Coordinator could be proposed for full-time, with appropriate justification. Also, the funds currently assigned to the Coordinator function, but not longer eligible for support of that function of the position may be used for additional support services for CHSP clients, consistent with future guidance to be published by HUD.

The approval of a Service Coordinator for these projects, per this Notice, must be consistent with the next annual budget cycle under the CHSP.

For Example, if a CHSP project's renewal date is April 21, 1991, and its regular annual budget cycle begins on February 1, 1991, that project (in its regular budget submission or earlier) must request approval of the Service Coordinator, to be effective April 21, 1991. In such cases, project management must explain (in addition to the requirements of paragraph IV(F), above) how the time allotted to the Service Coordinator prior to the allowance of a Coordinator as an eligible project expense has been allocated between those non-CHSP specific functions, *e.g.*, case management, case monitoring, resident education, and those CHSP-specific duties noted above. On April 21, 1991, the Coordinator would become covered by the project's operating budget.

V. Reporting

A. Field Office Report to the Regions on Service Coordinators

Each Field Office must report to the Regional Office beginning 395 days after the publication date of this Notice, and annually thereafter. The reports are based on the information provided by projects in their request for approval to the Field Office during the reporting period (Field Offices should use the form HUD–92453 at appendix A). It should only cover information regarding projects which were approved for Service Coordinators in that 12-month period. The report should be sent to the Regional Administrator by the Field Office Manager.

The purpose of this report is to provide information necessary for the Regions to report to Headquarters on: (1) the number of projects adding a Service Coordinator to their staff; (2) a data profile on the types of projects and internal situations regarding the need for Service Coordinators; and, (3) a Regional estimate of additional Section 8 costs engendered.

The report must be sent to the Regional Office even if no projects within the Field Offices' jurisdiction requested approval for a Service Coordinator during the covered period. In such cases, the memorandum should state simply that no projects requested approval for a service coordinator during the reporting period.

The following information must be submitted:

1. Report on each category of project as follows: small projects (under 51 units), medium projects (51–100 units), and large project (101+units).

2. For each category, above, provide the following information for each annual period:

a. number of projects requesting approval for a Service Coordinator.

b. average age of the elderly.

c. average number of non-elderly handicapped.

d. major frailty types noted (list by type and by numbers of projects in which occurred).

e. number of services staff hired per project (median, range).

f. number of projects using current income, excess reserves or residual receipts to fully pay for the Service Coordinator(s).

g. number of "old" Section 202 or Section 202/236 projects (*i.e.*, those in occupancy prior to 1978) passing on the cost of the Coordinator directly to the tenants through a rent increase.

h. average amount of monthly rent increase.

i. number of projects using a Section 8 rent increase to pay for the position(s).

for those using Section 8,

—The total annual additional cost within the Field Office, and,

—The average cost per project

j. number of projects denied approval for a Service Coordinator.

B. Regional Report to Headquarters

Each Region, must aggregate all data collected and report to Headquarters within 45 days of the field office deadline to the Regional Office. This is, at 440 days after the effective date of this Notice, and at annual increments. (Regions should use the reporting form HUD–92453–A at appendix B). The Regional Administrator should send the report to Margaret Milner, Deputy Director, Office of Elderly and Assisted Housing, ATTN: Jerry Nachison.

C. Project Reporting/Field Office Management Review

Each project approved for a Service Coordinator per this Notice is required to report annually to the Field Office regarding the activities of that function (see paragraph IV(F)(4), prior). This report, developed by the Service Coordinator, must be mailed to the Field Office annually, ATTN: Loan Management Branch Chief, with the reporting due date based upon date of the Field Office's approval of the Service Coordinator function:

The information requested is as follows:

1. a. Number of staff actually hired on an ongoing basis.

b. Average number of hours worked per person.

c. Median case load per person.

d. Median amount of time per case.

2. Case Information—a. Types of services utilized (list).

b. Agencies providing services (list).

c. Average number of units of service provided/per agency/per service type.

d. Problems noted by project in getting access to services for particular needs.

Problems noted in obtaining services by the project should be reported to the Field Office Director of Management, for assistance, or to the Field Office CSA, if such a position has been established.

The required information should be written-up in list/narrative format and mailed to the appropriate loan services in the Field Office. If there is a CSA, or another staff person designated with responsibility in the supportive services area in that Field Office, he/she should review the report and make appropriate recommendations to the loan servicer for action.

Per Handbook 4350.1, chapter 8, "Project Monitoring", as modified by former Deputy Assistant Secretary Barksdale's May 20, 1983 memorandum, each Field Office is required to perform a project management review, with normal practice essentially being a biennial review, unless the project is considered "troubled."

When doing an on-site review, the Field Office should include a review on the adequacy of the service coordination function, based upon discussions with management, a review of the adequacy of the client files (looking at a 10 percent sample of files, or a maximum of 10 cases), file notes and review of the reports submitted by the project. This portion of the review would be done by the loan servicer, or the Field Office CSA, or supportive services person if one is in that office, and travel funds are available to send the additional staff person.

Findings should be written-up in narrative format as an addendum to Form HUD 9834B, "Management Review Questionnaire" and summarized on the Form HUD-9834, "Management Review Report", under section 5, General Management Practices, which is sent to the project manager. Problematic findings should be discussed with the Headquarters Desk Officer prior to their being shared with the project.

Copies of problematic reviews concerning the operation of the service coordination function should be sent by the Chief, Loan Management Branch, to the Regional Director of Housing Management for his/her information, and Headquarters, per paragraph V(E), above. Headquarters staff will consult with the Field Office, as appropriate.

Regional Desk Officers for technical issues related to this Notice are: Otelia Hebert, Regions I, III, VI and VII, RoseMary Sunderland, Regions II, IV and V, and Dee Ann Walker, Regions VIII, IX and X.

Arthur J. Hill,

Acting Assistant Secretary for Housing-Federal Housing Commissioner.

BILLING CODE 4210-27-M

Office of the Regional Administrator—Regional Housing Commissioner

[Docket No. D-90-992]

Acting Regional Administrator, Region IV (Atlanta); Designation

AGENCY: Department of Housing and Urban Development.

ACTION: Designation.

SUMMARY: Updates the designation of officials who may serve as Acting Regional Administrator for Region IV.

EFFECTIVE DATE: September 11, 1990.

FOR FURTHER INFORMATION CONTACT: H.E. Rollins, Director, Management Systems Division, Office of Administration, Atlanta Regional Office, Department of Housing and Urban Development, room 634, Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303-3388, 404-331-5190.

Designation of Acting Regional Administrator for Region IV

Each of the officials appointed to the following positions is designated to serve as Acting Regional Administrator during the absence of, or vacancy in the position of, the Regional Administrator, with all the powers, functions, and duties redelegated or assigned to the Regional Administrator: Provided, That no official is authorized to serve as Acting Regional Administrator unless all other employees whose names or titles precede his/hers in this designation are unable to serve by reason of absence:

1. Deputy Regional Administrator
2. Director, Office of Housing
3. Director, Office of Administration
4. Director, Office of Public Housing
5. Director, Office of Community Planning and Development
6. Regional Counsel
7. Director, Office of Fair Housing and Equal Opportunity
8. Georgia Program Coordinator
9. Director, Program Planning and Evaluation
10. Director, Operational Support Division

This designation supersedes the designation effective November 3, 1988 (53 FR 52510, December 28, 1988).

(Delegation of Authority by the Secretary effective May 4, 1982, (27 FR 4319, May 4, 1982); Dept. Interim Order II (31 FR 815, January 21, 1966)

This designation shall be effective as of September 11, 1990.

Raymond A. Harris,

Regional Administrator—Regional Housing Commissioner, Region IV (Atlanta).

[FR Doc. 90-24289 Filed 10-15-90; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ-010-01-4410-06; 1784-010]

Arizona Strip District Advisory Council, Field Tours; Meeting

AGENCY: Bureau of Land Management, Arizona Strip District, Interior.

ACTION: Notice of two field tours and a meeting.

SUMMARY: The Arizona Strip District Advisory Council will tour the Paria Plateau and Marble Canyon area and discuss the Proposed Arizona Strip District Resource Management Plan and other resource management issues.

The Arizona Strip District Grazing Advisory Board will tour the Shivwits Resource area and review range conditions and discuss maintenance of projects.

DATES: The Advisory Council will begin their tour at the Marble Canyon Lodge, Marble Canyon, Arizona November 14, 1990, at 8 a.m., A half day meeting will be held on November 15, 1990 at the Grand Canyon River Education facility at Lees Ferry beginning at 8 a.m.

The Grazing Board Tour will begin at the Arizona Strip District (Office 390 N. 3050 E., St. George, Utah) on November 16, 1990 at 8 a.m.

FOR FURTHER INFORMATION CONTACT: G. William Lamb, District Manager, 390 N. 3050 E., St. George, Utah 84770 (Phone 801/673-3545).

SUPPLEMENTARY INFORMATION: The tours and meeting are open to the public, but the public must provide their own transportation for the tours. The Advisory Council will consider both oral and written statements from the public at 8 a.m. Thursday November 15, 1990. The Grazing Board will consider oral and written comments any time during the tour. People interested in commenting should contact BLM at 801/673-3545 at least 5 days in advance.

Dated: October 5, 1990.

G. William Lamb,

Arizona Strip District Manager.

BILLING CODE 4310-32-M

Bureau of Reclamation

Quarterly Status Tabulation of Water Service and Repayment Contract Negotiations

AGENCY: Bureau of Reclamation, Department of the Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given of proposed contractual actions pending through December 1990. This notice is one of a variety of means being used to inform the public about proposed contractual actions for water service and repayment. The Bureau of Reclamation announcements of individual repayment and water service contract actions will be published in the

Federal Register and in newspapers of general circulation in the areas determined by the Bureau of Reclamation to be affected by the proposed action. Announcements may be in the form of news releases, legal notices, official letters, memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation requirements do not apply to proposed contracts for the sale of surplus or interim irrigation water for a term of 1 year or less. The Secretary of the Interior or the district may invite the public to observe any contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act if the Bureau determines that the contract action may or will have "significant" environmental effects.

ADDRESSES: The identity of the approving officer, and other information pertaining to a specific contract proposal, may be obtained by calling or writing the appropriate regional office at the address and telephone number given for each region in the supplementary information.

FOR FURTHER INFORMATION CONTACT: Dick L. Porter, Chief, Contracts & Repayment, Bureau of Reclamation, 1849 C St. NW., Washington, DC 20240; telephone (202) 208-3014, (FTS) 268-3014.

SUPPLEMENTARY INFORMATION: Pursuant to section 226 of the Reclamation Reform Act of 1982 (96 Stat. 1273), and to § 426-20 of the rules and regulations published in the Federal Register dated December 6, 1983, Vol. 48, page 54785, the Bureau of Reclamation will publish notice of proposed or amendatory repayment contract actions or any contract for the delivery of water for irrigation or other uses in newspapers of general circulation in the affected area at least 60 days prior to contract execution and, Pursuant to the "Final Revised Public Participation Procedures" for water service and repayment contract negotiations, published in the Federal Register dated February 22, 1982, Vol. 47, page 7763, a tabulation is provided below of all proposed contractual actions in each of the five Reclamation regions. Each proposed action listed is, or is expected to be, in some stage of the contract negotiation process during October, November, or December of 1990. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary, or pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the Regional Directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved.

This notice is one of a variety of means being used to inform the public about proposed contractual actions. Individual notices of intent to negotiate, and other appropriate announcements, are made in the Federal Register for those actions found to have widespread public interest. When this is the case, the date of publication is given.

Pacific Northwest Region

Bureau of Reclamation, 550 West Fort Street, Box 043, Boise, Idaho 83724-0043, telephone (208) 334-1894.

1. *Cascade Reservoir Water Users, Boise Project, ID:* Repayment contracts for irrigation and municipal and industrial water; 19,201 acre-feet of stored water in Cascade Reservoir.

2. *Individual Irrigators, M&I, and Miscellaneous Water Users, Pacific Northwest Region, Idaho, Montana, Oregon, and Washington:* Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

3. *Rogue River Basin Water Users, Rogue River Basin Project, Oregon:* Water service contracts; $5 per acre-foot or $50 minimum per annum for terms up to 40 years.

4. *Willamette Basin Water Users, Willamette Basin Project, Oregon:* Water service contracts; $1.50 per acre-foot or $50 minimum per annum for terms up to 40 years.

5. *Irrigation Districts and Similar Water User Entities:* Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (Pub L. 97-293).

6. *Forty-four Palisades Reservoir Shareholders, Minidoka Project, Idaho-Wyoming:* Contract amendments to extend term for which contract water may be subleased to other parties.

7. *City of Cle Elum, Yakima Project, Washington:* Amendatory or replacement M&I water service contract; 2,200 acre-feet (1,350 gallons per minute) annually for a term of up to 40 years.

8. *Three Irrigation Districts, Flathead Indian Irrigation Project:* Repayment of costs associated with rehabilitation of irrigation facilities.

9. *Baker Valley Irrigation District, Baker Project, Oregon:* Irrigation water service contract on a surplus interruptible basis to serve up to 13,000 acres; sale of excess capacity in Mason Reservoir (Phillips Lake) for a term of up to 40 years.

10. *Crooked River Project, Oregon:* Irrigation repayment or water service contracts with several individuals and with North Unit Irrigation District for a total of up to 25,000 acre-feet of storage space in Prineville Reservoir (Arthur R. Bowman Dam).

11. *Various Projects, PN Region:* R&B contracts for replacement of needle valves at storage dams.

12. *Minidoka-Palisades Project:* Repayment contract with Palisades Water Users Inc., for additional 500 acre-feet of storage space in Palisades Reservoir.

13. *Willow Creek Project, Oregon:* Repayment or water service contracts for a total of up to 3,500 acre-feet of storage space in Willow Creek Reservoir.

14. *Four Project Spaceholders, Minidoka-Palisades Project, Idaho-Wyoming:* Contract amendments to provide for rental of water to other parties.

15. *Bridgeport Irrigation District, Chief Joseph Dam Project, Washington:* Warren Act contract for the use of an irrigation outlet in Chief Joseph Dam.

16. *Five Irrigation Districts, Arrowrock Division of the Boise Project, Idaho:* Repayment contracts for Safety-of-Dams repair to Deer Flat Dam.

17. *State of Wyoming, Palisades Project, Idaho:* Proposed repayment contract with the State of Wyoming for the sale of 33,000 acre-feet of noncontracted space in Palisades Reservoir.

18. *Herniston Irrigation District, Umatilla Project, Oregon:* Repayment contract for reimbursable cost for Safety-of-Dams repairs to Cold Springs Dam.

19. *Ochoco Irrigation District and Various Individual Spaceholders, Crooked River Project, Oregon:*

Repayment contract for reimbursable cost for Safety-of-Dams repairs to Arthur R. Bowman Dam and Ochoco Dams.

20. *The Dalles Irrigation District, Oregon:* SRPA loan repayment contract; $2,000,000 proposed loan obligation.

21. *Oroville-Tonasket Irrigation District, Chief Joseph Dam Project, Washington:* SRPA loan repayment contract; $661,500 proposed loan obligation.

22. *State of Idaho, Payette Division of the Boise Project, Idaho:* Proposed repayment contracts with the State of Idaho for the sale of uncontracted space in Cascade and Deadwood Reservoirs.

Mid-Pacific Region

Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825–1898, telephone (916) 978–5030.

1. *Tuolumne Regional Water District, CVP, California:* Water service contract, up to 9,000 acre-feet from New Melones Reservoir.

2. *Calaveras County Water District, CVP, California:* Water service contract, up to 2,000 acre-feet from New Melones Reservoir; FR notice published February 5, 1982, Vol. 47, page 5473.

3. *Individual irrigators, M&I, and miscellaneous water users, Mid-Pacific Region, California, Oregon, and Nevada:* Temporary (interim) water service contracts for available project water for irrigation, M&I or fish and wildlife purposes providing up to 10,000 acre-feet of water annually for terms up to 5 years; Temporary Warren Act contracts for use of project facilities for terms up to 1 year; Long-term contracts for similar service for up to 1,000 acre-feet of water annually.

Note: Copies of the standard form of temporary water service contract for the various types of service are available, upon written request, from the Regional Director at the address shown above.

4. *Friant Unit Contractors, CVP, California:* Renewal of existing long-term water service contracts with numerous contractors on the Friant-Kern Canal whose contracts expire 1990–1997 with two contracts expiring later. Water quantities in existing contracts range from 1,200 to 175,440 acre-feet.

5. *ID's and similar water user entities:* Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (P.L. 97-293).

6. *State of California, CVP, California:* Contract(s) for, (1) Sale of interim water to the Department of Water Resources for use by the State Water Project Contractors, and (2) acquisition of conveyance capacity in the California Aqueduct for use by the CVP, as contemplated in the Coordinated Operation Agreement.

7. *Madera ID, Madera Canal, CVP, California:* Warren Act contract to convey and/or store nonproject water through project facilities.

8. *County of Tulare, CVP, California:* Amendatory water service contract, to provide an additional 1,908 acre-feet and reallocate 400 acre-feet of water from the Ducor ID for a total increase of 2,308 acre-feet.

9. *Shasta Dam Area Public Utilities District, CVP, California:* Renewal/Increase of M&I water supply contract. Less than 6,000 acre-feet.

10. *U.S. Fish and Wildlife Service, CVP, California:* Long-term contract for water supply for Federal refuge in Grasslands area of California.

11. *North Kern Water Storage District, Buena Vista Water Storage District, Tulare Lake Basin Water Storage District, and Hacienda Water District, Kern River Project, California:* Amendatory contract to provide storage space for M&I water.

12. *Contra Costa Water District, CVP, California:* Amendatory water service contract to add an additional point of delivery to accommodate the District's proposed Los Vaqueros project. Amendment will also conform contract to current water ratesetting policies.

13. *San Juan Suburban Water District, CVP, California:* Amend Contract No. 14–06–200–152A to provide for the current CVP water rates to conform the contract with the provisions of section 105 and 106 of Pub. L. 99–546.

14. *Centerville Community Services District, CVP, California:* Water service contract for up to 800 acre-feet of M&I water annually.

15. *Shasta County Water Agency, CVP, California:* Amendatory water service contract to provide for reduction in annual entitlement of 800 acre-feet.

16. *Central Valley Project, California:* Amendatory contracts to include the provision of the Act of July 2, 1956 (70 Stat. 483) and/or the Act of June 21, 1963 (77 Stat. 68) in existing water service contracts.

17. *California Department of Corrections, CVP, California:* Water service for up to 1,000 acre-feet of water annually to serve the Sierra Conservation Center (a State prison) near Jamestown, California.

18. *Redwood Valley Water District, SRPA, California:* Amendatory loan repayment contract.

19. *Placer County Water Agency, CVP, California:* Amend Contract No. 14–06–200–5082A to provide for the current CVP water rates.

20. *Broadview Water District, CVP, California:* Amend Contract No. 14–06–200–8082 to provide for change in point of diversion, right to construct new turnout on the San Luis Canal, and contract renewal.

21. *Sutter Butte Mutual Water Company, CVP, California:* Water service contract for a long-term supplemental water supply. Contract will assure Company's water users an alternate water supply during periods of deficiency in their appropriative water rights. Annual water quantity not determined at this time.

22. *Paramount Citrus Association, CVP, California:* Contract to convey nonproject water through Federal facilities with exemption of RRA under 426.18. Up to 4,000 acre-feet of water to be transferred through Friant-Kern Canal for delivery to Southern San Joaquin Municipal District.

23. *Butte Slough Irrigation Company, CVP, California:* Water service contract for a long-term supplemental water supply. Contract will assure Company's water users an alternate water supply during periods of deficiency in their appropriative water rights. Annual water quantity not determined at this time.

24. *Lindsay-Strathmore ID, Friant-Kern Canal, CVP, California:* Warren Act contract to convey and/or store nonproject water through project facilities.

25. *Madera ID, Hidden Unit, CVP, California:* Renewal of existing water service contract for 24,000 acre-feet of water which expires February 29, 1992.

26. *Chowchilla WD, Buchanan Unit, CVP, California:* Renewal of existing water service contract for 24,000 acre-feet of water which expires February 28, 1991.

27. *Truckee Carson Irrigation District, Newlands Project, Nevada:* Warren Act contract to convey and/or store nonproject water in Project facilities.

28. *Truckee Carson Irrigation District, Newlands Project, Nevada:* Contract for repayment of construction costs of Newlands Project.

29. *Santa Barbara County Water Agency, Cachuma Project, California:* Repayment contract for reimbursement of funds expended under the Emergency Fund Act for continuation of water service.

30. *San Luis and Delta-Mendota Water Users Authority, CVP, California:* Financing agreement to provide for replacement of impellers at Tracy Pumping Plant.

31. *San Luis Water District, CVP, California:* Amendatory water service contract to provide that the District pay

full operation and maintenance (O&M) rate for all deliveries resulting from Axbderian Pumping Plant enlargement and the cost of service rate for such deliveries beginning in 1996 and each year thereafter.

32. *United Water Conservation District, SRPA, California:* Amendatory loan repayment contract.

Lower Colorado Region

Bureau of Reclamation, P.O. Box 427 (Nevada Highway and Park Street), Boulder City, Nevada 89005, telephone (702) 293-8536.

1. *Agricultural and M&I water users, CAP, Arizona:* Water service subcontracts; a certain percent of available supply for irrigation entities and up to 640,000 acre-feet per year for M&I use.

2. *Southern Arizona Water Rights Settlement Act:* Sale of up to 28,200 acre-feet per year of municipal effluent to the City of Tucson, Arizona.

3. *Contracts with five agricultural entities located near the Colorado River, BCP, Arizona:* Water service contracts for up to 1,920 acre-feet per year total.

4. *Gila River Indian Community, CAP, Arizona:* Water service contract for delivery of up to 173,100 acre-feet per year.

5. *ID's and similar water user entities:* Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97–293).

6. *Indian and non-Indian agricultural and M&I water users, CAP, Arizona:* Contracts for repayment of Federal expenditures for construction of distribution systems.

7. *State of Arizona, BCP, Arizona:* Contract for an undetermined amount of Colorado River water for M&I use and for agricultural use and related purposes on state-owned land.

8. *Imperial ID and/or the Coachella Valley Water District, California:* Contract providing for exchange of up to 10,000 acre-feet of water per year from a well field to be constructed adjacent to the All-American Canal (AAC) for an equivalent quantity and quality of Colorado River water and for O&M of the well field, Lower Colorado Water Supply Project, California.

9. *Lower Colorado Water Supply Project, California:* Water service and repayment contracts with nonagricultural users in California adjacent to the Colorado River for an aggregate consumptive use of up to 10,000 acre-feet of Colorado River water per year in exchange for an equivalent amount of water to be pumped into the AAC from a well field to be constructed adjacent to the canal.

10. Hutchison present perfected rights contract amendment to reflect the transfer of part of the right to Winterhaven, California, Supreme Court Decree in *Arizona* v. *California* and BCP.

11. Winterhaven present perfected rights contract for a portion of Hutchison Present Perfected Rights transferred to Winterhaven, Supreme Court Decree in *Arizona* v. *California* and BCP.

12. *County of San Bernardino, SRPA, California:* Repayment contract for a $29.6 million loan.

13. *Tohono O'Odham Nation, SRPA, Arizona:* Repayment contract for a $7.3 million loan for the Schuk Toak District.

14. *Sturges Trust, Supreme Court Decree in Arizona* v. *California and BCP, Arizona:* Contract for delivery of 8,500 acre-feet of Colorado River water per year for agricultural use as recommended by the State of Arizona and to recognize a 780 acre-feet present perfected right to the use of Colorado River water.

15. *Fort Mohave Indian Reservation, Supreme Court Decree in Arizona* v. *California and BCP, Arizona:* Contract for delivery of Colorado River water for its Federal establishment present perfected right, totaling 122,648 acre-feet of diversions annually.

16. *Colorado River Commission of Nevada, BCP, Nevada:* A surplus water contract which would allow them to utilize Colorado River water for M&I purposes when available.

17. *BCP, Arizona:* Contracts for additional allocations of Colorado River water to cities located along the Colorado River in Arizona for up to 15,076 acre-feet per year as recommended by the Arizona Department of Water Resources.

18. *National Park Service for Lake Mead National Recreation Area, Supreme Court decree in Arizona* v. *California and BCP in Arizona and Nevada:* Memorandum of Understanding for delivery of Colorado River water for its Federal establishment present perfected right of 500 acre-feet of diversions annually, and the Federal establishment perfected right pursuant to Executive Order No. 5125 (April 25, 1930).

19. *Eastern Municipal Water District, SRPA, California:* Repayment contract for $31 million loan.

Upper Colorado Region:

Bureau of Reclamation, P.O. Box 11568, 125 South State Street, Salt Lake City, Utah 84147, telephone (801) 524–5495.

1. *Individual irrigators, M&I, and miscellaneous water users, Utah, Wyoming, Colorado, and New Mexico:* Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

(a) *The Benevolent and Protective Order of the Elks, Lodge No. 1747, Farmington, New Mexico:* Navajo Reservoir water service contract; 20 acre-feet per year for municipal use; contract term for 40 years from execution.

2. *Southern Ute Indian Tribe, Animas-La Plata Project, Colorado:* Repayment contract for 26,500 acre-feet per year for M&I use and 2,600 acre-feet per year for irrigation use in Phase One and 700 acre-feet in Phase Two. Contract terms to be consistent with binding cost sharing agreement and water rights settlement agreement in principle.

3. *Ute Mountain Ute Tribe, Animas-La Plata Project, Colorado and New Mexico:* Repayment contract; 6,000 acre-feet per year for M&I use in Colorado; 26,400 acre-feet per year for irrigation use in Colorado; 900 acre-feet per year for irrigation use in New Mexico. Contract terms to be consistent with binding cost-sharing agreement and water rights settlement agreement.

4. *Navajo Indian Tribe, Animas-La Plata Project, New Mexico.* Repayment contract for 7,600 acre-feet per year for M&I use.

5. *La Plata Conservancy District, Animas-La Plata Project, New Mexico:* Repayment contract for 9,900 acre-feet per year for irrigation use.

6. *Uintah Water Conservancy District, Jensen Unit, Central Utah Project, Utah:* Amendatory repayment contract to reduce municipal and industrial water supply and corresponding repayment obligation.

7. *Vermejo Conservancy District, Vermejo Project, New Mexico:* Amendatory contract to relieve the district of further repayment obligation, presently exceeding $2 million, pursuant to Public Law 96–550.

8. *Conejos Water Conservancy District, San Luis Valley Project, Colorado:* Amendatory contract to place OM&R costs on a variable basis commensurate with the availability of project water.

9. *Weber Basin Water Conservancy District, Weber Basin Project, Utah:* Repayment Contract for Rehabilitation and Betterment work of selected project facilities.

Great Plains Region

Bureau of Reclamation, P.O. Box 36900, Federal Building, 316 North 26th Street, Billings, Montana 59107–6900, telephone (406) 657–6413.

1. *Individual irrigators, Municipal and Industrial (M&I), and miscellaneous water users, Great Plains Region: Montana, Wyoming, North Dakota, South Dakota, Colorado, Kansas, Nebraska, Oklahoma, and Texas:* Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

2. *Fort Shaw Irrigation District, Sun River Project, Montana:* R&B loan repayment contract; up to $1.5 million.

3. *Owl Creek Irrigation District, Owl Creek Unit, P–SMBP, Wyoming:* Amendatory water service contract to reflect reduced water supply benefits being received from Anchor Reservoir.

4. *Green Mountain Reservoir, Colorado-Big Thompson Project, Colorado:* Water service contracts; contract negotiations for sale of water from the marketable yield to water users within the Colorado River Basin of Western Colorado.

5. *Ruedi Reservoir, Fryingpan-Arkansas Project, Colorado:* Water service contracts; proposed second round contract negotiations for sale of agricultural, municipal, domestic and industrial water from the regulatory capacity of Ruedi Reservoir.

6. *Cedar Bluff Irrigation District No. 6, Cedar Bluff Unit, P–SMBP, Kansas:* Repayment contract; pending passage of Congressional legislation, terminate the Cedar Bluff Irrigation District's contract. The use of the District's portion of the reservoir storage capacity will be sold to the State of Kansas for fish, wildlife, recreation, and other purposes.

7. *Frenchman Valley Irrigation District, Frenchman Unit, P–SMBP, Nebraska:* Pending passage of congressional legislation, renegotiate District's existing contract to reduce payments based on payment ability and reduced water supply.

8. *Department of Natural Resources and Conservation, Montana:* SRPA Grant and loan contract for rehabilitation of Middle Creek Dam to meet required safety criteria and to increase reservoir storage capacity by 1,917 acre-feet which will be utilized for irrigation and municipal purposes.

9. *Garrison Diversion Unit, P–SMBP, North Dakota:* Repayment contract; Renegotiation of the master repayment contract with Garrison Diversion Conservancy District to bring the terms in line with the Garrison Diversion Unit Reformulation Act of 1986. Negotiation of repayment contracts with irrigators and M&I users.

10. *Corn Creek Irrigation District, Glendo Unit, P–SMBP, Wyoming:* Repayment contract for 10,350 acre-feet of supplemental irrigation water from Glendo Reservoir.

11. *Glen Elder Unit, P–SMBP, Kansas:* Negotiations for long-term contracts for agricultural water service from Waconda Lake.

12. *Foss Reservoir Master Conservancy District, Washita Basin Project, Oklahoma:* Amendatory repayment contract for remedial work.

13. *Arbuckle Master Conservancy District, Arbuckle Project, Oklahoma:* Contract for the repayment of costs incurred by the United States for the construction of the Sulphur, Oklahoma, pipeline and pumping plant (if constructed).

14. *Board of Water Commissioners of the City and County of Denver, the Colorado River Water Conservation District, and the Northern Colorado Water Conservancy District, Colorado-Big Thompson Project, Colorado:* Operating agreement for substitution of water in the proposed Muddy Creek or Rock Creek Reservoir for Green Mountain Reservoir water.

15. *Sargent Irrigation District, Middle Loup Division, P–SMBP, Nebraska:* R&B loan repayment contract not to exceed $2,435,000.

16. *Chinook Water Users Association, Milk River Project, Montana:* SRPA contract for loan of up to $6,000,000 for improvements to the Association's water conveyance system.

17. *Heart River Unit, Dickinson Subunit, P–SMBP, North Dakota:* Renegotiate Water Service Contract No. 179r–1412 with the City of Dickinson. Existing contract expired September 24, 1990.

18. *Malta Irrigation District, Malta Division, Milk River Project, Montana:* R&B contract for repayment of $5,600,000 loan.

19. *Midvale Irrigation District, Riverton Unit, P–SMBP, Wyoming:* Long-term contract for water service from Boysen Reservoir.

20. *Tom Green County Water Control and Improvement District No. 1, San Angelo Project, Texas:* Amendatory contract to increase irrigable acreage within the project.

21. East Bench Irrigation District, East Bench Unit, P-SMBP, deferment of semiannual payment of $21,800 due December 31, 1990. The deferment is due to extremely low water levels in Clark Canyon Reservoir.

22. *Palmetto Bend Project, Texas:* Amendment of the tripartite contract among the United States, the Lavaca-Navidad River Authority and the Texas Water Development Board to transfer the Board's remaining repayment obligation and interest in the Palmetto Bend Project to the Authority.

23. *City of Havre, Milk River Project, Montana:* New long-term water service contract for up to 2,800 acre-feet annually.

24. *Lakeview Irrigation District, Shoshone Project, Wyoming:* New long-term water service contract for up to 15,000 acre-feet of water annually from Buffalo Bill Reservoir.

25. *City of Rapid City, Rapid Valley Unit, P–SMBP, South Dakota:* Long-term water service contract renewal for approximately 7,000 acre-feet of water from Pactola Reservoir.

Opportunity for public participation and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

(1) Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

(2) Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of the Bureau of Reclamation.

(3) All written correspondence regarding proposed contracts will be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

(4) Written comments on proposed contract or contract action must be submitted to the appropriate Bureau of Reclamation officials at locations and within the time limits set forth in the advance public notices.

(5) All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

(6) Copies of specific proposed contracts may be obtained from the appropriate Regional Director or his designated public contact as they become available for review and comment.

(7) In the event modifications are made in the form of a proposed contract, the appropriate Regional Director shall determine whether republication of the notice and/or extension of the 60-day comment period is necessary.

Factors which shall be considered in making such a determination shall

include, but are not limited to: (i) The significance of the impact(s) of the modification, and (ii) the public interest which has been expressed over the course of the negotiations. As a minimum, the Regional Director shall furnish revised contracts to all parties who requested the contract in response to the initial public notice.

Dated: October 10, 1990.

Dennis B. Underwood,

Commissioner.

BILLING CODE 4310-55-M

Fish and Wildlife Service

Receipt of Application for a Permit

The following applicant has applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Erie Zoological Society, Erie, PA. PRT 749376.

The applicant requests a permit to export one captive-bred Bengal tiger (*Panthera tigris*) to Parque Zoologico Nacional, in the Republic of Dominica, for purposes of captive-breeding and zoological display.

Documents and other information submitted with this application are available to the public during normal business hours (7:45 a.m. to 4:15 p.m.) room 430, 4401 N. Fairfax Dr., Arlington VA 22203, or by writing to the Director, U.S. Office of Management Authority, 4401 N. Fairfax Drive, room 433, Arlington, VA 22203.

Interested persons may comment on this application within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: October 11, 1990.

Karen Wilson,

Acting Chief, Branch of Permits, U.S. Office of Management Authority.

BILLING CODE 4310-55-M

Minerals Management Service

Information Collection Requirements for Subpart B, Exploration and Development and Production Plans

AGENCY: Minerals Management Service, Interior.

ACTION: Request for comments on the information collection requirements for Subpart B—Exploration and Development and Production Plans, 30 CFR Part 250 (OMB No. 1010-0049).

SUMMARY: The Minerals Management Service (MMS), as part of its continuing effort to reduce the paperwork and respondent burden required by the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*), provides the general public, industry, and State and other Federal agencies an opportunity to comment on current and proposed information collection requirements. The MMS will evaluate all comments and will revise reporting and recordkeeping requirements, as appropriate, to minimize respondent burdens. This notice specifically requests comments regarding the information collection burdens imposed by MMS regulations on lessees that plan to conduct exploration, development, and production activities in the Outer Continental Shelf (OCS). Comments will be used in the preparation of an information collection request to be submitted to the Office of Management and Budget (OMB) for the renewal of information collection authorizations.

DATES: Comments may be submitted on or before November 15, 1990.

ADDRESSES: Comments and suggestions on these collection requirements should be submitted to Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards, Offshore Rules and Operations Division, Mail Stop 4700, Minerals Management Service, 381 Elden Street, Herndon, Virginia 22070-4817, with copies to the Bureau Clearance Officer, Mail Stop 2300, 381 Elden Street, Herndon, Virginia 22070-4817 and to the Office of Management and Budget, Paperwork Reduction Project (1010-0049), Washington, DC 20503, telephone (202) 395-7340.

FOR FURTHER INFORMATION CONTACT: Copies of the current information collection requirements and supporting material may be obtained by contacting Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards; telephone (703) 787-1600 or (FTS) 393-1600.

SUPPLEMENTARY INFORMATION:

I. Background

The OCS Lands Act, 43 U.S.C. 1331 *et seq.*, requires the holders of OCS oil and gas and sulphur leases to submit Exploration or Development and Production Plans to the Secretary of the Interior (Secretary) prior to commencing exploration, development, or production activities. To carry out these responsibilities, the Secretary has authorized the Director of MMS to issue regulations governing OCS oil and gas and sulphur lease operations. The rules implementing the requirements and associated information collections for Exploration and Development and Production Plans are contained in 30 CFR part 250, subpart B—Exploration and Development and Production Plans. The information collected under subpart B is analyzed and evaluated by MMS engineers, geologists, geophysicists, and environmental scientists to ensure that planned operations will not adversely affect the marine, coastal, or human environment. The information collected is also reviewed by affected States for consistency with approved Coastal Zone Management Plans.

The Paperwork Reduction Act of 1980 requires MMS to obtain approval of the information collection requirements for subpart B from OMB. The MMS obtained approval for the information collection requirements for subpart B in January 1988 during the restructuring and consolidation of the offshore operating regulations under 30 CFR part 250. This information collection was approved by OMB through January 31, 1991.

II. Current Actions

The MMS is preparing an information collection request that will be submitted to OMB in order to obtain renewal of the authorization for information collections under subpart B. An information collection authorization request must contain a description of the information collection requirements, statements justifying their collection, and responses to comments from individuals affected by the information collection. This notice provides a brief description of the information collection requirements for subpart B and the estimated burden for industry to prepare the information.

III. Request for Comments

The sections of subpart B that contain information collection requirements are listed below, along with MMS's estimates of the number of requests or annual plans submitted, preparation time per response or plan, and total burden hours for each requirement. The total burden for submitting plans has been calculated by multiplying the estimated number of initial and revised Exploration and Development and Production Plans that will be submitted in a year by the estimated time to prepare each initial and revised plan. The MMS requests the oil and gas and sulphur industries and other interested parties to comment on these information collection requirements, including comments regarding the clarity of the information requirements, availability of

required information, estimated burden hours, and frequency of collection.

(a) *Section 250.31 Preliminary activities.* Notification of the type, scope, and timing of preliminary activities—100 requests to submit notification per year, 1 hour per response, 100 total burden hours.

(b) *Section 250.33 Exploration plan.* Detailed descriptions of the exploration activities, including type of drilling unit to be used, well information, geologic information, new technology used, onshore support infrastructure, waste disposal, meteorological conditions, physical oceanography, onsite flora and fauna, environmentally sensitive areas, local archaeological and cultural resources, assessment of effects, coastal zone consistency certificate, responsible individuals, and other information as required by the Regional Supervisor—300 initial Exploration Plans submitted per year, 480 hours per initial plan, 300 revised Exploration Plans submitted per year, 80 hours per revised plan, 168,000 total burden hours.

(c) *Section 250.34 Development and production plan.* Detailed descriptions of development and production activities, including schedule of activities, types of drilling vessels or platforms, location of pipelines, geological and geophysical information, environmental safeguards, satisfaction of lease stipulations, reservoir engineering practices, drilling and completion programs, new technology, drilling fluids, waste disposal, onshore support facilities, existing environment, archaeological and cultural resources, aquatic biota, environmentally sensitive areas, physical oceanography, meteorological conditions, other uses of the area, assessment of effects, alternatives to activities, coastal zone consistency certificate, responsible individuals, and other information as required by the Regional Supervisor—100 initial Development and Production Plans submitted per year, 480 hours per initial plan, 200 revised Development and Production Plans submitted per year, 80 hours per revised plan, 64,000 total burden hours.

The total annual information collection burden on lessees for subpart B is 232,100 hours.

Comments submitted in response to this notice will be summarized and/or included in the information collection authorization request submitted to OMB for approval of this information collection. These comments will also become a matter of public record.

Authority: Section 204, Pub. L. 95-372, 92 Stat. 629 (43 U.S.C. 1334).

Dated: October 4, 1990.

Ed Cassidy,

Deputy Director, Minerals Management Service.

[FR Doc. 90-24287 Filed 10-15-90; 8:45 am]

BILLING CODE 4310-MR-M

Information Collection Requirements for Subpart E, Well-Completion Operations

AGENCY: Minerals Management Service, Interior.

ACTION: Request for comments on the information collection requirements for Subpart E—Well-Completion Operations, 30 CFR part 250 (OMB No. 1010-0067).

SUMMARY: The Minerals Management Service (MMS), as part of its continuing effort to reduce the paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*), provides the general public, industry, and State and other Federal agencies an opportunity to comment on current and proposed information collection requirements. The MMS will evaluate all comments and will revise reporting and recordkeeping requirements, as appropriate, to minimize respondent burdens. This notice specifically requests comments regarding the information collection burdens imposed by MMS regulations on lessees that conduct well-completion operations in the Outer Continental Shelf (OCS). Comments will be used in the preparation of an information collection request to be submitted to the Office of Management and Budget (OMB) for the renewal of information collection authorizations.

DATES: Comments may be submitted on or before November 15, 1990.

ADDRESSES: Comments and suggestions on these collection requirements should be submitted to Gerald D. Rhodes; Chief, Branch of Rules, Orders, and Standards; Offshore Rules and Operations Division, Mail Stop 4700, Minerals Management Service, 381 Elden Street, Herndon, Virginia 22070-4817, with copies to the Bureau Clearance Officer, Mail Stop 2300, 381 Elden Street, Herndon, Virginia 22070-4817 and to the Office of Management and Budget, Paperwork Reduction Project (1010-0067), Washington, DC 20503, telephone (202) 395-7340.

FOR FURTHER INFORMATION CONTACT: Copies of the current information collection requirements and supporting material may be obtained by contacting Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards, telephone (703) 787-1600 or (FTS) 393-1600.

SUPPLEMENTARY INFORMATION:

I. Background

The OCS Lands Act, 43 U.S.C. 1331 *et seq.*, gives the Secretary of the Interior (Secretary) the responsibility to preserve, protect, and develop oil and gas resources in the OCS in a manner which is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resources development with protection of the human, marine, and coastal environment; ensure the public a fair and equitable return on OCS resources; and preserve and maintain free enterprise competition.

The Paperwork Reduction Act of 1980 requires MMS to obtain approval of the information collection requirements for subpart E from OMB. The MMS obtained approval for the information collection requirements for subpart E in January 1988 during the restructuring and consolidation of the offshore operating regulations under 30 CFR part 250. This information collection was approved by OMB through January 31, 1991.

II. Current Actions

The MMS is preparing an information collection request that will be submitted to OMB in order to obtain renewal of the authorization for information collections for subpart E. An information collection authorization request must contain a description of the information collection requirements, statements justifying their collection, and responses to comments from individuals affected by the information collection. This notice provides a brief description of the information collection requirements for subpart E and the estimated burden for industry to prepare the information.

III. Request for Comments

The sections of subpart E that contain information collection requirements are listed below, along with MMS's estimates of the average number of annual responses, completion time per response, recordkeeping hours per lessee, and burden hours for each requirement. The burden hours have been calculated by multiplying the estimated number of well-completion activities (500) that will likely occur on OCS oil and gas leases during the next year by the estimated time to prepare the required information or recordkeeping.

The MMS requests the oil and gas industry and other interested parties to comment on these information collection requirements, including comments regarding the clarity of the information requirements, availability of required information, estimated burden hours, and frequency of collection.

(a) *Section 250.70 Crew instructions.* Record date and time of crew safety meetings

BEST COPY AVAILABLE

—0 responses per year, 0 hours per response, 80 hours of recordkeeping (1 recordkeeping entry per crew ×2 crews per completion ×200 completions ×0.05 hours per entry), 80 burden hours.

(b) *Section 250.81 Traveling-block safety device.* Record results of weekly operational check of safety device —0 responses per year, 0 hours per response, 80 hours of recordkeeping (1 operational check per week × average of 2 weeks per completion operation ×200 completions ×0.05 hours recordkeeping time per entry), 80 burden hours.

(c) *Section 250.85 Blowout prevention equipment.* Well-control procedure for annular preventer when expected surface pressure exceeds rated working pressure submitted to District Supervisor, as appropriate —10 responses per year, 1.0 hour per response, 0 hours of recordkeeping, 10 burden hours.

(d) *Section 250.89 Blowout preventer system testing, records, and drills.* Record pressure testing, actuations, and inspections of the blowout preventer system, system components, and marine risers or record reason for postponing testing —0 responses per year, 0 hours per response, 196 hours of recordkeeping (470 tests ×0.4 hours to document test + 30 postponed tests ×2.2 hours to document reason for test delay —188 + 8 hours of recordkeeping), 196 burden hours.

(e) *Section 250.87 Tubing and wellhead equipment.* Casing shall be pressure tested, calipered, or otherwise evaluated every 30 days following prolonged operations that could damage casing, and results should be submitted to the District Supervisor —10 responses per year, 0.5 hours per response, 0 hour of recordkeeping, 5 burden hours.

The total annual information collection burden on lessees for subpart E is 308 hours.

Comments submitted in response to this notice will be summarized and/or included in the information collection request submitted to OMB for approval of this information collection. These comments will also become a matter of public record.

Authority: Sec. 204, Pub. L. 95-372, 92 Stat. 629 (43 U.S.C. 1334).

Dated: October 4, 1990.

Ed Cassidy,

Deputy Director, Minerals Management Service.

BILLING CODE 4310-MR-M

Information Collection Requirements for Subpart F, Well-Workover Operations

AGENCY: Minerals Management Service, Interior.

ACTION: Request for comments on the information collection requirements for Subpart F—Well-Workover Operations, 30 CFR part 250 (OMB No. 1010-0043).

SUMMARY: The Minerals Management Service (MMS), as part of its continuing effort to reduce the paperwork and respondent burden required by the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*), provides the general public, industry, and State and other Federal agencies an opportunity to comment on current and proposed information collection requirements. The MMS will evaluate all comments and will revise reporting and recordkeeping requirements, as appropriate, to minimize respondent burdens. This notice specifically requests comments regarding the information collection burdens imposed by MMS regulations on lessees that conduct well-workover operations in the Outer Continental Shelf (OCS). Comments will be used in the preparation of an information collection request to be submitted to the Office of Management and Budget (OMB) for the renewal of information collection authorizations.

DATES: Comments may be submitted on or before November 15, 1990.

ADDRESSES: Comments and suggestions on these collection requirements should be submitted to Gerald D. Rhodes; Chief, Branch of Rules, Orders, and Standards; Offshore Rules and Operations Division; Mail Stop 4700; Minerals Management Service; 381 Elden Street; Herndon, Virginia 22070-4817, with copies to the Bureau Clearance Officer; Mail Stop 2300; 381 Elden Street; Herndon, Virginia 22070-4817 and to the Office of Management and Budget; Paperwork Reduction Project (1010-0043); Washington, DC 20503, telephone (202) 395-7340.

FOR FURTHER INFORMATION CONTACT: Copies of the current information collection requirements and supporting material may be obtained by contacting Gerald D. Rhodes; Chief, Branch of Rules, Orders, and Standards; telephone (703) 787-1600 or (FTS) 393-1600.

SUPPLEMENTARY INFORMATION:

I. Background

The OCS Lands Act, 43 U.S.C. 1331 *et seq.*, gives the Secretary of the Interior (Secretary) the responsibility to preserve, protect, and develop oil and gas resources in the OCS in a manner which is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resources development with protection of the human, marine, and coastal environment; ensure the public a fair and equitable return on OCS resources; and preserve and maintain free enterprise competition. To carry out these responsibilities, the Secretary has authorized the Director of MMS to issue rules governing OCS oil and gas and sulphur lease operations. The rules governing well-workover operations are contained in 30 CFR part 250, Subpart F—Well-Workover Operations.

The Paperwork Reduction Act of 1980 requires MMS to obtain approval of the information collection requirements for subpart F from OMB. The MMS obtained approval for the information collection requirements for subpart F in January 1988 during the restructuring and consolidation of the offshore operating regulations under 30 CFR part 250. This information collection was approved by OMB through January 31, 1991.

II. Current Actions

The MMS is preparing an information collection request that will be submitted to OMB in order to obtain renewal of the authorization for information collections for subpart F. An information collection authorization request must contain a description of the information collection requirements, statements justifying their collection, and responses to comments from individuals affected by the information collection. This notice provides a brief description of the information collection requirements for subpart F and the estimated burden for industry to prepare the information.

III. Request for Comments

The sections of subpart F that contain information collection requirements are listed below, along with MMS's estimates of the average number of annual responses, completion time per response, recordkeeping hours per lessee, and burden hours for each requirement. The burden hours have been calculated by multiplying the estimated number of well-workover activities (400) that will likely occur on OCS oil and gas leases during the next year and the estimated time to prepare the required information or recordkeeping. The MMS requests the oil and gas and sulphur industries and other interested parties to comment on these information collection requirements, including comments regarding the clarity of the information requirements, availability of required information, estimated burden hours, and frequency of collection.

(a) *Section 250.89 Crew instructions.* Record date and time of crew safety meetings—0 responses per year, 0 hours per response, 40 hours of recordkeeping (1 recordkeeping entry per crew x 2 crews per workover x 400 workovers x 0.05 hours per entry), 40 burden hours.

(b) *Section 250.101 Traveling-block safety device.* Record results of weekly operational check of safety device—0 responses per year, 0 hours per response, 40 hours of recordkeeping (1 operational check per week x average of 2 weeks per workover operation x 400 workovers x 0.05 hours recordkeeping time per entry), 40 burden hours.

(c) *Section 250.105 Blowout prevention equipment.* Well-control procedure for annular preventer when expected surface pressure exceeds rated working pressure submitted to District Supervisor, as appropriate—10 responses per year, 1.0 hours per response, 0 hours of recordkeeping, 10 burden hours.

(d) *Section 250.108 Blowout preventer system testing, records, and drills.* Record pressure testing, actuations, and inspections of the blowout preventer system, system components, and marine risers or record reason for postponing testing—0 responses per year, 0 hours per response, 155 hours of recordkeeping (375 tests x 0.4 hours to document test + 25 postponed tests x 0.2 hours to document reason for test delay = 150 + 5 hours of recordkeeping), 155 burden hours.

(e) *Section 250.107 Tubing and wellhead equipment.* Casing shall be pressure tested, calipered, or otherwise evaluated every 30 days following prolonged operations that could damage casing, and results should be submitted to the District Supervisor—10 responses per year, 0.5 hours per response, 0 hours of recordkeeping, 5 burden hours.

The total annual information collection burden on lessees for subpart F is estimated to be 250 hours.

Comments submitted in response to this notice will be summarized and/or included in the information collection request submitted to OMB for approval of this information collection. These comments will also become a matter of public record.

Authority: Section 204, Pub. L. 95-372, 92 Stat. 629 (43 U.S.C. 1334).

Dated: October 4, 1990.

Ed Cassidy,

Deputy Director, Minerals Management Service.

BILLING CODE 4310-MR-M

Information Collection Requirements for Subpart G, Abandonment of Wells

AGENCY: Minerals Management Service, Interior.

ACTION: Request for comments on the information collection requirements for Subpart G—Abandonment of Wells, 30 CFR part 250 (OMB No. 1010-0079).

SUMMARY: The Minerals Management Service (MMS), as part of its continuing effort to reduce the paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*), provides the general public, industry, and State and other Federal agencies an opportunity to comment on current and proposed information collection requirements. The MMS will evaluate all comments and will revise reporting and recordkeeping requirements, as appropriate, to minimize respondent burdens. This notice specifically requests comments regarding the information collection burdens imposed by MMS regulations on lessees that plan to maintain the temporarily abandoned status of a well drilled under an oil and gas or sulphur lease in the Outer Continental Shelf (OCS). Comments will be used in the preparation of an information collection request to be submitted to the Office of Management and Budget (OMB) for the renewal of information collection authorizations.

DATES: Comments may be submitted on or before November 15, 1990.

ADDRESSES: Comments and suggestions on these collection requirements should be submitted to Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards, Offshore Rules and Operations Division, Mail Stop 4700, Minerals Management Service, 381 Elden Street, Herndon, Virginia 22070-4817, with copies to the Bureau Clearance Officer, Mail Stop 2300, 381 Elden Street, Herndon, Virginia 22070-4817 and to the Office of Management and Budget, Paperwork Reduction Project (1010-0079), Washington, DC 20503, telephone (202) 395-7340.

FOR FURTHER INFORMATION CONTACT: Copies of the current information collection requirements and supporting material may be obtained by contacting Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards, telephone (703) 787-1600 or (FTS) 393-1600.

SUPPLEMENTARY INFORMATION:

I. Background

The OCS Lands Act, 43 U.S.C. 1331 *et seq.*, gives the Secretary of the Interior (Secretary) the responsibility to preserve, protect, and develop oil and gas resources in the OCS in an appropriate manner. The OCS Lands Act requires the holders of OCS oil and gas and sulphur leases to conduct operations using technology, precautions, and techniques sufficient to prevent or minimize physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health. To carry out these responsibilities, the Secretary has authorized the Director of MMS to issue regulations governing OCS oil and gas and sulphur lease operations. The rules governing the temporary abandonment of a drilling well are contained in 30 CFR Part 250, Subpart G—Abandonment of Wells. The information collected under Subpart G is evaluated by MMS to determine the necessity for allowing a well to remain in a temporarily abandoned status.

The Paperwork Reduction Act of 1980 requires MMS to obtain approval of the information collection requirements for subpart G from OMB. The MMS obtained approval for the information collection requirements for subpart G in January 1988 during the restructuring and consolidation of the offshore operating regulations under 30 CFR part 250. This information collection was approved by OMB through January 31, 1991.

II. Current Actions

The MMS is preparing an information collection request that will be submitted to OMB in order to obtain renewal of the authorization for information collections for subpart G. An information collection authorization request must contain a description of the information collection requirements, statements justifying their collection, and responses to comments from individuals affected by the information collection. This notice provides a brief description of the information collection requirements for subpart G and the estimated burden for industry to complete the required information.

III. Request for Comments

The section of subpart G that contains an information collection requirement is listed below, along with MMS's estimates of the number of annual reports, completion time per report, and total burden hours for the requirement. The total burden for reporting has been calculated by multiplying the estimated number of reentry reports that will be submitted in a year by the estimated time to complete each report. The MMS requests the oil and gas and sulphur industries and other interested parties to comment on these information collection requirements, including comments regarding the clarity of the information requirements, availability of required information, estimated burden hours, and frequency of collection.

Section 250.113 Temporary abandonment. An annual report describing plans for reentry to complete or permanently abandon well—1,000 reports per year, 0.25 hours per report, 250 total burden hours.

The total annual information collection burden on lessees for subpart G is 250 hours.

Comments submitted in response to this notice will be summarized and/or included in the information collection package submitted to OMB for approval of this information collection. These comments will also become a matter of public record.

Authority: Sec. 204, Pub. L. 95-372, 92 Stat. 629 (43 U.S.C. 1334).

Dated: October 4, 1990.

Ed Cassidy,

Deputy Director, Minerals Management Service.

BILLING CODE 4310-MR-M

Information Collection Requirements for Prospecting for Minerals Other Than Oil, Gas, and Sulphur in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Request for comments on the information collection requirements for Prospecting for Minerals Other Than Oil, Gas, and Sulphur in the Outer Continental Shelf, 30 CFR part 280 (OMB No. 1010-0072).

SUMMARY: The Minerals Management Service (MMS), as part of its continuing effort to reduce the paperwork and respondent burden (required by the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*), provides the general public, industry, and State and other Federal agencies an opportunity to comment on current and proposed information collection requirements. The MMS will evaluate all comments and will revise reporting and recordkeeping requirements, as appropriate, to minimize respondent burdens. This notice specifically requests comments regarding the information collection burdens imposed by MMS regulations on Prospecting for Minerals Other Than Oil, Gas, and Sulphur in the Outer Continental Shelf (OCS). Comments will be used in the preparation of an information collection request to be submitted to the Office of Management and Budget (OMB) for the renewal of information collection authorizations.

DATE: Comments may be submitted on or before November 15, 1990.

ADDRESSES: Comments and suggestions on these collection requirements should be submitted to Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards, Offshore Rules and Operations Division, Mail Stop 4700, Minerals Management Service, 381 Elden Street, Herndon, Virginia 22070-4817, with copies to the Bureau Clearance Officer, Mail Stop 2300, 381 Elden Street, Herndon, Virginia 22070-4817 and to the Office of Management and Budget, Paperwork Reduction Project (1010-0072), Washington, DC 20503, telephone (202) 395-7340.

FOR FURTHER INFORMATION CONTACT: Copies of the current information collection requirements and supporting material may be obtained by contacting Gerald D. Rhodes, Chief, Branch of Rules, Orders, and Standards, telephone (703) 787-1600 or (FTS) 393-1600.

SUPPLEMENTARY INFORMATION:

I. Background

Section 8(k) of the OCS Lands Act, 43 U.S.C. 1337, authorizes the Secretary of the Interior (Secretary) "* * * to grant to the qualified persons offering the highest cash bonuses on a basis of competitive bidding leases of any mineral other than oil, gas, and sulphur in any area of the Outer Continental Shelf not then under lease for such mineral upon such royalty, rental, and other terms and conditions as the Secretary may prescribe * * *." To carry out these responsibilities, the Secretary has authorized the Director of MMS to issue rules governing the prospecting for minerals other than oil, gas, and sulphur. These rules are contained in 30 CFR Part 280—Prospecting for Minerals Other than Oil, Gas, and Sulphur in the OCS (Prospecting).

The Paperwork Reduction Act of 1980 requires MMS to obtain approval of the information collection requirements for Prospecting from OMB. The MMS submitted an information collection authorization request for renewal in October 1989 and received approval for this information collection through January 1991.

II. Current Actions

The MMS is preparing an information collection request that will be submitted to OMB in order to obtain renewal of the information collection authorizations for Prospecting. An information collection authorization request must contain a description of the information collection requirements, statements justifying their collection, and responses to comments from individuals affected by the information collection. This notice provides a brief description of the information collection requirements for Prospecting and the estimated burden for industry to prepare the information.

III. Request for Comments

The sections of Prospecting that contain information collection requirements are listed below, along with MMS's estimates of the average number of annual responses, completion time per response, recordkeeping hours, and total burden hours for each requirement. The MMS requests the marine mining industry and other interested parties to comment on these information collection requirements, including comments regarding the clarity of the information requirements, availability of required information, estimated burden hours, and frequency of collection.

(a) *Section 280.5 Application for a prospecting or scientific research permit.* An application for a prospecting permit shall include name, address, and nationality of permittee and person(s) directly responsible for conducting the activities; description and map of the area(s) covered by the application; time covered by term of permit; description and schedule of activities to be conducted; prospecting plan; and indication of which data and information in the prospecting application are considered proprietary. An application for a scientific research permit shall include name of the person conducting the proposed research; type of research activity and manner in which it will be conducted; location of the proposed research activity designated on a map, plat, or chart; schedule for proposed scientific research activity; proposed time and manner in which the information and data resulting from the research will be made available to the public for inspection and reproduction; agreement that the information and data resulting from the scientific research activity will not be sold or withheld for exclusive use; name, registry number, registered owner, and port of registry of vessels used in the operation; and scientific research plan—0 applications per year, 10 hours per application, 0 hours of recordkeeping, 90 burden hours.

(b) *Section 280.6 Prospecting or scientific research plan.* The plan shall include identification of the mineral(s) or material(s) of interest; description of the activities to be conducted; type(s) of equipment to be used; name, registration, and mobile communication system of vessel(s); maps showing location of proposed activities and proposed survey grids for each surveying method; schedule for proposed activity; anticipated environmental consequences of proposed activity; mitigation measures used to avoid or minimize adverse environmental impacts of proposed activities; a plan for monitoring the effects of the activities on the environment; known archaeological resources in the area of the proposed activities; description of any potential conflicts with other uses or users in the permit area; and a drilling plan if appropriate—0 plans per year, 10 hours per plan, 0 hours of recordkeeping, 90 burden hours.

(c) *Section 280.7 Obligations of persons.* The permittee shall notify the Director of a substantial change from the approved plan—4 responses per year, 3 hours per response, 0 hours of recordkeeping, 12 burden hours.

(d) *Section 260.8 Reporting.* The quarterly report shall include a summary of the prospecting or scientific research activities conducted prior to the end of the reporting period and the results obtained—36 reports per year, 3.8 hours per report, 0 hours of recordkeeping, 136 burden hours.

(e) *Section 260.8 Reporting.* The final report shall include description of the work performed; charts, maps, or plats depicting the area and blocks in which any activities were conducted; dates actual activities were performed; summary of any mineral occurrences encountered including location, environmental features, and the nature and degree of adverse effects on the environment, aquatic life, archaeological resources, or other uses of the area; report of the results of the environmental monitoring; and descriptions of other activities conducted as specified by the Director—6 reports per year, 30 hours per report, 0 hours of recordkeeping, 270 burden hours.

(f) *Section 260.8 Reporting.* The permittee shall notify the Director of all serious accidents, any death or serious injury, or fire or explosion connected with any activity conducted—one response per year, 1 hour per response, 0 hours of recordkeeping, 1 burden hour.

(g) *Section 260.9 Recordkeeping.* A representative split of each geological sample and a quarter longitudinal segment of each core shall be available for inspection at the convenience of the Director for 1 year, and data and information collected under a permit, including environmental data and information; geological and geophysical data and information; drill logs; analyses of cores, cuttings, and samples; and maps and navigation tapes showing the location where samples were taken and test drilling conducted, shall be kept available for 3 years at a location approved by the Director—6 responses per year, 0 hours per response, 54 hours of recordkeeping, 54 burden hours.

The total annual information collection burden on permittees for Prospecting is estimated to be 653 hours.

Comments submitted in response to this notice will be summarized and/or included in the information collection request submitted to OMB for approval of this information collection. These comments will also become a matter of public record.

Authority: Section 204, Pub. L. 95-372, 92 Stat. 629 (43 U.S.C. 1337).

Dated: October 4, 1990.

Ed Cassidy,

Deputy Director, Minerals Management Service.

BILLING CODE 4310-MR-M

National Park Service

National Register of Historic Places; Proposed NHL Boundaries

The National Park Service has been working to establish boundaries for all National Historic Landmarks for which no specific boundary was identified at the time of designation, and therefore, are without a clear delineation of the amount of property involved. The results of such designation make it important that we define specific boundaries for each landmark.

In accordance with the National Historic Landmark program regulations 36 CFR Part 65, the National Park Service notifies owners, public officials and other interested parties and provides them with an opportunity to make comments on the proposed boundaries.

Comments on the proposed boundaries will be received for 60 days after the date of this notice. Please address replies to Jerry L. Rogers, Associate Director, Cultural Resources, and Keeper of the National Register of Historic Places, National Park Service, P.O. Box 37127, Washington, DC 20013-7127, Attention: Chief of Registration (202) 343-9536. Copies of the documentation of the landmarks and their proposed boundaries, including maps may be obtained from that same office.

Carol D. Shull,

Chief of Registration, National Register of Historic Places, Interagency Resources Division.

Hull-Rust-Mahoning National Historic Landmark St. Louis County, MN

Verbal Boundary Description:

The west one-quarter of the district includes southwestern, western, and northwestern boundaries of the district. These are drawn to include all historic mines associated with the large continuous Hull-Rust-Mahoning pit. They follow the southern and western rims of the historic mines in this area or straight lines connecting the rims (as with the Morton, Carmi, and Lamberton mines). The decision to follow the west and north edges of section 3 T58N R21W was determined by the local description of the mine leases in this area and by the total inaccessibility of this portion of the district. The northwest boundary of the district heads east to meet the north rim of the Kerr Mine which itself is part of the continuous large Hull-Rust-Mahoning pit.

Biltmore National Historic Landmark Ashville, NC

Verbal Boundary Description:

Beginning at the intersection of McDowell Street and the private road, proceed west along the southern curb of the private road, when the private road curves south, continue in the same westward direction to the south bank of the French Broad River; thence west along said bank 1.5 miles, thence southwest to the opposite bank of the river; thence northwest to the 2000' contour line; thence southwest to the east curb of Brevard Road; thence southerly along said curb to its intersection with Interstate 26; thence southeast along the west curb of Interstate 26 to the north curb of the Blue Ridge Parkway; thence follow said curb southeast, east, north, east, and northeast to the west curb of 2000, more or less, to a point; thence north to the southern curb of Cedar Cliff Road; thence northeast along said curb to its intersection with the west curb of Vanderbilt Forest Road; thence northerly along said curb to the point of origin.

Long Wharf and Custom House Block National Historic Landmark Boston, MA

Verbal Boundary Description:

Beginning at the intersection of the outer line of the southern bulkhead of Long Wharf and a line of convenience parallel to and 40 feet west of the west wall of the brick warehouse known as the Chart House; thence, northerly along said line of convenience 190 feet to a point; thence, easterly along a second line of convenience drawn at a right angle to the first approximately 170 feet to the northern bulkhead of Long Wharf; thence, easterly along the outer line of said northern bulkhead of Long Wharf (approximately 430 feet), southerly along the outer line of the eastern bulkhead of Long Wharf (approximately 220 feet), and westerly along the outer line of the southern bulkhead of Long Wharf (approximately 580 feet) to the point of beginning.

BILLING CODE 4310-70-M

Mississippi River Coordinating Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Mississippi River Coordinating Commission. Notice of this meeting is required under the Federal Advisory Committee Act.

DATES: October 26, 1990; 8:30 a.m. to 12 a.m.

ADDRESSES: Council Chambers, Metropolitan Council, Mears Park Centre, 230 East Fifth Street, St. Paul, Minnesota.

FOR FURTHER INFORMATION CONTACT: Norman J. Reigle, Superintendent, Mississippi National River and Recreation Area, Post Office Box 85456, St. Paul, MN 55165-0456 (612-290-4160).

SUPPLEMENTARY INFORMATION: The Mississippi River Coordinating Commission was established by Pub. L. 100-696, November 18, 1988.

Dated: September 28, 1990.

Don H. Castleberry,

Regional Director, Midwest Region.

[FR Doc. 90-24259 Filed 10-15-90; 8:45 am]

BILLING CODE 4310-70-M

Upper Delaware Scenic and Recreational River

AGENCY: National Park Service; Upper Delaware Citizens Advisory Council.

ACTION: Notice of change of meeting date.

SUMMARY: This notice changes the date of the October, 1990, meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting change is required under the Federal Advisory Committee Act.

DATE: November 2, 1990.

TYPE OF MEETING: Business.

ADDRESSES: Town of Tusten Hall, Bridge Street, Narrowsburg, New York.

Press Releases containing specific information regarding the subject of the monthly meeting will be published in the following area newspapers:

The Sullivan County Democrat
The Times Herald Record
The River Reporter
The Tri-state Gazette
The Pike County Dispatch
The Wayne Independent
The Hawley News Eagle
The Weekly Almanac

Announcements of cancellation due to inclement weather will be made by radio stations WDNH, WDLC, WSUL, and WVOS.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent; Upper Delaware Scenic and Recreational River, P.O. Box C, Narrowsburg, New York 12764-0159; 717-729-8251.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Public Law 95-625, 16 U.S.C. s1724 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation and implementation of the management plan, and on programs which relate to land and water use in the Upper Delaware Region.

All meetings are open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Upper Delaware Citizens Advisory Council, P.O. Box 84, Narrowsburg, New York 12764. Minutes of the meeting will be available for inspection four weeks after the meeting, at the permanent headquarters of the Upper Delaware Scenic and Recreational River, River Road, 1-¾ miles north of Narrowsburg, New York; Damascus Township, Pennsylvania.

James W. Coleman, Jr.,

Regional Director, Mid-Atlantic Region.

DEPARTMENT OF LABOR

Employment and Training Administration

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period September and October 1990.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,674; Remington Building Products, Millen, GA

TA-W-24,658; Woodstock Die Cast, Woodstock IL

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-24,683; Diebold, Inc., Canton, OH

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,696; Pharmacia Diagnostics, Inc., Fairfield, NJ

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,697; Phoenix Tube, New Brunswick, NJ

The investigation revealed that criterion (1) has not been met. A significant number or proportion of the workers did not become totally or partially separated as required for certification.

TA-W-24,668; Kessler Knitting & Dye Div., Grand Rapids, MI

Increased imports did not contribute importantly to worker separations.

Affirmative Determinations

TA-W-24,721; QED Exploration, Inc., Denver, CO

A certification was issued covering all workers separated on or after July 28, 1989 and before October 1, 1990.

TA-W-24,659; D.T.W., Inc., Three River, MI

A certification was issued covering all workers separated on or after July 17, 1989.

TA-W-24,667; Kessler, Inc., Wayland, MI

A certification was issued covering all workers separated on or after July 17, 1989.

TA-W-24,662; Elkay Industries, Inc., Wilkes-Barre, PA

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662A; Elkay Industries, Inc., New York, NY

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662B; Elkay Industries, Inc., Sumter, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662C; Elkay Industries, Inc., Coward, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662D; Elkay Industries, Inc., Camden, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662E; Elkay Industries, Inc., Heath Springs, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662F; Elkay Industries, Inc., Olanta, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662G; Elkay Industries, Inc., Holly Hill, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662H; Elkay Industries, Inc., Cheraw, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662I; Elkay Industries, Inc., Williston, SC

A certification was issued covering all workers separated on or after June 15, 1989.

TA-W-24,662J; Elkay Industries, Inc., Turbeville, SC

A certification was issued covering all workers separated on or after June 15, 1989.

I hereby certify that the aforementioned determinations were issued during the month of September and October 1990. Copies of these determinations are available for inspection in Room C4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons to write to the above address.

Dated: October 10, 1990.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,701; Ted Butcher, Inc., Sequim, WA

TA-W-24,649; Package machinery Co., Reed Div., Stafford Springs, CT

TA-W-24,703; Watervliet Paper Co., Watervliet, MI

TA-W-24,632; Anchor Hocking Packaging Co., Connellsville, PA

TA-W-24,640; J.L. Coombs, Inc., Phillip, ME

TA-W-24,653; Signal Apparel, Inc., New Tazewell, TN

TA-W-24,685; Fairset Manufacturing Co., New York, NY

TA-W-24,650; Welchem, Inc., Houston, TX

In the following cases, the investigation revealed that the criteria for eligibility has not been met for the reasons specified.

TA-W-24,675; Royal Canin U.S.A., Inc., Everson, PA

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,700; Smithkline Beecham, Bristol, TN

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,690; Gaylord Container Corp., Baltimore, OH

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,690; Kamen Instrumention, Colorado Springs, CO

Increased imports did not contribute importantly to worker separations

TA-W-24,664; Fourply, Inc, Grants Pass, OR

U.S. imports of softwood plywood were negligible.

TA-W-24,636; Fryburg Trucking Service, Inc., Belfield, ND

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-24,646; Mike Byrd Casing Crews, Inc., Hamlin, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-24,679; Bohemia, Inc., Culp Creek, OR

U.S. imports of softwood were negligible during the relevant time period.

TA-W-24,666; Halstead Industries, Inc., Zelienople, PA

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,717; Joshi Technologies International, Tulsa, OK

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-24,673; Prairie Producing Co., Houston, TX

Increased imports did not contribute importantly to worker separations at the firm.

TA-W-24,680; Bradford Pipe, Inc., Titusville, PA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-24,681; Bradford, Inc., Bradford, PA

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

Certifications

TA-W-24,647; Nelson Drilling, Inc., Gillette, WY

A certification was issued covering all workers separated on or after July 9, 1989.

TA-W-24,654; Terex Corp., Northwest Engineering, Green Bay, WI

A certification was issued covering all workers separated on or after July 10, 1989.

TA-W-24,652; DOG Shake Co., Inc., Amanda Park, WA

A certification was issued covering all workers separated on or after July 12, 1989.

TA–W–24,698; Schott Electronics, Inc., Seymour, CT

A certification was issued covering all workers separated on or after July 23, 1989.

TA–W–24,618; Oxford of Covington, Covington, GA

A certification was issued covering all workers separated on or after June 29, 1989.

TA–W–24,631; American Lantern Co., Newport, AR

A certification was issued covering all workers separated on or after July 8, 1989.

TA–W–24,720; Nidec Corp., Torrington, CT

A certification was issued covering all workers separated on or after July 27, 1989.

TA–W–24,677; Thor Energy, Shreveport, LA

A certification was issued covering all workers separated on or after July 12, 1989.

TA–W–24,665; General Electric Motor Division, Holland, MI

A certification was issued covering all workers separated on or after July 16, 1989.

TA–W–24,668; Skagit Shake Co., Concrete, WA

A certification was issued covering all workers separated on or after July 11, 1989.

TA–W–24,663; Fisher Price, Inc., Holland, NY

A certification was issued covering all workers separated on or after July 20, 1989.

TA–W–24,670; MGM, Inc., Mohall, ND

A certification was issued covering all workers separated on or after July 16, 1989.

I hereby certify that the aforementioned determinations were issued during the month of September 1990. Copies of these determinations are available for inspection in Room C4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: October 4, 1990.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Job Training Partnership Act: Announcement of Proposed Noncompetitive Grant Award

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of intent to award a noncompetitive grant.

SUMMARY: The Employment and Training Administration (ETA) announces its intent to modify our current grant on a non-competitive basis with the National Youth Employment Coalition for the provision of Specialized Services under the authority of the Job Training Partnership Act (JTPA).

DATES: It is anticipated that this grant agreement will be executed by November 9, 1990, and will be funded for one year. Submit comments by 4:45 p.m. (Eastern Time), on October 31, 1990.

ADDRESSES: Submit comments regarding this proposed assistance award to: U.S. Department of Labor, Employment and Training Administration, Room C–4305, 200 Constitution Avenue, NW., Washington, DC 20210, Attention: Charlotte Adams; Reference FR–DAA–001–01.

SUPPLEMENTARY INFORMATION: The Employment and Training Administration (ETA) announces its intent to modify its current grant with the National Youth Employment Coalition. The grantee will promote the development of coalitions at the local level among training and employment service providers and private sector employers, to identify and test more effective cooperative approaches and strategies for enhancing long-term training and job opportunities for youth. Funds for this activity are authorized by the Job Training Partnership Act (JTPA), as amended, Title IV—Federally Administered Programs. The proposed funding is approximately $50,000 for a one-year period.

Signed at Washington, DC, on October 3, 1990.

Robert D. Parham,

ETA Grant Officer.

BILLING CODE 4510-30-M

[TA–W–24,551]

Helmerich and Payne, Inc. Iraan, TX; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Helmerich and Payne, Inc., Iraan, Texas. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA–W–24,551; Helmerich and Payne, Incorporated Iraan, Texas (October 4, 1990)

Signed at Washington, DC, this 10th day of October, 1990.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 90-24318 Filed 10-15-90; 8:45 am]

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M–90–145–C]

Rawl Sales and Processing Co.; Petition for Modification of Application of Mandatory Safety Standard

Rawl Sales and Processing Company, P.O. Box 722, Matewan, West Virginia 25678 has filed a petition to modify the application of 30 CFR 75.900 (low- and medium-voltage circuits serving three-phase alternating current equipment; circuit breakers) to its Rocky Hollow Mine (I.D. No. 46–05195) located in Mingo County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that low- and medium-voltage power circuits serving three-phase alternating current equipment be protected by suitable circuit breakers of adequate interrupting capacity which are properly tested and maintained. Such breakers are required to be equipped with devices to provide protection against undervoltage, grounded phase, short circuit, and overcurrent.

2. As an alternate method, petitioner proposes to use shunt-trip circuit breakers and relays to obtain undervoltage protection with specific equipment and procedures as outlined in the petition.

3. The use of undervoltage circuit breakers creates an extremely hazardous safety condition. Whenever the power blinks, workers are dashing to each belt drive location to reset the circuit breakers. A sense of urgency often causes the workers to take unplanned actions which places their safety and that of their fellow workers in jeopardy.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 15, 1990. Copies of the petition are available for inspection at that address.

Dated: October 10, 1990.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 90-24319 Filed 10-15-90; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-90-143-C]

Wolf-Creek Collieries Co.; Petition for Modification of Application of Mandatory Safety Standard

Wolf-Creek Collieries Company, Caller 802, Lovely, Kentucky 41231, has filed a petition to modify the application of 30 CFR 75.900 (low- and medium-voltage circuits serving three-phase alternating current equipment; circuit breakers) to its No. 4 Mine (I.D. No. 15-04020) located in Martin County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that low- and medium-voltage power circuits serving three-phase alternating current equipment be protected by suitable circuit breakers of adequate interrupting capacity which are properly tested and maintained as prescribed by the Secretary and that such breakers be equipped with devices to provide protection against undervoltage, grounded phase, short circuit, and overcurrent.

2. The petitioner states that application of the standard would result in a diminution of safety for the following reasons:

(a) The mine is an old, extensively worked mine which has frequent power outages and an inconsistent power supply.

(b) After each power outage, a worker must go to each pump location and reset the breakers before the pumps will resume operating. This results in hasty, unplanned travel to old abandoned areas of the mine.

(c) Some areas of the mine accumulate water during the time involved in resetting power to the pumps.

3. The petitioner feels that the use of pump power contactors would provide the same degree of protection as the standard.

4. For these reasons, the petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 15, 1990. Copies of the petition are available for inspection at that address.

Dated: October 10, 1990.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

THE LIBRARY OF CONGRESS

National Film Preservation Board; Public Meeting, Dayton, OH

November 1, 1990.

AGENCY: Library of Congress, National Film Preservation Board.

ACTION: Notice of public meeting.

This notice is issued pursuant to Public Law 100-446, The National Film Preservation Act of 1988, 2 U.S.C. 178, by Dr. James H. Billington, the Librarian of Congress, to inform the public that the next meeting of the National Film Preservation Board will be held in Dayton, Ohio. The meeting will be held on Thursday, November 1, 1990 at 1:30 p.m., at Wright State University, University Center, room 155. The meeting site is located on the campus of Wright State University on University Center Drive. If necessary, the Board will also meet on Friday, November 2, at 9:30 a.m., at the same location.

For more information on the meeting location call the Library of Congress Public Information Office (202) 707-5000.

FOR FURTHER INFORMATION CONTACT: Eric Schwartz, Counsel, The National Film Preservation Board, Library of Congress, Washington, DC 20540. Telephone: (202) 707-8350.

Dated: October 11, 1990.

Approved by:

James H. Billington,

The Librarian of Congress.

BILLING CODE 1410-03-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 90-79]

NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC), Life Sciences Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applications Advisory Committee, Life Sciences Subcommittee.

DATES: October 23, 1990, 8:30 a.m. to 5:30 p.m.; and October 24, 1990, 8:30 a.m. to 1:15 p.m.

ADDRESSES: Holiday Inn-Capitol, Columbia B Room, 500 C Street, SW., Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald J. White, Code SB, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-2126).

SUPPLEMENTARY INFORMATION: The Space Science and Applications Advisory Committee consults with and advises the NASA Office of Space Science and Applications (OSSA) on long-range plans for, work in progress on, and accomplishments of NASA's Space Science and Applications programs. The Life Science Subcommittee provides advice to the Life Sciences Division concerning all of its programs in the space life sciences. the Subcommittee will meet to discuss Life Sciences status and issues, activities of the Office of Space Science and Applications, and reports on Life Sciences activities. The Subcommittee is chaired by Dr. Francis J. Haddy and is composed of 22 members. The meeting will be closed October 24, from 12:15 p.m. to 1:15 p.m. to discuss and evaluate qualifications of candidates being considered for membership on the Subcommittee. Such discussions would invade the privacy of the individuals involved. Since this session will be concerned with matters listed in 5 U.S.C. 552(c) (6), it has been determined that the meeting will be closed to the public

for this period of time. The remainder of the meeting will be open to the public up to the capacity of the room (approximately 45 including Subcommittee members). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

TYPE OF MEETING: Open—except for a closed session as noted in the agenda below.

Agenda

Tuesday, October 23

8:30 a.m.—Introductory Remarks.
8:45 a.m.—Office of Space Science and Applications Status.
9:30 a.m.—Life Sciences Status.
10:45 a.m.—Reports on Activities of Other Advisory Committees.
11:15 a.m.—Summary of Life Sciences Activities.
1:30 p.m.—Review of Life Sciences Report to Space Science and Applications Advisory Committee (SSAAC).
2:30 p.m.—Search for Extraterrestrial Intelligence (SETI) Program Overview.
3:30 p.m.—NASA Activities Related to Biospheric Research Program and Earth Observing system (EOS).
4:30 p.m.—New Life Sciences Strategic Plan/Revision of "Rationale * * * " Document.
5:30 p.m.—Adjourn.

Wednesday, October 24

8:30 a.m.—Life Sciences Report to SSAAC.
9:30 a.m.—Lifesat Update: Relation to Radiation Program.
11:15 a.m.—Committee Strategy and Actions.
12:15 p.m.—Closed Session.
1:15 p.m.—Adjourn.

Dated: October 10, 1990.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 90-24331 Filed 10-15-90; 8:45 am]

BILLING CODE 7510-01-M

[Notice 90-86]

NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applications Advisory Committee.

DATES: October 31, 1990, 8:30 a.m. to 5:30 p.m.; November 1, 1990, 8:30 a.m. to 5:30 p.m.; and November 2, 1990, 8:30 a.m. to 3 p.m.

ADDRESSES: The National Aeronautics and Space Administration, 600 Independence Avenue SW., room 226A, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph K. Alexander, Code S, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1430).

SUPPLEMENTARY INFORMATION: The Space Science and Applications Advisory Committee consults with and advises the NASA Office of Space Science and Applications (OSSA) on long range plans for, work in progress on, and accomplishments of NASA's Space Science and Applications programs. The Committee will meet to discuss the Office of Space Science and Applications (OSSA) Program Status, Fiscal Year 1991 and Future Issues. The Committee is chaired by Dr. Berrien Moore and is composed of 28 members. The meeting will be open to the public up to the capacity of the room (approximately 50 including Committee members). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Type of Meeting: Open.

Agenda

Wednesday, October 31

8:30 a.m.—Introductory Remarks.
8:45 a.m.—Office of Space Science and Applications (OSSA) Overview.
10:40 a.m.—Committee Discussion.
1:15 p.m.—Report on Hubble Space Telescope.
2 p.m.—Report on Magellan.
2:30 p.m.—Report on Comet Rendezvous Asteroid Flyby (CRAF)/Cassini.
3:30 p.m.—OSSA Program Issues.
4:30 p.m.—Committee Discussion.
5:30 p.m.—Adjourn.

Thursday, November 1

8:30 a.m.—Committee Business.
8:45 a.m.—Report on the Space Station Science and Applications Advisory Subcommittee (SSSAAS).
9:15 a.m.—Report on Exploration Science Working Group (EXSWG).
9:45 a.m.—Divisional Discussions.
5:30 p.m.—Adjourn.

Friday, November 2

8:30 a.m.—Writing Groups.
11:30 a.m.—Committee Discussion.
1:30 p.m.—Meeting with the OSSA Associate Administrator.
3 p.m.—Adjourn.

Dated: October 10, 1990.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 90-24332 Filed 10-15-90; 8:45 am]

BILLING CODE 7510-01-M

[Notice 90-81]

NASA Advisory Council (NAC), Space Station Science and Applications Advisory Subcommittee (SSSAAS); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Station Science and Applications Advisory Subcommittee (SSSAAS).

DATES: October 29, 1990, 8:30 a.m. to 10 p.m.; October 30, 1990, 8 a.m. to 10 p.m.; and October 31, 1990, 8 a.m. to 2 p.m.

ADDRESSES: Greenbelt Marriott Hotel, 6400 Ivy Lane, Greenbelt, MD 20770.

FOR FURTHER INFORMATION CONTACT: Mr. Robert C. Rhome, Code S, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1425).

SUPPLEMENTARY INFORMATION: The Space Station Science and Applications Advisory Subcommittee (SSSAAS) reports to the Space Science and Applications Advisory Committee (SSAAC) and consults with and advises the NASA Office of Space Science and Applications (OSSA) on the new capabilities to be made available by the Space Station program and how these may be most effectively utilized. It also advises the NASA Space Station Freedom Office on how the Space Station program may most effectively support potential science and applications users. The Subcommittee will meet to receive reports from NASA Division representatives and discuss issues relating to Space Station Freedom. The Subcommittee is chaired by Dr. Robert J. Bayuzick and is composed of 20 members. The meeting will be closed on Tuesday, October 30, 1990, at 7:30 p.m.–10 p.m. to allow for a discussion on qualifications of individuals being considered for membership to the Space Station Science and Applications Advisory

Subcommittee. Such a discussion would invade the privacy of the individuals involved. Since this session will be concerned with matters listed in 5 U.S.C. 552b(c)(6), it has been determined that the meeting will be closed to the public for this period of time. The remainder of the meeting will be open to the public up to the seating capacity of the room (approximately 50 people including members of the Group). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Type of Meeting: Open—except for a closed session, as noted in the agenda below.

Agenda

Monday, October 29

8:30 a.m.—Opening Remarks.
9 a.m.—Outlook of Space Science and Applications Outlook-Fiscal Year 1991.
9:30 a.m.—Reports on Space Station Freedom (SSF).
11 a.m.—Science Utilization Management (SUM) Support of the SSF Preliminary Review Process.
11:30 a.m.—Multilateral Science Working Group Status.
1 p.m.—Bartering and Cooperative Programs Status.
1:30 p.m.—Exploration and Technology SSF Utilization Plans.
2:15 p.m.—Office of Commercial Programs SSF Utilization Plans.
3 p.m.—Splinter Group Sessions.
7:30 p.m.—Splinter Group Sessions.
10 p.m.—Adjourn.

Tuesday, October 30

8 a.m.—Utilization Technical Working Group (UTWG).
8:45 a.m.—Small Attached and Rapid Response (SARR) Project Status.
9:45 a.m.—Robotics Laboratory Briefing.
1 p.m.—SSF Data Management System Briefing.
3:30 p.m.—Reports on Office of Space Science and Applications (OSSA) Data Issues Update.
4 p.m.—Science Operations Workshop, Plenary Discussions and Findings.
7:30 p.m.—Closed session.
10 p.m.—Adjourn.

Wednesday, October 31

8 a.m.—Woods Hole Response Plan.
9 a.m.—Splinter Group Sessions.
10:30 a.m.—Early Utilization of SSF.
12 p.m.—Working Lunch—Splinter Group Sessions.
2 p.m.—Adjourn.

Dated: October 10, 1990.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 90-24333 Filed 10-15-90; 8:45 am]

BILLING CODE 7510-01-M

[Notice 90-82]

NASA Advisory Council (NAC), Space Science and Applications Advisory Committee (SSAAC), Microgravity Science and Applications Advisory Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Science and Applicantions Advisory Committee, Microgravity Science and Applications Advisory Subcommittee.

DATES: October 30, 1990, 9 a.m. to 4 p.m.

ADDRESSES: National Aeronautics and Space Administration, 600 Independence Avenue, SW., room 226A, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Roger K. Crouch, Code SN, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1490).

SUPPLEMENTARY INFORMATION: The Space Science and Applications Advisory Committee consults with and advises the NASA Office of Space Science and Applications (OSSA) on long range plans for, and work in progress on, and accomplishments of NASA's Space Science and Applications programs. The Microgravity Science and Applications Advisory Subcommittee provides advice to the Microgravity Science and Applications Division concerning all of its programs in the microgravity sciences. The Subcommittee will meet to review the current status of the Microgravity Science and Applications Division. The Subcommittee is chaired by Dr. Dudley Saville and is composed of 7 members. The meeting will be open to the public up to the capacity of the room (approximately 20 including Subcommittee members). It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

Type of Meeting: Open.

Agenda

Tuesday, October 30

9 a.m.—Introduction and Review of Current Status of the Microgravity Science and Applications Division.
10 a.m.—Discussion of the Role of the Prinicipal Investigator in Flight Hardware Development.
1 p.m.—Discussion of Science Objectives of the Division.
3 p.m.—Summary and Conclusions.
4 p.m.—Adjourn.

Dated: October 10, 1990.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 90-24334 Filed 10-15-90; 8:45 am]

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

Public Disclosure of Selected General Licensee Information

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for public comment.

SUMMARY: Any device used under the general license in § 31.5 must be manufactured and distributed under a specific license issued by the NRC or by an Agreement State. The device must be so designed that it can be oprated by persons with no training in radiological protection. Usually it is required that installation, servicing and periodic testing of the device be performed by a specific licensee, usually the device vendor, whose training and experience with radiation have been evaluated by a regulatory agency. When the user no longer needs the device, it must be transferred to a specific licensee for disposal. Persons obtaining devices for use under a general license are identified to the NRC in quarterly reports of transfers. These reports are submitted by the specifically licensed distributors. The NRC is considering releasing the names and addresses of the general licensees identified in the quarterly reports of transfer. The NRC is soliciting comments whether this information should be made public.

DATE: Submit comments by November 15, 1990. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received by this date.

ADDRESSES: Submit written comments to: David L. Meyer, Chief, Regulatory Publications Branch, Division of

Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Hand deliver comments to 7920 Norfolk Avenue, Bethesda, Maryland, between 7:45 a.m. and 4:15 p.m. on Federal workdays.

FOR FURTHER INFORMATION CONTACT: Donnie H. Grimsley, Director, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (301) 492–7211.

SUPPLEMENTARY INFORMATION: The NRC and the Agreement States regulate the distribution and use of all products within the United States that contain byproduct material. The NRC classifies the regulatory control of byproduct material into one of three categories: specific license, general license, or exempt from regulations. The classification depends on the type, quantity and use of the material.

Specific licenses are issued to persons who have filed an application demonstrating that their training, experience, equipment and facilities are adequate to perform the requested task to meet the NRC public health and safety protection requirements.

There are many products containing radioactive material that can be used by the general public and industry without extensive radiation safety program. These products contain relatively small amounts of radioactive materials that are sealed within the device (sealed source) so that they can be used by persons without radiological training. The products containing byproduct material, along with small amounts of source material, fall under the category of general licenses. General licenses are in effect for persons using certain radioactive material without the filing of an application with the Commission.

Devices used under the general licenses must be manufactured and distributed under a specific license. The specific license may be issued by the NRC or by an Agreement State. The radiation safety of the device design is evaluated against regulatory requirements prior to being listed on a specific authorizing distribution to general licensees.

Those who obtain devices under the general license are listed in the manufacturers quarterly reports of transfer to the NRC. Agreement State distributors have similar reporting requirements in that they are required to notify the NRC when they sell generally licensed devices in areas under NRC jurisdiction.

The general license policy was implemented in 1969 by the AEC as a means of simplifying the specific license process where a case-by-case determination of the adequacy of qualification is not necessary. A generally licensed device uses radioactive material contained in a sealed source within a shielded device. The device is designed with inherent radiation safety features so that it can be used by persons without radiation training or experience beyond precautions which can be placed on a label or simple instruction guide.

The quarterly reports of transfer have, in the past, been withheld from public disclosure under 10 CFR 2.270. The NRC is considering making public the names and addresses of its general licensees because it now has an automated general license data base which allows it to extract the names and addresses of NRC general licensees without revealing any confidential data associated with the reports of transfer.

The NRC is proposing to place this information in its Public Document Room and update it semi-annually. Agreement State general licensees are not included in this data base and would, therefore, be excluded from the information that would be made publicly available in the NRC Public Document Room.

Any person who requests this type of information under the jurisdiction of an Agreement State should contact the Agreement State directly. NRC is soliciting public comments to determine whether this information should now be made public.

Dated at Bethesda, Maryland, this 10th day of October 1990.

For the Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Freedom of Information and Publications Services, Office of Administration.

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ended October 5, 1990

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 412 and 414. Answers may be filed within 21 days of date of filing.

Docket number: 47126

Date filed: October 2, 1990
Parties: Members of the International Air Transport Association
Subject: Canada-Europe Expedited Resolutions
Proposed effective date. October 28, 1990

Docket number: 47128

Date filed: October 5, 1990
Parties: Members of the International Air Transport Association
Subject: USA–Europe Agreement
Proposed effective date: January 1, 1991

BILLING CODE 4910-62-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed During the Week Ended October 5, 1990

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order a tentative order or in appropriate cases a final order without further proceedings.

Docket number: 47105

Date filed: October 1, 1990
Due date for answers conforming applications, or motion to modify scope: October 29, 1990
Description. Application of Air Micronesia, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, applies for an amendment to its certificate of public convenience and necessity for Route 170 to engage in foreign air transportation of persons, property and mail between Guam/Saipan and Seoul, Korea, and between Guam/Saipan and Taipei, Taiwan.

Docket number: 47129

Date filed: October 5, 1990
Due date for answers conforming applications, or motion to modify scope: November 2, 1990
Description: Application of American Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, applies for a certificate of public convenience and necessity so as to authorize foreign air

transportation of persons, property, and mail between Miami, Florida, and Mexico City, Mexico.

Phyllis T. Kaylor,
Chief, Documentary Services Division.

BILLING CODE 4910-62-M

Federal Aviation Administration

[Summary Notice No. PE-90-42]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before: November 5, 1990.

ADDRESSES: Send comments on any petition in triplicate to:

Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Petition Docket No. _____, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-10), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on October 9, 1990.

Denise Donohue Hall,
Manager, Program Management Staff, Office of the Chief Counsel.

Petitions for Exemption

Docket No.: 18631
Petitioner: International Aerobatic Club
Sections of the FAR affected: 14 CFR 91.22(a)(1)
Description of relief sought: To extend Exemption No. 2889, as amended, which allows petitioner's members to participate and practice for participation in aerobatic competitions without meeting the fuel requirements for flight under visual flight rules. Exemption No. 2889, as amended, will expire on March 31, 1991.

Docket no.: 26348
Petitioner: United Airlines
Sections of the FAR affected: 14 CFR 121.417
Description of relief sought: To allow petitioner to accomplish the one-time emergency firefighting training for its crewmembers by using simulation rather than an actual fire.

Federal Highway Administration

Environmental Impact Statement: Salt Lake County, UT

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for the proposed highway project in Salt Lake County, UT.

FOR FURTHER INFORMATION CONTACT: Bill Gedris, Environmental Coordinator, Federal Highway Administration, 2520 West 4700 South, Suite 9A, Salt Lake City, Utah 84118, Telephone: (801) 524-5141; or Tom Smith, Preconstruction Engineer, Utah Department of Transportation, District Two, 2060 South 2400 West, Salt Lake City, Utah 84104, Telephone: (801) 975-4806.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Utah Department of Transportation, will prepare an environmental impact statement (EIS) on a proposal to extend the planned West Valley Highway approximately 6 miles from 12600 South to a connection with I-15 near Draper or a Redwood Road connection south of Bluffdale in Salt Lake County, Utah. The proposed extension would provide increased traffic capacity for the west side of the Salt Lake City metropolitan area as a component of the planned West Valley Highway which is presently under various stages of design.

The concept of a West Valley Highway has been included in long-range transportation planning for the Salt Lake Valley for nearly 30 years and has received considerable public and political attention during the past several years. The extension proposed here will be an obvious and necessary component of that facility. Alternatives under consideration include (1) Taking no action, (2) using alternate travel routes, and (3) constructing the extension on one of several alternative alignments. Incorporated into and analyzed with the various build alternatives will be design variations of grade and alignment.

A scoping document describing the proposed action and soliciting comments, concerns, and issues will be sent to all appropriate Federal, State, and local agencies, and to private organizations and individuals expected to be interested in the project. A public scoping meeting will be scheduled and held in the city of Riverton in October of 1990. Notice of additional public scoping meetings to present information and solicit comments relative to alternatives for consideration and possible impacts will be given as the proposed project proceeds. Upon release of the draft EIS for public and agency review and comment, public notice will be given of the time and place for a public hearing to be held to receive comments.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA or UDOT at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations impending Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: October 5, 1990.

Donald P. Steinke,
Division administrator, Salt Lake City, Utah.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: October 10, 1990.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: New
Form Number: IRS Form 8455
Type: Volunteer Opportunity Survey
Description: The Volunteer Opportunity Survey provides the IRS Taxpayer Education Coordinators with information which they use in giving training and/or orientation to individuals who volunteer for any of the Internal Revenue Service's eight volunteer and education programs.
Respondents: Individuals or households, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.
Estimated Number of Respondents: 40,000.
Estimated Burden Hours Per Respondent: 10 minutes.
Frequency of Response: On occasion and Annually
Estimated Total Reporting Burden: 6,664 hours.
Clearance Officer: Garrick Shear, (202) 535-4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, room 3001 New Executive Office Building, Washington DC 20503.

Lois K. Holland,
Departmental Reports, Management Officer

Sunshine Act Meetings

Federal Register
Vol. 55, No. 200
Tuesday, October 16, 1990

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR; COMMISSION HEARING

There will be a public hearing on the draft Five Year Plan/Work Plan of the Blackstone River Valley National Heritage Corridor Commission. Notice is hereby given in accordance with section 552(b) of title 5, United States Code, that this hearing will be held. The Commission was established pursuant to Public Law 99-647, in order to protect and interpret the nationally significant resources of the Blackstone Valley.

PLACE: Unitarian Church Hall, 13 Maple Street, Mendon, MA

DATE: October 27, 1990

TIME: 10:00 AM to 12:00 Noon

This is the opportunity for individuals, groups, or local governments to comment on the proposed work plan for the National Heritage Corridor. Projects which are consistent with the approved Plan for the National Heritage Corridor may be advocated at the hearing. Comments or presentations will be limited to 4 minutes each.

Comments may also be provided in writing. Comments received by October 22 will be brought to public attention at the Public Hearing. Written comments may be any length. All comments must be received in Commission Headquarters no later than October 30, 1990.

Copies of the Five Year Plan or the National Heritage Corridor Plan ("Cultural Heritage and Land Management Plan") may be obtained at Commission Headquarters.

Mailing address and phone: Blackstone River Valley NHC Commission, P.O. Box 34, Uxbridge, MA 01569, 508-278-9400

Street Address: 21 Mendon Street, Uxbridge, MA

Carol Dandrade,

Acting Executive Director, Blackstone River Valley National Heritage Corridor.

BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR

Meeting of the Commission

Notice is hereby given in accordance with section 552b of title 5, United States Code, that a meeting of the Blackstone River Valley National Heritage Corridor Commission will be held on Thursday, November 1, 1990.

The Commission was established pursuant to Public Law 99-647. The purpose of the Commission is to assist federal, state and local authorities in the development and implementation of an integrated resource management plan for those lands and waters within the Corridor.

The meeting will convene at 7:00 p.m. at Blackstone Senior Center, Blackstone Municipal Building, St. Paul Street, Blackstone, MA for the following reasons:

1. Report of the Chairman.
2. Report of the Treasurer.
3. Report of the Executive Subcommittee for Budget and Administration: Work Plan/Five Year Plan; Policy Development Initiative.
4. Report of the Tourism and Economic Development Subcommittee.
5. Report of the Planning Subcommittee.
6. Report of the Public Information and Education Subcommittee.
7. Status of Corridor Legislation.
8. Report of the Town of Blackstone.
9. Public Comments.

It is anticipated that about twenty people will be able to attend the session in addition to the Commission members.

Interested persons may make oral or written presentations to the Commission or file written statements. Such requests should be made prior to the meeting to: James Pepper, Executive Director, Blackstone River Valley National Heritage Corridor Commission, P.O. Box 34, Uxbridge, MA 01569. Telephone (508) 278-9400 or (508) 278-5124.

Further information concerning this meeting may be obtained from James Pepper, Executive Director of the Commission at the address below.

James Pepper,

Executive Director, Blackstone River Valley National Heritage Corridor Commission.

DEPARTMENT OF JUSTICE

Parole Commission

Record of Vote

Authority: Public Law 94-409; 5 U.S.C. Section 552b.

I, Benjamin F. Baer, Chairman of the United States Parole Commission, presided at a meeting of said Commission which started at two o'clock p.m. on Friday, September 21, 1990 at the Commission's Central Office, 550 Friendship Boulevard, Chevy Chase, Maryland 20815, by conference telephone call. This meeting ending at or about 3:30 p.m. The purpose of this meeting was to discuss appropriate policy for the Commission to follow in compliance with the appellate court

decision rendered in *Rizzo* v. *Armstrong*, No. 89–55389 (9th Cir. August 30, 1990) (opinion to be published). This matter required immediate consideration. Seven Commissioners were in attendance, constituting a quorum when the vote for early consideration was submitted.

Upon motion duly made, seconded, and carried, the following Commissioners voted that Commission business required immediate consideration of the matters discussed: Benjamin F. Baer, Cameron M. Batjer, Jasper Clay, Jr., Vincent Fechtel, Jr., Carol Pavilack Getty, Daniel Lopez, and Victor M.F. Reyes.

In witness whereof, I make this official record of the vote taken for immediate consideration of the matters discussed at the meeting and authorize this record to be made available to the public.

Dated: September 21, 1990.

Benjamin F. Baer,

Chairman, U.S. Parole Commission.

BILLING CODE 4401–01–M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of October 15, 22, 29, and November 5, 1990.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of October 15

Monday, October 15

10:00 a.m.—Briefing on Regulatory Impact Survey Recommendations [Public Meeting]

2:00 p.m.—Briefing on Decoupling Siting Requirements from Future Designs and Update of Source Term Matters (Public Meeting)

Wednesday, October 17

11:30 a.m.—Affirmation/Discussion and Vote (Public Meeting)

a. Petitions to Intervene and Requests for Hearing in Shoreham Operating License Amendment Proceeding

b. Kerr-McGee's Motion for a Hearing Under section 274

Week of October 22—Tentative

Thursday, October 25

10:00 a.m.—Periodic Briefing on Industry Implementation of Generic Safety Issues (Public Meeting)

Friday, October 26

10:00 a.m.—Briefing on NUMARC's Perspective of the State of the Nuclear Industry (Public Meeting)

11:30 a.m.—Affirmation/Discussion and Vote (PUBLIC MEETING) (if needed)

Week of October 29—Tentative

Monday, October 29

10:00 a.m.—Briefing on Issues Raised by the Provision Requiring Title Transfer of Low Level Waste (Public Meeting)

Tuesday, October 30

10:00 a.m.—Briefing on Nonprescriptive Nuclear Safety Regulation (Public Meeting)

Wednesday, October 31

10:00 a.m.—Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)

11:30 a.m.—Affirmation/Discussion and Vote (Public Meeting) (if needed)

Week of November 5—Tentative

Thursday, November 8

10:00 a.m.—Briefing on Progress of Research in the Area of Organization and Management (Public Meeting)

2:00 p.m.—Periodic Meeting with the Advisory Committee on Reactor Safeguards (ACRS) (Public Meeting)

3:30 p.m.—Affirmation/Discussion and Vote (Public Meeting) (if needed)

Note: Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

TO VERIFY THE STATUS OF MEETINGS CALL: (Recording)—(301) 492–0292.

CONTACT PERSON FOR MORE INFORMATION: William Hill (301) 492–1661.

Dated: October 11, 1990.

Part II

Department of Transportation

Coast Guard

46 CFR Parts 38, 54, 98, and 151
Intervals for Required Internal Examination and Hydrostatic Testing of Pressure Vessel Type Cargo Tanks on Barges; Final Rule

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 38, 54, 98, and 151

[CGD 89-054]

RIN 2115-AG16

Intervals for Required Internal Examination and Hydrostatic Testing of Pressure Vessel Type Cargo Tanks on Barges

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending the regulations that govern internal inspection and hydrostatic test intervals for pressure vessel type cargo tanks on barges that transport liquefied gaseous cargoes and Grade A flammable liquids. This action adopts the interim final rule published on December 11, 1989 as a final rule with changes.

EFFECTIVE DATE: This rulemaking is effective on October 16, 1990.

FOR FURTHER INFORMATION CONTACT: LCDR William C. Bennett, Standards Development Branch, Office of Marine Safety, Security, and Environmental Protection, telephone (202)–267–1161. Normal working hours are between 8 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

SUPPLEMENTARY INFORMATION: On December 11, 1989, an interim final rule (IFR) entitled Intervals for Required Internal Examination and Hydrostatic Testing of Pressure Vessel Type Cargo Tanks on Barges, was published in the Federal Register (54 FR 50958). The Coast Guard received 8 letters commenting on the IFR. A public hearing was not requested and one was not held.

Drafting Information

The principal persons involved in drafting this proposal are: LCDR William C. Bennett, Project Manager, and Mr. Nick Grasselli, Project Counsel, Office of Chief Counsel.

Background and Purpose

On September 8, 1987, following industry requests that the Coast Guard review and amend existing inspection requirements, a notice of proposed rulemaking (NPRM), entitled Intervals for Required Internal Examination and Hydrostatic Testing of Pressure Vessel Type Cargo Tanks on Barges, was published in the Federal Register (52 FR 33841). The NPRM proposed to extend the internal examination interval from 8 years to 10 years for most pressure vessel type cargo tanks (PVCTs) carrying cargoes which qualified for a maximum internal examination interval of 8 years. Tanks dedicated to propylene oxide service would have to be internally examined at a maximum interval of 10 years, and the periodic hydrostatic testing requirement would be removed. The single most controversial proposal of the NPRM concerned nondestructive testing of PVCTs subject to the proposed 10 year internal examination interval. The rules proposed in the NPRM required these tanks to undergo nondestructive testing after 25 years of service and every 5 years thereafter. New design and fabrication requirements for tanks, which are permitted by regulation to be constructed as Class II and III pressure vessels, were also proposed.

As a result of the comments received, changes were made to the NPRM and on December 11, 1989, the IFR was published in the Federal Register (54 FR 50958). In the FR the internal examination interval was left at 10 years for most PVCTs. The nondestructive testing requirement for PVCTs subject to the 10 year internal examination interval was changed to start at the first internal examination conducted after the tanks are 30 years old or older, and to be performed at 10 year intervals. As a result, the internal examination and nondestructive testing can now be coordinated and conducted at the same time.

Another change made in the IFR, which had been considered but not proposed in the NPRM, was the extension of the internal examination and hydrostatic test interval for PVCTs in chlorine service from two to three years. This change was not adopted in the NPRM because the Coast Guard was reluctant to propose regulatory requirements less stringent than standards set for other modes of bulk chlorine transportation.

The Coast Guard decided to publish the IFR instead of a final rule to allow a comment period for the changes made concerning the hydrostatic test and internal examination intervals for PVCTs in chlorine service. The IFR comment period expired on March 12, 1990. No comments were received concerning the chlorine tank hydrostatic test and internal examination intervals. However, 8 comments were received concerning alignment of the intervals for testing excess flow valves and safety relief valves with hydrostatic test, internal examination, and drydocking intervals.

This rulemaking adopts the IFR, and changes the intervals for testing the excess flow valves and safety relief valves on PVCTs in chlorine service, as discussed below, effective immediately upon publication. Since the only changes being made are corrective or provide relief to owners and operators of barges with chlorine tanks, a delayed effective date is unnecessary. Therefore, the Coast Guard finds good cause to make this rulemaking effective upon publication in the Federal Register.

Discussion of Comments and Changes

1. *Section 38.25–1.* One comment pointed out that although the new 10 year internal examination interval lines up with the regular intervals for drydocking, internal structural examinations, and inspections for certification, it does not line up with the 4 year interval for testing of safety relief valves on tanks carrying liquified flammable gas and other Subchapter D and I cargoes. The comment proposed that the safety relief valve test interval for tanks carrying these cargoes be changed from 4 to 5 years, to line up with drydock and other inspection and examination requirements. The Coast Guard has determined it is imprudent to extend the interval beyond 4 years. Most safety relief valves on tanks carrying Subchapter D and I cargoes are mounted on manifolds or the tanks themselves, exposed to the weather and mechanical abuse. When tested at the required 4 year intervals, the safety relief valves exhibit many setting and adjustment problems and it has become common for the owners or operators to "swap out" the valves with ones which have been rebuilt and bench tested. For these reasons, the present 4 year safety relief valve test interval has not been increased to 5 years.

2. *Table 54.01–5(b).* When this table, titled Pressure Vessel Classification, was revised and published in the IFR, several footnote numbers were inadvertently left out of the table. Table 54.01–5(b) is republished with corrections.

3. *Part 151.* Seven of the comments pointed out that even though the internal examination and hydrostatic test interval for PVCTs in chlorine service was now 3 years, 46 CFR 151.04–5 (g) and (i) still required the excess flow valves and safety relief valves for these tanks to be tested every 2 years at the time of the inspection for certification. This effectively negated the advantages of the 3 year internal examination and hydrostatic test intervals, because the tanks must be emptied and gas-freed in order to test the valves. They requested that the excess flow and safety relief valve test intervals be extended to 3 years also.

These types of valves on chlorine tanks are not subject to excessive mechanical abuse or exposure to the weather, being protected by weathertight metallic domes. The valves in service on shoreside chlorine tanks which are tested every 3 to 6 years have not experienced any problems. Therefore, the Coast Guard is changing the 2 year interval for tests of excess flow valves and safety relief valves in chlorine service to 3 years, which will be alignment with the new 3 year internal exam and hydrostatic test requirements.

Regulatory Evaluation

The Coast Guard considers these regulations to be non-major under Executive Order 12291 and non-significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). A regulatory evaluation has been prepared and placed in the public docket as required by the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5, dated May 22, 1980). It may be inspected or copied at the Marine Safety Council, U.S. Coast Guard Headquarters, Room 3406, 2100 Second Street SW., Washington, DC 20593–0001, between 7 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Because the economic impact as a result of the changes to the excess flow valve and safety relief valve test intervals for chlorine tanks is so minimal, the Coast Guard finds that no further economic evaluation is necessary.

Regulatory Flexibility Act

These regulations would affect companies that own or operate barges carrying cargoes in PVCTs; some of these companies may be small entities. For this rulemaking, the Coast Guard considered a small entity to be one operating a single barge. The amendments will provide an economic benefit to these barge owners and operators by reducing the frequency of costly inspections. The Coast Guard does not consider this economic impact to be significant. The estimated cost savings of $1,042 per barge per year represents about 2 days revenue for this type of barge. The Coast Guard has identified ten companies as small entities. The Coast Guard certifies in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

These regulations contain information collection requirements. These items were submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and OMB approved them. The affected section numbers are §§ 38.25–3, 98.25–97, and 151.04–7. The corresponding OMB Control Number is 2115–0583.

Federalism

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

Reduced tank cleaning will result in a slight reduction in air and water pollution. Due to the small number of barges that would be affected by these regulations, this slight reduction is considered insignificant. The use of more sophisticated examination methods on older cargo tanks is expected to decrease the probability of catastrophic tank failure and improve the reliability of these tanks. This effect is more important as a safety benefit because an uncontrolled release of the type of cargo generally carried in these tanks presents an immediate threat to life but the gases tend to rapidly dissipate, thereby posing no known persistent environmental threat. The Coast Guard considered the environmental impact of these regulations and concluded that preparation of an environmental impact statement is not necessary. An environmental assessment and a finding of no significant impact are available in the rulemaking docket for inspection or copying at the Marine Safety Council, U.S. Coast Guard Headquarters, Room 3406, 2100 Second Street SW., Washington, DC 20593–0001, between 7 a.m. and 4 p.m., Monday and Friday, except Federal holidays.

List of Subjects

46 CFR Part 38

Cargo vessels, Fire prevention, Gases, Hazardous materials transportation, Incorporation by reference, Marine safety.

46 CFR Part 54

Reporting and recordkeeping requirements, Vessels.

46 CFR Part 98

Cargo vessels, Hazardous materials transportation, Incorporation by reference, Marine safety.

46 CFR Part 151

Cargo vessels, Hazardous materials transportation, Incorporation by reference, Marine safety, Reporting and recordkeeping requirements.

For the reasons set out above, the interim final rule amending title 46, chapter I, of the Code of Federal Regulations, which was published at 54 FR 50958 on December 11, 1989, is adopted as a final rule with the following changes:

PART 54—PRESSURE VESSELS

1. The authority citation for part 54 continues to read as follows:

Authority: 33 U.S.C. 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5115; E.O. 12234, 45 FR 58801, 3 CFR 1980 Comp., p. 277; 49 CFR 1.46.

§ 54.01–5 [Amended]

2. In § 54.01–5, Table 54.01–5(b) is revised to read as follows:

* * * * *

TABLE 54.01–5(b)—PRESSURE VESSEL CLASSIFICATION [8]

Class	Service contents	Class limits on pressure and temperature	Joint requirements [4,6,7]	Radiography requirements, section VIII, ASME Code [4,7]	Post weld heat treatment required [4,7]	Shop inspect. required	Plan approval required
I	(a) Vapor or gas. (b) Liquid (c) Hazardous materials [3]	Over 600 p.s.i. or 700°F Over 600 p.s.i. or 400°F	(1) For category A; (1) or (2) For category B. All categories C and D must have full penetration welds extending through the entire thickness of the vessel wall or nozzle wall.	Full on all butt joints regardless of thickness. Exceptions listed in Table UCS–57 of ASME Code do not apply.	For carbon or low alloy steel, in accordance with Table UCS–56, regardless of thickness. For other materials, in accordance with section VIII, ASME Code.	Yes [4]	Yes [4].

TABLE 54.01-5(b)—PRESSURE VESSEL CLASSIFICATION [8]—Continued

Class	Service contents	Class limits on pressure and temperature	Joint requirements [4,6,7]	Radiography requirements, section VIII, ASME Code [5,7]	Post weld heat treatment required [6,7]	Shop inspect. required	Plan approval required
I-L Low temperature.	(a) Vapor or gas.	Over 250 p.s.i. and service temperature below 0°F	(1) for categories A and B. All categories C and D must have full penetration welds extending through the entire thickness of the vessel wall or nozzle wall. No backing rings or strips left in place.	Full on all butt joints regardless of thickness. Exceptions listed in Table UCS-57 of ASME Code do not apply.	For carbon or low alloy steel, in accordance with Table UCS-56, regardless of thickness. For other materials, in accordance with section VIII, ASME Code.	Yes	Yes.
	(b) Liquid	Over 250 p.s.i. and service temperature below 0°F					
	(c) Hazardous materials [3]						
II	(a) Vapor or gas.	30 through 600 p.s.i. or 275° through 700°F	(1) or (2) for category A. (1), (2), or (3) for category B. Categories C and D in accordance with UW-12 of ASME Code.	Spot, unless exempted by UW-11(c) of ASME Code.	In accordance with section, VIII of ASME Code.	Yes [4]	Yes [4].
	(b) Liquid	250 through 600 p.s.i. or 250° through 400°F					
	(c) Hazardous materials [3,5,6]						
II-L Low temperature.	(a) Vapor or gas.	0 through 250 p.s.i. and service temperature below 0°F	(1) for category A; (1) or (2) for category B. All categories C and D must have full penetration welds extending through the entire thickness of the vessel wall or nozzle wall.	Spot. The exemption of UW-11(c) of ASME Code does not apply.	Same as for I-L except that mechanical stress relief may be substituted if allowed under Subpart 54.30 of this chapter.	Yes	Yes.
	(b) Liquid	0 through 250 p.s.i. and service temperature below 0°F					
	(c) Hazardous materials [3]						
III	(a) Vapor or gas.	Under 30 p.s.i. and 0° through 275°F	In accordance with Section VIII of ASME Code.	Spot, unless exempted UW-11(c) of ASME Code.	In accordance with Section VIII of ASME Code.	Yes [4]	Yes [4]
	(b) Liquid	Under 200 p.s.i. and 0° through 350°F					
	(c) Hazardous materials [3,5,6]						

[1] Welded joint categories are defined under UW-3 of the ASME Code. Joint types are described in Table UW-12 of the ASME Code, and numbered "(1)," "(2)", etc.

[2] See § 54.20-2.
[3] See §§ 54.25-9(c) and 54.25-10(d).
[4] See §§ 54.01-15 and 54.10-3 for exemptions.
[5] Specific requirements modifying Table UCS-56 of the ASME Code are found in § 54.25-7.
[6] See § 54.20-3 (c) and (f)
[7] Applies only to welded pressure vessels.
[8] Does not include special requirements for heat exchanger. Section 54.01-2 contains an explanation of these special requirements.

PART 151—BARGES CARRYING BULK LIQUID HAZARDOUS MATERIAL CARGOES

3. The authority citation for part 151 continues to read as follows:

Authority: 33 U.S.C. 1903(b); 46 U.S.C. 3703; 49 CFR 1.46.

4. In § 151.50–31, paragraphs (q) through (s) are redesignated as paragraphs (r) through (t), respectively, and new paragraph (q) is added to read as follows:

§ 151.50–31 Chlorine.

* * * * *

(q) During each internal inspection, each cargo tank excess flow valve and safety relief valve must be inspected and tested in accordance with paragraphs (g) and (i) of § 151.04–5 of this chapter.

* * * * *

Signed: August 16, 1990.

J.D. Sipes,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

Title 3—

The President

Proclamation 6283 of October 12, 1990

National Disability Employment Awareness Month, 1990

By the President of the United States of America

A Proclamation

The United States' ability to remain strong and prosperous in the increasingly technological, increasingly competitive global marketplace will be determined, in large part, by our success in harnessing the energy, creativity, and talent of all our citizens. A great many of those among the estimated 43 million Americans who have disabilities are both eager and able to help our country meet the challenges of our rapidly changing world. Recognizing this rich source of human potential and providing these individuals with greater opportunities to bring their knowledge, ideas, and commitment to the workplace is, therefore, not only a moral imperative, but also a crucial investment in our Nation's future.

Over the years, the United States has made significant progress in facilitating the movement of persons with disabilities into the mainstream of American life. We have opened doors to education and business, and we have developed effective rehabilitation and training programs that are helping millions of people with disabilities to become skilled, productive workers. Advances in technology and the removal of architectural barriers and other obstacles in housing, transportation, and the workplace have also enabled Americans with disabilities to enjoy greater freedom, independence, and mobility.

While Americans with disabilities have made many advances in education, public accommodations, and employment, we know that more doors remain to be opened. Thus, it was with great pleasure that I signed into law on July 26 historic new civil rights legislation—the Americans with Disabilities Act of 1990. Expanding upon the goals of the Rehabilitation Act of 1973, this legislation is the world's first comprehensive declaration of equality for persons with disabilities. The Americans with Disabilities Act prohibits employers covered by the act from discriminating against qualified applicants or employees on the basis of a disability; it guarantees persons with disabilities access to public accommodations, such as offices, hotels, and shopping centers; and it calls for improved access to transportation, State and local government services, and telecommunications as well.

The Americans with Disabilities Act of 1990 reaffirms our national commitment to providing persons with disabilities equal opportunities to participate in the social and economic life of our country. During this year's observance of National Disability Employment Awareness Month, we not only celebrate the enactment of this legislation, but also recognize the many contributions that persons with disabilities have made, and continue to make, in the Nation's workplace.

The Congress, by Joint Resolution approved August 11, 1945, as amended (36 U.S.C. 155), has called for the designation of the month of October of each year as "National Disability Employment Awareness Month." This special month is a time for all Americans to join together in recognizing the unlimited potential of persons with disabilities and in renewing our determination to provide equal employment opportunities for them.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the month of October 1990 as National Disability Employment Awareness Month. I call upon the people of the United States to continue working to guarantee for Americans with disabilities equal employment opportunities and the full rights and privileges of citizenship.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

Proclamation 6304 of October 12, 1990

National Forest Products Week, 1990

By the President of the United States of America

A Proclamation

Ever since the first American colonists described for their contemporaries in Europe the splendor of the New World, this country's forests have been recognized around the globe for their majestic beauty. However, our forests have also been an invaluable resource, one that has played a singularly important role in the building of our Nation. Centuries ago, our forests provided Native Americans and European settlers with a variety of foods and raw materials for shelter, tools, and fuel. As the Nation expanded westward, they provided the timbers necessary to build ships and railroads for transportation and commerce, as well as telegraph and telephone lines.

Today we continue to rely on our Nation's forests and forest products in a multitude of ways. Forests serve as the habitat for much of our Nation's wildlife and provide a peaceful, scenic setting for family outings and other recreational activities. They also continue to provide raw materials for fuel, construction, and a variety of wood and paper products.

Although we have the choice of many different building products, we continue to value wood for our homes and furnishings. Wood is strong and durable, yet also flexible and versatile. New technology and techniques for its treatment, preservation, and design continue to increase its usefulness.

The Department of Agriculture reports that forest products contribute 4 percent to the Gross National Product and account for almost 2 million jobs in wood manufacturing and related industries and an estimated $25 billion in annual wages to working men and women. According to the Department, the forest industry ranks among the top 10 employers in 48 of the 50 States. Forest products thus make a significant contribution to our Nation's economic strength and progress, as well as to our individual physical comfort and well-being.

Unfortunately, in the past, our ancestors did not always recognize the need for careful stewardship of our forest resources. Taking for granted this country's vast, dense forests and striving to meet the great and urgent demands of a growing Nation led to rapid and sometimes wasteful use of forest resources. Forest cut-out and move-out practices were, for too long, assumed to be an inevitable part of development, while conservation strategies were viewed as a limitation on progress. Fortunately, however, a more enlightened view of forest management eventually emerged. Farsighted leaders such as President Theodore Roosevelt and Gifford Pinchot, the Nation's first trained forester, successfully contended that systematic and scientific management of our forests could guarantee their productivity for years to come.

While it is clear that forests can be used to meet consumer needs, it is also clear that they must be replenished in a timely manner—especially when natural regeneration does not appear to be sufficient. Over the years careful studies and experience have helped us to improve management of this precious, yet renewable, resource. Indeed, today's forest managers view the forest as a whole ecosystem that, when handled wisely, can ensure a sustained yield of forest products. Policies and practices developed according to this view are compatible with other environmental interests such as water-

shed and wildlife protection. Targeting research to develop more environmentally sensitive methods of harvesting forest products and increasing cooperation among government and private forest managers are keys to successful stewardship of this vital natural resource.

Each of us has a stake in the stewardship of our Nation's forests. Ensuring that our children and our children's children are able to enjoy abundant natural resources and a healthy environment calls for personal action. Accordingly, local governments are rapidly organizing recycling programs in which every citizen can participate. Each American can also make a difference by planting trees. Through Federal efforts such as the America the Beautiful initiative, every State, community, and individual in the Nation will have the opportunity to help plant and maintain nearly 1 billion trees per year across the country. These trees, planted in both urban and rural areas, will stand in addition to the more than 2 billion trees planted regularly through previously established government programs and existing private efforts.

In recognition of the value of our forests, the Congress, by Public Law 86–753 (36 U.S.C. 163), designated the week beginning on the third Sunday in October of each year as "National Forest Products Week" and authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week beginning October 21, 1990, as National Forest Products Week and call upon all Americans to observe that week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

George Bush

Proclamation 6235 of October 12, 1990

Country Music Month, 1990

By the President of the United States of America

A Proclamation

Whether they tap their feet to the spirited sound of bluegrass or quietly hum along with the soulful melodies of traditional ballads, millions of Americans—and, indeed, fans around the world—enjoy listening to country music each day. However, country music is more than a favorite source of entertainment; it is also a rich and colorful expression of the hopes, experiences, and values of the American people.

Encompassing a wide range of musical genres, from folk songs and religious hymns to rhythm and blues, country music reflects our Nation's cultural diversity as well as the aspirations and ideals that unite us. It springs from the heart of America and speaks eloquently of our history, our faith in God, our devotion to family, and our appreciation for the value of freedom and hard work. With its simple melodies and timeless, universal themes, country music appeals to listeners of all ages and from all walks of life.

The popularity of country music, both throughout the Nation and throughout the world, is a great tribute to generations of talented American composers, musicians, lyricists, and singers. This month, we gratefully acknowledge their many gifts to us and proudly celebrate the uniquely American art form that is country music.

The Congress, by House Joint Resolution 603, has designated October 1990 as "Country Music Month" and has authorized and requested the President to issue a proclamation in observance of this month.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim October 1990 as Country Music Month. I invite all Americans to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of October, in the year of our Lord nineteen hundred and ninety, and of the Independence of the United States of America the two hundred and fifteenth.

Office of Management and Budget

Final OMB Sequester Report to the President and Congress for Fiscal Year 1991; Report Transmittal

OFFICE OF MANAGEMENT AND BUDGET

Final OMB Sequester Report to the President and Congress for Fiscal Year 1991

AGENCY: Office of Management and Budget.

ACTION: Report Transmittal.

SUMMARY: This notice transmits the *Final OMB Sequester Report to the President and Congress for Fiscal Year 1991* as required by the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119)

Dated: October 15, 1990.

Richard G. Darman,

Director.

BILLING CODE 3110-01-M

FINAL OMB SEQUESTER REPORT TO THE PRESIDENT AND CONGRESS FOR FISCAL YEAR 1991

NOTICE

There should be no release of this document until 12 noon (E.D.T.), Monday, October 15, 1990.

October 15, 1990

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

THE DIRECTOR

The following is the text of a letter transmitting the *Final OMB Sequester Report to the President and Congress for Fiscal Year 1991.*

October 15, 1990

The President
The White House
Washington, DC 20500

Dear Mr. President:

Enclosed please find the *Final OMB Sequester Report to the President and Congress for Fiscal Year 1991.* It has been prepared in accordance with the requirements of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119).

As required by law, the budget estimates contained in this report are based on economic and technical assumptions published by the Office of Management and Budget in the July 16th Mid-Session Review, and on laws enacted and final regulations promulgated as of October 10, 1990.

The report finds that, under current law, sequestration is necessary in order to meet the Gramm-Rudman-Hollings (G-R-H) deficit reduction target. Accordingly, a final Presidential sequestration order has been prepared for issuance today. The Further Continuing Appropriations Act of 1991 (Public Law 101–412), however, has suspended until October 19th implementation of reductions required under the final order.

This final sequester report estimates the fiscal year 1991 G-R-H baseline deficit (which is very substantially different from the current estimate of the consolidated budget deficit) to be $147.3 billion, $83.3 billion above the $64 billion deficit target. This G-R-H deficit estimate strictly adheres to the requirements of the G-R-H law. Consequently, it reflects events that are likely not to happen, such as the expiration of the food stamp program, or the failure to increase funding authority for S&L case resolutions. And it does *not* reflect updated economic assumptions. By making reasonable assumptions, such as the continuation of the food stamp program and additional funding for S&L case resolutions, and adjusting for the most recent economic forecast, the current baseline consolidated deficit for 1991 is estimated to be $295.0 billion.

This report provides calculations of the amounts and percentages by which various budgetary resources would be reduced under the assumption of a necessary $83.3 billion sequester. As required by law, the report includes projected budget baseline levels, Mid-Session economic assumptions, a discussion of the sequestration calculations, and comparisons with the estimates provided by the Director of the Congressional Budget Office in his report.

Respectfully yours,

Richard G. Darman
Director

GENERAL NOTES

1. All years referred to are fiscal years unless otherwise noted.
2. Details in the tables and text may not add to totals because of rounding.
3. Unless otherwise noted, the source of all data in this report is the Office of Management and Budget.
4. Unless otherwise noted, "the Act" refers to the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119).

I. THE G-R-H BASELINE DEFICIT

The Balanced Budget and Emergency Deficit Control Act of 1985, as amended, (commonly known as Gramm-Rudman-Hollings, or G-R-H) sets deficit targets for 1991 through 1993. The Act requires automatic reductions in selected programs (a sequester) to achieve these targets if they cannot be reached through the legislative process. The table below shows the deficit targets specified in the Act. Except in 1993, the Act allows a $10 billion margin-of-error. However, if the deficit exceeds the sequester trigger level, which is $74 billion in 1991, the Act requires a sequester sufficient to reduce the baseline deficit to the target level—$64 billion in 1991.

Deficit Targets

(In billions of dollars)

Fiscal Year	Target Deficit	Sequester Trigger
1991	64.0	74.0
1992	28.0	38.0
1993	zero	zero

Under the Act, the Director of the Office of Management and Budget (OMB) is obliged to determine each year whether or not sequestration is necessary and, if so, the magnitude of the sequester. The Congressional Budget Office (CBO) is obliged to prepare independently its own sequestration reports. The CBO reports are transmitted to the Director of OMB and to Congress, and provide a basis for comparison against which Congress and others may assess the OMB reports. The OMB reports to the President and the Congress provide the basis for sequestration orders to be issued by the President. The timetable for the OMB and CBO reports and Presidential orders for calendar year 1990 is as follows:

Report or Order	Date
Snapshot date for initial OMB and CBO report	August 15th
Initial CBO report	August 20th
Initial OMB report	August 25th
Initial Presidential order	August 25th
Final CBO report	October 10th
Final OMB report	October 15th
Final Presidential order	October 15th

OMB issued an estimate of the G-R-H baseline deficit in the Mid-Session Review of the Budget, which was published on July 16, 1990. Under the Act, subsequent G-R-H reports must use the economic and technical assumptions used in the Mid-Session Review. Both the OMB and CBO initial sequestration reports are based on laws enacted and regulations promulgated as final as of August 15th (the snapshot date). The final reports, however, do not share a common snapshot date. Rather, the G-R-H law requires that the final reports be based on laws enacted and final regulations promulgated by the latest possible date before the reports are issued. The CBO final report was issued on October 10th. Because no changes in law after the CBO snapshot date affected the OMB G-R-H baseline estimates, both the OMB and CBO final reports reflect the same enacted legislation and final regulations.

As required by the Act, this report:

- estimates the 1991 G-R-H baseline deficit, using the economic and technical assumptions indicated in the Mid-Session Review;
- calculates the sequester amounts required; and
- presents and explains significant differences between the estimates in this report and the estimates in the CBO report.

Baseline Estimates

This report shows the current-law G-R-H baseline deficit (which is different from the current estimate of the consolidated budget deficit) to be $147.3 billion, $83.3 billion above the $64 billion deficit target specified in the Act for 1991 and $73.3 billion above the level that would trigger a sequester. As shown in Table 1, OMB's current 1991 G-R-H baseline estimate for receipts is $1,121.4 billion. G-R-H baseline outlays are estimated to total $1,268.8 billion. These estimates include the receipts and outlays of the off-budget social security trust funds, although social security benefits themselves are exempt from sequestration.

The G-R-H baseline estimates assume that current law for revenues and spending authority (including most entitlements) will continue unchanged, and that expiring provisions of law providing revenues and spending authority will terminate as scheduled, except as provided in the G-R-H Act.[1] Because no 1991 appropriations bills have been enacted, baseline estimates for discretionary spending accounts are based on the 1990 appropriations adjusted for inflation and pay costs.

By following the specifications set forth in the Act for developing the baseline, the G-R-H estimates in this report include no adjustments for anomalies that result from the requirements of the Act. For instance, the G-R-H estimates assume that in 1991 the authorization for the food stamp program will expire and that the 1990 decennial census will be repeated in 1991. The latter certainly will not occur, and the former is highly unlikely. Nonetheless, the G-R-H Act requires that the baseline be calculated as if these unlikely events were reality.

In addition, the Act requires that G-R-H estimates of the Resolution Trust Corporation (RTC) net outlays be constrained by the current law limit on the availability of RTC funding as provided by the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 (Public Law 101–73). It now appears that the RTC may reach the $50 billion limit in early 1991. For G-R-H baseline purposes, therefore, the RTC must be treated as if it were to run out of funds. Assuming no additional funding, RTC outlays could range from $-14 billion to $14 billion. The G-R-H estimates use a figure in the middle of this range, producing RTC outlays for 1991 of about $0.1 billion. In reality, RTC net outlays for 1991 are likely to exceed $88 billion—but, since this requires a change of law, the G-R-H baseline does not reflect this fact.

Although the Iraqi invasion of Kuwait has had a substantial impact on oil prices and other economic factors, these economic effects are not reflected in this report. The G-R-H law requires that the estimates in this report use the Mid-Session Review economic assumptions. For purposes of estimating the current baseline consolidated deficit, however, it seems reasonable to use updated economic and technical assumptions and to make other adjustments, such as assuming continuation of the food stamp program and additional funding for RTC. Under these assumptions, the baseline consolidated deficit for 1991 is currently estimated to be $295.0 billion. (This estimate excludes savings that would result from enactment of legislation consistent with the Budget Summit Agreement and the Congresional budget resolution.)

---

[1] The G-R-H Act allows for continuation of expiring programs in the following cases: excise taxes dedicated to a trust fund (but not spending authority in that trust fund); Commodity Credit Corporation price support programs; contract authority for transportation trust funds; and authority to provide insurance through the Federal Housing Administration fund.

Table 1.—G-R-H Baseline Totals for 1991

(In billions of dollars)

	Laws and regulations in effect as of:			
	January 1, 1990	July 10, 1990	August 15, 1990	October 10, 1990

G-R-H Outlays	1,269.4	1,270.1	1,271.2	1,268.8
G-R-H Deficit	147.6	148.4	149.4	147.3

Memorandum: Current Baseline Consolidated Deficit: $295.0 billion.

OMB's estimate of the G-R-H baseline deficit is further affected by a technical spendout requirement specified in the G-R-H Act. The Act requires that in developing the G-R-H baseline the Director of OMB shall assume that the aggregate spendout rate (the ratio of new outlays to new budgetary resources) from sequesterable discretionary resources for defense programs not differ by more than one-half percentage point from the comparable rate contained in the sequester report submitted for the previous fiscal year. The Act applies the same requirement to nondefense programs. The estimates for defense programs meet this requirement. To meet the requirement for nondefense programs, however, a $0.1 billion upward adjustment of the estimated outlays from new budgetary resources is needed in order to bring the aggregate spendout rate within one-half a percentage point of the benchmark rate.

Final Sequester Order

Because these estimates indicate that a sequester would be required for 1991 under current law, the President is required to issue a final sequester order to withhold funds necessary to reduce outlays by $83.3 billion. The final order for 1991 will be issued today, but its implementation has been suspended until October 19th under the Further Continuing Appropriations Act of 1991 (Public Law 101–412).

Given the unprecedented size of the sequester estimated in the Mid-Session Review and the August initial sequester report, agencies and departments were required to develop detailed plans to manage sequesterable programs. In addition to various programmatic reductions, these plans include reductions-in-force, furloughs, and hiring freezes to reduce staff costs. Because the sequester estimate in this report is of the same magnitude as the August estimate, these plans would in general still apply if the final sequester order were implemented. For an illustrative description of the programmatic impact of a potential $100 billion sequester, see pages 18 through 38 in the Mid-Session Review of the Budget.

Changes Since January

Estimates of the G-R-H baseline using current economic and technical assumptions but assuming laws and regulations in effect on January 1, 1990, produce a fiscal year 1991 deficit of $147.6 billion. Table 2 shows the impact on this estimated deficit of legislation enacted and final regulations promulgated since January. In total, these policy changes have reduced the baseline deficit by $0.3 billion.

The Dire Emergency Supplemental Appropriations Act of 1990 (Public Law 101–302) increased the 1991 baseline deficit by $0.7 billion. As a result of the embargo of Iraq, defaults on loans guaranteed by the Commodity Credit Corporation and the Export-Import Bank are expected to increase, adding $0.9 billion in outlays.

Since August 15th, the snapshot date for the initial sequester report, the G-R-H baseline deficit has been reduced by $2.1 billion. An increase in the deposit insurance premium paid by banks to the Bank Insurance Fund is anticipated to yield $1.2 billion in additional collections in 1991. Establishment of the 1991 Federal pay raise of 3.5 percent effective January 1991 reduces outlays by $0.9 billion

because the final pay raise is lower than the previous baseline estimate, which was calculated according to the G-R-H rules. Legislation enacted since August 15th has reduced the deficit by about $0.1 billion.

Table 2.—G-R-H Baseline Deficits for 1991—Based on Laws in Effect in January, July, August, and October

(In billions of dollars)

January G-R-H baseline deficit	147.8
Changes in law January 1st–July 10th:	
1990 supplemental appropriations (Public Law 101–302)	0.7
Other (including debt service)	0.1
Subtotal, changes in law January 1st–July 10th	0.8
July (Mid-Session Review) G-R-H baseline deficit	148.4
Changes in law July 10th–August 15th:	
Executive Orders 12722–12725	0.9
Other (including debt service)	0.1
Subtotal, changes in law July 10th–August 15th	1.0
August G-R-H baseline deficit	149.4
Changes in law August 15th–October 10th:	
Desert Shield authority in 1991 continuing appropriations (Public Law 101–403)	0.4
Customs and Trade Act of 1990 (Public Law 101–382)	-0.4
Establishment of 1991 Federal pay raise (net)	-0.9
Bank Insurance Fund assessment rate increase	-1.2
Other (including debt service)	-0.1
Subtotal, changes in law August 15th–October 10th	-2.1
October G-R-H baseline deficit	147.3
MEMORANDUM	
Net deficit reduction achieved January 1st–October 10th	0.5

II. ECONOMIC ASSUMPTIONS

The principal economic assumptions underlying the G-R-H baseline estimates for 1991 are shown in Table 3. The Act requires the OMB Director to publish an estimate of the rate of real GNP growth for the last two quarters of fiscal year 1990 and for each quarter of fiscal year 1991. These estimates are shown in Table 4. Notwithstanding significant intervening events (such as those in the Mideast), these economic assumptions are the same as those used by OMB for its Mid-Session Review of the Budget—as required by law. They are *not* current estimates. They are far too optimistic. They are merely the estimates required by law.

Table 3.—Economic Assumptions

(Fiscal year 1991)

Gross National Product:	
Current dollars (in billions of dollars)	5,853.6
Percent change, year over year	7.0
Constant dollars (in billions of dollars)	4,311.4
Percent change, year over year	2.6
GNP Implicit Price Deflator (percent change, year over year) [1]	4.3
CPI-W (percent change, year over year)	4.3
Civilian Unemployment Rate (percent, fiscal year average)	5.7
Interest Rates (fiscal year average):	
91-day Treasury bills	7.2
10-year Treasury notes	8.2

[1] As required under the Act, the discretionary program inflation adjustment and pay raise costs are estimated using the increase in the GNP deflator (4.2 percent) from the economic assumptions presented in January. All other estimates in this report, however, use the economic assumptions presented in the Mid-Session Review of the Budget and shown in this table.

Table 4.—Real Economic Growth Rates by Quarter

(In percent, annual rates)

FY 1990			FY 1991			
Actual		Estimate	Estimates			
Jan.–Mar. 1990 [1]	Apr.–June 1990 [2]	July–Sept. 1990	Oct.–Dec. 1990	Jan.–Mar. 1991	Apr.–June 1991	July–Sept. 1991
1.3	2.2	2.5	2.8	2.8	2.8	3.0

[1] As reported by the Department of Commerce (May 24, 1990) and used in the Mid-Session Review of the Budget. Subsequently, the Department of Commerce revised the "actual" for January–March 1990 to 1.7 percent. Pursuant to the Act, OMB may not update the Mid-Session figure for purposes of estimating the G-R-H baseline.

[2] On September 25, 1990, the Department of Commerce reported a "final" estimate for April–June 1990 of 0.4 percent.

III. COMPOSITION OF G-R-H BASELINE OUTLAYS AND RESOURCES SUBJECT TO SEQUESTER

For defense and nondefense programs combined, an estimated $919.6 billion in outlays, or 72 percent of total outlays, are associated with budgetary resources exempt from sequestration under current law. This total for exempt programs includes military personnel accounts, which the President has chosen to exempt under authority provided in the G-R-H Act. The burden of sequestration, therefore, falls on programs that comprise the remaining 28 percent of budget outlays. Of these outlays, defense programs account for 35 percent, special rule nondefense programs account for 31 percent, and other nondefense programs account for 34 percent.

Table 5 provides further detail on the G-R-H baseline outlay estimates for 1991 under current law. An estimated $120.8 billion of 1991 outlays for defense programs, or 39 percent of total defense outlays, are associated with budgetary resources subject to an across-the-board percentage reduction.

An estimated $228.3 billion of outlays for nondefense programs, or 24 percent of total nondefense outlays, are associated with sequesterable budgetary resources under current law. About $106.2 billion of these outlays, or 11 percent of total nondefense outlays, are for programs with automatic spending increases and for certain special rule programs, the largest of which is medicare. The Act limits the extent of spending reductions for these programs. Of the total estimated 1991 nondefense outlays of $962.8 billion, an estimated $120.1 billion—about 12 percent of nondefense outlays—are associated with budgetary resources subject to an across-the-board percentage reduction.[2] An estimated $734.5 billion of nondefense outlays, or 76 percent of total nondefense outlays, are exempt from sequestration.

A sequester does not reduce outlays directly; rather, it permanently cancels budget authority and other authority to obligate and expend funds (except that special rules apply to amounts sequestered in special and trust funds). For defense programs, sequesterable budgetary resources consist of new budget authority provided for 1991 and unobligated balances of budget authority provided in previous years. For nondefense programs, the sequesterable budgetary resources are new budget authority; new direct loan obligations, commitments, or limitations; new guaranteed loan commitments or limitations; obligation limitations; and spending authority as defined in Section 401(c)(2) of the Congressional Budget Act of 1974. This definition of spending authority includes various mandatory and permanent appropriations, as well as Federal payments financed by offsetting collections that are credited to budget accounts.

The Act exempts a number of programs and activities of the Federal Government from the sequestration process. As shown in Table 5, the largest are social security benefits, net interest, certain low-income programs, most Federal retirement and disability benefits, veterans compensation and pensions, and regular State unemployment insurance benefits. Also exempt from sequestration are prior legal obligations of the Government in certain specified budget accounts. Outlays from obligated or unobligated balances of prior-year appropriations for nondefense programs are generally not subject to sequestration.

Federal administrative expenses for most otherwise exempt programs and activities, however, are sequesterable, including programs that are self-supporting. Although budgetary resources available for Federal pay are subject to sequestration, the Act provides that rates of pay for civilian employees (and rates of basic pay, basic subsistence allowances, and basic quarter allowances for members of the uniformed services), or any scheduled pay increases, may not be reduced pursuant to a sequestration order.

---

[2] The estimated $120.1 billion nondefense total subject to across-the-board reduction excludes $5.7 billion of 1992 outlays for Commodity Credit Corporation (CCC) that would also be subject to a 1991 sequester.

BEST COPY AVAILABLE

Certain programs and activities, while not exempt, are subject to special rules that have the effect of limiting the amount of the spending reduction. For example, the sequestration reduction for medicare, veterans medical care, and certain health programs (but not for the administrative expenses of these programs) is limited to two percent annually. In addition, the total amount of the automatic spending increases in three programs specified in the Act is sequesterable, but the program bases are exempt. Although the Federal share of extended unemployment benefits is sequesterable, if States act to increase their share by the amount of the reduction in the Federal share, total budget outlays, which include both the Federal and State shares, will not be changed by the sequestration.

For credit programs, the measures governing sequesterable budgetary resources are direct loan obligations and guaranteed loan commitments. In the event of a sequester, the Act requires that credit limitations enacted in annual appropriations acts be reduced, and that *de facto* limitations be imposed on both types of new credit activity where there is no enacted limitation.

Table 5.—Composition of G-R-H Baseline Outlay Estimates for 1991

(Dollar amounts in billions)

	Outlays	Percent of Total
Defense programs: [1]		
Subject to across-the-board reduction	120.8	9.5
Exempt from sequestration [2]	185.2	14.6
Subtotal, defense programs	305.9	24.1
Nondefense programs:		
Subject to sequestration:		
Certain programs with automatic spending increases [3]	1.4	0.1
Certain special rule programs [4]	106.6	8.4
Subject to across-the-board reductions [5]	120.1	9.5
Subtotal, subject to sequestration	228.3	18.0
Exempt from sequestration:		
Social security	264.6	20.9
Federal retirement, disability, and workers compensation	70.8	5.6
Earned income tax credit	4.7	0.4
Low-income programs [6]	82.7	6.5
Veterans compensation and pensions	15.9	1.3
State unemployment benefits	18.3	1.4
Offsetting receipts and collections	-64.6	-5.1
Net interest	192.1	15.1
Other [7]	150.0	11.8
Subtotal, exempt from sequestration	734.5	57.9
Subtotal, nondefense programs	962.8	75.9
Total	1,268.8	100.0

[1] Function 050, excluding Federal Emergency Management Agency (FEMA) programs.
[2] Largely outlays from military personnel accounts and obligated balances.
[3] National Wool Act, special milk, and vocational rehabilitation programs.
[4] Guaranteed student loans, foster care and adoption assistance, medicare, veterans medical care, and other health programs.
[5] Excludes $5.7 billion in estimated 1992 outlays for CCC that would be subject to a 1991 sequester.
[6] Family support payment, child nutrition, medicaid, food stamps, SSI, and WIC.
[7] Outlays from prior year appropriations, certain prior legal obligations, and other exempt programs.

IV. SEQUESTRATION CALCULATIONS

This report indicates that, under current law, an outlay reduction of $83.3 billion, the difference between the current baseline deficit and the target of $64 billion, is required. The reductions are determined using the following steps, as shown in Table 6.

First, one-half of the required deficit reduction is assigned to defense programs (budget accounts in the national defense function, 050, excluding the Federal Emergency Management Agency) and the other half to nondefense programs.

Second, the savings from eliminating automatic spending increases in three specific programs, which are listed in Table 7, are applied to the required reduction in outlays for nondefense programs. The amount of savings from eliminating these adjustments in 1991 is $58 million.

Third, the amount of outlay savings to be obtained from programs subject to other special sequestration rules, also listed in Table 7, is then calculated. The estimated savings from these special rule programs, $1.8 billion for 1991, are applied toward the required spending reductions in nondefense programs.

Table 6.—Sequestration Calculations for 1991

(Dollar amounts in billions)

	Estimate
Required deficit reduction	83.3
Defense programs: [1]	
Total required outlay reductions	41.7
Estimated outlays associated with across-the-board sequesterable budgetary resources [2]	120.8
Uniform reduction percentage	34.5%
Nondefense programs:	
Total required outlay reductions	41.7
Estimated savings from automatic spending increases	0.1
Estimated savings from the application of special rules	1.8
Amount remaining to be obtained from uniform percentage reductions of budgetary resources	39.8
Estimated outlays associated with across-the-board sequesterable budgetary resources [3]	125.8
Uniform reduction percentage	31.6%

[1] Function 050, excluding FEMA programs.
[2] Reflects Presidential exemption of military personnel accounts.
[3] Includes $5.7 billion in estimated 1992 outlays for the CCC and $3.5 billion in outlays from offsetting collections that are subject to a 1991 sequester.

The reductions in defense programs and remaining reductions in nondefense programs are applied to budgetary resources on a uniform percentage basis, computed separately for each category. The uniform reduction percentages are computed from outlay estimates. The remaining outlay savings to be achieved separately in defense and nondefense spending are divided by the estimated outlays associated with sequesterable budgetary resources in each category. The two resulting uniform reduction percentages for defense and nondefense are then applied separately to all of the remaining sequesterable budgetary resources (budget authority, credit authority, and other spending authority) in each category.

Under current estimates, the uniform percentage reduction is 31.6 percent for nondefense programs. For defense programs, on August 10, 1990, the Director of OMB notified Congress of the

President's intent to exempt the military personnel accounts from sequestration, as permitted by the G-R-H Act. For the remaining defense programs subject to sequester, the uniform percentage reduction is 34.5 percent.

The Act requires special calculations to achieve the uniform percentage reduction for child support enforcement (CSE). The Federal matching rate on most CSE expenditures would be reduced from 66 percent to 40 percent, and the rate for computer-related expenditures and genetic testing would be reduced from 90 percent to 54 percent. Nondefense savings from the across-the-board reductions also include $1.8 billion of 1992 outlay savings from the Commodity Credit Corporation (CCC). Under the Act, CCC outlay reductions in 1992 resulting from contract adjustments made in 1991 following a sequester are to be credited to the overall outlay reduction required in 1991.

Table 7.—Programs Subject to Special Sequestration Rules

(Outlay amounts in millions of dollars)

	Required Outlay Reductions	Scheduled Increase (percent)
Programs with Automatic Spending Increases Subject to Sequestration:		
National Wool Act [1]	5	4.8
Special milk program [2]	—	—
Vocational rehabilitation [3]	53	4.5
Total	58	
Other Programs Subject to Special Sequestration Rules:		
Guaranteed student loans	36	
Foster care and adoption assistance	4	
Health programs with sequester limited to 2 percent:		
Medicare	1,598	
Veterans medical care and other health programs	207	
Total	1,844	

[1] Payment increases are based on changes in the wool parity price.

[2] Benefits are indexed to the Producer Price Index for Fresh Processed Milk. No automatic increase is projected for 1991.

[3] The automatic spending increase for this program is specified in the program's authorizing legislation and requires an annual percent increase in funding for the State grant and Indian set-aside portions of the program equal to the percentage change in the Consumer Price Index for urban consumers over the past year.

Table 8.—G-R-H Pre- and Post-Sequester Baseline Estimates for 1991 by Function

(In billions of dollars)

Function	October Baseline		Post-Sequester		Sequester Estimate	
	Budget Authority	Outlays	Budget Authority	Outlays	Budget Authority	Outlays

*$50 million or less.

[1] Estimates exclude $5.7 billion of 1992 CCC budget authority and outlays that would be subject to a 1991 sequester of $1.8 billion.

[2] Estimates reflect the $1.8 billion debt service reduction that would result from the sequester.

V. COMPARISONS WITH CONGRESSIONAL BUDGET OFFICE ESTIMATES

As shown in Table 10, the Congressional Budget Office (CBO) estimates in its final sequester report a baseline deficit for 1991 of $163.4 billion, $16.1 billion above the final OMB G-R-H baseline estimate of $147.3 billion. Under CBO assumptions, a sequester of $99.4 billion would be triggered if no further policy changes were made, while OMB estimates that a sequester of $83.3 billion would be required. This section provides the comparisons between OMB and CBO estimates that are required by the G-R-H Act.

Table 10.—Differences Between OMB and CBO G-R-H Baselines

(In billions of dollars)

	Outlays	Receipts	Deficit
OMB baseline	1,268.8	1,121.4	147.3
Changes due to:			
Conceptual differences:			
Food stamps	18.0	—	18.0
Airport and airway trust fund	—	-0.9	0.9
Other (largely debt service)	0.8	—	0.8
Subtotal, conceptual	18.9	-0.9	19.7
Economic assumptions:			
Level of GNP and incomes	—	-6.4	6.4
Interest (including debt service)	-1.0	-0.4	-0.6
Inflation and cost-of-living adjustments	-3.2	—	-3.2
Subtotal, economic	-4.2	-6.8	2.6
Technical:			
Resolution Trust Corporation	7.9	—	7.9
Other deposit insurance	2.1	—	2.1
Medicare and medicaid	-2.4	—	-2.4
Net interest (including debt service)	-2.4	—	-2.4
Other	-2.1	9.3	-11.4
Subtotal, technical	3.1	9.3	-6.2
Total differences	17.7	1.6	16.1
CBO baseline	1,286.5	1,123.1	163.4

Different economic assumptions account for $2.6 billion of the difference between OMB and CBO baseline deficit estimates. CBO forecasts slower real growth and lower interest and inflation rates than OMB. As a result, CBO estimates lower incomes and thus lower receipts, lower interest costs, and lower inflation adjustments for outlays. Technical estimating differences offset $6.3 billion of the difference in the baseline deficit estimates, as discussed below. Conceptual differences between the OMB and CBO estimates account for $19.7 billion. The primary conceptual difference stems from a different legal interpretation of the G-R-H law as it pertains to the expiration of the authority to appropriate funds for the food stamp program beyond 1990. OMB holds the view that the G-R-H baseline rules preclude counting new funds for food stamps in the absence of reauthorization, while CBO holds a contrary view.

Technical differences include $9.3 billion higher receipts under CBO assumptions, due to different estimating assumptions and assumed levels of capital gains realizations, and $3.1 billion higher

outlays under CBO assumptions. The technical difference for outlays is the net of $9.9 billion higher outlays for the Resolution Trust Corporation (RTC) and other deposit insurance programs, and $6.9 billion lower CBO estimates for medicare and medicaid, net interest, and other programs. The higher CBO estimate for the RTC reflects differences in OMB and CBO assumptions about how much of the $50 billion available to that agency will be spent on savings and loan case resolutions in fiscal year 1990 and how much in fiscal year 1991.

The Act requires three comparisons of differences between OMB and CBO estimates. Table 11 shows, by type of sequesterable resource for defense and nondefense programs, the amount of budgetary resources that would be sequestered using the OMB estimate of the required outlay reductions and CBO's estimating methodology. Table 12 identifies differences between OMB and CBO estimates of the aggregate amount of resources to be sequestered by type of resource for defense and nondefense programs. Table 13 identifies differences for accounts where OMB and CBO estimates of sequesterable resources differ by $5 million or more. Explanations of these differences are presented in the footnotes, which appear at the end of the table.

Table 11.—Budgetary Resource Reductions Using CBO Assumptions

Table 13.—Detailed List of Sequestrable Resources for Which OMB and CBO Estimates Differ by More Than $5 Million—Continued
(In thousands of dollars)

Account Title	Resource	OMB Base	CBO Base	Difference	Explanation
United States Information Agency					
Salaries and expenses (91-10-0201-154-0)	Budget Authority	661,408	670,286	8,878	1

Explanation:
1 Different adjustment factors for increased personnel costs and nonpay inflation.
2 Different assumptions about enacted 1990 levels, including transfers and rescissions.
3 Different account structure.
4 Different resource type classification.
5 Different assumptions about resource levels under current law for mandatory programs.
6 OMB classifies as sequestrable; CBO as exempt.
7 OMB classifies as exempt; CBO as sequestrable.
8 OMB over.
9 CBO over.
10 Technical estimating difference for unobligated balances due to rescissions.
11 Different assumptions regarding historical response of programs to payment reductions.
12 Different estimating techniques.
13 Different scoring of previously authorized housing/urban projects.

Title 3—

The President

Final Order of October 15, 1990

Emergency Deficit Control Measures for Fiscal Year 1991

By the authority vested in me as President by the statutes of the United States of America, including section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177), as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119) (hereafter referred to as "the Act"), I hereby order that the following actions shall be taken to implement the sequestrations and reductions determined by the Director of the Office of Management and Budget as set forth in his report dated October 15, 1990, under section 251 of the Act:

(1) Each automatic spending increase that would, but for the provisions of the Act, take effect during fiscal year 1991 is permanently sequestered or reduced as provided in section 252.

(2) The following are sequestered as provided in section 252: new budget authority; unobligated balances; new loan guarantee commitments or limitations; new direct loan obligations, commitments, or limitations; spending authority as defined in section 401(c)(2) of the Congressional Budget Act of 1974, as amended; and obligation limitations.

(3) For accounts making payments otherwise required by substantive law, the head of each Department or agency is directed to modify the calculation of each such payment to the extent necessary to reduce the estimate of total required payments for the fiscal year by the amount specified by the Director of the Office of Management and Budget in his report of October 15, 1990.

(4) For accounts making commitments for guaranteed loans as authorized by substantive law, the head of each Department or agency is directed to reduce the level of such commitments or obligations to the extent necessary to conform to the limitations established by the Act and specified by the Director of the Office of Management and Budget in his report of October 15, 1990.

All reductions and sequestrations shall be made in strict accordance with the specifications of the October 15th report of the Director of the Office of Management and Budget and the requirements of section 252(b).

This order supersedes the Initial Order issued on August 25, 1990.

This order shall be published in the Federal Register.

George Bush

THE WHITE HOUSE,
October 15, 1990.

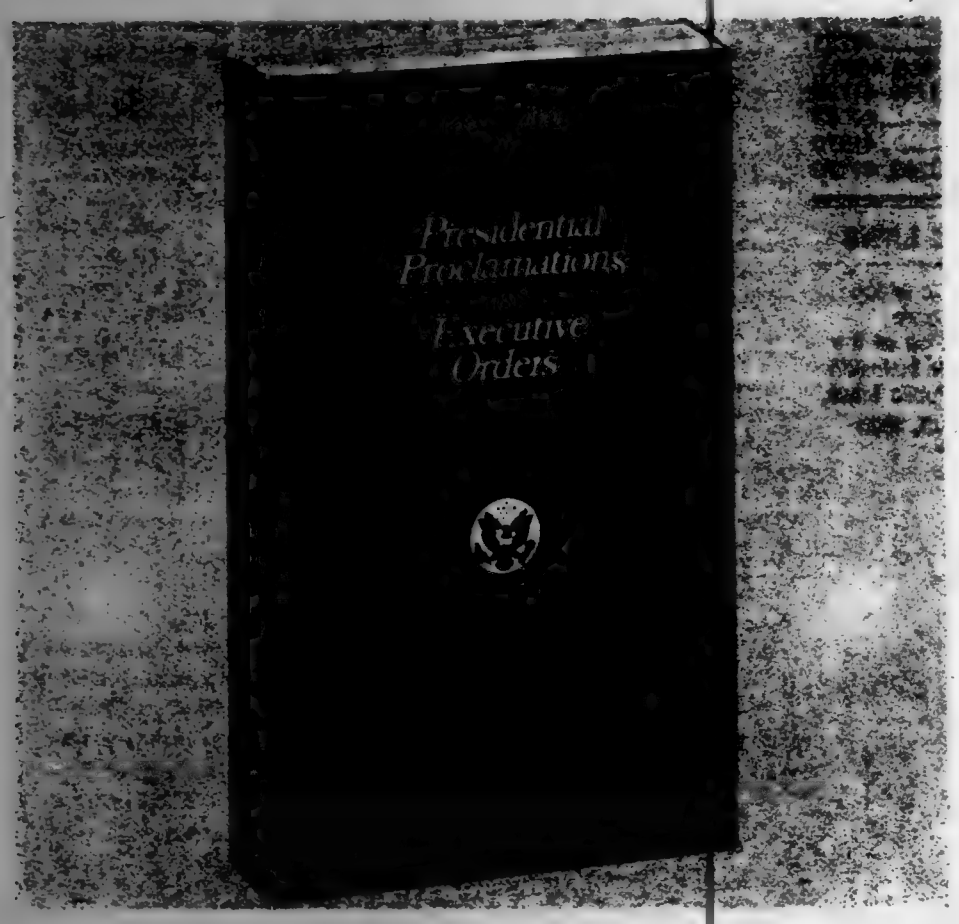
New edition .... Order now !



For those of you who must keep informed about Presidential Proclamations and Executive Orders, here is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

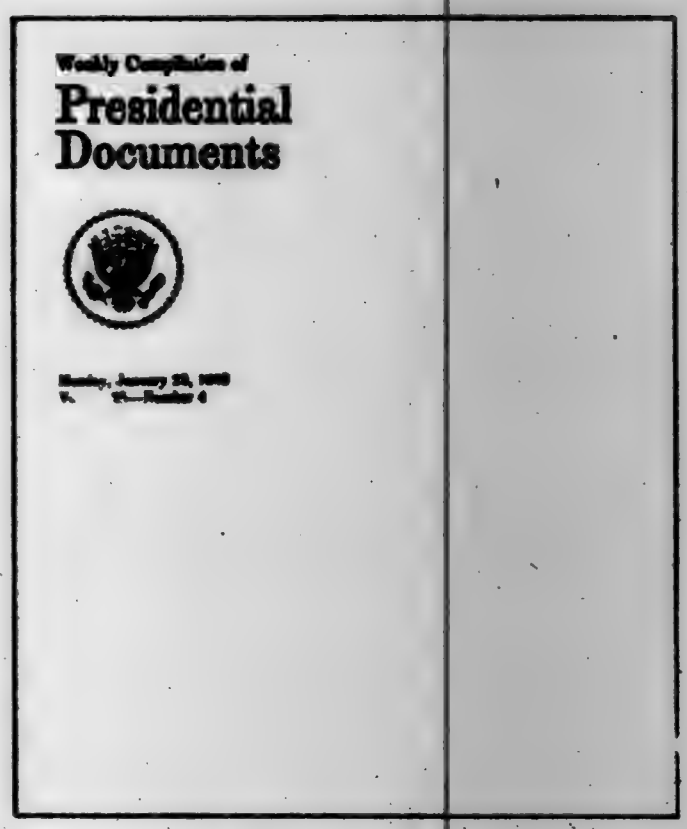
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the Federal Register shall be judicially noticed.

The Federal Register will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 55 FR 12345.

Title 3—

The President

Presidential Determination No. 91–3 of October 12, 1990

Determination of FY 1991 Refugee Admissions Numbers and Authorization of In-Country Refugee Status Pursuant to Sections 207 and 101 (a) (42), Respectively, of the Immigration and Nationality Act

Memorandum for the United States Coordinator for Refugee Affairs

In accordance with section 207 of the Immigration and Nationality Act ("the Act") (8 U.S.C. 1157), and after appropriate consultation with the Congress, I hereby make the following determinations and authorize the following actions:

a. The admission of up to 131,000 refugees to the United States during FY 1991 is justified by humanitarian concerns or is otherwise in the national interest; provided, however, that this number shall be understood as including persons admitted to the United States during FY 1991 with Federal refugee resettlement assistance under the Amerasian admissions program, as provided in paragraph (b) below.

Ten thousand of these admissions numbers shall be set aside for private sector admissions initiatives, and may be used for any region. The admission of refugees using these numbers shall be contingent upon the availability of private sector funding sufficient to cover the reasonable costs of such admissions.

b. The 131,000 admissions shall be allocated among refugees of special humanitarian concern to the United States as described in the documentation presented to the Congress during the consultations that preceded this determination and in accordance with the following regional allocations; provided, however, that the number allocated to the East Asia region shall include the number of persons admitted to the United States during FY 1991 with Federal refugee resettlement assistance under section 584 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act of 1988, as contained in section 101(e) of Public Law 100–202 (Amerasians and their family members):

Africa	6,000
East Asia	32,000
Soviet Union	50,000
Eastern Europe	5,000
Near East/South Asia	9,000
Latin America/Caribbean	3,100
Not Designated	10,000*

* Funded by the private sector.

Utilization of the 121,000 federally funded admissions numbers shall be limited by such public and private funds as shall be available to the Department of State and the Department of Health and Human Services for refugee and Amerasian admissions in FY 1991. You are hereby authorized and directed to so advise the judiciary committees of the Congress.

Unused admissions numbers allocated to a particular region within the 121,000 federally funded ceiling may be transferred to one or more other regions if there is an overriding need for greater numbers for the region or regions to which the numbers are being transferred. You are hereby authorized and directed to consult with the judiciary committees of the Congress prior to any such reallocation.

The 10,000 privately funded admissions not designated for any country or region may be used for refugees of special humanitarian concern to the United States in any region of the world at any time during the fiscal year. You are hereby authorized and directed to notify the judiciary committees of the Congress in advance of the intended use of these numbers.

An additional 5,000 refugee admissions numbers shall be made available during FY 1991 for the adjustment to permanent resident status under section 209(b) of the Act (8 U.S.C. 1159[b]) of aliens who have been granted asylum in the United States under section 208 of the Act (8 U.S.C. 1158), as this is justified by humanitarian concerns or is otherwise in the national interest.

In accordance with section 101(a)(42) of the Act (8 U.S.C. 1101(a)(42)), I also specify, after appropriate consultation with the Congress, that the following persons may, if otherwise qualified, be considered refugees for the purpose of admission to the United States while still within their countries of nationality or habitual residence:

a. Persons in Vietnam and Laos who have past or present ties to the United States or who have been or currently are in reeducation camps in Vietnam or seminar camps in Laos, and their accompanying family members.

b. Present and former political prisoners, persons in imminent danger of loss of life, and other persons of compelling concern to the United States in countries of Latin America and the Caribbean, and their accompanying family members.

c. Persons in Cuba who are (1) in immediate danger of loss of life and for whom there appears to be no alternative to resettlement in the United States, or (2) are of compelling concern to the United States, such as former or present political prisoners, dissidents, or human rights and religious activists, or (3) were employed by the United States Government for at least 1 year prior to the claim for refugee status; and their accompanying family members.

d. Persons in the Soviet Union and Romania.

You are hereby authorized and directed to report this determination to the Congress immediately and to arrange for its publication in the Federal Register.

Rules and Regulations

Federal Register
Vol. 55, No. 201
Wednesday, October 17, 1990

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 90-199]

Imported Fire Ant Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: We are affirming without change an interim rule that amended the imported fire ant quarantine and regulations by designating all or portions of the following as generally infested areas: Five counties in Alabama, four counties in Arkansas, four counties in Mississippi, four counties in South Carolina, three counties in Tennessee, and seven counties in Texas. The action expanded the regulated areas and imposed certain restrictions on the interstate movement of regulated articles. The action was necessary to prevent the artificial spread of the imported fire ant.

EFFECTIVE DATE: November 16, 1990.

FOR FURTHER INFORMATION CONTACT: Milton C. Holmes, Senior Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, room 642, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8247.

SUPPLEMENTARY INFORMATION:

Background

In an interim rule published in the Federal Register and effective on July 12, 1990 (55 FR 28596-28598, Docket No. 90-101), we amended the imported Fire Ant regulations in 7 CFR 301.81-2a by designating all or portions of the following counties as generally infested areas: De Kalb, Jackson, Lauderdale, Limestone, and Madison Counties in Alabama; Desha, Grant, Jefferson, and Lincoln Counties in Arkansas; Bolivar, Leflore, Sunflower, and Tallahatchie Counties in Mississippi; Chester, Greenwood, McCormick, and Newberry Counties in South Carolina; Hardin, Hardeman, and McNairy Counties in Tennessee; and Edwards, Hamilton, Kimble, McMullen, Midland, Real, and Uvalde Counties in Texas.

Comments on the interim rule were required to be received on or before September 10, 1990. We received one comment from a State Department of Agriculture. The commenter supported the interim rule as necessary to protect against introduction of the imported fire ant. The facts in the interim rule still provide a basis for the rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

This action affects the interstate movement of regulated articles from specified areas in Alabama, Arkansas, Mississippi, South Carolina, Tennessee, and Texas. Thousands of small entities move these articles interstate from these States, and many more thousands of small entities move these articles interstate from other States.

However, based on information compiled by the Department, we have determined that approximately 136 small entities within the newly regulated areas move articles interstate from the specified areas in those States. Further, the overall economic impact from this action is estimated to be approximately $14,000.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The regulations in this subpart contain no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 7 CFR Part 301

Agricultural commodities, Imported fire ant, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation.

PART 301—DOMESTIC QUARANTINE NOTICES

Accordingly, we are adopting as a final rule, without change, the interim rule amending 7 CFR 301.81-2a that was published at 55 FR 28596-28598 on July 12, 1990.

(Authority: 7 U.S.C. 150bb, 150dd, 150ee, 150ff, 161, 162, and 164-167; 7 CFR 2.17, 2.51, and 371.2(c).

Done in Washington, DC, this 11th day of October 1990.

Robert Melland,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 90-24369 Filed 10-16-90; 8:45 am]

BILLING CODE 3410-34-M

---

7 CFR Part 301

[Docket No. 90-198]

Mediterranean Fruit Fly; Removal From the Quarantined Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: We are amending the Mediterranean fruit fly regulations by removing portions of the quarantined area in Los Angeles County near Glendora, Pomona, and Valinda, from

the list of quarantined areas in California. We have determined that the Mediterranean fruit fly has been eradicated from the area and that the restrictions are no longer necessary. This action relieves unnecessary restrictions on the interstate movement of regulated articles from the area.

DATES: Interim rule effective October 12, 1990. Consideration will be given only to comments received on or before December 17, 1990.

ADDRESSES: To help ensure that your comments are considered, send an original and three copies to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 90-199. Comments received may be inspected at USDA, room 1141, South Building, 14th and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Milton C. Holmes, Senior Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, room 642, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8247.

SUPPLEMENTARY INFORMATION:

Background

The Mediterranean fruit fly, *Ceratitis capitata* (Wiedemann), is one of the world's most destructive pests of numerous fruits and vegetables, especially citrus fruits. The Mediterranean fruit fly (Medfly) can cause serious economic losses. Heavy infestations can cause complete loss of crops, and losses of 25 to 50 percent are not uncommon. The short life cycle of this pest permits the rapid development of serious outbreaks.

We established the Mediterranean fruit fly regulations and quarantined an area in Los Angeles County, California (7 CFR 301.78 *et seq.*; referred to below as the regulations), in a document effective August 23, 1989, and published in the Federal Register on August 29, 1989 (54 FR 35629-35635, Docket Number 89-146). We have published a series of interim rules amending these regulations by adding or removing certain portions of Los Angeles, Orange, San Bernardino, and Santa Clara Counties, California, from the list of quarantined areas. Amendments affecting California were made effective on September 14, October 11, November 17, and December 7, 1989; and on January 3, January 25, February 16, March 9, May 9, June 1, August 3, September 6, September 14, and September 21, 1990. (54 FR 36643-36645, Docket Number 89-169; 54 FR 42478-42480, Docket Number 89-182; 54 FR 48571-48572, Docket Number 89-202; 54 FR 51189-51191, Docket Number 89-206; 55 FR 712-715, Docket Number 89-212; 55 FR 3037-3039, Docket Number 89-227; 55 FR 6353-6355, Docket Number 90-014; 55 FR 9719-9721, Docket Number 90-031; 55 FR 19241-19243, Docket Number 90-050; 55 FR 22320-22323, Docket Number 90-061; 55 FR 32236-32238, Docket Number 90-151; 55 FR 37097-37098, Docket Number 90-175; 55 FR 38529-38530, Docket Number 90-178; and FR 39261-39262, Docket Number 90-182).

Based on insect trapping surveys by inspectors of California State and county agencies and by inspectors of the Animal and Plant Health Inspection Service (APHIS), we have determined that the Medfly has been eradicated from portions of the quarantined area in California in Los Angeles County, near Glendora, Pomona, and Valinda. The last finding of the Medfly was made on April 16, 1990, in the Glendora area; on April 18, 1990, in the Pomona area, and on April 25, 1990, in the area near Valinda. Since then, no evidence of infestations has been found in these areas. We have determined that the Medfly no longer exists in these areas. Therefore, we are removing these areas from the list of areas in § 301.78.3(c) quarantined because of the Mediterranean fruit fly. A description of the areas that remain quarantined is set forth in full in the rule portion of this document.

Emergency Action

James W. Glosser, Administrator of the Animal and Plant Health Inspection Service, has determined that an emergency situation exists that warrants publication of this interim rule without prior opportunity for public comment. The areas in California affected by this document were quarantined due to the possibility that the Mediterranean fruit fly could spread to noninfested areas of the United States. Since this situation no longer exists, and the continued quarantined status of these areas would impose unnecessary regulatory restrictions on the public, we have taken immediate action to remove restrictions from the noninfested areas.

Since prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest under these conditions, there is good cause under 5 U.S.C. 553 to make it effective upon signature. We will consider comments received within 60 days of publication of this interim rule in the Federal Register. After the comment period closes, we will publish another document in the Federal Register, including a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

This regulation affects the interstate movement of regulated articles from portions of Los Angeles County in California. Within the regulated area being removed there are approximately 695 entities that could be affected, including 60 nurseries, 219 fruit/produce vendors, 3 swap meets, 24 commercial growers, 1 farmers market, 237 yard maintenance services, 150 mobile vendors, and 1 dehydrator site.

The effect of this rule on these entities should be insignificant since most of these small entities handle regulated articles primarily for local intrastate movement, not interstate movement, and the distribution of these articles was not affected by the regulatory provisions we are removing.

Many of these entities also handle other items in addition to the previously regulated articles so that the effect, if any, on these entities is minimal. Further, the conditions in the Mediterranean fruit fly regulations and treatments in the Plant Protection and Quarantine Treatment Manual, incorporated by reference in the regulations, allowed interstate movement of most articles without significant added costs.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have

a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The regulations in this subpart contain no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation, Incorporated by reference, Mediterranean fruit fly.

Accordingly, 7 CFR part 301 is amended as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for 7 CFR part 301 continues to read as follows:

Authority: 7 U.S.C. 150bb, 150dd, 150ee, 150ff; 161, 162, and 164–167; 7 CFR 2.17, 2.51, and 371.2(c).

2. Section 301.75–3, paragraph (c), is revised to read as follows:

§ 301.75–3 Quarantined areas.

* * * * *

(c) The areas described below are designated as quarantined areas:

California

Los Angeles and Orange Counties

That portion of the counties in the San Gabriel Valley, Brea, Lakewood, and Los Angeles areas bounded by a line drawn as follows: Beginning at the intersection of Interstate Highway 210 and Interstate 605; then southerly along Interstate 605 to its intersection with State Highway 60; then easterly along this highway to its intersection with the Los Angeles-San Bernardino County line; then southerly and westerly along this county line to its intersection with the Los Angeles-Orange County line; then westerly along this line to its intersection with State Highway 57; then southerly along this highway to its intersection with Chapman Avenue; then westerly along this avenue to its intersection with Commonwealth Avenue; then southerly and westerly along this avenue to its intersection with Beach Boulevard; then southerly along this boulevard to its intersection with Lincoln Avenue; then westerly along this avenue to its intersection with Carson Street; then westerly along this street to its intersection with Lakewood Boulevard; then northerly along this boulevard to its intersection with Del Amo Boulevard; then westerly along this boulevard to its intersection with Downey Avenue; then northerly along this avenue to its intersection with Artesia Boulevard; then westerly along this boulevard to its intersection with Interstate Highway 710; then northerly along this highway to its intersection with State Highway 60; then westerly along this highway to its intersection with Soto Street; then northeasterly along this street to its intersection with Whittier Boulevard; then westerly along this boulevard to its intersection with 6th Street; then northwesterly along this street to its intersection with Broadway; then southwesterly along Broadway to its intersection with Interstate Highway 10; then westerly along this highway to its intersection with La Brea Avenue; then northerly along this avenue to its intersection with Hollywood Boulevard; then easterly along this boulevard to its intersection with Highland Avenue; then northerly along this avenue to its intersection with U.S. Highway 101; then northwesterly along this highway to its intersection with State Highway 134; then easterly along this highway to its intersection with Interstate Highway 210; then easterly along this highway to the point of beginning.

Done in Washington, DC, this 12th day of October 1990.

Robert Melland,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 90–24460 Filed 10–16–90; 8:45 am]

BILLING CODE 3410–34–M

---

7 CFR Part 301

[Docket No. 90–092]

Witchweed Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: We are amending the list of suppressive areas under the witchweed quarantine and regulations by adding and deleting areas in North Carolina and South Carolina. These changes affect 13 counties in North Carolina and 3 counties in South Carolina. These actions are necessary in order to impose certain restrictions on the interstate movement of regulated articles to prevent the artificial spread of witchweed and to delete unnecessary restrictions on the interstate movement of regulated articles.

DATES: Interim rule effective October 17, 1990. Consideration will be given only to comments received on or before December 17, 1990.

ADDRESSES: To help ensure that your comments are considered, send an original and three copies to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 90–092. Comments may be inspected at USDA, room 1141, South Building, 14th and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 pm., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas G. Flanigan, Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, room 646, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8247.

SUPPLEMENTARY INFORMATION:

Background

Witchweed is a parasitic plant that causes degeneration of corn, sorghum, and other grassy crops. It has been found in the United States only in parts of North Carolina and South Carolina.

The witchweed quarantine and regulations (contained in 7 CFR 301.80 *et seq.*, and referred to below as the regulations) quarantine the States of North Carolina and South Carolina and restrict the interstate movement of certain witchweed hosts from regulated areas in the quarantined States for the purpose of preventing the artificial spread of witchweed.

Regulated areas for witchweed are designated as either suppressive areas or generally infested areas. Restrictions are imposed on the interstate movement of regulated articles from both types of areas in order to prevent the artificial movement of witchweed into noninfested areas. However, the eradication of witchweed is undertaken as an objective only in areas designated as suppressive areas. Currently, there are no areas designated as generally infested areas.

Designation of Areas as Suppressive Areas

We are amending the list of suppressive areas by adding areas in Craven, Duplin, Greene, Lenoir, Pender, and Pitt Counties in North Carolina, and areas in Florence and Horry Counties in South Carolina to the list of suppressive areas in § 301.80–2a of the regulations.

The rule portion of this document lists the suppressive areas for each county. Nonfarm areas, if any, are listed first; farms are then listed alphabetically.

Removal of Areas from List of Regulated Areas

We are also amending the list of suppressive areas by removing areas in Columbus, Craven, Cumberland, Duplin, Greene, Harnett, Hoke, Lenoir, Pender,

Richmond, Sampson, and Wayne Counties in North Carolina, and areas in Florence, Horry, and Marlboro Counties in South Carolina from § 301.80-2a of the regulations. As a result of this action, there are no longer any regulated areas in Hoke and Richmond Counties, North Carolina or in Marlboro County, South Carolina.

We are taking this action because we have determined that witchweed no longer occurs in these areas and there is no longer a basis to continue listing these areas as suppressive areas for the purpose of preventing the artificial spread of witchweed. Therefore, we are removing these areas from the list of suppressive areas in order to remove unnecessary restrictions on the movement of articles designated as witchweed regulated articles.

Emergency Action

James W. Glosser, Administrator of the Animal and Plant Health Inspection Service, has determined that a situation exists that warrants publication of this interim rule without prior opportunity for public comment. Because of the possibility that witchweed could be spread artificially to noninfested areas of the United States, it is necessary to act immediately to control its spread. Also, where witchweed no longer occurs, immediate action is needed to delete unnecessary restrictions on the interstate movement of regulated articles.

Since prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest under these conditions, there is good cause under 5 U.S.C. 553 to make it effective upon publication in the Federal Register. We will consider comments received within 60 days of publication of this interim rule in the Federal Register. After the comment period closes, we will publish another document in the Federal Register, including a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an estimated annual effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

This action affects the interstate movement of regulated articles from specified areas in North Carolina and South Carolina. Based on information compiled by the Department, we have determined that approximately 281,000 small entities move these articles interstate from North Carolina and South Carolina. However, this action affects only 67 of these entities, by removing 50 entities from regulation and placing 9 new entities under regulation. We have determined that the 50 deregulated entities will realize combined annual savings of approximately $3,350, or an average of $67.00 each, in regulatory and control costs. We estimate that the 9 newly regulated entities will need to invest approximately $135 each, per year, in order to comply with our regulations.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This interim rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

The program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant pests, Plants (Agriculture), Quarantine, Transportation, Witchweed.

Accordingly, we are amending 7 CFR part 301 as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for part 301 continues to read as follows:

Authority: 7 U.S.C. 150bb, 150dd, 150ee, 150ff, 161, 162 and 164–167; 7 CFR 2.17, 2.51, and 371.2(c).

2. Section 301.80-2a is revised to read as follows:

§ 301.80-2a Regulated areas; suppressive areas.

The civil divisions and parts of civil divisions described below are designated as witchweed regulated areas within the meaning of this subpart.

North Carolina

(1) *Generally infested areas.* None.
(2) *Suppressive areas.*
Bladen County. The entire county.
Columbus County. The part of the county lying north and west of a line that begins at a point where State Highway 410 intersects the Bladen-Columbus County line, then south along this road to its junction with U.S. Highway 76, then west along U.S. Highway 76 to its junction with State Secondary Road 1356, then south along this road to its junction with the North Carolina-South Carolina border, where the line ends.

The Brown, Annie, farm located on the west side of State Highway 11 and 0.8 mile south of the junction of this road with State Highway 87.

The Harmon, Thelma, (formerly the Lloyd Spaulding farm) located in the southeast corner of the junction of State Secondary Roads 1736 and 1713.

The Jacobs, Thomas, farm located 0.2 mile north of State Secondary Road 1847 and 1 mile northeast of the junction of this road with State Secondary Road 1740.

The Walters, Eugene, farm located on the southeast side of a farm road 0.2 mile southeast of its intersection with State Highway 131 at a point opposite the junction of this highway with State Secondary Road 1530.

Craven County. The Chapman, Idel M., farm located on the west side of State Secondary Road 1459 and 0.1 mile north of the junction with State Secondary Road 1468 with this road and 0.2 mile off the west side of State Secondary Road 1459.

Cumberland County. That area bounded by a line beginning at a point where U.S. Highway 401 intersects the Cumberland-Hoke County line, then east along this highway to its intersection with the Fayetteville city limits, then south, east, and northeast along these city limits to its junction with U.S. Highway 301 north, then northeast along this highway to its junction with U.S. Interstate 95, then northeast along this interstate to its junction with U.S. Highway 13, then east and northeast along this highway to its intersection with the Cumberland-Sampson County line, then southerly along this county line to its junction with the Bladen-Cumberland County line, then westerly along this county line to its junction with the Cumberland-Robeson County line, then northwesterly along this county line to its junction with the Cumberland-Hoke County line, then northwesterly along this county line to the point of beginning.

The Contrell, C.T., farm located on the west side of State Secondary Road 1400 at its junction with State Secondary Road 1401.

The Elliott, W.H., farm located on the south side of State Secondary Road 1609 and 0.5 mile east of its junction with State Secondary Road 1710.

The Gerald, Rufus, farm located on the east side of State Secondary Road 1818 and 0.5 mile north of its intersection with U.S. Highway 13.

The Holiday, Waddell, farm located on the south side of State Secondary Road 3122 and its junction with State Secondary Road 1402.

The Jackson, J.T., farm located on the west side of State Secondary Road 1403 and 0.7 mile north of its junction with U.S. Highway 401.

The Lockamy, Earl, farm located on the west side of U.S. Highway 301 and 0.3 mile south of its junction with State Secondary Road 1802.

The Lovick, Eugene, farm located on the north side of State Secondary Road 1732 and 0.9 mile west of its junction with U.S. Highway 301.

The Matthews, Isiah, farm located on a private road off the east side of U.S. Highway 301 and 0.1 mile north of its junction with State Secondary Road 1722.

The McKeithan, Sarah E., farm located on the west side of U.S. Highway 301 and 0.3 mile north of its junction with State Secondary Road 1815.

The McLaurin, Burnice, farm located on the north side of State Secondary Road 1720 and 0.7 mile east of its intersection with State Secondary Road 1719.

The McLaurin, Elwood, farm located on the west side of U.S. Highway 301 and 0.2 mile north of its junction with State Secondary Road 1823.

The McLaurin, George, farm located on the north side of State Secondary Road 1722 and 0.4 mile west of its junction with U.S. Highway 301.

The McLaurin, Greg, farm located on the south side of State Secondary Road 1722 and 0.3 mile west of its junction with U.S. Highway 301.

The McLaurin, McLaurin, farm located on the north side of State Secondary Road 1722 and 0.5 mile west of its junction with U.S. Highway 301.

The McLaurin, Octavious, farm located on the north side of State Secondary Road 1722 and 0.51 mile west of its junction with U.S. Highway 301.

The McMillan, Vander, farm located on the west side of U.S. Highway 301 and 0.5 mile north of its junction with State Secondary Road 1722.

The Melvin, Edith, farm located on the east side of State Secondary Road 1800 and 1.7 miles north of its intersection with State Secondary Road 1815.

The Pruitt, K.D., farm located on the west side of U.S. Highway 13 and 0.6 mile north of its intersection with State Secondary Road 1818.

The Roberts, Christine Dawson, farm located on the south side of State Secondary Road 1714 and 0.5 mile west of its junction with State Secondary Road 1718.

The Shirman, Harry, farm located on the west side of State Secondary Road 1400 and 0.1 mile south of its junction with State Secondary Road 1401.

The Smith, Agnes, farm located on the south side of State Secondary Road 1720 and 0.7 mile east of its intersection with State Secondary Road 1719.

The Smith, Larry Don, farm located on a private road off the west side of U.S. Highway 301 and 0.2 mile south of its junction with State Secondary Road 1722.

The Underwood, Olive T., farm located on the east side of State Secondary Road 1723 and 0.8 mile south of its junction with State Secondary Road 1722.

The Valentine, Ike, farm located on the west side of State Secondary Road 1402 and 0.9 mile south of its junction with State Secondary Road 1400.

The Vann, W.E., farm located on the northwest side of State Secondary Road 1819 at its junction with State Secondary Road 1813.

Duplin County. The Grand, Pietro, farm located 0.2 mile southwest of the end of State Secondary Road 1951.

The Hamilton, John, farm located on both sides of State Secondary Road 1921 and 1.4 miles southeast of the junction of this road and State Secondary Road 1922.

The Holland, William, farm located on the west side of U.S. Highway 117 at the junction of State Secondary Road 1908.

The Lee, Daphne, farm located on the south side of State Highway 24 and 0.3 mile east of its intersection with State Secondary Road 1737.

The Lewis, Merle S., farm located on both sides of North Carolina Secondary Road 1808 and .25 miles east of its intersection with North Carolina State Road 1004.

The Miller, O'Berry, farm located on the north side of State Secondary Road 1700, and 0.1 mile east of its junction with State Highway 11.

The Phillips, Hubert, farm located on the east side of State Secondary Road 1375 and 0.7 mile northwest of its junction with State Highway 24.

The Thomas, J.R., farm located on the south side of State Secondary Road 1700 and 1.8 miles east of the intersection of this road and State Secondary Road 1701.

The Tyner, J.R., farm located on the south side of State Highway 24 and the east side of State Secondary Road 1737 at the intersection of this road.

Greene County. The Applewhite, Claudia, farm located on the west side of North Carolina State Road 1419 and 0.2 mile south of the junction of this road and North Carolina State Highway 903.

The Carmon, James E., farm located on the east side of State Secondary Road 1004 and 0.4 mile south of its junction with State Highway 903.

The Dun, Jo, Estate farm located 1 mile south of Maury on the northeast side of State Secondary Road 1441 and 0.5 mile west of its junction with State Secondary Road 1413.

The Dunn, Theodore S., farm located on the east side of North Carolina Secondary Road 1413 and in the northeast junction with this road and North Carolina Secondary Road 1417.

The Edwards, Joe E., farm located on the west side of State Secondary Road 1413 and 0.4 mile north of its junction with State Secondary Road 1403.

The Nethersett, Lawrence, farm located on the north side of State Secondary Road 1409 and 3 miles southeast of its junction with U.S. Highway 13.

The Warren, Francis, farm located on the west side of State Secondary Road 1418 and 0.3 mile north of its junction with State Secondary Road 1419.

Hornett County. The Dove, Ira, farm located on the southeast side of State Secondary Road 1105 and 0.7 mile southwest of its junction with State Highway 24/27.

The Farrel, David, farm located on the west side of State Secondary Road 1201 and 0.2 mile northwest of its junction with State Highway 27.

The Forthberry, Bennett, farm located on the south side of State Secondary Road 1141 and 0.4 mile east of the junction of this road with State Secondary Road 1139.

The Grey, Charlie, farm located on the west side of State Secondary Road 1111 and 0.8 mile south of its junction with State Highway 24.

The Hicks, Vashti, farm located on the south side of State Secondary Road 2039 and 0.4 mile west of its junction with State Secondary Road 2031.

The Hobbs, Marvin, farm located on the southwest side of State Secondary Road 2072 and 1 mile northwest of its junction with State Secondary Road 2033.

The Hobbs, R.C., farm located on the southwest side of State Secondary Road 2072 and 1.1 miles northwest of its junction with State Secondary Road 2033.

The McNeil, Raymond F., farm located on the east side of State Secondary Road 1201 and north of its junction with State Secondary Road 1202.

The Pennington, Albert J., farm located on the southwest side of State Secondary Road 1110 and 0.3 mile east of its junction with State Secondary Road 1108.

The Spaulding, James, farm located on the north side of State Secondary Road 1141 and 1.3 miles east of its junction with State Secondary Road 1139.

The Thomas, Floyd E., farm located on the northeast side of State Secondary Road 1148 and 0.2 mile north of its junction with State Secondary Road 1117.

The Walker, N.A., farm located on the east side of State Secondary Road 2042 and 0.9 mile southwest of its junction with State Secondary Road 2039.

Lenoir County. The Faulkner, Isabelle, farm located on both sides of State Secondary Road 1809 and 0.5 mile east of its junction with State Secondary Road 1720.

The Hill, Nannie T., farm located in the east junction of State Highway 55 and State Secondary Road 1161.

The Ivey, Lelland, farm located on the northeast side of North Carolina Secondary Road 1324 at its junction with North Carolina Secondary Road 1307.

The Pelletier, Roger, farm located on the northeast side of State Secondary Road 1318 and 0.3 mile northwest of its junction with State Secondary Road 1318.

The Taylor, Heber, No. 2, farm located on the south side of State Secondary Road 1161.

0.3 mile east of its junction with State Highway 55.

Pender County. The Anderson, Julius W., farm located on both sides of State Secondary Road 1135 and 0.9 mile northwest of its junction with State Secondary Road 1107.

The Barnhill, Frank, farm located on the south side of State Highway 210 and 0.1 mile of the junction of this highway and State Secondary Road 1120.

The Batson, Arthur, farm located on the east side of State Secondary Road 1411 and 1.5 miles east of its intersection with U.S. Highway 117.

The Burns, T.C., farm located 0.8 mile northeast of State Secondary Road 1104 and 1 mile northwest of the junction of this road and State Secondary Road 1107.

The Corbett Farming Co., farm located on a field road 1.7 miles east of U.S. Highway 117 and 0.3 mile south of its intersection with State Secondary Road 1411.

The Corbett, Robert L., farm located on both sides of State Highway 210 and 0.5 mile northwest of its junction with State Secondary Road 1120.

The Dees, Betty, farm located 0.6 mile east of State Secondary Road 1411 and 1.5 miles east of its intersection with U.S. Highway 117.

The Frizzel, F.P., farm located on the north side of State Secondary Road 1103 and 0.6 mile west of its junction with State Secondary Road 1133.

The Flynn, B.S., farm located on the north side of State Road 1108 at its junction with State Road 1107.

The Hardie, George, farm located on the north side of a field road 0.4 mile east of State Secondary Road 1104 and 0.2 mile northeast of its intersection with Lyon Canal.

The Henry, Mary E., farm located 0.1 mile south of State Secondary Road 1130 and 0.2 mile east of its intersection with the Pender-Bladen County line.

The Hicks, Carol, farm located on the south side of State Highway 210 and 0.8 mile east of its intersection with U.S. Highway 117.

The Kea, Nora, farm located 0.1 mile west of the west end of State Secondary Road 1138.

The Keith, F.R., farm located on both sides of State Secondary Road 1130 and 0.7 mile west of the junction of this road and State Highway 210.

The Keith, James R., farm located on 0.8 mile northeast of State Road 1104 and 1 mile northwest of its junction of this road with State Road 1107.

The Keith, Sprunt, farm located on the southwest side of State Secondary Road 1130 and at the Pender-Bladen County line.

The Lanier, Adonah, farm located on the southeast side of State Secondary Road 1411 and 1.4 miles east of its intersection with U.S. Highway 117.

The Larkins, C.E., farm located on the southwest side of State Secondary Road 1102 and 0.2 mile southeast with the Pender-Bladen County line.

The Larkins, Maggie, estate located on the northeast side of State Secondary Road 1102 and 0.2 mile southeast along this road to its intersection with the Pender-Bladen County line.

The Malloy, Pete, No. 1 farm located on both sides of State Highway 210 and the east side of State Secondary Road 1200.

The Malloy, Pete, No. 2 farm located on both sides of State Highway 210 and 1.3 miles east of the intersection of this highway and U.S. Highway 117.

The Manuel, George, farm located 0.1 mile south of State Highway 210 and 0.2 mile west of its junction with State Secondary Road 1103.

The Marshall, Crawford, farm located on the north side of State Secondary Road 1103 and 0.6 mile west of its junction with State Secondary Road 1133.

The Marshall, Milvin, farm located on the north side of State Secondary Road 1103 and 0.6 mile east of the southern junction of this road and State Secondary Road 1104.

The Nixon, Ross, farm located on both sides of State Highway 210 and on the west side of State Secondary Road 1599.

The Peterson, Grady, farm located on the north side of a field road 0.2 mile east of State Secondary Road 1104 and northeast of its intersection with Lyon Canal.

The Pridgen, Pete, farm located on the southwest side of State Secondary Road 1103 and 0.3 mile southeast of its junction with State Highway 210.

The Taylor, Bill, farm located on the west side of State Secondary Road 1104 and 2.0 miles south of the northernmost intersection of this road with State Secondary Road 1103.

The Terrell, Nancy, farm located on a field road 2.8 miles east of U.S. Highway 117 and 0.3 mile south of its intersection with State Secondary Road 1411.

The Williams, Leroy, farm located on the south side of State Secondary Road 1600 and at the south end of State Secondary Road 1599.

Pitt County. The Hodges, M.B., farm located 1.1 miles north of Grifton on the east side of State Secondary Road 1907 and 1.1 miles north of the injunction of U.S. Highway 118.

Robeson County. The entire county.

Sampson County. That area bounded by a line beginning at a point where State Secondary Road 1927 intersects the Sampson-Duplin County line, then southerly and easterly along this county line to its junction with the Sampson-Pender County line, then southwesterly along this county line to its junction with the Sampson-Bladen County line, then northwesterly along this county line to its junction with the Sampson-Cumberland County line, then northwesterly, north, and northeast along this county line to its junction with the Sampson-Harnett County line, then easterly along this county line to its junction with the Sampson-Johnston County line, then southeast along this county line to its intersection with State Highway 242, then south along this highway to its junction with U.S. Highway 421, then southeast along this highway to its intersection with U.S. Highway 13, then east along this highway to its junction with State Secondary Road 1945, then east along this road to its intersection with U.S. Highway 701, then south along this highway to its junction with State Highway 403, then east along this highway to its junction with State Secondary Road 1919, then east along this road to its intersection with State Secondary Road 1939, then southerly along this road to its junction with State Secondary Road 1934, then southerly along this road to its junction with State Secondary Road 1911, then southerly along this road to its junction with State Secondary Road 1927, then southerly along this road to the point of beginning.

The Hawley, William, farm located on the southwest side of State Secondary Road 1731 and 2.5 miles west of its intersection with State Secondary Road 1725.

The Jackson, Tony, farm located on the northwest side of the intersection of State Secondary Roads 1740 and 1742.

The Swain, Robert W., farm located on the northeast side of State Secondary Road 1740 and 1.0 mile northwest of its intersection with State Secondary Road 1742.

The Weeks, Glenn, farm located on the south side of State Secondary Road 1737 and 1.1 mile east of U.S. Highway 701.

Wayne County. The Broadhurst, Johnny Lee, farm located on the north side of State Secondary Road 1744, 1.2 miles northeast of the intersection of this road and State Secondary Road 1915.

The Daniels, Riley, farm located on the east side of State Secondary Road 1915, 0.1 mile south of the junction of this road and State Secondary Road 1120.

The Gautier, Rosa Mae, farm located on the east side of State Secondary Road 1915 and 0.8 mile south of the junction of this road and State Secondary Road 1914.

The Georgia-Pacific Corp., farm located on the north side of State Secondary Road 2010 at the junction of this road and State Secondary Road 1936.

The Greenfield, Charlie, farm located on both sides of State Secondary Road 1915 and 0.2 mile north of the junction of this road and State Secondary Road 1914.

The Greenfield, Mattie, farm located on the north side of State Secondary Road 1914, 0.9 mile east of the junction of this road and State Secondary Road 1915.

The Greenfield, William, No. 1, farm located 4 miles west of the Seven Springs on State Secondary Road 1744, 0.2 mile west of the junction of this road and State Secondary Road 1913.

The Haggin, Joe, No. 2, farm located on the east side of State Secondary Road 1931 and 1.1 miles northeast of its intersection with State Secondary Road 1120.

The Ham, Thedy, Estate, farm located on the west side of State Secondary Road 1913, 0.5 mile south of the junction of this road and State Highway 111.

The Humphrey, Josephine, farm located on the east side of State Secondary Road 1932 and 0.2 mile north of its intersection with State Secondary Road 1120.

The Lofton, Mary F., farm located on the south side of State Secondary Road 1745 and 0.1 mile west of its junction with State Secondary Road 1952.

The O'Quinn, Earl, farm located on the north side of State Secondary Road 1914, 0.4 mile east of the junction of this road and State Secondary Road 1915.

The Raynor, Early, No. 1, farm located on the south side of U.S. Highway 13 and 0.3

mile east of its junction with State Secondary Road 1207.

The Sasser, Johnny, farm located on the west side of State Secondary Road 1931 and 0.3 mile south of its junction with State Secondary Road 1930.

The Smith, Allen J., farm located on both sides of State Secondary Road 1963 and 0.8 mile north of State Highway 55.

The Wayne County Landfill property located on the southeast side of State Secondary Road 1728 and 0.5 mile northeast of its junction with State Highway 111.

South Carolina

(1) *Generally infested areas.* None.

(2) *Suppressive areas.*

Dillon County. The entire county.

Florence County. The Isgett, Otto, Estate farm located on the southeast side of State Secondary Road 24 and 1.4 mile east of the junction of this road and State Secondary Road 57.

The Munn, F.M., farm located on the southeast side of State Secondary Road 24 at the intersection with Jeffries Creed. This intersection being 1.6 mile northeast of the junction of State Secondary Road 24 and State Secondary Road 57.

Horry County. That area bounded by a line beginning at a point where State Secondary Highway 33 intersects the South Carolina-North Carolina State line and extending south along this highway to its intersection with State Secondary Highway 306, then west along this highway to its intersection with State Secondary Highway 142, then south along this highway to its junction with State Primary Highway 9, then northwest along this highway to its intersection with State Secondary Highway 59, then southwest and south along this highway to its junction with State Primary Highway 917, then southwest along this highway to its intersection with State Secondary Highway 19, then south and southeast along Highway 19 to its intersection with U.S. Highway 701 at Allsbrook, then northeast along this highway to its intersection with State Primary Highway 9, then southeast and south along this highway to its intersection with the Waccamaw River, then northeast along this river to its intersection with the South Carolina-North Carolina State line, then southeast along this State line to its intersection with U.S. Highway 17, then southwest along this highway to its junction with State Primary Highway 90, then west along this highway to its intersection with a dirt road known as Telephone Road, this intersection being 1.3 miles west of Wampee, then southwest and south along Telephone Road to its end, then northwest along a projected line for 1.9 miles to its junction with Jones Big Swamp, then northwest along this swamp to its junction with the Waccamaw River, then west along this river to its intersection with Stanley Creek, then north along this creek 1.8 miles, then northwest along this creek 2.8 miles, then north along a line projected from a point beginning at the end of the main run of this creek, and extending north to the junction of this line with State Primary Highway 905, then southwest along this highway to its junction with State Secondary Highway 19, then north along this highway 2.4 miles to its junction with a dirt road.

Then southwest along this road to its intersection with Maple Swamp, then north along this swamp to its intersection with State Secondary Highway 65, then southwest along this highway to its junction with U.S. Highway 701, then south along this highway to its intersection with U.S. Highway 501, then northwest along this highway to its intersection with State Secondary Highway 548, then west along this highway to its junction with a dirt road, then west along a dirt road to its junction with State Secondary Highway 78, then north along this highway to its junction with State Secondary Highway 301, then northeast along this highway to its junction with U.S. Highway 501, then southeast along this highway to its junction with State Secondary Highway 501, then north along this highway to its intersection with State Secondary Highway 97, then east 0.2 mile to its intersection with a dirt road, then north along this dirt road to its junction with State Primary Highway 319, then northwest along this highway to its junction with State Secondary Highway 131, then east and north along this highway to its intersection with Loosing Swamp, then west and northwest along this swamp to its intersection with State Secondary Highway 45, then southwest along this highway to its junction with State Secondary Highway 129, then northwest along this highway to its junction with U.S. Highway 501, then northwest along the latter highway to its intersection with Little Pee Dee River, then northwest along this river to its junction with the Lumber River, then northeast along this river to its intersection with the South Carolina-North Carolina State line, then southeast along this State line to the point of beginning, excluding the area within the corporate limits of the towns of Conway and Loris.

The Alford, Alex, farm located on the south side of a dirt road and being 2 miles southwest and west of the junction of this dirt road and State Secondary Highway 99, this junction being 1.75 miles north of the junction of this highway and State Secondary Highway 97.

The Cooper, Thomas B., farm located northeast of a dirt road and 0.75 mile northwest of the intersection of this dirt road with rural paved road No. 108, this intersection being 2.25 miles northeast of the junction of rural paved road No. 109 with rural paved road No. 78.

The Cox, Nancy T., farm located on the northwest corner of the intersection of two dirt roads. This intersection being 0.8 mile northeast of the junction of State Secondary Road 105 and State Secondary Road 377. One of the dirt roads is an extension of State Secondary Road 105.

The Cox, Velma, farm located on the west side of a dirt road and 1.0 mile northwest of junction of this dirt road and State Primary Highway 90. This junction being 3.2 miles south of junction of State Primary Highway 90 and State Secondary Road 31.

The Harden, John, farm located on the northwest side of a dirt road and 0.4 mile northeast of junction of this dirt road with the junction of State Secondary Roads 105 and 377.

The Holmes, Marie T., farm located on the west side of dirt road and 0.7 mile northwest of this dirt road with its junction with State Primary Highway 90. This junction being 3.2 miles south of junction of State Primary Highway 90 and State Secondary Road 31.

The Livingston, W.S., farm located on the south side of a dirt road and 0.8 mile east of its junction with a second dirt road, this junction being 0.5 mile south of the junction of the second dirt road and State Primary Highway 90, this junction being 0.8 mile south of junction of State Primary Highway 90 and State Secondary Road 31.

The Martin, Denisle E., farm located on the east side of State Primary Highway 90 and 0.9 mile northeast of the junction of this highway and State Secondary Highway 377.

The Vaugh, Ruth, farm located on the east side of a dirt road and 0.7 mile northwest of this dirt road and its junction with State Primary Highway 90. This junction being 3.2 miles south of junction of this State Primary Highway 90 and State Secondary Road 31.

Marion County. The entire county.

Done in Washington, DC, this 11th day of October, 1990.

Robert Melland,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Parts 103 and 214

[Order No. 1447-90]

Withdrawal of Approval for School or School System To Enroll Foreign Students

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule revises the procedures and authority to withdraw approval for a school to enroll foreign students. It corrects an existing procedure where an initial hearing is conducted outside the Immigration and Naturalization Service (Service) but an appeal is taken within the Service. Under the revised rule, a district director within the Service has authority to withdraw school approval, and that decision may be appealed to the Associate Commissioner, Examinations.

EFFECTIVE DATE: October 17, 1990.

FOR FURTHER INFORMATION CONTACT: Joanna London, Senior Trial Attorney, Immigration and Naturalization Service, 425 I Street NW., Washington, DC 20536. Telephone: (202) 514-2395.

SUPPLEMENTARY INFORMATION: On November 5, 1986, the Immigration and Naturalization Service (Service) published a notice of proposed rulemaking in the Federal Register (51 FR 40207). The Service received four comments in response. The commenters uniformly opposed the proposal to have the district directors of the Service make the initial determination to withdraw school approval, with an appeal to the Associate Commissioner, Examinations, although they agreed that the present procedure is anomalous and should be changed. Two commenters urged that, instead of the procedure proposed, the present hearing before an immigration judge be retained, with the appeal going to the Board of Immigration Appeals. Having considered these comments, the Service nevertheless has decided that a decision by a district director with a right to appeal to the Associate Commissioner, Examinations, satisfies the due process of law requirement in these cases.

Two commenters also urged the Service to withdraw the proposal and wait until discussions are completed with the National Association of Foreign Student Affairs on a more comprehensive revision of the regulations regarding sanctions against noncomplying schools. However, the Service believes that the anomaly in the present procedure needs to be corrected as soon as possible. Any further revision can be made at a future time. After due consideration of all the comments received, the Department has determined to publish the final rule using virtually the same language as the proposed rule.

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that this rule will not have a significant adverse impact on a substantial number of small entities.

This rule contains collection requirements; however, they are exempt from the Paperwork Reduction Act requirements in accordance with 5 CFR 1320.3(c)

This is not a major rule as defined in section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federalism Assessment in accordance with E.O. 12612.

Administrative practice and procedure, Authority delegations (Government agencies), Freedom of information, Immigration, Privacy, Reporting and recordkeeping requirements, Surety bonds.

8 CFR Part 214

Administrative practice and procedure, Aliens, Employment, Foreign officials, Health professions, Immigration, Reporting and recordkeeping requirements, Schools, Students.

For the reasons set out in the preamble, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. The authority citation for part 103 continues to read as follows:

Authority: 5 U.S.C. 552, 552a; 8 U.S.C. 1101, 1103, 1201, 1304; 31 U.S.C. 9701; E.O. 12356, 47 FR 14874, 15557; 3 CFR, 1982 Comp., p. 166; 8 CFR part 2.

2. In § 103.1, paragraph (f)(2)(ix) is revised to read as follows:

§ 103.1 Delegations of authority.

* * * * *

(f) * * *

(2) * * *

(ix) Decisions of district directors regarding withdrawal of approval of schools for attendance by foreign students under § 214.4 of this chapter.

* * * * *

PART 214—NONIMMIGRANT CLASSES

3. The authority citation for part 214 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1184, 1186a, 1187, and 8 CFR part 2.

4. In § 214.4, paragraphs (b) through (h) are revised to read as follows:

§ 214.4 Withdrawal of school approval.

* * * * *

(b) *Notice.* Whenever a district director has reason to believe that an approved school or school system in his/her district is no longer entitled to approval, a proceeding shall be commenced by service upon its designated official a notice of intention to withdraw the approval. The notice shall inform the designated official of the school or school system of the grounds upon which it is intended to withdraw its approval. The notice shall also inform the school or school system that it may, within 30 days of the date of service of the notice, submit written representations under oath supported by documentary evidence setting forth reasons why the approval should not be withdrawn and that the school or school system may, at the time of filing the answer, request in writing an interview before the district director in support of the written answer.

(c) *Assistance of counsel.* The school or school system shall also be informed in the notice of intent to withdraw approval that it may be assisted or represented by counsel of its choice qualified under part 292 of this chapter, at no expense to the Government, in preparation of its answer or in connection with the interview.

(d) *Allegations admitted or no answer filed.* If the school or school system admits all of the allegations in the notice of intent to withdraw approval, or if the school or school system fails to file an answer within the 30-day period, the district director shall withdraw the approval previously granted and he/she shall notify the designated school official of the decision. No appeal shall lie from the district director's decision if all allegations are admitted or no answer is filed within the 30-day period.
